II. Read G.O. no. 1206 of 18th August 1899,
disallowing the proposal of closing the Muhammedan
Burial Ground with certain remarks regarding the
question of sewage pool & wells in Sangadiguntur.
The matter has been exhaustively dealt with
in Resolution no. III dated 11.9.97. The Council
regrets that it is unable owing to want of funds
to sanction any additional improvements. Steps
will be taken to give effect to the said resolution.

Memorandum

The Dhobie tank which is condemned by the Sanitary Commissioner as very insanitary and which consequently has to be filled up is a tank which if repaired according to the suggestions of Mr. Khargat will be of immense use to all the people in the neighbour hood. I consulted all the inhabitants in this quarter of the town & they are all of opinion that the tank if filled up would put them to much inconvenience; but if properly repaired it will serve a very useful purpose. The chief repairs to be done are - (1) the tank sides should be ^{sloped} ~~stuffed~~, (2) the drainage water of the town should not be allowed to flow into it, (3) it should be connected with the Black tank so that it may be full when it gets its supply, & (4) the surroundings should be kept clean.

As it is, the tank is useless & somewhat deleterious to public health. There is no use in filling it up, and in deference to public feeling, it may be set right.

There is a Surveyor specially engaged now in taking levels with reference to the water supply scheme of this town, and he may be directed to take levels of this tank and of the lands surrounding it so that the necessary plans may be prepared.

The Works overseer may afterwards be asked to prepare an estimate for all the repairs on the plans given by the Surveyor. If the Council approve of this suggestion, the Asst Sanitary Engineer under whom the Surveyor is at present working will be requested to spare his services for

this special work inasmuch as it is closely connected with the water supply scheme of the town. I may, moreover inform the Council that the Surveyor has work for a fortnight or so, and after this he will be unemployed until the fields over which crops at present stand are quite free. Till then, he may usefully be employed on this special work.
