Administration Report.

Reviewing the — of the Nellore Municipal Council for 1898–99.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper:—

From M.R.Ry. N. V. RANGACHARLU Garu, Chairman, Municipal Council, Nellore, to the Secretary to Government, Local and Municipal Department (through the Head-quarter Deputy Collector, Nellore), dated 20th May 1899, No. 608-Mun.

I have the honour to submit the following report on the administration of the Nellore Municipality during the financial year 1898–99, together with the usual statements:—

I.—CONSTITUTION OF THE COUNCIL.

2. The sanctioned number of councillors was eighteen. Besides the four vacancies pending in the beginning of the year, seven more seats fell vacant during the year. Of these eleven vacancies, six were filled up by election as per G.O., Mis. No. 711 M., dated 4th April 1898, three by nomination and the other two remained vacant, having occurred in March 1889, so that the number of councillors actually remaining at the end of the year was sixteen. All the six seats were contested, 47·7 per cent. of the registered voters attending the poll. The undersigned held the office of Chairman throughout the year.

3. Twenty-two meetings were convened during the year and the number actually held was twenty against twenty-seven in 1897–98. The average attendance at the meetings held was 7—2·3 being officials and 4·7 non-officials against 1·9 and 7·7, respectively, in the previous year. The delay in filling up the six seats by election accounts for the decrease in the attendance of the non-officials.

4. The accounts for the year under report have not been audited.

II.—RECEIPTS.

5. The receipts under the several heads in 1898–99 amounted to Rs. 44,374 against Rs. 41,919, the actuals of 1897–98, and Rs. 44,630, the revised estimate of the year under report.

6. The differences between the actuals of 1897–98 and the budget and revised estimates of 1898–99 were explained in this office letter, dated 10th December 1898, No. 1294, recorded in G.O., No. 373 M., dated 15th March 1899, and those between the revised estimate and the actuals of the year under report are explained below.

7. *Tax on Arts.*—The original demand amounted to Rs. 3,252 and Rs. 16 was remitted on appeal, the net demand being Rs. 3,236. This, together with the arrear demand of Rs. 75, came up to Rs. 3,311, the total demand for the year. Rupees 3,134 (arrears Rs. 63 + current Rs. 3,071) were collected during the year and Rs. 12 written off, leaving a balance of Rs. 165 relating to the year under report.

The total number of persons assessed and the average incidence per person assessed were 1,090 and Rs. 2–15–6 against 1,046 and Rs. 2–15–3 in 1897–98, respectively, the increase in the number of persons being due to fresh assessments under the lower classes of the schedule.

8. *Tax on Buildings.*—This tax having been revised in 1897–98, the revised tax amounting to Rs. 16,317 was the original demand for the year under report. Rupees 24 were remitted on appeal and the net demand was Rs. 16,293. Adding to this the arrear demand of Rs. 450, the total demand for the year was Rs. 16,743. Rupees 15,983 (arrears Rs. 360 + current Rs. 15,623) were collected during the year, Rs. 61 remitted on account of vacant houses, &c., and Rs. 5 written off, leaving a balance of Rs. 694.

The number of houses assessed during the year was 6,050 against 6,165 in 1897–98, the decrease being due to the clubbing of houses at the revision and to the removal of those burnt, &c.

9. *Tax on Lands.*—This tax not having been revised in 1897–98 along with the house-tax for want of time, the previous year's demand excluding the tax on lands subsequently built upon, was taken as the original demand for 1898–99. This, together with the tax on vacant sites at As. 4 per 80 square yards amounted to Rs. 1,265 and Rs. 2 were remitted on appeal. Adding to this the arrear demand of Rs. 124, the total demand for the year was Rs. 1,387. A sum of Rs. 1,041 (arrears Rs. 108 + current Rs. 933) was collected during the year, leaving a balance of Rs. 346 at its close. The extent of land assessed was 1,401·82 acres against 1,393·77 acres in 1897–98, the increase being due to the inclusion of the extent of vacant sites assessed during the year under report.

10. *Tax on Vehicles, Animals and Carts.*—A sum of Rs. 4,556 (arrears Rs. 5 + current Rs. 4,551) was collected under these heads against Rs. 4,691 in 1897–98 and Rs. 4,680, the revised estimate of the year, and there was a balance of Rs. 90 remaining to be collected at its close.

