GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

ORDER—No. 698 P., dated 10th May 1899.

Ordered that the following Fortnightly Narrative of the progress of plague for the period from the 23rd April to the 6th May 1899 be despatched to the Government of India.

(True Extract.)

M. HAMMICK,
Ag. Secretary to Government.

To the Sanitary Commissioner.
" Surgeon-General.
" Secretary, Indian Plague Commission.

Exd. A. F. Eccleston.

Fortnightly Narrative.

The plague showed a further decrease during the fortnight under report. Bellary district is now free, while the two cases reported from Kurnool are very possibly not plague. In Anantapur, the disease still lingers in two villages. In North Arcot, Vellore and Ránipéttai continues to be bad. Salem reports nearly the same number of cases as North Arcot but most of them are imported. The following table compares the figures for the current fortnight with those for the past :—

plague

—	Cases reported during fortnight ending 22nd April 1899.		Cases reported during fortnight ending 6th May 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	1	1	3	4
Bellary	5	6	..	..
Coimbatore	..	..	1	..
Kurnool	..	..	2	2
Madras	2	..	..	1
North Arcot	41	28	20	11
Salem	10	10	19	10
Total ..	59	45	45	28

2. In the *Anantapur district* disinfection has been completed in all the affected villages and the people are re-occupying them. The railway inspection station at Tadpatri has been closed and the plague establishments have been considerably reduced. Only two villages reported cases during the fortnight. There were one attack and two deaths at Narsapuram, a small hamlet of 18 houses. In Manepalle, the other village, there were two fatal cases: one was imported from Kolar and the other was indigenous and occurred on the 2nd May.

3. The *Bellary district* is, as stated already, now clean. The disinfection of Hospet will be completed by about the middle of this month and that of Alúr will take the whole of the month. On completion of the disinfection, both the places will be allowed to be re-occupied should no further cases occur.

4. The imported case reported from *Coimbatore* is that of a beggar who came to the local hospital for treatment. The District Medical and Sanitary Officer considers the case to be one of plague, but the source of infection is not known and the patient has escaped. The contacts have however been segregated and the usual precautions taken.

5. In the *Kurnool district*, two cases were reported from Pattikonda, which has been free from plague since the beginning of April. One of these cases occurred on the 30th April and the other on the 4th May. They were reported to be plague by a young sanitary inspector, but the District Medical and Sanitary Officer considers them to be ordinary cases of swelling of the neck probably due to exposure to land wind.

6. The death reported from the *City of Madras* is that of a police constable who returned from Arcot and whose case was reported in the previous fortnight.

7. In the *North Arcot district*, Arcot and Kuppam are clean. Disinfection has been completed in Arcot and nearly so in Kuppam, and in both the places disinfected houses are being re-occupied. Tiruvallam shows a decided improvement. Wallajah reports one case; it had been free for a full fortnight previously. Half of the cases reported from Vellore are stated to be old cases that had occurred in the previous fortnight. In Ránipéttai, the condition of things is bad. Most of the cases there occurred in a paracheri where the surroundings are particularly insanitary, the houses are very small and overcrowded, and the people belong to the Pariah class and tan hides. Difficulty is therefore experienced in stamping out the disease from this quarter.

8. In the *Salem district* Hosúr is practically free, the one case reported being doubtful. The town was evacuated more than a month ago and is now being re-occupied. Mattigiri, Berikai and Shulagiri have all been re-occupied, without any evil effects. The cases at Jalarpet are mostly those of passengers from the Mysore gold mines detained at the railway inspection station. Both the cases at Vániyambádi were imported from Marikuppam in the Kolar district. Nagondapalli has been newly infected with indigenous plague in the fortnight. The source of infection is not known. The village is two miles from Mattigiri, where the patients who belong to the Achari caste have relations. At Mukondapalli, there have been the largest number of indigenous cases in the district. All the people attacked belong to one family and got infected from the person mentioned in the report for the last fortnight.

9. Inoculation continues to be unpopular, the number of operations during the fortnight being only 101 in the whole Presidency.

