The question of a site for this hospital has been fully considered & decided upon in G.O. 481 P Misc, d. 25.XI.98. The present site is, as far as I remember the locality, the most convenient. I believe that a properly conducted plague hospital is not a source of danger; see Nathan Vol: 1 pp. 44-45. If we admit this objection, every other suitable site will also be objected to, on the same ground & we shall have no hospital at all.

Plague in Ootacamund

CHIEF SECRETARY
-1. FEB. 1899
GOVERNMENT OF MADRAS

To the Chief Secretary
to the Government of Madras

Sir,

The humble petition of the members etc of the Nilgiri Library at Ootacamund

Respectfully sheweth

(1) that your petitioners have heard that a fatal case of Plague has occurred at Ootacamund, & that Government has ordered a plague hospital to be placed in the heart of the station, without consultation with the Local Authorities, close to the Armoury, to the Masonic Hall, to the New Club, & to the Nilgiri Library.

(2) By Rule XXVII of the Society a special general meeting of the Nilgiri Library cannot be held without 14 days' notice "to be convened on the signed requisition of "not fewer than 25 members", but this procedure

stopped pending orders on protest?

Memo. by Hony. Secy. of Library

I have mentioned above that these are signatures of "members &c", thus including "members" who can vote at meetings, & "subscribers" who cannot thus vote, & "readers," who are relations of the above classes. — The most numerous readers are ladies, but every one objects to the plague hospital being near the library, & one lady, "a member", has already taken her name off our list. — There are only 42 signatures, including my own, but the whole Committee are represented, & no doubt more people would have signed, except that at present the library is full of dust & dirt, while the contractors are joining the new wing to the old building, so that few people come to read at present. — R. Templewright

Ooty, Jany. 30/99.

I see no reason to modify the decision already arrived at. The Hospital I understand is now finished.

A.E.H.
8.2.99

It has been pointed out to me that the Nilgiri News says, the Hospital is hardly begun, and has been stopped pending orders on these protests. I would suggest that if this be ascertained by telegraph, and if the report be true, that the new Collector be offered an opportunity of giving his opinion on the site. A plague hospital, full of patients, in the middle of the Station, would alarm visitors during the season. Should the Collector support the protest, and the Hospital be proved to be unbuilt, I should fall back on the S. Thomas' site. If the Hospital be already finished I should stick to our guns. I believe there is no real danger.

One more suggestion, — how would Lake Cottage (I mean the house in which old Hammond lived, below Sudbury House) do for a Plague Hospital? It belongs to Govt.

A.E.H. 9.2.99

with some small alterations it would do well for a plague hospital & would accommodate 10 to 12 patients.

I have had a talk with Thompson on the subject & he suggests that Govt should consult King regarding the likelihood of the lake being infected & the disease thus spread.

From an official letter I am sending you today you will see that apparently the Mahomedans here will not do anything towards erecting a new plague hospital. If the objection Thompson raises to Westmere is found not be a real or grave one. It would do admirably for an hospital

Yours sincerely

C. S. Weir

Civil Surgeon's Office,
Ootacamund, March 3rd 1899.

Dear Weir

Excuse me for not having replied to your note of 1st. Curr—

The suitability of the house, referred to by Tremenheere, for a Gosha Women hospital, was discussed by Butterworth & myself & we decided that the situation was bad—

1
80 1997-699

too close to the roads too near the Lake –

Supposing there were any plague cases located in the house, nothing is more certain than that there would be drainage – plague infected – into the Lake from bath-rooms &c &c.

Practically it would be impossible to prevent the water in the Lake being polluted. I don't think much is known as to the powers of growth of the plague bacillus in water. I can't find anything definite on the subject but I think it is very open to question if it would be advisable to run the risk of the water in the Lake being converted into a culture medium for the plague bacillus.

The water in the lake is certainly not by any means pure & might form a fertile soil for its growth. Should ~~[illegible]~~ determine to use the house as a plague hospital, many changes must be made in it.

Yours

C M Thompson

At 1377-S

11 MAR. 1899

NOTE FOR THE Sanitary Commr.
u. o.

Will you kindly go through the accompanying papers & give your opinion as to the objection raised by the Civil Surgeon on acct of the risk of infecting the Lake? I understand from a previous reply of yours to a query from me, that you consider it probable that water can become infected. But in the present case, it seems that Sanitary engineering should be able to provide that infected matter should not be able to flow from the house into the lake. The bathrooms might be fitted with cement drains leading to cisterns where infected matter could be received in disinfectants and sweepings &c the sweepings might be and disposed of in the incinerator afterwards. If

a further prec

~~Sec.~~ 814/S

To the Plague Commr.

It has been proved both in practice and by laboratory experiments that water can be infected: that is, that the microbe of plague can live in water for a period of three days. The arrangements you suggest would greatly minimize any danger as to ~~x~~ surface and sullage water. The factor to be most feared is the emptying of filth and cleansing of infected articles in the water by untrustworthy menials. Therefore, an effective palisade with a guarded exit should be added to your suggestions.

