NOTE FOR THE

Plague Comm.
A copy has not yet been sent to the Collector of Godavari. The Progs does not modify any previous order but merely removes a doubt of the Sanitary Comm. as the Govt had called for remarks on the copy of the S.C.'s letter, it was thought best to await the orders of Government before communicating the papers to the Collector.

READ— Letter from the Sanitary Commissioner for

Madras dated 5th January 1899 No. 230/S offering his opinion on the Godavari observation scheme.

Order No. 45 dated 10th February 1899.

It was not intended that an observation scheme should be introduced only after indigenous plague has appeared in a place. It will be introduced immediately a district is found to be imminently threatened with plague - vide Additional Madras Regulation 1. As regards the Godavari District, Mr. Hammick thought an observation scheme could not well be worked in Badrichallam and Relapalli taluks and that so far as this tract was concerned, observation circles for 20 miles round an infected place under Additional Madras Regulation 22 would suffice.

SIR,

With reference to your Pro-
ceedings No ¹²⁶/₁₀ dated 17 January
1899, I have the honor to state
whilst refraining from offering
my opinion as to the details of the
scheme, that in my opinion
the principle adopted of de-
liberately waiting until "in-
digenous plague" has declared
itself within an area before
"observation circles" are establish-
ed is sanitarily unsound,
and is directly opposed to the
spirit of the Additional Regu-
lations throughout which it
is obvious that the great im-
portance of obtaining early
recognition of imported
plague cases is fully under-
stood, with the object of —
preventing

preventing the misfortune of
plague becoming indigenous