10. As the plague has been decreasing and will probably continue to do so during the hot weather, the appointment of the Plague Commissioner has been temporarily abolished.

11. The usual statements are appended.

[Statement.

~~NOTE FOR THE~~

No 21 P of 10-5-99

D.O. to the Secretary to the Government of India (Home)

Sir,

In continuation of my letter no. 19 P., d/30th ultimo, I am directed to enclose a narrative of the progress of plague in this Presidency for the fortnight ending the 6th inst:, and to enquire whether, in view of the fact that the plague has already considerably lessened and continues to lessen, the Government of India still wish that similar narratives should continue to be submitted.

Ms 10558.

The plague Commissionership has been held in abeyance during the absence of the Plague Commr on three months leave, and unless plague shows signs of recrudescence with the rains it is not probable that this officer will be reappointed.

10 V. 99.

27.5.99

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

ORDER—No. 698 P., dated 10th May 1899.

Ordered that the following Fortnightly Narrative of the progress of plague for the period from the 23rd April to the 6th May 1899 be despatched to the Government of India :—

The plague showed a further decrease during the fortnight under report. Bellary district is now free, while the two cases reported from Kurnool are very possibly not plague. In Anantapur, the disease still lingers in two villages. In North Arcot, Vellore and Ránipéttai continue to be bad. Salem reports nearly the same number of cases as North Arcot but most of them are imported. The following table compares the figures for the current fortnight with those for the past :—

—	Cases reported during fortnight ending 22nd April 1899.		Cases reported during fortnight ending 6th May 1899.	
	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	1	1	3	4
Bellary	5	6	..	..
Coimbatore	..	..	1	..

2. In the *Anantapur district* disinfection has been completed in all the affected villages and the people are re-occupying them. The railway inspection station at Tadpatri has been closed and the plague establishments have been considerably reduced. Only two villages reported cases during the fortnight. There were one attack and two deaths at Narsapuram, a small hamlet of 18 houses. In Manepalle, the other village, there were two fatal cases: one was imported from Kolar and the other was indigenous and occurred on the 2nd May.

3. The *Bellary district* is, as stated already, now clean. The disinfection of Hospet will be completed by about the middle of this month and that of Alúr will take the whole of the month. On completion of the disinfection, both the places will be allowed to be re-occupied should no further cases occur.

4. The imported case reported from *Coimbatore* is that of a beggar who came to the local hospital for treatment. The District Medical and Sanitary Officer considers the case to be one of plague, but the source of infection is not known and the patient has escaped. The contacts have however been segregated and the usual precautions taken.

5. In the *Kurnool district*, two cases were reported from Pattikonda, which has been free from plague since the beginning of April. One of these cases occurred on the 30th April and the other on the 4th May. They were reported to be plague by a young sanitary inspector, but the District Medical and Sanitary Officer considers them to be ordinary cases of swelling of the neck probably due to exposure to land wind.

6. The death reported from the *City of Madras* is that of a police constable who returned from Arcot and whose case was reported in the previous fortnight.

7. In the *North Arcot district*, Arcot and Kuppam are clean. Disinfection has been completed in Arcot and nearly so in Kuppam, and in both the places disinfected houses are being re-occupied. Tiruvallam shows a decided improvement. Wallajah reports one case; it had been free for a full fortnight previously. Half of the cases reported from Vellore are stated to be old cases that had occurred in the previous fortnight. In Ránipéttai, the condition of things is bad. Most of the cases there occurred in a paracheri where the surroundings are particularly insanitary, the houses are very small and overcrowded, and the people belong to the Pariah class and tan hides. Difficulty is therefore experienced in stamping out the disease from this quarter.

8. In the *Salem district* Hosúr is practically free, the one case reported being doubtful. The town was evacuated more than a month ago and is now being re-occupied. Mattigiri, Berikai and Shulagiri have all been re-occupied, without any evil effects. The cases at Jalarpet are mostly those of passengers from the Mysore gold mines detained at the railway inspection station. Both the cases at Vániyambádi were imported from Marikuppam in the Kolar district. Nagondapalli has been newly infected with indigenous plague in the fortnight. The source of infection is not known. The village is two miles from Mattigiri, where the patients who belong to the Achari caste have relations. At Mukondapalli, there have been the largest number of indigenous cases in the district. All the people attacked belong to one family and got infected from the person mentioned in the report for the last fortnight.