11. *Gross Collections under the above six taxes.*—The total collections under these amounted to Rs. 24,714 against Rs. 25,230, the revised estimate of the year. The decrease below the revised estimate was due to the abolition of the office of Revenue Inspector from 1st April 1898 and to the occurrence of plague during the latter part of the year. A sum of Rs. 789 has been collected up to date.

12 *Coercive Processes.*—The number of warrants at the beginning of the year was 39 involving a sum of Rs. 54. Five hundred and thirty-five warrants involving a sum of Rs. 693 were issued during the year, so that the number of warrants for execution was 574; of these 461 warrants were either executed or cancelled during the year, leaving a balance of 113 warrants at its close pending execution. In twenty cases the property was distrained and released before sale.

13. *Tolls.*—All the toll-gates were sold in one lot for Rs. 4,750 against Rs. 6,000 in 1897–98, the decrease being due to the opening of the Bezwada-Madras Railway. The whole of the demand was collected and the District Board's one-fourth share paid during the year.

14. *Rent of Municipal Buildings and Fees from Travellers' Bungalows.*—The increase under these two heads was due to more collections than was expected at the time of preparing the revised estimate.

15. *Income from School-fees.*—The headmaster of the Ranganaikulapet Municipal school failed to collect fees from boys leaving the school and a sum of Rs. 22 and odd was collected from him. This and the increase in strength account for the increase over the revised estimate.

16. *Cart-stand Fees.*—The cart-stand renter failed to pay four instalments; hence the decrease below the revised estimate. A suit has been filed against him.

17. *Fines.*—The amounts realised under the Police and Municipal Acts have been shown separately. The increase over the revised estimate was due to more collections subsequent to the submission of the revised estimate.

18. *Grants and Contributions from Government—Education—Normal Stipends.*—As no provision was made in the budget for 1899–1900, no students were entertained from January as usual. Hence the decrease below the revised estimate.

19. *Grants and Contributions from Local Boards—Medical.*—The less expenditure on the Jubilee Hospital and the consequent non-realization of the proportionate cost from the District Board account for the decrease below the revised estimate.

20. *Private Scavenging.*—The number of houses cleaned by the municipal agency at the beginning of the year was 881 and it rose to 923 at its close. The collections were Rs. 1,959 (arrears Rs. 39 + current Rs. 1,920) against Rs. 1,738 in 1897–98. The expenditure under this head was Rs. 1,778, leaving a surplus of Rs. 181. A separate inspector having been appointed from 1st April 1899, it is expected that there would be a substantial increase in the number of houses.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. N. V. RANGACHARLU Garu, Chairman, Municipal Council, Nellore, to the Secretary to Government, Local and Municipal Department (through the Head-quarter Deputy Collector, Nellore), dated 20th May 1899, No. 608-Mun.

I have the honour to submit the following report on the administration of the Nellore Municipality during the financial year 1898–99, together with the usual statements :—

I.—CONSTITUTION OF THE COUNCIL.

2. The sanctioned number of councillors was eighteen. Besides the four vacancies pending in the beginning of the year, seven more seats fell vacant during the year. Of these eleven vacancies, six were filled up by election as per G.O., Mis. No. 711 M., dated 4th April 1898, three by nomination and the other two remained vacant, having occurred in March 1889, so that the number of councillors actually remaining at the end of the year was sixteen. All the six seats were contested, 47·7 per cent. of the registered voters attending the poll. The undersigned held the office of Chairman throughout the year.

3. Twenty-two meetings were convened during the year and the number actually held was twenty against twenty-seven in 1897–98. The average attendance at the meetings held was 7—2·3 being officials and 4·7 non-officials against 1·9 and 7·7, respectively, in the previous year. The delay in filling up the six seats by election accounts for the decrease in the attendance of the non-officials.

4. The accounts for the year under report have not been audited.

II.—RECEIPTS.

5. The receipts under the several heads in 1898–99 amounted to Rs. 44,374 against Rs. 41,919, the actuals of 1897–98, and Rs. 44,630, the revised estimate of the year under report.

6. The differences between the actuals of 1897–98 and the budget and revised estimates of 1898–99 were explained in this office letter, dated 10th December 1898, No. 1294, recorded in G.O., No. 373 M., dated 15th March 1899, and those between the revised estimate and the actuals of the year under report are explained below.

7. *Tax on Arts.*—The original demand amounted to Rs. 3,252 and Rs. 16 was remitted on appeal, the net demand being Rs. 3,236. This, together with the arrear demand of Rs. 75, came up to Rs. 3,311, the total demand for the year. Rupees 3,134 (arrears Rs. 63 + current Rs. 3,071) were collected during the year and Rs. 12 written off, leaving a balance of Rs. 165 relating to the year under report.

