(To be submitted within 48 hours under Plague Commissioner's Proceedings
No. 145, dated 5th December 1898.)

Government of Madras

~~Plague Commissioner's Office.~~

Local and Municipal Department.

CURRENT No. 1139P.

Date of Receipt. 26th may 99.

Plague Report North Arcot District.

Date 23rd may 99, No. Reference to 2102.P.

1. Name of town or village.— Peranambat, Gudiyattam Taluk.

2. Population of town or village.— 6254.

3. Plague cases up to date of last report
   - Number of seizures.— nil
   - Number of deaths.— nil
   - Date of last report.— nil.

4. Date of present attack.— 18th may 1899.

5. When reported by telegram?— 21st may 1899.

6. Imported or indigenous?— Imported.

7. Brief history of case.— on the evening of the 19th instant, I received a telegram from the assistant Plague officer, Bowringpet in the Mysore province that one Suliman suspected to be suffering from plague left Bowringpet on the night of the 18th and proceeded to Parampat in Chittoor Taluk in a jutka to one Baker Hussain's house. As there is no village by name Parampat in Chittoor Taluk, I wired to the Tahsildar of Gudiyattam to make enquiries in Peranambat and also directed the Tahsildar of Chittoor to make enquiries in Pothambat, Perampodi, and Pamambat of Chittoor Taluk. Suliman arrived at Peranambat on the 19th and halted in a garden at a distance from the village; The monegar at once suspected his illness to be plague reported the matter to the Tahsildar. The Deputy Tahsildar proceeded at once to the village with the Hospital assistant and examined Suliman. The Hospital assistant suspects the case to be plague.

8. If imported, had patient a passport?— no passport.

9. Steps taken to isolate and treat the patient.— The patient has been segregated in a hut in the garden where he halted. The Hospital assistant has given him some medicines.

10. Steps taken towards the segregation of contacts.— The bother of Suleman who accompanied him from Bowringpet is the only contact. He has been segregated in the same shed with Suleman and is attending upon the patient. A guard has been placed over the hut.

11. Steps taken towards the evacuation and disinfection of the infected house.—

No infected house in Peranambat.

26 MAY 1899

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?—

None.

13. Remarks.— The Deputy Tahsildar has not ascertained and reported by what road the patient travelled and whether he passed any Road Frontier Inspection station on his way. I am calling for a further report from him. He does not appear to have disinfected the carriage in which the patient travelled. I have asked him to do so immediately.

Plague Report Salem District.

Date 22nd May, No.

1. Name of town or village.— Jalarpet

2. Population of town or village.— —

3. Plague cases up to date of last report
   - Number of seizures.— 66
   - Number of deaths.— 42
   - Date of last report.— 5-5-99

4. Date of present attack.— 21-5-99

5. When reported by telegram?— 21-5-99

6. Imported or indigenous?— Imported from Bangalore Contonment

7. Brief history of case.— Thaudroyan. Age 25. Caste Parrah was proceeding from Bangalore Cantonment to Utthagad, Conjeevaram Taluk on the 16th May. At first he had normal temperature but it gradually rose to 104° on the 21st. He had oedema of the feet and scrotum and had considerable prostration and very weak. There is dullness and deficiency of Respiratory murmur on the right side of chest. He has cough and expectorates freely

8. If imported, had patient a passport?— No.

9. Steps taken to isolate and treat the patient.— The man was kept with his wife and child in a separate shed in the Suspect camp from the 16th to the 21st when he became considerably worse and was treated with expectorant medicine.

10. Steps taken towards the segregation of contacts.— His wife and child are still kept isolated in the Suspect camp and he has been removed into the Plague Hospital and is under treatment.

11. Steps taken towards the evacuation and disinfection of the infected house.—

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?—

13. Remarks.—

This is an obscure case and I am not prepared to finally diagnose it as a case of plague. Any how it appears very suspicious. He has no glandular enlargements nor tenderness. The lung complaint makes it suspicious of the Pneumonic form of Plague.

Plague Report North Arcot District

Date 25th May 99 No. Rc. 2139 P of 99

1. Name of town or village.— No 86. Kalavagunta, Chittoor Taluk

2. Population of town or village.— 1467.

3 Plague cases up to date of last report

Number of seizures — Nil
Number of deaths.— Nil
Date of last report.— Nil

4. Date of present attack.— Not known exactly

5. When reported by telegram?— 23rd May 1899

6. Imported or indigenous?— Imported.

7. Brief history of case.— The patient Rajaram is a resident of Gollapolem a suburb of Madras. He is a hawker by profession. He was travelling with his partner Thumbur Munisami also a resident of Gollapolem, in the Mysore Province. It seems they visited Kolar gold fields also on their way. They arrived at Palmaner someday last week and Rajaram was taken ill there. The illness was communicated to Rajaram's mother at Gollapolem and she proceeded immediately to Palmaner and brought her son to Kalavagunta where she had a relative on the morning of the 22. The Headman of the village and the Police Station House officer noticing him with high fever and a swelling on the left side of his neck took steps to segregate him.

