MAY.

Fortnightly Narrative of the Progress of Plague in the Madras Presidency.

Ordering the despatch of the — for the fortnight ending the 20th May 1899.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

Order—No. 783 P., dated 29th May 1899.

Ordered that the following fortnightly narrative of the progress of plague for the period from 7th to 20th May 1899 be despatched to the Government of India.

(True Extract.)

for *Ag. Secretary to Government.*

To the Sanitary Commissioner.
„ Surgeon-General.
„ Secretary, Indian Plague Commission.

Exd. A. F. Eccleston.

FORTNIGHTLY NARRATIVE.

The plague continues to diminish and the special plague establishments are being reduced in all the affected districts. The following is the abstract of cases reported during the fortnight, as compared with the figures for the previous fortnight :—

District.	Imported cases.				Indigenous cases.			
	Previous fortnight.		This fortnight.		Previous fortnight.		This fortnight.	
	Seizures.	Deaths.	Seizures.	Deaths.	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	1	1	..	..	2	3	..	..
Bellary	..	..	..	..	..	..	2	2
Coimbatore	1	..	..	..	..	..	..	..
Kurnool	..	..	..	..	2	2	..	..
Madras City	..	1	..	..	..	..	..	..
North Arcot	1	1	..	..	20	10	13	4
Salem	11	4	3	4	8	6	1	1
Total ..	14	7	3	4	32	21	16	7

2. *Imported cases.*—The three attacks in the Salem district took place at Tiruppattúr, Krishnagiri and Begepalli. In all cases the patients were segregated and the usual precautions taken.

3. *Indigenous cases.*—Of the thirteen cases reported from North Arcot, ten occurred at Ránipéttai, which is at present the chief centre of indigenous plague in the Presidency. The Collector states that the disease there has now assumed a mild form. The other three cases took place, one on the 8th May at Vellore and the other two at Tiruvallam. In the Salem district, there was one case on the 7th at Periabelagondapalli; otherwise the district was free from plague. Bellary district, which did not report any cases last fortnight, had two cases during the period under report. One was that of a Madiga girl in the fields of Alur and the other that of a cooly who had been assisting the sepoys in Alur in disinfecting houses where dead rats were found. The districts of Anantapur and Kurnool are now free. The two cases of the latter district mentioned in the last narrative are now reported to be genuine.

4. With the decline of plague the inoculation figures show a corresponding decrease. During the week ending 6th May, there were but 31 inoculations in Bellary, 2 in Madras and 5 in North Arcot, and during the next week the total number of operations was only 9, of which 3 were in Madras and 6 in Bellary.

5. The detailed statement of plague cases is appended.

Print as order here and F. N. as appendix as was done last time (Sample copy sent herewith)

~~Read—the following paper:—~~

~~Fortnightly Narrative.~~

The plague continues to diminish and the special plague establishments are being reduced in all the affected districts. The following is the abstract of cases reported during the fortnight, as compared with the figures for the previous fortnight:—

District.	Imported cases.				Indigenous cases.			
	Previous fortnight.		This fortnight.		Previous fortnight.		This fortnight.	
	Seizures.	Deaths.	Seizures.	Deaths.	Seizures.	Deaths.	Seizures.	Deaths.
Anantapur	1	1	..	..	2	3	..	..
Bellary	..	..	..	..	..	..	2	2
Coimbatore	1	..	..	..	..	..	..	..
Kurnool	..	..	..	..	2	2	..	..
Madras City	..	1	..	..	..	..	..	..
North Arcot	1	1	~~2~~	..	20	10	~~11~~ 13	4
Salem	11	4	3	4	8	6	1	1
Total ..	14	7	~~5~~ 3	4	32	21	~~14~~ 16	7

2. *Imported cases.*—~~Of the two cases in North Arcot, one occurred at Tiruvallam and the other at Ránipéttai.~~ The three attacks in the Salem district took place at Tiruppattúr, Krishnagiri and Begepalli. In all cases the patients were segregated and the usual precautions taken.