The total number of persons assessed and the average incidence per person assessed were 1,090 and Rs. 2–15–6 against 1,046 and Rs. 2–15–3 in 1897–98, respectively, the increase in the number of persons being due to fresh assessments under the lower classes of the schedule.

8. *Tax on Buildings.*—This tax having been revised in 1897–98, the revised tax amounting to Rs. 16,317 was the original demand for the year under report. Rupees 24 were remitted on appeal and the net demand was Rs. 16,293. Adding to this the arrear demand of Rs. 450, the total demand for the year was Rs. 16,743. Rupees 15,983 (arrears Rs. 360 + current Rs. 15,623) were collected during the year, Rs. 61 remitted on account of vacant houses, &c., and Rs. 5 written off, leaving a balance of Rs. 694.

The number of houses assessed during the year was 6,050 against 6,165 in 1897–98, the decrease being due to the clubbing of houses at the revision and to the removal of those burnt, &c.

9. *Tax on Lands.*—This tax not having been revised in 1897–98 along with the house-tax for want of time, the previous year's demand excluding the tax on lands subsequently built upon, was taken as the original demand for 1898–99. This, together with the tax on vacant sites at As. 4 per 80 square yards amounted to Rs. 1,265 and Rs. 2 were remitted on appeal. Adding to this the arrear demand of Rs. 124, the total demand for the year was Rs. 1,387. A sum of Rs. 1,041 (arrears Rs. 108 + current Rs. 933) was collected during the year, leaving a balance of Rs. 346 at its close. The extent of land assessed was 1,401·82 acres against 1,393·77 acres in 1897–98, the increase being due to the inclusion of the extent of vacant sites assessed during the year under report.

10. *Tax on Vehicles, Animals and Carts.*—A sum of Rs. 4,556 (arrears Rs. 5 + current Rs. 4,551) was collected under these heads against Rs. 4,691 in 1897–98 and Rs. 4,680, the revised estimate of the year, and there was a balance of Rs. 90 remaining to be collected at its close.

11. *Gross Collections under the above six taxes.*—The total collections under these amounted to Rs. 24,714 against Rs. 25,230, the revised estimate of the year. The decrease below the revised estimate was due to the abolition of the office of Revenue Inspector from 1st April 1898 and to the occurrence of plague during the latter part of the year. A sum of Rs. 789 has been collected up to date.

12 *Coercive Processes.*—The number of warrants at the beginning of the year was 39 involving a sum of Rs. 54. Five hundred and thirty-five warrants involving a sum of Rs. 693 were issued during the year, so that the number of warrants for execution was 574; of these 461 warrants were either executed or cancelled during the year, leaving a balance of 113 warrants at its close pending execution. In twenty cases the property was distrained and released before sale.

13. *Tolls.*—All the toll-gates were sold in one lot for Rs. 4,750 against Rs. 6,000 in 1897–98, the decrease being due to the opening of the Bezwada-Madras Railway. The whole of the demand was collected and the District Board's one-fourth share paid during the year.

14. *Rent of Municipal Buildings and Fees from Travellers' Bungalows.*—The increase under these two heads was due to more collections than was expected at the time of preparing the revised estimate.

15. *Income from School-fees.*—The headmaster of the Ranganaikulapet Municipal school failed to collect fees from boys leaving the school and a sum of Rs. 22 and odd was collected from him. This and the increase in strength account for the increase over the revised estimate.

16. *Cart-stand Fees.*—The cart-stand renter failed to pay four instalments; hence the decrease below the revised estimate. A suit has been filed against him.

17. *Fines.*—The amounts realised under the Police and Municipal Acts have been shown separately. The increase over the revised estimate was due to more collections subsequent to the submission of the revised estimate.

18. *Grants and Contributions from Government—Education—Normal Stipends.*—As no provision was made in the budget for 1899–1900, no students were entertained from January as usual. Hence the decrease below the revised estimate.

19. *Grants and Contributions from Local Boards—Medical.*—The less expenditure on the Jubilee Hospital and the consequent non-realization of the proportionate cost from the District Board account for the decrease below the revised estimate.

20. *Private Scavenging.*—The number of houses cleaned by the municipal agency at the beginning of the year was 881 and it rose to 923 at its close. The collections were Rs. 1,959 (arrears Rs. 39 + current Rs. 1,920) against Rs. 1,738 in 1897–98. The expenditure under this head was Rs. 1,778, leaving a surplus of Rs. 181. A separate inspector having been appointed from 1st April 1899, it is expected that there would be a substantial increase in the number of houses.