8. If imported, had patient a passport?— Information not available.

9. Steps taken to isolate and treat the patient.— A temporary shed has been put up outside the village and the patient and his mother have been segregated in it.

10. Steps taken towards the segregation of contacts.— All the contacts were removed to other quarters. Police guard was posted to prevent the people from going into the house.

11. Steps taken towards the evacuation and disinfection of the infected house.— Necessary disinfections were carried out. All the inmates of the house were passported and kept under observation.

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— The relatives of the Plague patient objected to the removal to the Plague Camp and hence home segregation was given. It is accepted by the relatives

13. Remarks.— The civil apothecary was informed by one Hussan Ahmed ghouse Sahib uncle of the patient on the 21st. Inst. Immediately the civil apothecary proceeded to the spot and examined the patient and found him suffering from high fever of 105° with glandular swellings on the left side of his neck. It was reported that the person was passported at Patchur for Krishnagiri on 19-5-99 but as he was attacked with fever on the way he came away here. The patient died at 5 P.M on the 21st. Inst. The dead body was removed to the burial ground at 7 P.M. I myself inspected the locality on the next morning early and found that necessary disinfections were carried out.

10. Steps taken towards the segregation of contacts.— Will be reported later on.

27 MAY 1899

11. Steps taken towards the evacuation and disinfection of the infected house.— Will be reported later on.

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?— None.

13. Remarks.— Thirabur Munisami travelled with the patient from Palmaner to Chittoor in the same cart, but he left them at Chittoor and proceeded to Madras. I have already wired to the President, Municipal Commission, Madras to segregate him and keep him under observation. The cart and the house where the patient halted at Palmaner have been ordered to be disinfected. I proceeded to Kalavagunta on the 23rd ~~and~~ saw the patient and inspected the arrangements made by the Tahsildar.

Fort Saint George.

SIR,

In continuation of my plague report Rc. No. 2139 D of 99, dated 25th May 1899, I have the honor to state that there does not appear to be any other contact with the patient Raghavan besides his mother Muniammal. It is stated that Raghavan and Muniammal did not enter the house of Muniammal's relative at Kalavagunta but ~~they~~ that they lived only in the pial outside the house. The Tahsildar has disinfected the pial and the inmates of the house have vacated the house of their own accord.

Raghavan died on the morning of the 25th. The shed in which he was segregated was immediately ~~burnt~~ burnt and Munianmal was segregated in another shed.

2. Although it is stated that Raghavan did not enter the house of Munianmal's relative at Kalavagunta, I have asked the Tahsildar to disinfect the interior of that house also with mercury lotion in order to be on the safe side.

I have the honor to be,
Sir,

Ranipet 26th May 1899.
No 229.

To
The Collector of
North Arcot District
Chittoor.

Sir,

I have the honor, with reference to my telegram dated 23-5-99 reporting a case of imported plague, to supply you with the details.

The patient Asmat Bee is the wife of a Mahomedan mendicant named Mahomed Shah.

On Medical examination the patient was found with high fever (temperature 104°) bubo in left groin and in great pain, tongue coated and eyes injected.

Mahomed Shah the husband states they arrived the previous evening (May 22nd) from Arcot (where they had been residing for the past 3 months Taravadi Sedatheru street). On the 23rd his wife was taken ill. Previous to residing in Arcot he had

resided

in Vellore three months.

At the time the female patient was being medically examined the husband complained of feeling ill. He was also medically examined and found to have high temperature but no other symptoms, so being a contact his case was reported suspicious. To day however he appears to be all right again.

Both patients and contact have been segregated in a plague hut.

I have etc.

Abstract Weekly Report
to the Plague Commissioner – Madras
for week ending June 3rd /99.
Salem Observation area

Sir

In continuation of my weekly abstract reports (in abeyance since May 6th) in accordance with the order of Collector – Salem.

The returns of Plague cases for week 13th May

1 indigenous – The case of a boy found at Partha-Belagondapalli – with bubo left groin &c. (Mattigiri Gp)

2 imported cases (a) A death (concealed) at Begapalli (Matigiri Gp) occurred on 6th Ult – discovered on 9th Idem – in which every probability of Plague. The woman had been recently staying with her relatives at Nargondapalli: Previously in good health – soon after leaving she suddenly develops high fever and dies in 3 days.

(b) At Krishnagiri (Gp IV) a man under observation coming from Nigham without passport – found to be suffering with symptoms of Plague on 12th Ult.

In the following week – ending 20th May

1 (old) death at Krishnagiri – this the imported case notified the previous week. Death occurred on 14th Inst.

1 Indigenous attack & death – A case in the field at Nargondapalli (Matigiri Gp). A woman Marakka, age 35 years, related to Mungamah whose daughter Marakka died at Begapalli on 6/5/99 – living in neighbouring hut – attacked 16/5/99 died 20/5/99

Concealment was attempted.

Salem Observation area

Sir

In continuation of my weekly abstract reports (in abeyance since May 6th) in accordance with the order of Collector – Salem.

