APRIL.

Fortnightly Narrative of Plague Cases.

Recording letter from the Plague Commissioner submitting fortnightly narrative of the progress of plague cases in the Madras Presidency for the fortnight ending 8th April 1899.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From L. E. BUCKLEY, Esq., I.C.S., Plague Commissioner, to the Secretary to Government, Local and Municipal Department, dated 12th April 1899, No. 944.

I have the honour to submit, for the information of Government, my fortnightly narrative of the progress of plague from the 26th March to 8th April 1899.

Enclosure.

Fortnightly Narrative for the period ending Saturday the 8th April 1899.

Plague showed a decline during the fortnight. The only districts in which attacks occurred were Anantapur, Bellary, Kurnool, North Arcot and Salem. The figures are compared below with those of the previous fortnight :—

—	Fortnight ending 25th March 1899.		Fortnight ending 8th April 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	9	5	21	15
Bellary	6	6	13	11
Kurnool	7	6	1	2
Madras	3	1	..	1
Nellore	2	2	..	..
North Arcot	108	79	67	46
Salem	33	24	27	20
Total ..	168	123	129	95

2. The increase in the *Anantapur District* is due practically entirely to the outbreaks at Srirangarayapalle and Manepalle. Srirangarayapalle is close to Parige, a previously infected village which was evacuated by its inhabitants. A blacksmith at Srirangarayapalle used to work in the Parige camps. He noticed dead rats in his house after a time and evacuated it without telling anybody. Shortly afterwards his next door neighbours were attacked with plague. The disease was carried from Srirangarayapalle to Manepalle by a woman. Kotipi is a hamlet of Manepalle. All three villages have been evacuated. Gooty taluk is now clean. The sepoys have returned to military duty. The affected villages which have been disinfected and in which there have been no cases for sometime past are being re-occupied.

In *Bellary* there has been a slight increase in the number of deaths reported from the Hospet Union, which includes Chittavadigi besides Hospet. No fresh seizures have been reported since the 2nd. The two cases reported from Hirehalu are of a very doubtful nature.

In *Kurnool* the villages of Alardinne, Dudekonda and Togalagula which were evacuated and in which no cases have occurred for sometime past have been re-occupied. Maddikera is at last free, but a few cases are still reported from Pattikonda and Peravali.

From *Madras* the death is reported of a plague patient who came by sea from Calcutta in the previous fortnight.

The cases in *Nellore* have been successfully dealt with, for the disease has not spread.

Reports from *North Arcot* show slight improvement. The disease is at last declining in Kuppam but unfortunately it has spread to the neighbouring village of Gudupalle. The village has been deserted. Some of the people are living in encampments in the fields, but many of them are not to be found and there can be no doubt that they must have fled to other villages. No further outbreak has, however, been reported from these parts. There is a slight improvement at Arcot. Walaja shows a decided improvement as does also Vellore, but it is doubtful if the Vellore figures represent the facts. The figures are no doubt approximately true, for I feel confident that a really severe outbreak could not have failed to come to the notice of the local officers. The Ranipet figures are also probably not correct, for no attacks have been reported among Muhammadans up to date and it is unlikely that they have altogether escaped. There was an increase in the attacks at Padiyambakkam near Ranipet at the close of the fortnight.

There have been many scattered cases throughout *Salem district*. The evacuation of Hosúr has been completed and people have been prevented from going backwards and forwards to their houses. There has been a decline in the number of attacks and deaths. The sappers have returned to Bangalore.

3. The temper of the people has been generally good. A decided change has come over the inhabitants of Vellore where people are at last taking to use the Government camp. The existing buildings are insufficient for requirements and are being extended.

4. Inoculation figures are appended. The operation is nowhere popular.

[Statement.

" Secretary, Indian Plague Commission.

Ead. P. Seetharam.

Proceedings of the Madras Govt.

Read the following paper:-

From. L. E. Buckley Esqr. Plague Commr.

No. 946 of 12th April 1899.

I have the honour to submit for the information of Govt. my fortnightly narrative of the progress of plague from the 26 March to 8th April 1899.

Fortnightly Narrative for the period ending Saturday the 8th April 1899.

Plague showed a decline during the fortnight. The only districts in which attacks occurred were Anantapur, Bellary, Kurnool, North Arcot and Salem. The figures are compared below with those of the previous fortnight :—

	Fortnight ending 25th March 1899.		Fortnight ending 8th April 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	9	5	21	15
Bellary	6	6	13	11
Kurnool	7	6	1	2
Madras	3	1	..	1
Nellore	2	2	..	..
North Arcot	108	79	67	46
Salem	33	24	27	20
Total ..	168	123	129	95

2. The increase in the *Anantapur District* is due practically entirely to the outbreaks at Srirangarayapalle and Manepalle. Srirangarayapalle is close to Parige, a previously infected village which was evacuated by its inhabitants. A blacksmith at Srirangarayapalle used to work in the Parige camps. He noticed dead rats in his house after a time and evacuated it without telling anybody. Shortly afterwards his next door neighbours were attacked with plague. The disease was carried from Srirangarayapalle to Manepalle by a woman. Kotipi is a hamlet of Manepalle. All three villages have been evacuated. Gooty taluk is now clean. The sepoys have returned to military duty. The affected villages which have been disinfected and in which there have been no cases for sometime past are being re-occupied.

