G.O.	No.	Department.	Date.

FURTHER PAPERS.

G.O.	No.	Department.	Date.

Weekly Report of Plague in the Civil and Military Station, Bangalore, for week ending 10th March 1899.

The following are the plague figures for the week compared with those of the preceding three weeks :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal recorded mortality for same period.
From 28th Sept. to 10th Feb.	3,981	3,271	6,114	719
Week ending 17th February ...	10	10	52	41
" 24th " ...	6	6	62	41
" 3rd March ...	9	9	64	44
" 10th " ...	11	6	50	49

There was thus a further slight increase in the number of cases. Six of these cases, however, were undoubtedly imported ; two from Kolar, one from Poona, one from Vaniambadi in the Madras Presidency, and two from surrounding villages. They were all detected in an early stage : but the fact that infection can be introduced from so many different directions must cause the greatest anxiety. The five local cases occurred in five different circles, one of which had been free for several weeks. The mortality from other causes decreased and the general health of the town is good.

2. The cases during the week were distributed as follows :—

Mahomedans ... 3. Hindus ... 4. Native Christian ... 1. Pariahs ... 3.

3. The figures for the segregation camp were :—

	Remaining.	Admitted.	Developed plague.	Died from other causes.	Discharged.	Remaining.
North Camp ...	16	39	...	1	10	44

4. During the week 175 first and 1 second inoculations were performed, bringing the totals to 30,471 first and 964 second inoculations, in addition to those performed by the Medical Officers of the Military population. Two inoculated persons were attacked during the week.

5. The number of houses disinfected during the week was twelve, and Rs. 96 were paid in compensation. The five houses in which indigenous cases occurred had all been cleaned during the systematic disinfection, at periods varying from 62 to 32 days before the fresh cases occurred. There was no instance during the week of a case occurring in a house in which there had been a previous seizure.

6. The Hospital figures were as follows :—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
North Camp.					
For the week	8	8	3	3	10
Since commencement		948	339	599	10
Inoculates		88	58	24	6
South Camp.					
Since commencement		768	306	462	...
Inoculates		41	29	12	...
Military Population.					
For the week		...	...	...	...
Since commencement		195	53	139	3
Inoculates		123	40	82	1

7. During the week, Capt. Leumann, I. M. S., left for Natal, and Lieut. Stevenson, I. M. S., for Mauritius, for plague.

The number of Medical Officers remaining on plague duty has thus been reduced to three, the number originally contemplated to be kept on, after the end of the epidemic.

As passes have still to be given to all persons desiring to leave the Station, and all arrivals have to be inspected for ten days, in addition to all sick cases being required to be reported, the Medical Officers are very fully occupied.

P. R. CADELL,
Assistant to the Resident
in Mysore.

6978999

Residency, Press, Bangalore.—14-3-99.—80.

Weekly Report of Plague in the Mysore State, excluding the Civil and Military Station, for the Week ending 10th March 1899.

Bangalore City.

I. The following are the figures in the City up to date:—

	Plague Cases.	Plague Deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 10th February 1899	3,329	2,650	7,018	644
Week ending 17th February 1899	1	1	27	32
Week ending 24th February 1899	1	...	31	32
Week ending 3rd March 1899	1	1	35	31
Week ending 10th March 1899	1	1	37	32

As in each of the three previous weeks, there was, during the week, in the City, only one case. The arrivals in the City increased from 1,651 in the previous week to 1,803 in the present week, the population in the City being now about 55,132 as against 80,285 before the outbreak of plague according to the census of 1891.

II. The figures for the Health and Segregation Camps were as follows:—

	Remaining	Admitted	Discharged	Developed plague	Remaining
Health camps	274	22	24	...	272
Segregation camp	2	16	2	...	16

III. During the week there were 449 first and 13 second inoculations, bringing the totals to 32,154 and 1,369 respectively. There were no attacks among inoculated persons during the week.

IV. The Hospital figures were as follows:—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the week	1	1	...	1	1
Since commencement...		2,096	741	1,354	1
Inoculates ...		105	65	40	...

