List of plague infected
areas.

FOR ORDERS.

The list of plague infected
places was last revised in
G.O. No. 1418-P. of 25th September 99.
A statement is appended
showing the villages that have
reported plague cases since
the 16th September 1899, from
which it will be seen that
Maviranaipalli, Koor, Jibi
(Agricultural suburb of Koor)
and Navudi have had 2,
8, 4 & 6 indigenous attacks
respectively, and some of
these proved fatal. It is
submitted that these villages
may be declared infected. As
regards Settipalli and Kotha-
Kondapalli villages, the Secy
said (flag 0) that these villages
should

Should be retained in the list till another 15 days elapsed. The former village has reported no cases, the date of last indigenous attack being the 15th August 99, but the latter village reported one indigenous attack on the 19th Sept., one death on the 20th Sept., and one death on the 4th instant. It is submitted that Settipalli may now be excluded. The villages of Kumbatti, Chinnamenagaram, Kottur, and Paddamenagaram reported some indigenous cases, the no being two in each of the first three villages, and one in the last. (vide Statement.) These villages may be included in the list, if more cases are reported. The village of Minganapalli in the Hosur taluk has been free since the 10th September 99. Orders are solicited as to whether this village may be declared free.

2. As regards the places outside this Presidency no change seems to be called for.

I think you had better keep them in. Plague is almost certain to break out again in all these villages.