In *Bellary* there has been a slight increase in the number of deaths reported from the Hospet Union, which includes Chittavadigi besides Hospet. No fresh seizures have been reported since the 2nd. The two cases reported from Hirehalu are of a very doubtful nature.

In *Kurnool* the villages of Alardinne, Dudekonda and Togalakella which were evacuated and in which no cases have occurred for sometime past have been re-occupied. Maddikera is at last free, but a few cases are still reported from Pattikonda and Peravali.

From *Madras* the death is reported of a plague patient who came by sea from Calcutta in the previous fortnight.

The cases in *Nellore* have been successfully dealt with, for the disease has not spread.

Reports from *North Arcot* show slight improvement. The disease is at last declining in Kuppam but unfortunately it has spread to the neighbouring village of Gudupalle. The village has been deserted. Some of the people are living in encampments in the fields, but many of them are not to be found and there can be no doubt that they must have fled to other villages. No further outbreak has, however, been reported from these parts. There is a slight improvement at Arcot. Walaja shows a decided improvement as does also Vellore, but it is doubtful if the Vellore figures represent the facts. The figures are no doubt approximately true, for I feel confident that a really severe outbreak could not have failed to come to the notice of the local officers. The Ranipet figures are also probably not correct, for no attacks have been reported among Muhammadans up to date and it is unlikely that they have altogether escaped. There was an increase in the attacks at Padiyambakkam near Ranipet at the close of the fortnight.

There have been many scattered cases throughout *Salem district*. The evacuation of Hosúr has been completed and people have been prevented from going backwards and forwards to their houses. There has been a decline in the number of attacks and deaths. The Sappers have returned to Bangalore.

3. The temper of the people has been generally good. A decided change has come over the inhabitants of Vellore where people are at last taking to use the Government camp. The existing buildings are insufficient for requirements and are being extended.

4. Inoculation figures are appended. The operation is nowhere popular.

(Signed) L. E. BUCKLEY,
Plague Commissioner.

(True Copy.)

Sq. Secretary to Government.

Fortnightly Narrative for the period ending Saturday the 8th April 1899.

Plague showed a decline during the fortnight. The only districts in which attacks occurred were Anantapur, Bellary, Kurnool, North Arcot and Salem. The figures are compared below with those of the previous fortnight :—

—	Fortnight ending 25th March 1899.		Fortnight ending 8th April 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	9	5	21	15
Bellary	6	6	13	11
Kurnool	7	6	1	2
Madras	3	1	..	1
Nellore	2	2	..	..
North Arcot	108	79	67	46
Salem	33	24	27	20
Total ..	168	123	129	95

2. The increase in the *Anantapur District* is due practically entirely to the outbreaks at Srirangarayapalle and Manepalle. Srirangarayapalle is close to Parige, a previously infected village which was evacuated by its inhabitants. A blacksmith at Srirangarayapalle used to work in the Parige camps. He noticed dead rats in his house after a time and evacuated it without telling anybody. Shortly afterwards his next door neighbours were attacked with plague. The disease was carried from Srirangarayapalle to Manepalle by a woman. Kotipi is a hamlet of Manepalle. All three villages have been evacuated. Gooty taluk is now clean. The sepoys have returned to military duty. The affected villages which have been disinfected and in which there have been no cases for sometime past are being re-occupied.

In *Bellary* there has been a slight increase in the number of deaths reported from the Hospet Union, which includes Chittavadigi besides Hospet. No fresh seizures have been reported since the 2nd. The two cases reported from Hirehalu are of a very doubtful nature.

In *Kurnool* the villages of Alardinne, Dudekonda and Togalakallu which were evacuated and in which no cases have occurred for sometime past have been re-occupied. Maddikera is at last free, but a few cases are still reported from Pattikonda and Peravali.

From *Madras* the death is reported of a plague patient who came by sea from Calcutta in the previous fortnight.

The cases in *Nellore* have been successfully dealt with, for the disease has not spread.

Reports from *North Arcot* show slight improvement. The disease is at last declining in Kuppam but unfortunately it has spread to the neighbouring village of Gudupalle. The village has been deserted. Some of the people are living in encampments in the fields, but many of them are not to be found and there can be no doubt that they must have fled to other villages. No further outbreak has, however, been reported from these parts. There is a slight improvement at Arcot. Walaja shows a decided improvement as does also Vellore, but it is doubtful if the Vellore figures represent the facts. The figures are no doubt approximately true, for I feel confident that a really severe outbreak could not have failed to come to the notice of the local officers. The Ranipet figures are also probably not correct, for no attacks have been reported among Muhammadans up to date and it is unlikely that they have altogether escaped. There was an increase in the attacks at Padiyambakkam near Ranipet at the close of the fortnight.