3. *Indigenous cases.*—Of the ~~eleven~~ thirteen cases reported from North Arcot, ~~nine~~ ten occurred at Ránipéttai, which is at present the chief centre of indigenous plague in the Presidency. The Collector states that the disease there has now assumed a mild form. The other ~~two~~ three cases took place, one on the 8th May at Vellore and the other two ~~on the 10th~~ at Tiruvallam. In the Salem district, there was one case on the 7th at Periabelagondapalli; otherwise the district was free from plague. Bellary district, which did not report any cases last fortnight, had two cases during the period under report. One was that of a Madiga girl in the fields of Alur and the other that of a cooly who had been assisting the sepoys in Alur in disinfecting houses where dead rats were found. The districts of Anantapur and Kurnool are now free. The two cases of the latter district mentioned in the last narrative are now reported to be genuine.

4. With the decline of plague the inoculation figures show a corresponding decrease. During the week ending 6th May, there were but 31 inoculations in Bellary, 2 in Madras and 5 in North Arcot, and during the next week the total number of operations was only 9, of which 3 were in Madras and 6 in Bellary.

5. The detailed statement of plague cases is appended.

Statement showing the progress of Plague in the Madras Presidency.

Of the two Cases in

In No. 8 P

7 **Fortnightly Narrative**

The plague Continues to diminish and the special plague Establishments are being reduced in all the affected districts. The following is the abstract of Cases reported during the fortnight, as compared with the figures for the previous fortnight.

District	Imported Cases				Indigenous Cases			
	Previous fortnight		This fortnight		Previous fortnight		This fortnight	
	S	D	S	D	S	D	S	D
Anantapur	1	1	–	–	2	3	–	–
Bellary	–	–	–	–	–	–	2	2
Coimbatore	1	–	–	–	–	–	–	–
Kurnool	–	–	–	–	2	2	–	–
Madras City	–	1	0	–	–	–	–	–
North Arcot	1	1	2	x	20	10	11	4
Salem	11	4	3	4	8	6	1	1
Total	14	7	~~56~~ 3	4	32	21	~~14~~ 16	7

x information not available will be obtained by telephone

2. **Imported Cases.** The ~~Case in~~ Madras was ~~imported from~~ Of the two Cases

North Arcot, one occurred at Tiruvallam, and the other at Ranipet. The 3 attacks in the Salem took place at Tirupattur, Krishnagiri and Begepalli. In all cases the patients were segregated and the usual precautions taken.

3. Indigenous Cases. Of the 11 Cases reported from North Arcot, nine occurred at Ranipet, which is at present, the Chief Centre of indigenous plague in the Presidency. The Collector states that the disease there has now assumed a mild form. The other two cases took place, one on the 8th May at Vellore, and the other on the 10th at Tiruvallam. In the Salem District, there was one case on the 7th at Periabelagondapalli; Otherwise the district was free from plague.

Bellary district, whi did not report any Ca last fortnight, had t Cases during the perio under report. One wa that of a Madiga gir in the field at Alur and the oth that of a Cooly who had been assisting the Sepoy in Alur in disinfecting houses where dead rats were found. The Districts of Anantapur and Kurnool are now free. The two cases of the latter district mentioned in the last narrative are now reported to be genuine.

4. With the decline of plague, the inoculation figures show a corresponding decrease. During the week ending 6th May, there were but 31 inoculations in Bellary, 2 in Madras and 5 in North Arcot and during the next week the total number of operations was only 9, of which 3 were in

and 6 in Bellary. The detailed statement of plague cases is appended.

23/5/99

25/5/99

Statement of inoculations at the end of the statement of plague cases will have to be struck out.

3

8. In the *Salem district* Hosúr is practically free, the one case reported being doubtful. The town was evacuated more than a month ago and is now being re-occupied. Mattigiri, Berikai and Shulagiri have all been re-occupied, without any evil effects. The cases at Jalarpet are mostly those of passengers from the Mysore gold mines detained at the railway inspection station. Both the cases at Vániyambádi were imported from Marikuppam in the Kolar district. Nagondapalli has been newly infected with indigenous plague in the fortnight. The source of infection is not known. The village is two miles from Mattigiri, where the patients who belong to the Achari caste have relations. At Mukondapalli, there have been the largest number of indigenous cases in the district. All the people attacked belong to one family and got infected from the person mentioned in the report for the last fortnight.

9. Inoculation continues to be unpopular, the number of operations during the fortnight being only 101 in the whole Presidency.

