Plague Report Kurnool District

1.	Name of town or village	Dhone Ramallakot Taluq
2.	Population of town or village	2 500
3.	Plague Cases up to date of last report	No. of Seizures Nil No. of deaths Nil Date of last report Nil
4.	Date of present attack	11. 12 98
5.	When reported by telegram	
6.	Imported or Indigenous?	
7.	Brief history of case	
8.	If imported had patient a passport	
9.	Steps taken to isolate & treat the patient	The patient was under observation by the local Hospital Assistant who found her with high fever on the 16th morning (temperature 105°) had her removed same night to a temporary shed outside the village run up by the Inhabitants was treated for fever by the Hospital Assistant. Her temperature at was 103° at 8 p.m 105°. At night she complained of pain in the throat was restless. At 1 A.m. on 17th she died.
10	Steps taken towards the segregation of contacts	The woman being removed to the shed the whole house was thoroughly disinfected as, also the clothing, and persons of the contacts who were then segregated in a portion of the same house, and are under observation there.
11	Steps taken towards the evacuation & disinfection of the infected house	The house was not evacuated but on removal of the patient it was thoroughly disinfected, and as there were no other quarters available for the contacts they after disinfection were segregated in a portion of the same house.
12.	Was there any opposition on the part of the inmates of the infected house or of the people of the village to the Plague measures	Nil.
13.	Remarks.	On receipt of a wire from the Hospital Assistant of Dhone on the 16th at 6 p.m reporting that this patient had high fever, I enquired by wire to report again how she was by the end of the end. At night received

a wire from him she had still high fever. Early next morning he wired again she was dead. On this I proceeded at once to Dhone with The corpse had been cremated before our arrival. From Hospital Assistants' report Dr. Power is inclined to think was a suspicious one. The patient had however no pneumonia. I examined the contacts who are segregated disinfected house and found them all healthy