9. Inoculation continues to be unpopular, the number of operations during the fortnight being only 101 in the whole Presidency.

10. As the plague has been decreasing and will probably continue to do so during the hot weather, the appointment of the Plague Commissioner has been temporarily abolished.

11. The usual statements are appended.

(True Extract.)

for *Ag. Secretary to Government.*

To the Sanitary Commissioner.
„ Surgeon-General.
„ Secretary, Indian Plague Commission.

Exd. A. F. Eccleston.

G.O. 20 698 P. Dy 10-5-99

Ordered that the following

18

Fortnightly narrative of the progress of plague for the period from the 23 April to the 6 May 1899 be despatched x to the S. of S.!

x with usual covering D.O.

Despatch copy to H.M. State for information print 13 v 99

The plague showed a further decrease during the fortnight under report. Bellary Dt is now free, while the two cases reported from Kurnool are very ~~probably~~ possibly not plague. In Anantapur, ~~plague~~ the disease still lingers in two villages. In N. Arcot, Vellore and Ranipet continue to be bad. Salem reports nearly the same number of cases as N. Arcot but most of them are imported. The following ~~statem~~ table compares the figures for the current fortnight with those for the past

	Cases reported during f.e. 22-4-99 S.	D	Cases reported during f.e. 6-5-99 S	D
Anantapur	1	1	3	4
Bellary	5	6	"	"
Coimbatore	-	-	1	"
Kurnool	-	-	2	2
Madras	2	"	0	1
N. Arcot	41	28	20	11
Salem	~~9~~ 10	10	19	10
	~~58~~ 59	45	45	28

2. In the Anantapur Dt, disinfection has been completed in all the affected villages and the people are reoccupying them. The Ry inspection station at Tadpatri has been closed & the plague establishments have been considerably reduced. Only two villages reported cases during the fortnight. There were one attack and 2 deaths at Narasapuram, a small hamlet of 10 ~~villages~~ houses. In Manepalle, the other village, there were two fatal cases; one was imported from Kolar and the other was indigenous & occurred on the 2d May.

(houses?

3. The Bellary District is as stated already now clean. The disinfection of Hospet will be completed by about the middle of this month & that Alur will take the whole of the month. On completion of the disinfection both the places will be allowed to be reoccupied should no further cases occur.

4 3. The imported case reported from Coimbatore is that of a beggar who came ~~f~~ to the local hospital for treatment. The D.M.&S.O. considers the case to be one of plague but the source of infection is not known and the patient has escaped. The contacts have however been segregated and the usual precautions taken.

5 4. In the Kurnool Dt, two cases ~~have~~ were reported from Pattikonda, which has been free from plague since the beginning of April. One of these cases occurred on the 30th April and the other on the 4th May. They were reported to be plague by a young Sanitary Inspector but the D.M.&S.O. considers them to be ordinary cases of swelling of the neck probably due to exposure to land winds.

6 5. The death reported from the City of Madras is that of ~~the patient who~~ Police Constable who returned from Arcot & whose case was reported in the previous fortnight.

7 6. In the N. Arcot Dt, Arcot

Arcot & Kuppam are clean. Disinfection has been completed in Arcot and nearly so in Kuppam, and in both the places disinfected houses are being re-occupied. Tiruvallam shows a decided improvement. Half of the cases reported from Vellore are stated to be old cases that had occurred in the previous fortnight. Wallajah reports one case; it had been free for a full fortnight previously. In Ranipet, the condition of things is bad. Most of the cases there occurred in a paracheri where the surroundings are particularly insanitary, the houses are very small and overcrowded, and the people belong to the pariah class and tan hides. Difficulty is therefore experienced in stamping out the disease from this quarter.