10. As the plague has been decreasing and will probably continue to do so during the hot weather, the appointment of the Plague Commissioner has been temporarily abolished.

11. The usual statements are appended.

Chittoor.
May 15th 99.

MAY 1899

My dear Hammick

This is my fortnightly D.O. narration of Plague from the 5th to the 18th inst. We have had the following cases in the District

Vellore — 1 attack 2 deaths
Ranipet — 10 attacks
Tiruvallam — 2 attacks 1 death
Kuppam — 1 old death.

In Vellore there have been no attacks since the 7th. The disease at Ranipet seems to have assumed a mild form

---

C No 4951

P.C.
13 MAY 1899

Deputy Collector on Plague duty for the week ending Thursday 1899.

have been no fresh cases of during the week. The last that reported on the 2nd instant.

during the week visited , Rangi, Narasapuram, Devan Nancepalli and found everything quiet

W. S. Marshall
Dy Collector on P duty
11. 5. 99

gregated in the fields.

STATEMENT showing the number of persons inoculated during the fortnight ending 29th 13 May April 1899.

Serial number.	Name of district.	Number.
1	Arcot, North	~~39~~ 5
2	Bellary	~~59~~ 37
3	Madras	~~3~~ 5

I have been reducing estab-lishments all round & shall continue to do so as far as possible. If no more Plague occurs in Vellore, I think Ffrench's services might be dispensed with at the end of this month. It would be well to keep on young Mayne with an observation staff; & Capt Allenby had better stay on at Ranipet until the Plague abates there. I propose to abolish the observation circles on the Mysore Frontier. They are doing no good. I have already recommended that the services of Pearse & Ainslie Special Plague Officers at Arcot & Kuppam may be dispensed with & am awaiting your orders.

We have no Sepoys now except 50 at Vellore who are retained only for guard purposes & will not form any burden on Plague funds unless Plague breaks out again.

Yours Sincerely

C W 4951

P. C.
13 MAY. 1899

Deputy Collector on Plague Duty
for the week ending Thursday

20.5.99

My dear Mr Hammick

Although the fortnight ending 6.5.99 presented a clean sheet, there were 2 cases of plague, both fatal, at Alur during the fortnight ending today. One was that of a madiga woman in the fields, & the other that of a cooly who had been assisting the sepoys in disinfecting houses where dead rats

Progress report of plague in Alur taluk for the week ending 11-5-99.

Plague.
D.O.P. 75/12-5-99

There was one case of plague during the week in Alur fields: one Eyakka of Madiga caste aged about 12 years was found to be suffering from fever on the evening of 6-5-99. The Additional Med. officer on plague duty examined her & she had the following symptoms:–

Tongue – dark brown; temperature 102°, eyes blood shot, gait unsteady.

She had no buboes but ~~had~~ 13 motions. The medical officer declared it to be a case of plague of abdominal type. She died on the following morning. The burial was ~~conducted~~ made with due precautions. The shed in which she was put up was completely burnt & so also the articles in contact with her.

The Madiga Quarters at Alur are separated from the fort only by a road. This was ordered to be evacuated. After

Progress report of Plague in Alur Taluk for the week ending 11-5-99.

Plague. Vide 75/12-5-99

There was one case of plague during the week in Alur fields. One Eyakka a Madiga aged about 12 years was found to be suffering from fever on the evening of 6-5-99. The Additional Medl. officer on plague duty examined her. She had the following symptoms:-

Tongue - dark brown; temperature above 102°, eyes blood shot, gait unsteady.

She had no buboes but ~~had~~ motions. The medical officer declared it to be a case of plague of abdominal type. She died on the following morning. The burial was conducted with due precautions. The shed in which she was put up was completely burnt & so also the articles in contact with her.

The Madiga Quarters at Alur are separated from the fort only by a road. This was ordered to be evacuated. After evacuation she got fever. The family of the deceased removed itself ~~from~~ to the fields. The recent rains might have carried the infection to the Madiga Quarters.

But I beg to state that in cases of Plague in choleraic form so far as observed by me in Narakallu fever is generally absent in the choleraic stage & that fever comes in after motions & vomitings cease and that bubos appear after two or 3 days' fever.

P Venkatachalam
Ag. Tahsildar.