21. *Advances—Others.*—The excess amount drawn in 1897–98 on account of the cost of printing work done at Madras was recovered during the year. Hence the increase over the revised estimate.

III.—Expenditure.

22. The expenditure under the several grants was Rs. 44,876 against Rs. 43,354, the actuals of 1897–98, and Rs. 42,970, the revised estimate of the year under report.

23. As already submitted in paragraph 6 above, the differences between the revised estimate and the actuals of 1898–99 are explained below.

24. *Grant 1, New Works—Buildings.*—As provided for in the budget the two pucka sheds in the municipal hospital for the sweeper and scavenger and four iron latrines were constructed during the year, three of the latter having been substituted for tatty ones and the fourth set apart for the use of the females of Mulappet. The decrease below the revised estimate was due to less expenditure than was expected.

25. *Repairs—Communications.*—Seven roads and seven streets were repaired during the year besides patch work on other roads and streets. The condition of the roads and streets is very fair.

The length of the roads and streets is 37 miles 7 furlongs and 620 feet, 26 miles and 6 furlongs being metalled and the rest unmetalled. The District Surgeon's remarks that some of the streets in the western part of the town are uneven will be noted and the defect remedied as soon as possible. The increase over the revised estimate was due to more expenditure than was expected.

26. *Buildings.*—The several municipal buildings were white-washed besides petty repairs. The contagious disease ward was not repaired in order to provide for the increase in the plague expenditure. Hence the decrease below the revised estimate.

27. *Drainage.*—With due deference to the Medical officer's remark regarding the unsatisfactory state of the existing drains, the Municipality has been doing its best to set right the minor defects so far as the funds at its disposal could permit. There are, no doubt, a few depressions here and there in the drains. These have been in existence for a number of years. All possible care is taken that no sewage accumulates in such places. Levels were taken several years ago for a complete drainage scheme, but nothing further could be done because of the large outlay required and the inability of the Council to meet it from its limited means. The execution of some urgent petty repairs and the debit of the cost of the sewage cart, &c., to contingencies account for the increase over the revised estimate.

28. *Grant 2, Training Schools—Stipends to Normal Students.*—As no provision was made in the budget for 1899–1900, no students were admitted in January last when the old students left the school. Hence the decrease below the revised estimate.

29. *Municipal Schools on Salary-result System.*—The Municipality continued to maintain the three schools remaining at the close of 1897–98, one of them being purely for Panchamas. The average attendance in each of the three schools was higher than that in 1897–98 and the average cost of educating each pupil was Rupees 4–1–2 against Rs. 5–13–6 in the previous year. The increase under result grants was met by transfer of the savings under contingencies, salary, building, &c., grants. Hence the variations under the minor heads between the revised estimate and the actuals of the year under report. It appears from the results appended to statement V-A, that the schools did fairly well at the grant examinations.

30. *Salary Grants.*—The Free Church Mission and the Venkatagiri Raja's High schools were aided during the year. The strength of the schools was 274 and 271 against 308 and 269, respectively, in 1897–98. Out of Rs. 581 spent under this head, Rs. 494 were for the Free Church Mission school and Rs. 87 for the other. It appears from the Inspector's report that though the general condition of the Mission school and its tone and discipline were good, the work of the staff was not satisfactory, judging from the results of his inspection and that careful supervision did not seem to have been exercised by the headmaster over the work of his assistants. In the

case of the other school, he observed that generally fair results were shown at the inspection and that the general condition and the tone and discipline of the school left little to be desired. The following shows the results of the public examinations in the two schools :—

Name of institute.	Examination.	Number sent up.	Number passed.
Venkatagiri Raja's High school	Lower Secondary	16	7
Do.	Matriculation	29	7
Free Church Mission school	Lower Secondary	16	7
Do.	Matriculation	30	6

31. *Fixed and Result Grants.*—There were at the beginning of the year eleven schools—two lower secondary and nine primary. Two schools were added and three closed during the year, so that the number at the end of the year was ten. Rupees 1,255 were spent under this head against Rs. 1,004 in 1897–98.

32. *Inspection.*—The permanent supervisor having been sent for training at Madras, there was some delay in filling up the acting vacancy. Hence the decrease below the revised estimate.