7. In the Salem Dt. Hosur ~~town~~ is practically free, the one case reported being doubtful. ~~Mattigiri~~ The town was evacuated more than a month ago and is now being reoccupied. Mattigiri

Berikai

Berikai and Shulagiri have all been re-occupied, without any evil effects. The cases at Jalarpet are mostly those of passengers from the Mysore Gold mines detained at the Ry Inspection Station. Both the cases at Vaniyambadi were imported from Marikuppam in the Kolar Dt. Nagondapalli has been newly infected with indigenous plague in the fortnight. The source of infection ~~has~~ is not known. ~~It is~~ The village is two miles from Mattigiri, ~~the place~~ where the patient who belong to the achari caste have relations. At Mukundapalli, there have been the largest numbers of indigenous cases in the Dt. All the people attacked belong to one family and got ~~their~~ infected from the person mentioned in the report for the last fortnight.

9 A. Inoculation continues to be ~~ups~~ unpopular, the number of operations during the fortnight being only 101 in the whole Presidency.

9. 10 As the plague has been decreasing & will probably continue to do so during the hot weather, the appt of the Plague Commr has been temporarily abolished.

10. The usual statements are appended

Statement showing the Plague report

Kurnoo
5/5/9

Memo on plague matter
for the fortnight ending 5/5/

HS

FN

Two fatal cases were repor
from Pattikondah by a yau
Sanitary Inspector there. I hav
received no report on this ma
from the Tahsildar. The two ca
are said to have occurred on th
30th ultimo & 4th instant. Dr
O'Hara who was encamped
at Pattikonda for about 10 day
immediately before the date of
the first case tells me that many
of the inhabitants of Pattikonda
were found by him exposing
themselves at nights and
that they had ~~the~~ also some
swelling in the neck solely
due to the exposure. He sai

his neck when he was
Pattikonda & slept out.
e thinks that the cases
in question might have been
eported by the Sanitary
nspector out of fear that he
would be otherwise found
ault with, and that they were
robably not plague cases. Dr
O'Hara will now proceed there.
The Divisional officer has already
gone thither to make inquiries
as to the nature of the cases and their
causes. The Sanitary Inspector
seems inexperienced and will
be removed if the reports of
Dr O'Hara & the Divisional
officer disclose that they were
not plague cases.

2. The health of Maddikera,

[illegible]

Statement showing the Plague report

No. 1599 Office of the Addl Medl Officer
Hindupur Dated 27th April 9

From John Hunter Esq M.B.
Addl Medl Officer Hindupur

30/4

To The Plague Commissioner
Madras.

Sir

I have the honor to report that one death of an old case & a fresh attack which also proved fatal has occurred during the week at Narasapuram. The patient had lived, before evacuation of the village in the house adjoining to the infected one. The Coolies are at present engaged in disinfecting Narasapuram.

The establishment in this division has been further reduced by the dismissal of four Sanitary Inspectors one Supervisor and some servants in the Plague camp, the orders for which were received yesterday.

I have the honor to be
Sir
Your most obedt Servt.
Hunter

Report of the Deputy Collector on Plague Duty at Hindupur for the week ending Thursday the 6th May.

On the 25th April a man from Madanapalli visited a village in Kolar District. He is said to have returned to Madanapalli on the 27th with fever and a bubo under his left arm. He was segregated in the fields but died on the 1st instant. Another indigenous case was also reported from the same village on the 2nd instant. There have, however, been no further attacks at the village and other parts of the District remain free.

The Disinfection of Hindupur

dis 5/5

Weekly progress report of Plague cases A[illegible] Spet Taluk for the week ending Thursday the 27th April 99.

1. No of attacks from Friday the 21st April & Thu
No of deaths from —— do ——, nil

2. Measures taken & the success they meet with.
The disinfection of houses in Chitwadiji has been Completed. No fresh measures taken during the week. The disease seems to be disappearing.

3. The attitude of the people.
The people are allowed to enter the town & take out things they require from their homes on special passes. No person is allowed to slip into the town without a pass. A list of the poor for the supply of thatch grass to make their huts watertight is being prepared. On the whole all are very eager to go into the town & occupy their homes.

