Plague Report of the plague hospital at Hospet Bellary District.

Date 5. 10-99, *No.* 34

1. Name of town or village.— Hospet

2. Population of town or village.— 12878

3. Plague cases up to date of last report. Number of seizures.— . Number of deaths.— . Date of last report.—

4. Date of present attack.— 4-10-99

5. When reported by telegram ?— 4-10-99

6. Imported or indigenous ?— Imported

7. Brief history of case.— A Hindu girl from Hubli was detained on the 3rd morning at 2 Am. She was noticed at the morning inspection to have slight rise of temperature & in the same evening she had a temperature a little higher than in the morning. She was kept under observation. She had on 4th morning normal temperature and in 4th evening high temperature and slight tenderness and swelling of ~~right~~ cervical gland

8. If imported, had patient a passport ?— Imported. No passport

9. Steps taken to isolate and treat the patient.— Removed without delay to the plague hospital and treated there

10. Steps taken towards the segregation of contacts.—
The two contacts insisted on following the patient to the plague camp (a woman (sister in law of the patient) and her child)

Nil

11. Steps taken towards the evacuation and disinfection of the infected house.—
Evacuation and disinfection of the room in the segregation camp occupied by the patient were carried out—

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?—
Nil

13. Remarks.— A genuine imported case of plague

Plague Report North Arcot District.

Date 1st October 99 No. 3219 P of 99

1. Name of town or village.— Patrapalli Road Frontier Inspection Station.

2. Population of town or village.—

3. Plague cases up to date of last report.
Number of seizures.— One (imported)
Number of deaths.— One
Date of last report.— 20th April 99

4. Date of present attack.— 29th September 99

5. When reported by telegram?— 1st October — Information reached by Tappal only this day.

6. Imported or indigenous?— Imported

7. Brief history of case.— Three Mussalmans excluding the driver came in a jutka from Bowringpet on their way to Pallikonda in Vellore Taluk. One of them Abdul Kasim by name was found to be unwell and was detained at the Frontier Station on the morning of the 29th. He was examined with the result that he was suffering from fever. The rest were all right. In the evening of the same day Abdul Kasim developed plague symptoms with the characteristic bubo in the groin. He was delirious and unconscious

8. If imported, had patient a passport?— Patient was detained at the Frontier Station

9. Steps taken to isolate and treat the patient.—
The patient is in the plague shed at Patrapalli and is being attended by the Medical officer in charge of the station.

10. Steps taken towards the segregation of contacts.—
The two contacts insisted on following the patient to the plague camp (a woman (sister in law of the patient) and her child)

11. Steps taken towards the evacuation and disinfection of the infected house.—
Evacuation and disinfection of the room in the segregation camp occupied by the patient were carried out

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?—
Nil

(To be submitted within 48 hours under Plague Commissioner's Proceedings No. 145, dated 5th December 1898.)

~~Plague Commissioner's Office.~~

CURRENT No. 2985 7/10

Date of Receipt.

Plague Report North Arcot District.

Date 1st October 99 No. 3219/P of 99

1. Name of town or village.— Patrapalli Road Frontier Inspection Station.

2. Population of town or village.—

3. Plague cases up to date of last report.
- Number of seizures.— One (imported)
- Number of deaths.— One
- Date of last report.— 20th April 99

4. Date of present attack.— 29th September 99

5. When reported by telegram?— 1st October — Information reached by Tappal only this day.

6. Imported or indigenous?— Imported

7. Brief history of case.— Three Mussalmans excluding the driver came in a jutka from Bowringpet on their way to Pallikonda in Vellore Taluk. One of them Abdul Kasim by name was found to be unwell and was detained at the Frontier Station on the morning of the 29th. He was examined with the result that he was suffering from fever. The rest were all right. In the evening of the same day Abdul Kasim developed plague symptoms with the characteristic bubo in the groin. He was delirious and unconscious

8. If imported, had patient a passport?— Patient was detained at the Frontier Station

9. Steps taken to isolate and treat the patient.—
The patient is in the plague shed at Patrapalli and is being attended by the Medical officer in charge of the station.

10. Steps taken towards the segregation of contacts.— The contacts are said to have been disinfected. The Deputy Tahsildar of Venkatagirikota has not yet reported the steps taken by him to segregate the contacts and to disinfect the jutka in which they travelled. His further report is awaited.

11. Steps taken towards the evacuation and disinfection of the infected house.—

Nil

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?—

Nil.

13. Remarks.— A complete report is not yet to hand. It would appear that Abdul Karim was a cook under some rice merchants and was living in Bowringpet for the last two or three months. One of the rice merchants whom the plague patient was accompanying to Pallikonda, Vellore Taluk says that no case of plague or suspected plague occurred in his house. The patient is said to have been allright on the 27th of September. That day he is said to have proceeded to Pichupalli market to buy some curry stuff, and on his return home to have complained of headache and pains in the stomach and legs. The merchants then thought of taking him to his native place, Pallikonda, and it was on their way they were detained at Patnapalli Station. The Deputy Tahsildar has been asked to report at once the steps taken by him to segregate the contacts including the driver and to disinfect the jutka.