33. *Grant 3, Medical Relief.*—Three institutions were maintained as in 1897–98 and the number of patients treated at them is given below together with the corresponding figures of the previous year :—

Name of institution.	In-patients.		Out-patients.		Total treated.	
	1897–98.	1898–99.	1897–98.	1898–99.	1897–98.	1898–99.
Municipal hospital	499	548	22,360	16,585	22,859	17,133
Jubilee hospital	23	27	5,362	6,134	5,385	6,161
Branch dispensary	..	..	11,280	14,292	11,280	14,292
Total ..	522	575	39,002	37,011	39,524	37,586

Though there was a marked decrease in the number of out-patients treated at the municipal hospital, the decrease on the whole below that of 1897–98 was 1,938 and the existence of cholera almost throughout the town and the plague scare might be taken to account for it. The decrease in the municipal hospital was simultaneous with the transfer of the branch dispensary to a more convenient part of the town and it is not improbable that the people once resorting to the former now go to the latter. The opening up of the Jubilee hospital for out-patients must necessarily have interfered with the attendance of females at the municipal hospital. These two causes may have led to the decrease in the attendance at the latter institution.

The cost of maintaining the three institutions was Rs. 8,683 against Rs. 8,810, the revised estimate of the year, and Rs. 8,689, the actuals of 1897–98. The decrease below the revised estimate, mostly under establishment, was due to the entertainment of two against four pupil midwives and to the non-payment of vernacular allowance to the hospital assistant in charge of the branch dispensary as he was not entitled to it. An estimate is under preparation for the repairs of the several parts of the municipal hospital referred to by the Medical officer and they will be done as early as possible. The entertainment of a second toty could not be sanctioned for want of funds like other proposals of the Surgeon-General. As regards the unsuitability of the branch dispensary building, it may be submitted that the same was selected and considered sufficient by the then Medical officer for an out-patient dispensary and the Council agreed with him. The dispensary has been there since its transfer from the town. The Medical officer simply remarks "the working of the Jubilee hospital is not as satisfactory as it might be", though there was improvement in every way, viz., increase in the number of in-and out-patients treated and in the number of labour cases over last year and does not suggest any proposals to remedy it.

34. *Vaccination.*—The municipal vaccinator vaccinated 1,163 cases against 1,053 in 1897–98, 976 relating to primary and 187 to re-vaccination cases. Nine hundred

21. *Advances—Others.*—The excess amount drawn in 1897–98 on account of the cost of printing work done at Madras was recovered during the year. Hence the increase over the revised estimate.

III.—Expenditure.

22. The expenditure under the several grants was Rs. 44,876 against Rs. 43,354, the actuals of 1897–98, and Rs. 42,970, the revised estimate of the year under report.

23. As already submitted in paragraph 6 above, the differences between the revised estimate and the actuals of 1898–99 are explained below.

24. *Grant 1, New Works—Buildings.*—As provided for in the budget the two pucka sheds in the municipal hospital for the sweeper and scavenger and four iron latrines were constructed during the year, three of the latter having been substituted for tatty ones and the fourth set apart for the use of the females of Mulappet. The decrease below the revised estimate was due to less expenditure than was expected.

25. *Repairs—Communications.*—Seven roads and seven streets were repaired during the year besides patch work on other roads and streets. The condition of the roads and streets is very fair.

The length of the roads and streets is 37 miles 7 furlongs and 620 feet, 26 miles and 6 furlongs being metalled and the rest unmetalled. The District Surgeon's remarks that some of the streets in the western part of the town are uneven will be noted and the defect remedied as soon as possible. The increase over the revised estimate was due to more expenditure than was expected.

26. *Buildings.*—The several municipal buildings were white-washed besides petty repairs. The contagious disease ward was not repaired in order to provide for the increase in the plague expenditure. Hence the decrease below the revised estimate.

27. *Drainage.*—With due deference to the Medical officer's remark regarding the unsatisfactory state of the existing drains, the Municipality has been doing its best to set right the minor defects so far as the funds at its disposal could permit. There are, no doubt, a few depressions here and there in the drains. These have been in existence for a number of years. All possible care is taken that no sewage accumulates in such places. Levels were taken several years ago for a complete drainage scheme, but nothing further could be done because of the large outlay required and the inability of the Council to meet it from its limited means. The execution of some urgent petty repairs and the debit of the cost of the sewage cart, &c., to contingencies account for the increase over the revised estimate.

28. *Grant 2, Training Schools—Stipends to Normal Students.*—As no provision was made in the budget for 1899–1900, no students were admitted in January last when the old students left the school. Hence the decrease below the revised estimate.