Weekly progress report of Plague cases Hospe
Taluk for the week ending Thursday the
4th May 1899.

1 No of Attacks from Friday the 28th — nil
No of deaths from Friday the 28th — nil.

2. Measures taken & the success they meet with.
No fresh measures taken during the week. The disease has disappeared since the 9th ultimo. The disinfection work has almost been completed.

P.C.
6 - MAY. 1899

3. The attitude of the people.
The poor are being supplied with thatch grass to make their huts water tight. The people are anxious to go back into their houses in the town. A few days more must pass before they can be permitted to do so.

5-3-99

29/4/99

Khenpol
21/4/99

Memorandum on plague matters for the fortnight ending the 21st Instant.

No cases of plague occurred in the District during the fortnight. In the previous fortnight there were one death at Maddikera one attack & one death at Peruvali and three attacks and two deaths at Pattikoudale.

The inhabitants of the Fort portion of Maddi-kera who had evacuated their houses and been living out in the fields

77

for over a month complained to me about the end of the last month of the difficulties and inconvenience they were put to and begged leave to reoccupy their houses before the Telugu new year's day (11th Instant). The matter was referred by me for opinion to the D.M.S.O who, however, instead of furnishing me with his remarks, allowed the persons on the 7th Instant to return to their homes after thorough disinfection. Intimation of this fact reached me only on the 15th Instant and I have not thought it necessary to disturb the D.M.S.O's order as one month has elapsed since the date of the last case in

2

the village (attack 17th and death 22nd March). A similar permission will be accorded on the 1st proximo to the owners of the evacuated houses in Pattikonda & Peruvali, if no cases occur there meanwhile.

2. I would strongly urge again the expediency of the immediate abolition of the observation circles and the dispensing away with the services of the staff of Sanitary Inspectors and supervisors &ca as already recommended by me, as they have absolutely nothing to do.

Plague Diary

For week ending 27th April '99

To,

The Plague Commissioner,
Fort St. George,
Madras.

WH
JN

Sir:-

I beg to submit the following

Attacks- 0, 1, 0, 0, 1, 2, 0 = Total 4.

Deaths- 1, 0, 0, 0, 1, 0, 0 = Total 2.

Course of Disease. The town has been practically free from indigenous plague. The only indigenous cases discovered were in each instance old ones i.e., had been going on for at least 10 or 15 days before discovery. Two imported cases one from Ranipett and the other from Veppampat were discovered.

Disinfection According to verbal

verbal information received from the Sub Collector we refrained from removing tiles of the plague infected houses, but the disinfection etc, are going on as usual.

Practically no improvement.

Sanitation

Camp Segregation

The Segregation camp is empty. Great difficulty owing to lack of funds has been experienced in provisioning the camp. There is a considerable amount of grumbling among the staff owing to the delay in receiving pay. The greater part of the plague camp was wrecked by the wind on Tuesday night. One of the plague wards containing 2 patients was blown down. The patients though very frightened were not in any way injured. At present the camp contains 3 cases, viz 2 males males (Convalescent) and 1, female

Concealment of cases and Surruptitious burial

Since my last diary there were 5 more cases discovered in Sankarampolliam which is adjacent to Velapadi and from where the greater portion of the residents and inhabitants of this town obtain their supply of milk and butter. The bodies were removed and surruptitiously buried at dead of night and therefore having been prevented from medical examination and the causes of death thereby not being clear beyond suspicion they were treated as plague, and the houses in which the deaths occurred and those of the contacts who were concerned in the surruptitious burials were consequently disinfected. 2 of the bodies were buried not very deep, in a field which is not

not a Licensed burial ground,
about 400 yards from Sankaram polliam
and so had to have lime thrown over
the graves and earth to the height of
about 2½ feet heaped over them.

Attitude of the people

Coolies of the disinfecting Staff.

The measures taken are the same as those previously reported, and appear in Wallaja to have been thoroughly successful - which I think is attributable in a great degree to the town being kept in a fairly sanitary condition. Till the last case reported Wallaja had been free from a fresh case of plague for 14 days.