There have been many scattered cases throughout *Salem district*. The evacuation of Hosúr has been completed and people has been prevented from going backwards and forwards to their houses. There has been a decline in the number of attacks and deaths. The Sappers have returned to Bangalore.

3. The temper of the people has been generally good. A decided change has come over the inhabitants of Vellore where people are at last taking to use the Government camp. The existing buildings are insufficient for requirements and are being extended.

4. Inoculation figures are appended. The operation is nowhere popular.

[L. & M. Dept. 1,030—26-1-99.]

NOTE FOR ~~THE~~ Mr. V. Ponnayya.

I sent to you yesterday 5 copies of f.o. No. 568 P of 20th April 99 to be despatched to the Secretary, Indian Plague Commission, London. Among them I believe there are more than one unsigned copies. Please get only two of the unsigned copies signed by the Assistant Secretary and despatch them — one to the Secretary Indian Plague Commission, Care of India Office, London, and the other to the Sanitary Commr., Madras, along with 5 spare copies for the former and two for the latter. I send herewith 7 spare copies.

C.S.
5.5.99

Please also let me know the date of despatch

The former handed over to the Dept. & the latter despatched to the Sanit. Commr. V.P. 8-5-99.

ASSIST SECY TO GOVT. OF INDIA, GENL. MEDL. REG. & LEG. DEPTS. 13 APR 1899

13 APR 1899
LOCAL MUHL REGL & LEG DEPT

18

Fortnightly Narrative for the period ending Saturday the 8" April 1899.

Plague showed a decline during the fortnight . The only districts in which attacks occurred were Anantapur, Bellary, Kurnool, North Arcot, and Salem . The figures are compared below with those of the previous fortnight.

	Fortnight ending 25" March 1899		Fortnight ending 8" April 1899	
	Seizures	Deaths	Seizures	Deaths
Anantapur	9	5	21	15
Bellary	6	6	13	11
Kurnool	7	6	1	2
Madras	3	1	o	1
Nellore	2	2	o	o
North Arcot	108	79	67	46
Salem	33	24	27	20
	168	123	129	95

2. The increase in the Anantapur District is due practically entirely to the outbreaks at Srirangarayapalle and Manepalle. Srirangarayapalle is close to Parige, a previously infected village which was evacuated by its inhabitants. A blacksmith at Srirangaraya palle used to work in the Parige camps. He noticed dead rats in his house after a time and evacuated it without telling anybody. Shortly afterwards his next door neighbours were attacked with plague. The disease was carried from Srirangarayapalle to Manepalle by a woman. Kotipi is a hamlet of Manepalle. All three villages have been evacuated. Gooty taluk is now clean. The sepoys have returned to military duty. The affected villages which have been disinfected and in which there have been no cases for sometime past are being re-occupied.

In Bellary there has been a slight increase in the number of deaths reported from the Hospet Union, which includes Chitwadgi Chittavadigi

besides Hospet .No fresh seizures have been reported since the 2nd.The two cases reported from Hirehalu are of a very doubtful nature.

In Kurnool the villages of Alardinne ,~~Kodikonda~~ Dudekonda and Togalakallu which were evacuated and in which no cases have occurred for sometime past have been re-occupied .Maddikera is at last free, but a few cases are still reported from Pattikonda and Peravali.

From Madras the death is reported of a plague patient who came by sea from Calcutta in the previous fortnight.

The cases in Nellore have been successfully dealt with ,for the disease has not spread.

Reports from North Arcot show slight improvement.The disease is at last declining in Kuppam but unfortunately it has spread to the neighbouring village of Gudupalle.The village has been deserted.Some of the people are living in encampments in the fileds,but many of them are not to be found and there can be no doubt that they must have fled to other villages. No further outbreak has, however,been reported from these parts.There is a slight improvement at Arcot.Walaja shows a decided improvement as does also Vellore,but it is doubtful if the Vellore figures represent the facts.The figures are no doubt approximately true ,for I feel confident that a really severe outbreak could not have failed to come to the notice of the local officers.The Ranipet figures are also probably not correct,for no attacks have been reported among Muhammadans up to date and it is unlikely that they have altogether escaped.There was an increase in the attacks at Padiyambakkam near Ranipet at the close of the fortnight.

There have been many scattered cases throughout Salem district. The evacuation of Hosur has been completed and people have been prevented from going backwards and forwards to their houses.There has been a decline in the number of attacks and deaths.The sappers have returned to Bangalore.

3. The temper of the people has been generally good.A decided change has come over the inhabitants of Vellore where people are at last taking to use the Government camp.The existing buildings are insufficient for requirements and are being extended.

4. Inoculation figures are appended. The operation is nowhere popular.

for Plague Commissioner.
