Prags

Communicated
to the E. G. of Police
with a request that the Police
be ordered to see that
Constables returning from platoon duty
be properly disinfected and kept
the police station de tactement
under observation
for ten days, after
relief and before
departure.

Note. In the case of the
Seymour referred to by the

calls, arrangements
were ordered & made
for the relicensing detachment
to be inoculated and not
the relicined, as informed
by the calls.

If at all the police men
are inoculated, it should be
done before they are sent
to an infected place for
duty and not when they
return therefrom. In the
present instance, the
police men may simply
be kept under observation
10 days before return

SUBJECT.

SUGGESTING THAT THE MEN
DEPUTED TO PLACER DUTY
AT VELLONE + TUNGABUDRA
BE DISCULATED AND
OBSERVED BEFORE RETURN
TO VELLONE.

NELLORE COLLECTOR'S OFFICE,
DATED 17th March 1899.

No. 2408
Eng

From J. M. Mulla Esquire

Collector of Nellore.

To the Plague Commission
Madras

Sir,

It will be seen from the

C No 2328 put up

reports submitted with this office Nos 231d
Eng

sent to D.C.

232 P dated 16th March 1899 that the occurrence
Eng

of two imported cases in Nellore was the
result of the deputation of the Nellore Police
to the Plague duty at Vellore. If they had not
returned from Vellore probably there would
have been no cases here. I understand that
another detachment similarly deputed is
due from Vellore and Tungebudda on or about
5th April. To prevent any more importation
from those localities I have the honour to
suggest that necessary arrangements be
made for the men being inoculated

before departure from Vellore ^{and Tungabhadra} as appears to
be done in the case of Sepoys similarly
employed. (Vide your Pro No 605 dated
3rd March 1899) and that they be observed
after inoculation for 10 days in Vellore and
^{Tungabhadra}
before return.

I have the honour to be
Sir

Your most obedient servant

Shree...
Collector

Proceedings of the Plague Commission: | P
dated 24 March 1899

Letter from the Collector of Vellore, 17th
March 1899. No. 240-P/Eng.

It will be seen from the reports submitted
with this office No. 231-P/Eng. & 232-P/Eng. of 16th March
1899, that the occurrence of two imported cases in
Vellore was the result of the deputation of the
Vellore Police to Plague duty at Vellore. If they
had not returned from Vellore probably there
would have been no cases here. I understand
that another detachment similarly deputed
is due from Vellore and Tungabhadra on or
about 5th April. To prevent any more im-
portation from those localities I have the honour
to suggest that necessary arrangements be
made for the men being inoculated before
departure from Vellore and Tungabhadra as
appears to be done in the case of Sepoys
similarly employed (Vide your Pro: No. 605
of 3rd March 1899) & that they be observed after
inoculation for 10 days in Vellore & Tungabhadra
before return.

Letter No. 829, of 24-3-99.

From

L. E. Buckley, Esq: J. C. S.

To

^{Plague Commission.}
The Collector of Vellore.

Sir,

In reply to your letter No. 240-P/Eng. of 17-3-99, I have
the honour to say that inoculation is voluntary, and
cannot be insisted on if the men object. In
the case of the Sepoys quoted by you is not
parallel as it was asked that they might
be inoculated before being sent on
plague duty. Collectors in whose
districts police drafts from other districts
are

are working on plague duty, will be requested to have them carefully examined and disinfected before return. They should of course be given passports on arrival from infected areas.