Plague Report Salem District.

Date 1st October 99, No. 1

1. Name of town or village.— Chinnamenagram near Kumarnapalli

2. Population of town or village.— 56

3. Plague cases up to date of last report
   - Number of seizures.— nil
   - Number of deaths.— nil
   - Date of last report.— nil

4. Date of present attack.— 30th September 99

5. When reported by telegram?— 30th " September 99

6. Imported or indigenous?— Indigenous

7. Brief history of case.— Muniammal atammal an old woman of about 50, was found by me yesterday with fever temperature 104.6 & unconscious; She had no buboes that I could perceive. She had (it was said) never been outside the village & no dead rats were found in her house — but dead rats were found in another house in village two days ago on advice everyone removed to the fields —

8. If imported, had patient a passport?— No.

9. Steps taken to isolate and treat the patient.— Kept in a field shed outside village, tried to get her removed to Gumalapuram or Kumarnapalli Frontier Station but her husband would not let her ~~removed~~ be moved

10. Steps taken towards the segregation of contacts.—One contact segregated in the usual way

11. Steps taken towards the evacuation and disinfection of the infected house.—House evacuated two days ago and is about to be disinfected as well as other houses in village

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— None

13. Remarks.— An outbreak of plague was anticipated in this village, after appearance of dead rats in it & we anticipate more cases — it is only a mile from Kempatti where three cases & two deaths have already occurred —

10/10/99

10/10/99

Plague Report Salem District.

Date 3rd October 99, No. 1

1. Name of town or village.—Naundi (near Hosur)

2. Population of town or village.—121

3. Plague cases up to date of last report	Number of seizures.—	Nil
	Number of deaths.—	Nil
	Date of last report.—	Nil

4. Date of present attack.—1st October 99

5. When reported by telegram?—3rd October

6. Imported or indigenous?— Indigenous

7. Brief history of case.— There is absolutely no clue to trace outbreak at present, something may transpire in time. A boy Munigan aged 10 "Rafin" was taken ill with fever on 1st instant and died on 2nd. was reported to me, but as no plague symptoms on body it was not wired yesterday pending further development.

8. If imported, had patient a passport?— No

9. Steps taken to isolate and treat the patient.— Isolated outside village - Nursed by relatives

10. Steps taken towards the segregation of contacts.— The usual steps taken in fields

11. Steps taken towards the evacuation and disinfection of the infected house.— House evacuated and will be disinfected. Shortly the whole village was evacuated.

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— No

13. Remarks.— I went to the village today and found three fresh cases, two of them were children and one old woman, the latter and one child were related to each other, but none of these three were related to the first case. All three had furred tongues and fever but none of them had any glands except the old woman who was tender on the left groins. One child had head ache and the other had a circulatory motion. There have been therefore four cases and one death in this village up to date.

3. Plague cases up to date of last report
   - Number of seizures.— Nil
   - Number of deaths.— Nil
   - Date of last report.— Nil

4. Date of present attack.— 1st October (found) 2nd

5. When reported by telegram?— 3rd October

6. Imported or indigenous?— Indigenous (as far as is known)

7. Brief history of case.— Runga — 25 Balji Caste was reported to be ill last night, inspected by Circle Inspector this morning and fou to have a bubo in the right arm pit but as I had not time to see him I have had him observed till this morning. When I went there today he was dead.

8. If imported, had patient a passport?— No

9. Steps taken to isolate and treat the patient.— Found isolated in fields outside Jibi

10. Steps taken towards the segregation of contacts.— Contacts segregated in fields also

11. Steps taken towards the evacuation and disinfection of the infected house.— House evacuated will be disinfected today

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— None

shows that [illegible] man not always point to have plague

13. Remarks.— The Tasildar heard last night that there was a man ill at Jili and told Circle Inspector to go and see him; the latter heard this morning and found him in the fields.

It would appear that the patient has lands extending as far as Andivadi and is in the habit of going there to cultivate his fields — probably he got infected from there by mixing with villagers that is all that can be ascertained at present. I examined all contacts they were all well.

(Signed) T. T. French – Captn.
Special Plague Officer

Endorsement. No. $\frac{1682}{P}$

Submitted to Govt. in the Local and Municipal Department and the Sanitary Commissioner for Madras. Jili is an agricultural suburb of Hosur near Sub Collector's house. I will see that it is evacuated at once.

Recd 10-10-99

Plague Report Salem District.

Date 6th October 99, No.

1. Name of town or village.— Little Jili (Suburb of Hosur) chuckler village

2. Population of town or village.—

3. Plague cases up to date of last report
   - Number of seizures.— nil
   - Number of deaths.— nil
   - Date of last report.— nil

4. Date of present attack.— 4th October 99

5. When reported by telegram?— 5th October

6. Imported or indigenous?— Indigenous

7. Brief history of case.— A girl aged 10 got fever on evening of 4th and was removed outside village. I went to see her in field and found her with high fever and a bubo in left axilla. I cannot get any history of this case except that this girl is related to the last case reported from Kollur and in fact with all chucklers there. They lately had festivities both at Kollur and Jili and visited each others houses, & one probably was brought in an infection.