29. *Municipal Schools on Salary-result System.*—The Municipality continued to maintain the three schools remaining at the close of 1897–98, one of them being purely for Panchamas. The average attendance in each of the three schools was higher than that in 1897–98 and the average cost of educating each pupil was Rupees 4-1-2 against Rs. 5-13-6 in the previous year. The increase under result grants was met by transfer of the savings under contingencies, salary, building, &c., grants. Hence the variations under the minor heads between the revised estimate and the actuals of the year under report. It appears from the results appended to statement V-A, that the schools did fairly well at the grant examinations.

30. *Salary Grants.*—The Free Church Mission and the Venkatagiri Raja's High schools were aided during the year. The strength of the schools was 274 and 271 against 308 and 269, respectively, in 1897–98. Out of Rs. 581 spent under this head, Rs. 494 were for the Free Church Mission school and Rs. 87 for the other. It appears from the Inspector's report that though the general condition of the Mission school and its tone and discipline were good, the work of the staff was not satisfactory, judging from the results of his inspection and that careful supervision did not seem to have been exercised by the headmaster over the work of his assistants. In the

case of the other school, he observed that generally fair results were shown at the inspection and that the general condition and the tone and discipline of the school left little to be desired. The following shows the results of the public examinations in the two schools :—

Name of institute.	Examination.	Number sent up.	Number passed.
Venkatagiri Raja's High school	Lower Secondary	16	7
Do.	Matriculation	29	7
Free Church Mission school	Lower Secondary	16	7
Do.	Matriculation	30	6

31. *Fixed and Result Grants.*—There were at the beginning of the year eleven schools—two lower secondary and nine primary. Two schools were added and three closed during the year, so that the number at the end of the year was ten. Rupees 1,255 were spent under this head against Rs. 1,004 in 1897–98.

32. *Inspection.*—The permanent supervisor having been sent for training at Madras, there was some delay in filling up the acting vacancy. Hence the decrease below the revised estimate.

33. *Grant 3, Medical Relief.*—Three institutions were maintained as in 1897–98 and the number of patients treated at them is given below together with the corresponding figures of the previous year :—

Name of institution.	In-patients.		Out-patients.		Total treated.	
	1897–98.	1898–99.	1897–98.	1898–99.	1897–98.	1898–99.
Municipal hospital	499	548	22,360	16,585	22,859	17,133
Jubilee hospital	23	27	5,362	6,134	5,385	6,161
Branch dispensary	..	..	11,280	14,292	11,280	14,292
Total ..	522	575	39,002	37,011	39,524	37,586

Though there was a marked decrease in the number of out-patients treated at the municipal hospital, the decrease on the whole below that of 1897–98 was 1,938 and the existence of cholera almost throughout the town and the plague scare might be taken to account for it. The decrease in the municipal hospital was simultaneous with the transfer of the branch dispensary to a more convenient part of the town and it is not improbable that the people once resorting to the former now go to the latter. The opening up of the Jubilee hospital for out-patients must necessarily have interfered with the attendance of females at the municipal hospital. These two causes may have led to the decrease in the attendance at the latter institution.

The cost of maintaining the three institutions was Rs. 8,683 against Rs. 8,810, the revised estimate of the year, and Rs. 8,689, the actuals of 1897–98. The decrease below the revised estimate, mostly under establishment, was due to the entertainment of two against four pupil midwives and to the non-payment of vernacular allowance to the hospital assistant in charge of the branch dispensary as he was not entitled to it. An estimate is under preparation for the repairs of the several parts of the municipal hospital referred to by the Medical officer and they will be done as early as possible. The entertainment of a second toty could not be sanctioned for want of funds like other proposals of the Surgeon-General. As regards the unsuitability of the branch dispensary building, it may be submitted that the same was selected and considered sufficient by the then Medical officer for an out-patient dispensary and the Council agreed with him. The dispensary has been there since its transfer from the town. The Medical officer simply remarks "the working of the Jubilee hospital is not as satisfactory as it might be", though there was improvement in every way, viz., increase in the number of in-and out-patients treated and in the number of labour cases over last year and does not suggest any proposals to remedy it.

34. *Vaccination.*—The municipal vaccinator vaccinated 1,163 cases against 1,053 in 1897–98, 976 relating to primary and 187 to re-vaccination cases. Nine hundred

and sixty-eight cases were successful, 708 of them being cases below one year of age. The cost of each successful case was As. 4–7 against As. 4–1.