12.5.99

The Plague Commissioner
Madras

Weekly progress report of Plague cases Hospet Taluk for the week ending Thursday the 11th May 99

14/5/99

(1) No of attacks from Friday the 5th May 99 nil

No of deaths ____ or ____ nil

(2) Measures taken & the success they met with.

No fresh measures taken during the week. The disease has totally disappeared since 9th April 99. The disinfection of almost all the houses has been completed and the disinfection of drinking water well is progressing

(3) The attitude of the people.

The people are all free from any symptoms of Plague. The poorer classes are all supplied with thatch grass. But the whole population is very anxious to enter the town & reoccupy their forsaken homes but I am advising them to get themselves inoculated before they could be permitted to go back, but they are not coming forward. The inoculated people may be ~~fir~~ first let in as an encouragement. Cholera is very rife in Narayandevarkeri & there were 2 or 3 imported cases in Hospet recently. There are very many fever cases in fields and also deaths among them. Each fever case is carefully examined by the medical officer and ~~Tahsildar~~

P.T.O.

To
The Plague Commissioner

No of deaths ——— do ———; nil.

MAY 1899

NJ

2. Measures taken & the success they meet with.

No fresh measures taken during the week.

The disease has totally disappeared. The disinfection of houses both in Hospet and Chitwadigi is completed.

3. The attitude of the people.

The people of Hospet and Chitwadigi suffered very much for the heavy rain fall on the night of the 15th instant & they were very eager to go into the town. They were inclined to be trouble-some. The district medical and Sanitary officer on examination of the disinfection work recommended the reoccupation. Accordingly the Collector permitted the reoccupation giving priority to the inoculated. The people are now glad.

13 MAY. 1899

~~From~~

The Special Plague officer
Arcot.

To.

The Plague Commissioner
Madras.

Sir,

I have the honor to report as follows upon Plague operations in Arcot during the week ending 11th May 1899.

Plague operations

There have been no attacks or deaths from plague during the week & no houses have been disinfected.

The Detachment of 1 Native officer, 8 non-commissioned officers & 61 privates of the 4th Madras Infantry left Arcot & returned to their Regimental Head quarters on the 8th instant.

The Supervisor (Mir Kutbuddin) resigned his appointment on the Arcot Union Plague staff to day. His work is now being done by the Sanitary Inspector & the appointment of Supervisor has not been filled up.

W.H.S.

I have received orders to return to Military Duty in ten days time.

[illegible]

I am employing the Circle inspectors still retained here on observation duty until I receive orders from the Collector that they may

Please see C No 4911 put up. M.H.S. 13/5/99

W
CA

No. Dated 6th May 1899.
L No 4898

From
Dr. L. Virtue Tebbs
additional medical officer
Hosur.

To
The Plague Commissioner
Madras.

Sir,

I have the honour to submit my abstract report for the week ending May 6th 1899.

Group I Denkanikota Supervisor Mr. Hodding has been on sick leave. Nothing of importance to note in past week.

Group II Mattigiri. In the Hosur sheds on 30th Ult. in Mahomadan camp there was a suspicious death of a girl Fathima Bee (age 3½ yrs). Case not reported here till after death and burial.

I learn the girl had been ill 3 or 4 days previously with fever - a hut of very temporary and rapid construction (a mat over a few bamboos) was at some distance from the shed in which famil lived to which they say the child was remov on being found to be ill. It had not however been previously noticed by the

Sanitary Inspector whose business it

is to patrol these camps.

Enquiries lead one to suppose that

the child who at all events ill for some

days in shed with rest of family and it

is probable that the corpse only was

brought out to the isolated hut erected

for the purpose.

The father of deceased (a priest) whose

presence is required at every Muhamadan

death and burial was reported as suffering

from plague on 30-3-99 he was discharged

recovered on 10.4.99.

At that time it was said there was no

female member in their shed - It now

appears that the deceased girl must

also have been a contact at that time

- who as well as wife of elder brother of

deceased (as besides this woman there

was none in their house in whom they

could depend for their meals) were

conveyed away to the house of relatives.

The usual plague precautions taken

- shed & temporary hut burnt. Contacts

disinfected and isolated. A police guard

placed over them.

beyond Matigiri in Denkanikota road). There

have occurred 3 deaths with symptoms of

plague, during the week.