8. If imported, had patient a passport?—

9. Steps taken to isolate and treat the patient.— Isolated in fields and dooly just sent from Andivadi to remove her to our hospital there

10. Steps taken towards the segregation of contacts.— 5 contacts segregated in fields

11. Steps taken towards the evacuation and disinfection of the infected house.— House evacuated, will be disinfected shortly

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— None

13. Remarks.— The Village is not evacuated as the inhabitants are all Chucklers and very poor and have no land. They are willing to go into tents if we provide them, but they want permission to occupy a piece of land somewhere near the village orders might be issued to Tahsildar to apportion them some land for their purpose as it all belongs to other people.

Date of Receipt.

L&M 1690/PP – D 21 + 94

Plague Report Salem District.

Date 1st October 99, No.

1. Name of town or village.— Hosur

2. Population of town or village.— 5756

3. Plague cases up to date of last report		Imported	Indigenous
	Number of seizures.—	14	110
	Number of deaths.—	4	89
	Date of last report.—		

4. Date of present attacks— 29th September

5. When reported by telegram?— 1st October 99

6. Imported or indigenous?— Indigenous (infection imported)

7. Brief history of case.— A man named Irasiappan a syce employed in the Government horse breeding establishment near Sub-Collector's house was taken ill on 29th while at work in the Stables, left a substitute and went home to his house in Hosur and died there yesterday – body examined by Apothecary but no outward symptoms of plague – this was only found out by me today (1st October) when I happened to go and investigate a case next door (the 2nd case that occurred today) my reasons considering first case as plague will be seen in remarks.

8. If imported, had patient a passport?—

9. Steps taken to isolate and treat the patient.— No steps were taken as Apothecary said it was not plague and it was not reported to me at all.

10. Steps taken towards the segregation of contacts.— Contacts six in number now segregated by me in Hosur Sheds under a Police Guard.

11. Steps taken towards the evacuation and disinfection of the infected house.— House now evacuated and locked up; will be disinfected tomorrow.

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— None

13. Remarks.— I attribute the infection in this case to grain having been brought from Andiwadi stealthily during the night by a disinfection Cooly - (the deceased's brother). It has not actually been proved but I have a very strong suspicion that this is the case as this cooly was absent without leave on night of 11th September with 13 others from Andiwadi Camp and I fined them all for it and on 12th I hear now that there was a rumour in Hosur that grain had been stolen from Andiwadi. This house is also opposite the toddy shop where all disinfection Coolies gather together up to 8 P.M.

3. Plague cases up to date of last report	Number of seizures.—	Nil	7
	Number of deaths.—	Nil	7
	Date of last report.—	Nil	

4. Date of present attack.— 1st October 99

5. When reported by telegram?— 2nd October

6. Imported or indigenous?— Imported from Kottapalli (Mysore territory)

7. Brief history of case.— A girl Yellamma aged 15 Reddi caste was brought by her husband (a contact of the last case at that village) from Kottapalli. The C. I says that he knows for a fact she has never been [illegible] Kottur that the husband asked him a few days ago whether he could bring her. When she arrived the villagers would not admit her into the village but kept her out in a shed. She developed plague there on 1st and died this morning.

8. If imported, had patient a passport?— No. Came by foot path.

9. Steps taken to isolate and treat the patient.— Girl had fever when she arrived and was kept out in fields by villagers

(To be submitted within 48 hours under Plague Commissioner's Proceedings No. 845, dated 5th December 1898.)

Plague Commissioner's Office. 23/10

CURRENT No. 3139 / File

Date of Receipt. Recd 16/10/99

Plague Report Salem District.

Date 4th October 99 No.

1. Name of town or village.— Kottur

2. Population of town or village.— 203

3. Plague cases up to date of last report

		Imported	Indigenous
	Number of seizures.—	1	7
	Number of deaths.—	1	7
	Date of last report.—	3-10-99	

4. Date of present attack.— 3rd October

5. When reported by telegram?— 4th October

6. Imported or indigenous?— Indigenous

7. Brief history of case.— Munivenkati (a girl 7 years old) daughter of a Chukler was found by circle Inspector this morning dead in the fields. bubo on both sides of the neck. The father says that he went to andivadi to work about a week ago & got grain as remuneration

8. If imported, had patient a passport?— Infection imported — case indigenous

9. Steps taken to isolate and treat the patient.— Patient was taken to fields after death by father.

10. Steps taken towards the segregation of contacts.— Her husband ~~was~~ was the only contact segregated in fields

11. Steps taken towards the evacuation and disinfection of the infected house.— Shed in fields burnt

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— Nil

These two people are said never to have entered their houses in Kottur.

13. Remarks.— I went to see the body of the girl this morning and found a bubo in left groin. I have written to Amildar of Anekal to find out and let me know whether ~~that~~ the girl was ill at Kottapalli or whether there was any illness in her house there.

Her husband lost his father, mother and sister of plague not long ago in Kottur if you remember; it is very probable that he took some infected grain from Kottur to Kottapalli in Mysore which had escaped disinfection and thus the girl developed plague — it is a curious coincidence.
