G.O.	No.	Department.	Date.

FURTHER PAPERS.

G.O.	No.	Department.	Date.

GENERAL DEPARTMENT (PLAGUE).

Bombay Castle, 7th March 1899.

No. 1670-P.—The following Summary of Plague Operations in Bombay City during the week ending the 25th February 1899 is published for information:—

The total number of deaths in the City of Bombay during the week ending the 25th February was 2,210. Of this number 171 were untraced deaths. In addition to plague, m. a. l. s. was prevalent. The increased mortality was fairly evenly distributed throughout the city, Byculla being the worst section, where the mortality rose from 178 to 240 for the week. The Committees continue to be exceedingly useful except in two districts. About 20,000 people left the city during the week, leaving the population about 8,35,000.

The figures for plague attacks, deaths and total mortality are compared below.

Period.	Plague Attacks.	Plague Deaths.	Total Mortality.
Week ending 26th February 1898 ...	1,165	1,096	2,179
Ditto 4th February 1899 ...	631	569	1,640
Ditto 11th February 1899 ...	824	675	1,734
Ditto 18th February 1899 ...	845	703	1,717
Ditto 25th February 1899 ...	989	931	2,210

The admissions to hospitals and camps are shown in the following statement. 624 plague cases were under treatment at the beginning of the week. 651 were admitted during the week. Recoveries and deaths were 86 and 498 respectively. Appended are also statements showing information in regard to the plague operations and in regard to inoculation.

1 S. Cop. sent to P.C.
24/2

Return showing information regarding Plague under the following headings for the week ending
6 A.M. on Saturday the 25th February 1893.

Sections.	Population by Census of 1891	Average weekly Mortality.	Actual Mortality for the Week	No. of Plague cases discovered.			No. of Patients removed to Hospitals.	No. of Persons sent to Hospitals or Camps as Contacts	No. of Persons segregated in private quarters other than authorized Hospital or Camp.		Houses inspected.	Houses disinfected.	Houses or whole floors vacated.	No. of Persons sent to Camps as Evicts.

* Three suspicious cases under observation.

† Four suspicious cases in hospital under observation.

‡ Two cases too ill to be removed and one treated with Professor Lustig's serum.

§ Three suspicious cases in hospital under observation.

|| Too ill to be removed.

Note—The total number of cases discovered is shown. If a man is discovered sick, he is entered as an attack; but if he subsequently dies he is not again entered as a death. Similarly when the first intimation of a case is after the patient's death, he is entered as a death, but not also entered as an attack.

There has been a large increase in the number of plague admissions in the various hospitals during the week, viz. 651 against 511 last week. The death-rate also continues high and the type is still virulent. The deaths in the hospitals from plague are 498 as against 379 last week.

Amongst the new private hospitals opened are the Ahmedbhoj Habibbhoj Hospital in Don Tad Cross Lane, with 1 observation case; the Bráhmín Kshatrya Hospital in Bhuleshwar, with 8 admissions; the Vasanji Tricamji Hospital in Olive Road, with 6 admissions; and the Hindu Fever Hospital at Charni Road Gardens, with 15 admissions. As usual the heaviest work has been on the Maratha, Arthur Road, Modikhána, Pinjrapole Jain, Julai and the Sárvajanik Hospitals. The number living in the Private Health Camps has increased from 3,956 last week to 4,278. The number of persons occupying the various Public Health Camps is 8,946, and there are 2,800 contacts in the various Hospital Contact Camps and houses.

(Signed) JAMES S. WILKINS, Lieut.-Colonel,
Special Medical Officer, Plague Operations.

GENERAL DEPARTMENT (PLAGUE).

Bombay Castle, 13th March 1899.

No. 1815-P.—The following Summary of Plague Operations in Bombay City during the week ending the 4th March 1899 is published for information :—

There were 2,307 deaths reported during the week, or an increase of 97 in the total mortality. The increase was widely spread, but there was a considerable decrease in Umarchádi, Dongri, Second Nágpáda and Warli Sections. 165 deaths were not traced. A considerable number of deaths continue to occur from measles and relapsing fever. Nearly 20,000 people left during the week in excess of arrivals, reducing the population to about 8,15,000.

The figures for plague attacks, deaths and total mortality are compared below.

Period.			Plague Attacks.	Plague Deaths.	Total Mortality.
Week ending 5th March 1898	...		1,172	1,245	2,142
Ditto 11th February 1899	...		824	675	1,734
Ditto 18th February 1899	...		845	703	1,747
Ditto 25th February 1899	...		989	934	2,210
Ditto 4th March 1899	...		1,119	971	2,307

2
cno 6357089

The admissions to hospitals and camps are shown in the following statement. 732 plague cases were under treatment at the beginning of the week. 654 were admitted during the week. Recoveries and deaths were 115 and 513 respectively. Appended are also statements showing information in regard to the plague operations and in regard to inoculation.

Return showing information regarding Plague under the following headings for the week ending 6 A.M. on Saturday the 4th March 1899.

Section.	Population by Census of 1891.	Average weekly Mortality.	Actual Mortality for the Week	No. of Plague cases discovered.			No. of Patients removed to Hospitals.	No. of Persons sent to Hospitals or Camps as Contacts.	No. of Persons segregated in private quarters other than authorized Hospital or Camp.		Houses inspected.	Houses disinfected.	Houses or whole floors vacated.	No. of Persons sent to Camps as Evicts.

* Three cases too ill to be removed and two Municipal Bigaries.

† Three suspicious cases in hospital under observation.

‡ Three cases too ill to be removed.

§ One case treated in house.

|| One case too ill to be removed.

* One case convalescent left in house.

** Too ill to be removed.

†† Two hopeless cases not removed.

‡‡ Five too ill to be removed.

§§ One case of relapsing fever.

NOTE.—The total number of cases discovered is shown. If a man is discovered sick, he is entered as an attack but if he subsequently dies he is not again entered as a death. Similarly when the first intimation of a case is after the patient's death he is entered as a death, but not also entered as an attack.

There has been an increase in the number of admissions during this week, but not as large as last week.

I regret to say the type of the disease is still very bad and the percentage of mortality just as high.

There has been a slight reduction in the cases of relapsing fever.

Two new wards have been opened in the Arthur Road and the Modikhána Hospitals, and a new ward is being constructed in the Sárvañanik Hospital, Parel.

There has been an increase in the number of evicts and in the Private Health Camps.

(Signed) JAMES S. WILKINS, Lieut.-Colonel,
Special Medical Officer, Plague Operations.

*Prophylactic Inoculations performed in Bombay during the week ending 1st March 1899
as reported to the Plague Research Laboratory by the undermentioned operators.*