In Ranipett they have not met with the same success - which I think may be attributable to its unsanitary condition.

In Ranipett proper there are however only 3. Cases on hand, the others being ~~being~~ in the Villages of the Vannum, Karai, and Pinjee Paracherry.

In Pinjee Paracherry the plague seems of severe type, the ~~4~~ 5 deaths during the past week have all occurred in this Village. The surroundings of this Village are particularly unsanitary - the houses are very small and overcrowded; the people of pariah caste mostly employed the tanning trade. Their habits are filthy, and they are very ignorant.

The use of the thermometer is not understood by them - They believe it is an instrument of which there are three kinds - one which causes death shortly after use (insertion under the armpit to take temperature) one which causes the patient to linger for a long time and then die.

One which causes the patient to recover of course I endeavoured to disabuse them of the idea -

The Plague Commissioner
Madras

Sir,

I have the honor to report as follows upon Plague operations in Arcot during the week ending 4th May 1899.

Plague operations

There have been no Plague attacks or deaths & no houses have been disinfected.

I have carried out the reductions in Establishment referred to in my last week's report.

The Collector has asked me to state approximately when the Sepoy Detachment here* can be withdrawn & I have replied that as far as Sanitary Duty is concerned it can be withdrawn at once.

* Strength
1 Native officer
8 Non-Comd. officers
61. Private

There are now no persons under segregation in Arcot union & only one case of Plague under treatment. This patient is convalescent but cannot yet be discharged owing to complications arising from the original disease

I have nothing fresh to report under this head.

Attitude of the people

A case of breach of Plague Regulations having occurred about 3rd April the Sub Collector has sanctioned the prosecution of the individuals concerned & the case was filed before the Stationary Sub Magistrate of Arcot Taluk this week.

A case of extortion by a Police Constable in which Dr Lubeck is a witness has been referred to the District Superintendent of Police by the Collector for prosecution but so far I have received no information as whether prosecution has been instituted or not.

I mention these cases in view of the possibility of my or Dr Lubeck's early removal.

The weather is now very hot

Kuppam.
27. 4. '99.

Sir,

In continuation of my No 279 dated 20. 4. '99, I have the honour to report that ~~the~~ during the week ending to-day there have been no cases of Plague in Kuppam or its vicinity. There was one death from Plague at Patrapalle Road Frontier Station on the 19th instant, imported from Mysore. The Camp returns for the week are as follows.

Patients

Remaining since last return	4.
Admitted since	Nil
Discharged	3.
Died	Nil.
Remaining.	1.

Contacts.

Remaining since last return.	6.
Admitted since.	Nil.
Discharged.	4.
Remaining.	2.

2. Only about one hundred houses remain to be disinfected; these are chiefly those of the better sort, whose owners are residing at some distance. I have arranged to send them word through the Police, but I expect it will be some time before these houses are finished. Should this prove to be the case, I would propose that notices be placed on the doors prohibiting their re-occupation until they have been thoroughly disinfected, which work might be left to the Deputy Tahsildars. This would obviate the necessity of retaining the detachment of the 14th Madras Infantry.

3. I also propose to allow the people to re-enter their houses ~~from~~ (provided they have been disinfected) from the 1st prox; this may also have the effect of inducing people

whose houses have not been disinfected, to come in more readily.

4. The one patient in Camp, remains in a critical condition, and the Medical Officer is unable to say how soon she will be fit to be moved. The two contacts are her two children.

P. C.
5 - MAY. 1899

Sir,

In continuation of my No 300 of 27.4.99. I have the honour to report that for the week ending today, there have been no cases of Plague in Kuppam or its vicinity. The Camp returns for the week are as follows.

Patients.

Remaining since last return	1.
Admitted since	Nil
Discharged	Nil.
Died.	Nil.
Remaining.	1.

Contacts.

Remaining since last return	2.
Admitted since	Nil
Discharged	Nil
Remaining.	2.

