Weekly Report of Plague in the Civil and Military Station, Bangalore, for week ending 31st March 1899.

The following are the plague figures for the week compared with those of the preceding three weeks :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal recorded mortality for same period.
From 28th Sept. to 3rd March	*4,003	*3,304	6,292	845
Week ending 10th	11	6	50	49
" 17th	3	4	43	49
" 24th	4	1	52	49
" 31st	1	1	44	49

*Revised figures.

Only one case occurred during the week, which was an imported one. The Station was free from indigenous plague from the 21st to the 31st March, and although one indigenous death from plague has since occurred, the Station appears to be now practically clear of the disease.

2. As the recorded plague cases from the beginning of the outbreak do not represent the mortality from plague, and as, on the other hand, the normal mortality is also misleading, owing to previously defective registration, the following approximation may be taken as being nearer the true plague mortality.

Total deaths from all causes from 15th September to 31st December	...	...	5,482
Deduct 9 deaths per diem for same period, as a fair normal mortality	...	...	972
			4,510
Add Plague deaths in January, February and March	...	...	243
			Total..... 4,753

Nine has been taken as the normal number of deaths per diem, as it would give a fair ordinary death rate, 33 per mille per annum. As however a considerable number of people left the Station during the outbreak, the rate assumed is too low rather than too high. The total plague mortality may be assumed to fall little short of 5,000.

3. The figures for the segregation camp were as follows :—

	Remaining.	Admitted.	Developed plague.	Discharged.	Remaining.
North Camp	15	14	...	29	...

The camp was closed with the closing of the North Camp Hospital. The contacts of future cases will be sent to the South Camp, while persons detained on arrival by railway as suspicious will be sent to the Chattram Detention Camp.

4. During the week 65 first and 3 second inoculations bringing the totals to 30,823 first and 971 second inoculations, in addition to 11,815 first and 5,639 second inoculations performed among the Military population. No inoculated persons were attacked during the week. 379 inoculated persons are stated to have been attacked, and 263 to have died since the beginning of the outbreak.

5. Three houses were disinfected during the week. Rs. 1,055 were paid in compensation, principally to the inhabitants of Knoxpett rebuilding their houses.

6. The patients remaining in Hospital were discharged during the week, and the North Camp finally closed.

The final figures for the three Hospitals were as follows;—

	Admissions.	Deaths.	Case mortality.
North Camp ...	956	600	62.76
South Camp ...	768	462	60.15
Military Camp ...	192	142	73.96
<i>For inoculates.</i>			
North Camp ...	89	24	26.96
South Camp ...	41	12	29.27

7. On the evening of the 31st March a census of the station was taken, in order to ascertain as far as possible the results of the Epidemic on the population.

8. As the Epidemic has now ceased, this weekly report will now be discontinued, but a weekly return of any cases that may occur will be sent.

P. R. CADELL,
Assistant to the Resident
in Mysore.

Weekly Report of Plague in the Mysore State, excluding the Civil and Military Station, for the Week ending 31st March 1899.

Bangalore City.

I. The following are the figures in the City up to date:—

	Plague Cases.	Plague Deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 3rd March 1899..	3,331	2,652	7,111	739
Week ending 10th March 1899	1	1	37	32
Week ending 17th March 1899	2	2	26	32
Week ending 24th March 1899	...	...	35	32
Week ending 31st March 1899	*1	...	28	32

The case during the week was an imported one. The sufferer was a petty merchant who, on the outbreak of plague, had left Bangalore and made his head quarters at Gunjur, whence he peddled his goods among the surrounding villages, almost all of which at one time or another have been plague-infected and in one of which he must have contracted the disease. He came into Bangalore on the 30th. He was then suffering from fever and was put under observation. On the 31st, bubo began to develop and he was sent to the Plague Hospital. He had been inoculated.

There was no plague death during the week and the total mortality decreased by 7 and was even less than the normal recorded mortality of the previous 5 years. The number of arrivals in the City was 1,584, the total population of the City being estimated at 59,906 at the end of the current week as against 59,163 at the end of the previous week.

II. The figures for the Health and Segregation Camps were as follows:—

	Remaining	Admitted	Discharged	Developed plague	Remaining
Health camps	379	13	...	...	392
Segregation camps	...	8	...	...	8

III. During the week under report, there were 192 first and 2 second inoculations, bringing the totals to 33,541 and 1,375 respectively. One inoculated person was attacked with plague. The total number of such persons attacked since the outbreak is 233, of which the number verified is 158.

IV. The Hospital figures were as follows:—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the week	...	1	...	...	1
Since commencement...	...	2,097	742	1,354	1
Inoculates	...	106	65	40	1

* Imported.

V. The number of houses disinfected during the week was 197 as against 212 in the previous week. Of these 114 were deserted houses, 47 were plague infected, and 36 were locked-up ones, opened under Government Notification No. 5235/Pg. 21-96 dated 15th October 1898.

VI. During the week under report, permission was given to re-occupy 103 houses. No charge was levied for disinfecting 23 houses, 1 house was disinfected by the owner himself, and the charges realized from the remaining 79 amounted to Rs. 147½.

VII. The cost of road work and of construction of buildings in the Basavangudi and Malleswara Extensions, carried out during the week, amounted to Rs. 2,736 as against 4,089 in the previous week, bringing the total amount spent up to date to Rs. 51,236. The number of houses demolished as being unfit for human habitation, was 10, the total number demolished up to date being 445.

VIII. During the week 8 persons were prosecuted for violating the Epidemic Diseases Regulation, as against 3 in the previous week, and two of them were fined Rs. 2 each, and two Re. 1 each, the rest being discharged or acquitted.

IX. During the week 755 incoming passengers or a daily average of 107 were disinfected with their effects at the City Railway Station.

Mysore State outside Bangalore.

The accompanying weekly return shows the state of the Epidemic in the province:—

During the week under report, the number of cases decreased in the Districts of Bangalore, Kolar excluding Gold Fields, Tumkur and Mysore, but increased in Kolar Gold Fields.

In the Bangalore District, excluding Bangalore City, the number of cases dropped from 51 to 24. In the taluks of Anekal and Hoskote, there was a slight rise in the number of cases from 6 and 4 to 9 and 6 respectively, but in all the other taluks there was a decrease in the number of cases, while in the Taluks of Bangalore, Nelamangala and Kankanhalli there were no cases at all. The Taluk of Channapatna for the third consecutive week showed a clean sheet and will be shortly declared free from infection.

The number of infected villages decreased from 31 to 22, of which only 10 reported cases. Of these two were newly infected and two re-infected.

In the Kolar District, excluding Gold Fields, the number of indigenous cases decreased from 16 to 10 and the number of infected villages from 9 to 8. One village was newly infected during the week.

In the Gold Fields, however, the number of indigenous cases increased from 43 to 58 while the number of infected villages decreased from 20 to 19, of which 2 were re-infected.

In spite of the active measures taken to suppress the plague and of the increase in plague itself, there is no symptom of panic among the mine coolies and those that had fled early in the month are reported to be slowly returning.

The following Statement shows the cases and deaths among the several mines for the past 4 weeks:—

Number.	NAMES OF PLACES.	During the week ending 10th March 1899.				During the week ending 17th March 1899.				During the week ending 24th March 1899.				During the week ending 31st March 1899.