V. During the week 339 houses were disinfected as against 263 in the previous week, of which 245 were deserted houses, 52 plague infected and 42 locked-up ones opened under Government Notification No. 5235/Pg. 21-96.

VI. During the week permission was given to reoccupy 129 houses; no charge was levied for disinfecting 25 houses, 5 were disinfected by the owners themselves, and the charges collected on the remaining 99 amounted to Rs. 183-4-0.

VII. The cost of road work and pipes laid for water supply in the Melleswara and Basavangudi Extensions amounted to Rs. 5,559, bringing the total amount spent up to date to Rs. 38,430. During the week 29 infected houses were destroyed, and 26 houses were removed for opening out lanes in the city by the Sanitary Department. Independently of the above, the Municipality demolished 3 houses as unfit for human habitation during the week, the total number demolished by the Municipality from the commencement being 415.

VIII. During the week under report 928 persons or a daily average of 132 were disinfected with their effects at the City Railway Station.

Mysore State Outside Bangalore.

IX. The accompanying weekly return shows the state of the epidemic in the Province.

Plague is steadily decreasing in the Districts of Bangalore, Tumkur and Mysore, but in the District of Kolar, plague cases increased during the week.

In the Bangalore District, excluding Bangalore City, the number of cases during the week was 42 as against 91 in the previous week and 115 in the week ending 24th February 1899. There was a decrease in all the Taluks except Nelamangala in which the number of cases slightly increased from 12 to 14. The Taluk of Magadi has now been free for two weeks continuously.

The number of infected villages decreased from 59 to 47, of which only 21 reported cases as against 91 week previous; only 6 villages were newly infected against 8 in the previous week.

In the Kolar District, excluding the Gold Fields, the number of indigenous cases increased from 18 to 22, while the number of infected villages decreased from 16 to 12. Kolar Town was declared infected.

In the Gold Fields the number of indigenous cases increased from 15 to 49 and 17 respectively. The number of villages newly infected in the Gold Fields during the week was 3 as against 4 the week previous. The following Statement shows the incidence of cases among the several Mines for the past 4 weeks: —

Number.	NAMES OF PLACES.	During the week ending 17th February 1899.				During the week ending 24th February 1899.				During the week ending 3rd March 1899.				During the week ending 10th March 1899.				REMARKS.

	Total ...	1	1	16	14	...	...	32	21	...	...	*42	*26	1	1	49	30	

* These consist of 8 days' figures.

This week also Tumkur Town presented a clean sheet, while in the District the number of cases decreased from 11 to 4, and the number of infected villages decreased from 3. The number of newly infected villages decreased by both in the past and the present week.

In the Mysore District, excluding the Mysore City, the number of cases was 27 as against 32 and the number of infected villages 9 as against 11.

Up to the commencement of the present week, the Taluks of Mysore, Seringapatam, Hunsur and Mandya were infected.

In the Mysore Taluk, cases occurred only in one village in the present week; in Seringapatam Taluk cases decreased in three villages including Ganjam, and one village became newly infected. In Hunsur Taluk, the number of cases at Bellikere, the only village which remains infected, decreased from 9 to 4. There were no cases in the Taluk of Mandya, which has now been free for two weeks continuously, but one village in the Taluk of Heggaddevankote was newly infected during the week.

In the Mysore City the figures were as follows :—

	Plague Cases.	Plague Deaths.	Total Mortality.	Normal recorded mortality for past 5 years during the same period.
For week ending 17th February 1899	282	249	300	33
For week ending 24th February 1899	264	204	255	33
For week ending 3rd March 1899	194	186	233	35
For week ending 10th March 1899	140	124	160	36

Plague continues to decrease steadily in the Mysore City there being a very satisfactory drop in the total mortality from 233 to 160 and in plague attacks from 194 to 140.

A complete census of the City will be taken next full moon night, but it is estimated by the Chief Plague Officer that up to the 28th February only some 18,200 people had left the City, the population on that date standing at 53,044 as against 74,048 recorded at the last census of 1891 of whom 2,776 have died from all causes during December 1898 and January and February 1899.