I have nothing to guide me as to actual distance from the Lake: but, if near enough to demand these precautions, such a site should be elected only on its being shown that less objectionable places are not obtainable. I may add that the Punjab Regulations particularly warn against sites near water being used for P. Hospitals.

S. C.
13/3/99

25

against surface drainage in wet weather carrying infection to the lake a [illegible] catch drain of cement leading to a similar cistern might be built close to & below the house. This ought to be sufficient precaution if the hospital is placed under the direct charge of an officer who will see that it is properly managed, & that contacts are not allowed to use the margin of the lake for the purposes of nature &c. The house is just below Aviary House, & opposite the Boathouse—

8/3

P.C.

Further note as desired on 14/3/99
[illegible] has evidently backed out, so if a camp is built it must probably be at Government's expense. Mr. Weir says the house will do admirably if there are no sanitary objections. These appear to be none, if certain precautions are taken. I therefore think the house may be utilised.

26

Revenue Dept.

Read L & M Dept G.O. No. 171 P.
Regarding the subject of using "Westmere" as a plague hospital

To Under Secretary.

It has been proposed in the L & M Dept to make "Westmere" at Ootacamund a plague Hospital for Mohommedan Gosha women. The Collr. of the Nilgiris has reported that with a few alterations it would do well for a plague hospital.

The L & M Dept now asks the Rev Dept. whether it contemplates using the house for the Govt. Botanist. But as it was decided here that "Westmere" is not a suitable residence for the Govt. Botanist, Submitted that the L & M Dept. may be so informed.

Please see G.O. 171 Rev d/18-3-99

Plague

Repa P. Cir 15/1899

Nilgiri Collector's Office
Ootacamund 3rd March 1899.

From,

C. J. Weir Esq
Collector
The Nilgiris.

To,

The Secretary to Government
Local and Municipal Dept
Madras.

Sir,

I have the honour to acknowledge receipt of Government Memo No 47 P dated 24th February 1899 enquiring as to the location of the proposed Mahomedan Plague Hospital at Ootacamund and the progress that has been made with the work. — B.

2. The site decided upon is that described by Mr Butterworth in para 4 of his letter No G. B. 9 28/98 dated 17th November 1898 and thus one of the alternative sites approved of by Government in G.O. No 1481 P Mis: dated 28th November 1898. I enclose a plan of the ground on which the proposed Plague buildings are shown in situ. I may — October +E — 7

mention that it has not been found necessary to take up any portion of the Bishopsdown property for the site of the Camp.

3. As to the progress of the work I regret to say that the progress is 'nil' & matters have come to a dead lock. My predecessor, Mr Butterworth, on receipt of G. O. No 1481 P. Mis dated 25th November 1898 decided to erect the plague Camp for Mahomedan Gosha women on Jail Hill. This decision evoked, I understand, angry protests from several quarters and immediately before my arrival here Mr Roberts, who was in charge, decided that the plague Camp should be erected in the Government land close to St Thomas's Church.

The ground selected was overgrown with wattle and had to be cleared by the Municipality. This was done and a plan and estimate were drawn up in consultation with the Civil Surgeon Ooty & approved by the him & the Chairman for the Plague buildings. A copy of this plan I enclose as stated in para 2 above. It was necessary with regard to the Plague Regulations to make some reference to the Civil Surgeon regarding this plan but the Chairman

7

H.A.C!

Ootacamund Municipal Council was asked to mark out the sites on the ground and Essaf Sait was informed that everything was ready & that he might commence building.

4. As Essaf Sait took no action on this communication I have had an interview with him. He made various requests which it was quite impossible to grant & which I need not now discuss but his final decision was that he would undertake to erect the buildings required and would even spend Rs 2000 in excess of the estimates — It being understood that Government contribute half the estimated cost — Provided that Government and the Municipality would agree that the buildings now erected would remain for all time and would be devoted to "some useful purpose".

I should perhaps mention that Essaf Sait at first suggested that the useful purpose would be to allow him to let these buildings as stables. He afterwards suggested that they might be let as houses for poor people.

Though I had a decided opinion as to the impossibility of accepting these conditions I consulted the Chairman

Ootacamund Municipal Council before arriving at a conclusion on the matter and I find that he agrees with me that it is impossible to accept the Condition which Esoof Sait now attaches to his proposed donation. Mr Hamnett indeed believes and he is in a position to form an opinion on the subject that the condition now attached is put forward as a cloak to enable Esoof Sait to withdraw from his original offer. I have this day written to Mr Esoof Sait asking him if he will not in pursuance of the original promise undertake to erect the Plague buildings without Conditions save only that Government Contribute half the cost. When he 1st made his promise all that he asked was that the site of the Camp should be near the bazaar or the burial ground. He takes however no objection now to the location. I have also pointed out to him the inconvenience to which his Co-religionists of both sexes may necessarily be exposed to if plague appears before the proposed hospital

is erected.

I do not expect Esoof Sait will retreat from the position he has taken up. If not I think of appealing again to the wealthy Mahomedans of Ootacamund to subscribe half the cost. Mr Butterworth however, I may mention, made a similar appeal without result.

I have the honor to be
Sir
Your most obdt Servant