A major portion of the unsuccessful and unknown cases was among re-vaccination cases and these consist of operations performed chiefly on Police and Salt and Abkári recruits and are not capable of being verified. Prosecution was resorted to in 256 cases against 232 in 1897–98. No cases were vaccinated by the several medical subordinates during the year under report.

35. *Registration of Births and Deaths.*—Seven hundred and fifty-four births and 933 deaths were registered during the year against 817 and 1,062, respectively, in 1897–98. Of 933 deaths, 239 were from fever, 8 from small-pox, 212 from cholera and 2 from plague against 191, 9, 241, and *nil*, respectively, in the previous year. The number of prosecutions was 28 against 35 in 1897–98 and the defaulters punished in 23 cases. All possible steps are being taken to ensure a satisfactory registration.

36. The following gives the number and cost of vaccine operations and the number of births and deaths registered with ratio per mille during the last three years:—

Years.	Number vaccinated.	Average cost of each successful case.	Births.	Ratio per mille.	Deaths.	Ratio per mille.
		A. P.				
1896–97	1,200	5 0	815	27·78	665	22·66
1897–98	1,053	4 1	817	27·85	1,062	36·20
1898–99	1,163	3 10	754	25·70	933	31·80

37. *Conservancy—Road-cleaning and Road-watering.*—The sanitary staff continued to be the same as in the previous year. The expenditure under the several minor heads amounted to Rs. 12,172 against Rs. 10,680, the revised estimate of the year, and Rs. 9,572, the actuals of 1897–98. The increase over the revised estimate was due chiefly to the construction of plague sheds and to the purchase of necessary furniture, &c., for the equipment of the plague hospitals, &c., when plague actually broke out, and the variations in the several minor heads were due to the classifications recently ordered to be made. The number of rubbish, &c., carts was the same as in 1897–98 except that one sewage and one road-watering cart were purchased during the year.

The number of latrines was increased by one, and three of the tatty ones were replaced by three iron ones so that the number of latrines at its end consisted of thirteen masonry, four tatty and fourteen iron ones. No new urinals were built during the year. The two plague cases that occurred in March last were among the police constables and their families that had returned from plague duty at Vellore. Both the cases proved fatal and there were no fresh cases afterwards. An hospital assistant still inspects the incoming passengers by train.

38. As regards the District Medical and Sanitary Officer's remark that none of the fifty-nine masonry dust-bins were replaced by iron ones and that the beef slaughter-house was not constructed though land was acquired some two years ago, it is submitted that the masonry dust-bins would be replaced by iron ones as they are worn out and that the construction of the beef slaughter-house could not be done as the Council had to provide funds for other more important and urgent matters. However all possible care is taken to keep clean the present place.

39. *Burial and Burning Grounds.*—The place acquired for the people of Nabobpet, &c., for burial and burning purposes has not yet been actually opened, pending the disposal of the reference in the District Court regarding the compensation awarded for the place. Places were selected for similar purposes for the people of the other parts of the town and proposals submitted through the Collector for sanction. The order prohibiting the burial of corpses in the river-bed was made permanent and, as a matter of fact, no burials take place against that order.

40. *Grant 4, Lighting.*—The allotment for new lights having been transferred to plague charges, the number of lights remained the same as in the previous year, viz, 215. The increase of Rs. 30 under contingencies was due to the purchase of burners, &c., for the existing lanterns.

41. *Travellers' Bungalow.*—The building is in good repair and well furnished.

42. *Other Charges.*—Some of the items hitherto shown under other items have been separately entered as per recent orders of the Government and the decrease below the revised estimate was due to less expenditure than was expected.

43. *Grant 5, Supervision and Management.*—The salary of the Secretary has been shown under inspection with reference to the recent classification. The increase under office contingencies below the revised estimate was due to the increase in the cost of printing work done at Madras.

44. *Advances Recoverable—Others.*—The District Medical and Sanitary Officer and the Secretary were advanced Rs. 50 and Rs. 150, respectively, to meet the plague expenses and the remainder consists of small sums advanced to other persons; hence the expenditure under this head.

45. *Incidence of Taxation.*—The receipts for 1898–99 amounted to Rs. 44,374, of which Rs. 28,295 were from Municipal rates and taxes. The population as per census of 1891 was 29,336 and the incidence of taxation per head was As. 15–6 against As. 15–4 in 1897–98, the difference being very small.

46. Round figures have been adopted in the report to avoid annas and pies.

47. The Educational returns and the District Medical and Sanitary Officer's report on medical institutions and sanitation, together with a copy of the Council's resolution, are herewith submitted.

