BACK PAPERS.

G.O.	No.	Department.	Date.

FURTHER PAPERS.

G.O.	No.	Department.	Date.

Copy of letter from the Executive Engineer in charge of 2nd Circle to the President, District Board, Godavari, dated 11th January 1899. No 43.G.D.

I have the honour to forward with reference to your Ref. on C. 2453 of D.B. of 12.12.98, copy of No 3209 of 7.1.99 from the Executive Engineer, Godavari Central Division.

2. From para 2 of this letter, you will observe that the Executive Engineer does not consider the necessity of the outfall sluice to be constructed conclusively proved, and gives reason for his opinion.

3. I agree with him and consider that the construction of the work should be deferred for the present.

Copy of letter No 3209 of 6.1.99
from A.C. Langston Esqr. Executive
Engineer Godavari Central Division to
the Superintending Engineer 1st Circle.

In returning herewith President
District Board's no $\frac{2453}{D.B.}$ of 12-12-98,
bearing your endorsement No 1963 G.D.
of 27-12-98 together with its enclosures,
I have the honour to say that a report
has been added to the estimate giving
reasons for its preparation and showing
the necessity of the work. A copy of Pre-
sident District Board's No $\frac{1779}{1.11.98}$
also put up as requested.

2. Since the preparation of
the estimate, I have had an oppor-
tunity of forming some idea as to
the necessity for the work and I am
of opinion that it should not be
put in hand until the necessity
for it has been proved without any
doubt.

3. In the second week of
November last there was heavy

Continuous

rain for about 3 days. which was general throughout the District and whilst the low-lying part of the Delta suffered in the usual way, these high lands were in no way damaged and there must have been very little rain off from the area in question because the deep pits dug to form the bank were dry when I inspected them on 14.11.98. These high lands, some of which are sandy, seem to absorb any quantity of water. I have noticed the same on the right side of main Canal in connection with Kathunga Drain, the outfall sluice to which has been rightly designed very much smaller than would be required for the same area with the Coefficient of 80 which is generally used in the Delta and which is by no means too large for the low-lying portions.

Read the following

From the Executive Engineer in charge of
1st Circle, No. C/345 dated 12.3.99:—

Referring to G.O. No. 35945 of 4.2.99, I have the honour to bring to your notice that the necessity for the work of ~~construct~~ Constructing an outfall sluice at the 4th mile, Goutami Right Bank has not yet been distinctly proved and I am of opinion that the work should not be commenced until ^{the} matter has been finally decided.

2. I enclose for your perusal a copy of my letter No. 43 G. & of 11.1.99 to the President District Board, Godavari.

3. Under these circumstances, I have the honour to request you that the Contribution now sanctioned be paid back.

Order thereon No. 891 Wd of 24.3.99.

Communicated to the Local and Municipal Department with reference

reference to S.O. No 806 W, dated 15th + July 7422
March 1899. 5-6-99
