C No 2557
 Extract from letter No 776 from the
 23.2.98
 Commissioned Medical Officer Hoopet
 to the Collector of Bellary.

That the Plague camp extending as
 it does over a considerable area and in
 an exposed position with only a small
 police guard placed over it offers facilities
 especially at night to the inmates to
 abscond from it. The risk to others of
 a plague patient (convalescent of course)
 escaping is too real to need any descrip-
 tion. In my opinion the case can be
 met by having a thick thorn fence put
 up surrounding the camp and I am in-
 formed by the Tahsildar that this
 measure can be effectually undertaken
 at a very moderate cost.

Extract from letter No 777 from the
 23.2.98
 Commissioned Medical Officer Hoopet

To the Collector of Bellary

I have the honor to bring to your notice that great difficulty is experienced in drawing water from the well in the Plague camp owing to the want of a pulley. I therefore recommended that one of the ordinary well pattern be sanctioned as soon as possible.

Dustbins are also absolutely necessary for purposes of cleanliness in this camp and I have therefore to request that you will be good enough to take early steps to have two dustbins constructed and placed upon suitable sites in the plague camp.

827-P
26.2.99

Forwarded to the Plague Commission.

2 I do not think a thorn fence will be of much use. The police ought to be able to prevent people from escaping from the Plague Hospital. The medical officers have been requested to take

necessary action for providing a pulley for the well in the Plague camp and dustbins in the same camp. As the pulley for the well and dustbins are essential, I ordered these to be provided in anticipation of sanction. Sanction is now requested for these two articles.