Case I Boy age 5 yrs attacked 29-4-99 died 30-4-99

Case II Male " 18 " attacked 29-4-99 " 1-5-99

with symptoms pneumonic plague

Case III Female " 6 yrs. attacked 1-5-99 " 3-5-99

These cases were not reported by the village

authorities. The circle Inspector came to know

of after the death of 2nd case. The first 2

cases both belong to Achari caste of goldsmiths

the houses in which the 3 cases occurred in

are in different quarters of the village but

the families are related. They are in

the habit of going from village to village

in search of work - these people have

relatives at Matigiri and have been in

the habit of visiting them. The first 2

families had several bags of paddy,

ragi, and bratties and some charcoal.

The grain might have been brought from

one of the infected villages. I find that

the village munsiff a short time back

found some dead rats in his house

and saying nothing to any one left the

[illegible] frequently.

village on the 27th ult. going to Gummapuram 10 miles away where his wife has a house. This man I think should be prosecuted and serious notice taken of his conduct – as being the village authority. He has been summoned to return to the precincts of his village

The whole village has been completely evacuated by my order. The infected houses untiled and disinfected – including that of the village Munsiff. The people have been ordered to remove all their goods into the fields and leave their houses open; I have burnt a quantity of rubbish, rags and bags from the shed or huts the contacts are occupying in the fields. The whole village will be disinfected later – as with infection spread by rats it is impossible to say how far infection has been carried.

At Mukundapalli near Zuzuwadi

No fresh cases this week. This village also has been completely evacuated and people are ~~evacuated~~ encamped in the fields. The house from which the 5 contacts were removed last week (of whom 3 have developed plague) is an isolated one. The thatched roof being pulled down the whole place was thoroughly destroyed by fire with all contacts on the spot. The contacts and all they brought with them being disinfected on entry to the plague shed at Zuzuwadi Frontier Inspection station to which they were sent as I am insisting on the people taking all their goods with them into the fields and leaving their houses open. I do not think there should be any recurrence or further attacks here.

The permission to reoccupy Hosur town was issued this week by the Plague Divisional Officer – and is extended to all except the Muhammadans who give much trouble in continuing to conceal their cases. The ambulance nurse has been directed to visit these carefully and frequently.

The whole village will be disinfected later – as with infection spread by rats it is impossible to say how far infection has been carried.

At Mukundapalli near Zeyawadi

No fresh cases this week – This village also has been completely evacuated and people are ~~evacuated~~ encamped in the fields. The house from which the 5 contacts were removed last week (of whom 3 have developed plague) is an isolated one. The thatched roof being pulled down the whole place was thoroughly destroyed by fire with all contacts on the spot. The contacts and all they brought with them being disinfected on entry to the plague shed at Zeyawadi Frontier Inspection station to which they were sent as I am insisting on the people taking all their goods with them into the fields and leaving their houses open. I do not think there should be any recurrence or further attacks here.

The permission to reoccupy Hosur town was issued this week by the Plague Divisional Officer – and is extended to all except the Muhamadans who give much trouble in combining to conceal their cases. The ambulance nurse has been directed to visit there carefully and frequently.

Group III Shulagiri no returns of Plague

The efforts of Inspectors have been directed to watching the festivals at Kurubarapalli and Berikai – patrolling the byepaths and keeping people from infected villages from coming in.

About 20 persons from Mysore - Kolar District coming through the Kuppam byepath to attend the Vepanapalli Shandy were turned back: a number of persons also from Krishnagiri were observed going to Bargam to attend the shandy there through the Kamasamudram byepath.

The steps recommended to guard these channels into the infected areas of Mysore seem still in abeyance though backed by the Sub Collector Hosur – for withdrawing the persons of the frontier stations to the west and concentrating them on this side to patrol the ghat road leading to Vepanapalli, Maharajagadai and Krishnagiri at which latter 5 imported cases have already occurred.

At Berikai the contacts of the case of plague in which death occurred 20th Ult. have been discharged well – after disinfection.

In Group IV there is nothing further of importance to note this week.

I am making arrangements to transfer the remainder of 2d ambulance staff to Krishnagiri to be ready for emergencies.

2 cases of cholera are reported at Kandaikuppam.

I have the honour to be,
Sir,
Your most obedient servant
