FURTHER PAPERS.

G.O.	No.	Department.	Date.

Weekly Report of Plague in the Civil and Military Station, Bangalore, for week ending 24th March 1899.

The following are the plague figures for the week compared with those of the preceding three weeks :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal recorded mortality for same period.
From 28th Sept. to 24th Feb.	3,997	3,297	6,228	801
Week ending 3rd March	...	9	64	44
„ 10th „	...	11	50	49
„ 17th „	...	3	43	49
„ 24th „	...	4	52	49

The four cases all occurred on the same day, and two of them were somewhat doubtful. The source of infection was unknown. There have been no cases since that day, and it is hoped that the town is, for the time being, free of local plague. All four cases were Hindus.

2. The figures for the segregation camp were :—

	Remaining.	Admitted.	Developed plague.	Died from other causes.	Discharged.	Remaining.
North Camp	14	17	...	1	15	15

3. During the week 106 first, and 2 second inoculations were performed, bringing the totals to 30,758 first and 968 second inoculations, in addition to 11,815 first and 5,639 second inoculations among the Military population. One inoculated person was attacked during the week.

4. Four houses were disinfected, and Rs. 1,054 paid in compensation. The largeness of this amount is due to the inhabitants of Knoxpett rebuilding their houses which had been destroyed during the plague. The infected houses had all been previously disinfected, but there was no instance of a second seizure occurring in a house in which there had previously been a case.

5. The Hospital figures were as follows :—

	Remaining.	Admitted.	Died.	Discharged.	Remaining.
North Camp.					
For the week	...	7	4	1	5
Since commencement	...	953	601	347	5
Inoculates	...	89	60	28	1

6. There were no imported cases during week, and the rules for the observation of arrivals are working smoothly.

P. R. CADELL,
Assistant to the Resident
in Mysore.

Weekly Report of Plague in the Mysore State, excluding the Civil and Military Station, for the Week ending 24th March 1899.

Bangalore City.

I. The following are the figures in the City up to date:—

	Plague Cases.	Plague Deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 24th February 1899..	3,330	2,651	7,076	708
Week ending 3rd Marh 1899	...	1	1	35
Week ending 10th March 1899	...	1	1	37
Week ending 17th March 1899	...	2	2	26
Week ending 24th March 1899	...	NH	NH	35

There were no cases of plague during the week in the City and the total mortality was only very slightly in excess of the normal recorded mortality for the past 5 years. Owing to the redistribution of the Wards, the compilation of the return of arrivals in the City has been delayed and the figures cannot therefore be given.

II. The figures for the Health and Segregation Camps were as follows:—

	Remaining	Admitted	Discharged	Developed plague	Remaining.
Health camps	291	93	5	...	379
Segregation camps	9	...	9	...	...

III During the week there were 519 first inoculations and 2 second inoculations bringing the totals to 33,349 and 1,373, respectively. No inoculated person was attacked with plague during the week.

IV. The Hospital figures were as follows:—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the week	1	...	1	...	...
Since commencement...	...	2,096	742	1,354	...
Inoculates	...	105	65	40	...

V. During the week 212 houses were disinfected as against 225 in the previous week, of which 141 were deserted ones, 24 were plague infected and 47 were locked-up ones opened under Government Notification No. 5235/P. G. 21-96 dated 15th October 1898.

VI. During the week permission was given to re-occupy 121 houses, no charge was levied for disinfecting 27 houses, 2 houses were disinfected by the owners themselves and the charges realized from the remaining 92 amounted to Rs. 168.

The infection is confined in the District to Kortagere Sub-Taluk, and to the taluks of Kunigal and Tumkur. The cases in each were 6, 3 and 12 as against 0, 4 and 4 respectively in the previous week.

In the Mysore District excluding the Mysore City, the number of cases decreased from 29 to 14 and that of infected villages from 9 to 6.

In the Mysore Taluk there were 6 cases as against 4, in the Seringapatam Taluk 8 against 25, and there were no cases in the Taluks of Mandya, Hunsur and Heggedadevankote the first of which has now been free for 4 weeks and the others for the past two weeks.

In the Mysore City the figures were as follows:—

	Plague Cases.	Plague Deaths.	Total Mortality.	Normal recorded mortality during the same period.
For the week ending 3rd March 1899	... 194	186	233	35
For the week ending 10th March 1899	... 140	124	160	36
For the week ending 17th March 1899	... 110	91	139	36
For the week ending 24th March 1899	... 73	70	120	36

The decrease was steady all round, the number of attacks falling from 110 to 73, of deaths from 91 to 70 and total mortality from 139 to 120.

During the week 335 persons or a daily average of 47 were disinfected with their effects at the Mysore City Railway Station.

R. B. PLUMER,
For Plague Commissioner in Mysore.

Province reported in daily
as well as indigenous) in the Mysore
the 24th March 1899.

Letter dated 18th March, 1899.

...	40	31	40
-----	----	----	----

VII. During the week under report, the Wards in the City were re-arranged, the two Sub-Wards with their establishments costing Rs. 72 a month being abolished and the remaining four Wards being placed under the charge of 4 Ward Officers. A graded Medical Officer assisted by an Hospital Assistant and a Lady Apothecary has been placed in medical charge of every two Wards.

During the week, the Notification prescribing disinfection of departures from Bangalore City by rail, was withdrawn by the Resident.

VIII. The cost of road work and earth work and of pipes laid for water supply in the Basavangudi and Malleswara Extensions, amounted to Rs. 4,089 as against Rs. 5,981 in the previous week, bringing the total amount spent to Rs. 48,500. During the week 10 infected houses were destroyed and 14 houses were removed for opening out congested parts of the City.

To prevent concealment of cases, the infringement of the Plague Regulations in the matter of reporting deaths, cases of sickness, departures from the City and change of residence is carefully watched. During the week 3 persons were prosecuted for violating the Epidemic Diseases Regulation and 2 of them fined As. 8 and Re. 1, respectively, as against 5 prosecuted during the previous week.

Mysore State outside Bangalore.

IX. The accompanying weekly return shows the state of the Epidemic in the Province:—

During the week the number of cases increased in the Districts of Bangalore, Kolar, excluding Kolar Gold Fields, and Tumkur, but decreased in Mysore and the Kolar Gold Fields.

In the Bangalore District, excluding Bangalore City, the number of cases was 51 as against 43 in the previous week. In the Taluks of Bangalore, Doddballapur, Nela-mangla, Devanahalli and Anekal, the number of cases increased from 3, 3, 10, 7 and 5 to 4, 5, 14, 11 and 6 respectively, and in those of Hoskote and Kankanhalli, it decreased from 6 and 3 to 4 and 1 respectively. The Sub-Taluk of Closepet had during the week the same number of cases as in the previous week, viz. 6; while the taluks of Chennapatna and Magadi were altogether free. The latter taluk having been free from plague for the past four weeks will be removed from the list of infected areas.

The number of infected villages decreased from 31 to 28, of which 16 reported cases as against 20 in the week previous. The number of newly infected villages was 5 as against 6 and of re-infected villages 3 as against 2.

In the Kolar District excluding the Gold Fields, the number of indigenous cases increased from 11 to 15 and the number of infected villages from 7 to 9. Two villages were newly infected and 2 villages were re-infected during the week.

In the Gold Fields, the number of indigenous cases decreased from 53 to 43, while the number of infected villages increased from 16 to 20 of which 2 were newly infected and 2 were re-infected.

The following statement shows the cases among the several mines for the past 4 weeks:—
