PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following paper:—

From the Surgeon-General, Madras, No.164, dated 15th

February 1899.

O R D E R:—No.209, dated 13th February 1899.

The Government adheres to the decision in G.O.No.

169, Public, dated 9th February 1899.

2. The temporary doctors already engaged must be utilised to the best advantage. They should be required to travel and organise, and be employed ^{as} ~~as~~ as direct executive officers. It is impossible to allow a medical officer for each infected town, and it is only at places where plague is, or is likely to be, very bad that the Resident doctors should be stationed. The Surgeon-General should take steps to redistribute the staff accordingly, as necessity arises.

" Plague Commissioner.

Copy of letter from the Surgeon-General, Madras,
No.164, dated 15th February 1899:-

With reference to G.O.No.169, Public, dated 9th

February 1899, I have the honour to invite the attention of
Government to my letter No.146, dated 8th February 1899, forward-
ed through the Plague Commissioner, from which it will be seen
that I have ^{not} now a single Medical Officer at my disposal for
plague duty, should one be required in any District.

2. In addition to the two Addition^{al} Medical Officers
already employed in the North Arcot District, I had to send
the other day three more officers to Arcot, Kuppam and
Wallajah, respectively, at the instance of the Plague Commis-
sioner and the number of Additional Medical Officers employed in
the Anantapur District is four. If officers are thus asked for
each small place and I am to be in a position to comply with
such requisitions, it is absolutely necessary that more men
should be got out at once.

5. Under these circumstances and considering that plague
does not yet show a tendency to abate in the North Arcot
District, I would strongly urge on Government the necessity of
at least getting out five more Medical Officers at once and
the other five later on according to the development of events.
