GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From the Resident in Mysore, to the Secretary to the Government of Madras, Local and Municipal Department, dated Bangalore, 24th July 1899, No. 3232—401-97.

In continuation of correspondence ending with your letter, No. 837 M., dated the 13th June 1899, regarding the proposal to enlarge the Vaccine Institute at Bangalore in order to enable it to supply the lanoline lymph required by several of the District Boards and Municipal Councils in the Madras Presidency, I have the honour to forward, for the information of the Government of Madras, a copy of the Proceedings of the Mysore Government, No. 348—50 M., dated the 5th instant, embodying their decision on the subject.

2. It will be seen that, on a reconsideration of all the circumstances, the Darbar have come to the conclusion that it is not advisable to sanction the proposed enlargement of the institute.

ENCLOSURE.

Proceedings of the Government of Mysore.

Read—Correspondence ending with letter, No. 210, dated the 8th May 1899, from the Senior Surgeon and Sanitary Commissioner, submitting certain proposals *in re* the enlargement of the Vaccine Institute at Bangalore in order to enable it to supply the lanoline lymph required by the several District Boards and Municipal Councils in the Madras Presidency enumerated in the Proceedings of the Government of Madras, No. 58 L., dated the 12th January 1899.

Order thereon—No. 348—50 M., dated Bangalore, 5th July 1899.

In the Proceedings of the Madras Government, No. 1905 L., dated 5th October 1897, communicated to this office with the First Assistant Resident's letter, No. 4678, dated 5th November 1897, that Government approved the proposal of the Sanitary Commissioner, Madras, to authorise all Local Boards, including Municipal Councils in the Presidency, to obtain their supply of lymph from the Mysore Government Vaccine Institute at Bangalore. As, however, the question was an important one involving a heavy initial outlay in enlarging the scope of the vaccine institute and the subsequent annual cost of maintaining it in a condition of efficiency, some further definite information was requested by the Darbar and this has been furnished in the Proceedings of the Government of Madras, No. 58 L., dated the 12th January 1899, received with the First Assistant Resident's letter, No. 357, dated 26th idem, from which it would appear that certain District Boards and Municipal Councils "agree to obtain their supplies of lymph from Bangalore for a period of five years, subject, however, to the condition in many cases, that the lymph supplied by the Mysore Government is of good quality and is readily made available."

2. The Government having carefully considered the question, regret their inability to sanction the enlargement of the vaccine institute in the manner proposed, nor do they consider it desirable for the Government to enter into contracts of the kind described with any of the District Boards or Municipal Councils in the Madras Presidency.

3. The Government accordingly resolve that the Bangalore Vaccine Institute should continue to be maintained within the present sanctioned scale of expenditure, and any surplus lymph out of the quantity manufactured by the institute, which may remain after meeting all requirements within the State, may continue to be sold to applicants from outside the State. The Senior Surgeon will accordingly be requested to issue strict instructions to ensure the institute being worked within the limits of the present sanctioned scale.
