2. During the

late famine,

we had a famine

relief work in the

Bellary town

and for some

time and afterwards

within a distance

of 3 miles to

the south of

the town.

There were also

relief works in

other directions

within 10 miles.

The poor were

also relieved at

Bellary (of which

there were two

in the town) and

With reference to G. O. No. 230. M.

dated 20th ultimo, I have the honor

to state that the District Medical and

Sanitary officer reports that owing to the

prevalence of famine in the District during

the year 1897-98 the prices of grain and

other articles of food were considerably

high and almost prohibitive so far as

the poor people were concerned and that

from this cause the people were underfed

and consequently were in a very poor

health so that they succumbed more readily

to

to Cholera, fever, dysentery and other
bowel complaints which were then prevalent
in the town and so raised the death
rate.

I have the honour to

Sir

Your most obedient Servt

Ble Santaga

2. The Divisional officer's
endorsement shows that sufficient
measures for the relief of distress
were adopted and as distress
prevailed only during a portion
of the year the chairman's
explanation that increased mor-
tality was indirectly due to
distress cannot be endorsed.
The increased mortality was due
to Cholera, Small Pox and
Fever which accounts for 645
deaths.
