SIR,

With reference to your letter No. Ref on C.1083 dated 25th January 99, I have the honor to forward herewith a list of Temporary Plague Doctors obtained from England up to date showing the appointments now held by them respectively.

2. The engagement of the first 7 has already terminated and Government is in Communication with them for a fresh engagement. Until their final replies are received, it is impossible to say definitely how many of them will reengage but it is expected that a majority of them will.

Note for Public Department.

I enclose a list received from Surgeon-General showing the men now in service and the posts they hold. Drs. Page and Lubeck have just been appointed to Kuppam and Arcot; this leaves only Dr. Hanna without a definite appointment.

If it is wise to prophesy at all about plague it may be said that April and May should see it die down, but a recrudescence is to be expected in the Deccan in June or July and in the places 2 or 3 months later.--and we shall probably have a worse time next year than we are having now. Of the first 17, it is probable that at least half a dozen will refuse to renew their engagements, so that by August next we shall be six hands shorter than we are now. It may be that things will get very much worse before April but there is no time to strengthen our staff before then. I think the Secretary of State should be asked to have ten men ready to be in Madras by June 15th if wanted. Some men may be wanted, to supply vacancies caused by sickness & leave. Surgeon-General has called for definite statements as to willingness to renew.