The returns of Plague cases for week 13th May

1 indigenous – The case of a boy found at Partha-Belagondapalli – with bubo left groin &c. (Mattigiri Grp)

2 imported cases (a) A death (concealed) at Begapalli (Mattigiri Grp) occurred on 6th Ult – discovered on 9th Idem – in which every probability of Plague – The woman had been recently staying with her relatives at Nargondapalli: Previously in good health – soon after leaving she suddenly develops high fever and dies in 3 days.

(b) At Krishnagiri (Grp IV) a man under observation coming from Virigham without passport – found to be suffering with symptoms of Plague on 12th Ult.

In the following week – ending 20th May

1 (old) death at Krishnagiri – This the imported case notified the previous week. Death occurred on 14th Inst.

1 Indigenous attack & death – A case in the field at Nargondapalli (Mattigiri Grp). A woman Narakka, age 35 years, related to Mungamah whose daughter Narakka died at Begapalli on 6/5/99 – living in neighbouring hut – attacked 16/5/99 died 20/5/99
Concealment was attempted.

At Nargondapalli, the infection being evidently
spread by rats. The whole village has been
thoroughly disinfected, & drains opened &
flushed — dead rats were found.

For the week ending 27th May.

There were 2 fresh indigenous cases.

(1) At Mukondahalli (Mattigiri Grp) ~~Venk~~ a boy
Venkataswami. aet. 8.
On 21st I found 2 cases of fever in this village
and directed the Hosp Asst at Guzuwadi Frontier
Inspt Stn to visit daily & report — & make an
inspection of each hut. These 2 cases proved
to be ordinary fever. This boy Venkataswami
was found on 23rd with a painful bubo
in right groin & symptoms of plague.
He was removed to the Hospital at Frontr
Inspt St Guzuwadi — & the contacts to the
segregation sheds there. The hut they
occupied together with all contents were
burnt on the spot.
This boy's father (the toddy shop keeper) was
the original case in Mukondahalli, he
died about 1 month back. It seems evident
that some goods must have been removed
from his house before it was disinfected.

(2) At the commencement of the week another
case — Sakammal. female. age 20
was found in a hut on eastern side of
Bagalur Rd, which had been recently
occupied. This case was removed to
the Hosur Hospital, where she still is —
and contacts to the segregation camp.
This family had removed back to their
house in Indwadi (Therpetta) a hamlet
of Hosur — on the reoccupation of Hosur.
When the town was first infected there
were 4 deaths from this house.
Although the house has been twice
disinfected, first by the detachment
Sappers & afterwards by the coolies
employed for the purpose — it was

evident infection still clung to the place.
A careful search was made and a large
bricked up space was found between the
walls (which looked like part of the ordinary
construction of the house) which could only
be ~~entered~~ reached through the false
roof from above — in this was stored all
manner of goods and rubbish — on the
evacuation of the house on the outbreak
of plague, to prevent their destruction —
and things had recently been removed from
this hiding place on reoccupation —
This was turned out and the whole place
thoroughly redisinfected.

2 Children with high fever and symptoms of
a suspicious character were ~~found~~ removed
from Chinna Belagondapalli (Mattigiri Grp)
to the Mattigiri Hospl on the 23rd inst.
They have turned out to be Measles of a severe
character. They are now almost convalescent.
A house to house inspection of this village
revealed over 20 cases of fever. They have
been daily observed & have proved to be of
the a malarial ~~character~~ type.
Fever is widespread and general over
the whole of this area at present and
in some places whole villages are
down with it

For week ending June 3rd

There have been no fresh cases to report
this week — Fever continues throughout
the area in all 4 groups. The cases
are observed as far as possible — especially
in villages previously infected with plague

Plague has appeared in Karuchenapalli
on the Mysore side about 2 miles from the
frontier between Krimpati & Gummalapuram

3 Police have been sent down there by the Plague Divisional Officer to watch the roads, as the frontier stations at 2 last mentioned places have been recently abolished – with instructions to take any arrivals found coming from infected areas to the D. Commissr. to be reported. The Circle Inspector – Halli circle has also been advised to keep a close look out on the adjoining villages & warn the Munsiffs & people against admitting strangers or crossing the border.

Plague I understand has also reappeared at Malur – in Mysore State.

Of the 3 cases of Plague remaining at Guzuradi Centre Hospl. Stn. – from Mudkondapalli 2 are convalescent, and the last case received is progressing well.

The case in the Hosur Hospt from Guduradi (Kerpetta) removed from the Hosur fields – is improving.

1 Case remains isolated in the fields at P. Belagondapalli.

Permission was given by the Plague Divisional Officer to the rest of the people (P. Belagondapalli) – except the Pariahs (among whom this last case occurred) to reoccupy their village – on 23rd ult. after complete redisinfection of the houses had been carried out. These people have been out in the fields since the 18th March.

The 2 children (measles) remaining in the Mattigiri Hospital are convalescent & will be discharged as soon as fit to be removed.

I have the honor to be

My dear Hamwick

Plague has been much better during the past fortnight. Rampett seems to be the only really infected centre now left. There have been a few isolated cases in small villages, but they have not spread. I have written officially about reduction of Establishments. King sent me a wire advising me not to reduce establishments except where absolutely necessary, pending the orders of Govt. I have accordingly retained the Frontier