2. The people have been allowed free ingress to Kuppam since the 1st inst: but are very slow in availing themselves of it, consequently all the houses have not been disinfected. The people tell me that they will not come into Kuppam until the detachment of sepoys, and the Plague Establishment have left, and I would again recommend that the detachment be withdrawn, and the disinfection of the remaining houses left to the Deputy-Tahsildar.

3. I would also solicit instructions as to the disposal of the Ambulance Staff, as to whether they should return to Headquarters at Palmaner, or be broken up here in Kuppam. I consider that either course can now be taken, as arrangements can be made for the only remaining patient to be left in charge of the Hospital Assistant at the Local Dispensary.

As soon as these matters are disposed of, I shall start inspecting the work of the Supervisors and Inspectors in the Districts. 4.

I have the honour to be

Sir

Your obedient servant

H. P. Ainslie-Lieut.

Special Plague Officer

Abstract weekly report to the Plague Commissioner – Madras, for week Ending April 20th

There has been one imported case of plague at Krishnagiri since last report.

A butcher of Krishnagiri carrying on trade at Bisanatham on the 12th instant; he halted near Narelapalli & bullock cart was engaged at Krishnagiri to bring him there. He arrived at Krishnagiri on the 13th instant, evidently suffering from plague. He had no passport & the matter was not reported to the authorities. The case was discovered, however, the same date & the man segregated in some sheds belonging to him outside the town.

The 3 Contacts who accompanied him from Oogam also segregated with all occupants of house & 2 others who had had access.

The man died on the 16th Instant.

The house has been partially untiled & disinfected in usual manner & both the bandies in which he was brought & removed, disinfected & exposed.

At Berikai.

There has also been one indigenous case, though infection seems clearly imported. The man is a bandsman & resident of Paracheri quarter, outside the village proper & this has never been evacuated nor has any case occurred there till now. He has been in the habit of ~~or~~ some time of going to & fro. Sarjapuram an infected area in Mysore. He took some people ~~from~~ Berikai thither about 13th or 14th Instant. On return from journey on the 17th, he was taken suddenly ill & the people removed him at once to a hut outside the village. ~~I~~ found him with a commencing bubo in left groin. He was removed to Hospital & died 2 AM. this morning. The people (2 mohammadans) he brought in were passported & are being observed & segregated in their own house, outside main part of town.

All the contact & family of bandsman are removed & segregated outside town & the quarters occupied by themselves & relations completely disinfected.

At Sulagiri reoccupation has been sanctioned by the Collector & people are gradually coming in. I am requesting the Collector's sanction for reoccupation of Oshalli village. I have received notice from the District Medical & Sanitary officer, Salem to take over charge of observation groups I & II in addition. This I shall do at the commencement of the week.

Cases for the week ending
Thursday 20th April 99

C No 4746

Weekly report

To. The Plague Commissioner
Madras

for the week ending Thursday
27th April 1899.

Sir,

There have been no fresh attacks or deaths in Hosur Sheds or in hospital, but there have been three attacks and two deaths at Mukondahalli in a separate family from that reported on 21st ultimo. After the 1st death occurred in the village the contacts 5 in number were removed to the Plague Sheds at Zuzuwadi frontier inspection station, among whom there were 2 attacks and 1 death.

The father of the family (one of the 5 contacts) was in the habit of visiting the toddy shop, where case reported on 21st occurred and seems to have given infection to rest of the family - his son and daughter died first and he and another member of his family are now ill. Half the village was already evacuated. The remainder were making preparations for erection of accomodation. They have been directed to carry this out speedily.

In the Maharajagadai Circle dead body of a man was discovered of some days standing: left about 10 yards from the Gorgam byepath by which most of imported cases at Krishnagiri have arrived. The relatives (contacts) were discovered at Elathagiri and by them his death is fixed about 21st as the man came from Marikuppam and died on the way and his son deserted him this maybe considered a probable case of Plague. The body was cremated where it lay - the family of the man were discovered at Elathagiri and segregated together with all the other occupants of house. This and adjoining other thatched houses were burnt as of little value.

I took over charge of both Groups I & II since 25th but have ever since been suffering from a sharp attack of fever.

I have the honour to be,
Sir,
Your most obedient Servant