Enclosure.

From W. W. L. McLEAN, Esq., District Medical and Sanitary Officer, to the Chairman, Municipal Council, dated Nellore, 15th May 1899, No. 400.

I have the honour to submit the following report on the medical administration of the Nellore Municipality for the official year 1898–99:—

Public Health.—The health of the public has not been satisfactory during the year under report. Cholera, small-pox, fevers, chicken-pox and measles were prevalent. In the month of March 1899, there were two imported cases of plague, both of which proved fatal. No further cases have however occurred. Cholera broke out in the latter part of 1897 and continued in an epidemic form up to the 8th May 1898. It appeared again on the 11th August 1898 and continued almost to the end of the year. The epidemic was reported to have been imported on the first occasion from a village in Chingleput district and on the second occasion from Gundlacamma river bridge by two coolies who were engaged on railway works. There were 421 attacks with 212 deaths during the year against 496 attacks with 241 deaths last year. Small-pox was sporadic with 8 deaths against 9 in 1897–98. There was an increase during 1898–99 in the number of deaths from malarial fevers, the mortality being 239 against 191 in 1897–98. The rainfall was 36·46 inches against 20·10 inches in the previous year. The prices of food grains remained very high till the latter part of the year, but the poorer classes did not suffer materially in health in consequence.

2. *Vital Statistics.*—Two Registrars, as in 1897–98, were maintained by the Municipality during the year. The statistics for the last three years are shown below:—

Year.	Total number of births.	Total number of deaths.	Average number of births for 1,000 per annum.	Average number of deaths for 1,000 per annum.	Remark.
1896–97	815	665	27·78	22·66	The population is estimated to be over 30,000.
1897–98	817	1,062	27 85	36·20	
1898–99	754	933	25·70	31·80	

The number of prosecutions instituted under section 247 of Act IV of 1884 was 28 against 35 last year, of which 23 were convicted, 4 withdrawn and 1 acquitted. The registration of births and deaths was not satisfactorily carried out during the year. The defects have been pointed out monthly with no improvement.

3. *Sanitation.*—The drainage of the town continues in the same unsatisfactory condition as in the previous year. There are a number of cess-pools and pits in the side-channels, drainage water from which does not pass freely away. The public health in consequence is impeded. The Municipality appears to make no attempt to remedy this defect. The roads on the western side of the town are very uneven in many places and require early attention. The only improvements effected during the year have been petty repairs to three important drains. The number of dust-bins was the same as in 1897–98. None of the 59 masonry dust-bins have been replaced by moveable iron ones as suggested in the previous report. One new iron latrine was constructed during the year and three tatty latrines were replaced by iron ones, hence the number of latrines is 31 against 30 in 1897–98. The number of private latrines conserved by the Municipality was 923 against 881 last year, showing an increase of 42. A sum of Rs. 1,958–14–3 was collected during the year towards private privy tax, but no additional scavengers have been employed for this conservancy. The night-soil is deposited, as usual, in trenches and the rubbish stored in depots outside the town. The rubbish accumulated during the past three years was sold by auction during the year for Rs. 2,014–4–0. The beef slaughter-house has not yet been constructed though the matter had been under contemplation for the last two years and the necessary land acquired. Cows are at present slaughtered in private back-yards in the midst of dwelling houses which is objectionable. The practice of burying and burning the dead in the bed of the river is still continued though it has been often condemned as injurious to the health of the people. Two sites have been selected for burial and cremation grounds and a plan of the same has recently been received in this office for opinion. The water-supply of the town is obtained from wells, tank, irrigation channels, the river and the Moolapet reservoir. The latter is the only source which has a watchman employed to prevent it from pollution; during the hot months of the year, there was a great scarcity of water. The wells were almost dry and the principal source of drinking-water was the river and this is open to contamination. Four wells were supplied with pulleys and platforms during the year and one was repaired. Nothing appears to have been spent by the Municipality during the year in the direction of improvement of village-site. Sanitary establishments were the same as in the previous year.

4. *Vaccination.*—The subjoined table compares the work done by the Municipal vaccinator in 1898–99 with that in 1897–98:—

Year.	Total vaccinated.	Number successful.	Percentage of success.	Under one year of age.		
				Total vaccinated.	Number successful.	Percentage of success.
1897-98	1053	947	89·90	806	769	95·40
1898-99	1163	968	83·23	708	708	100

Vaccination is compulsory in the Municipality and a good supply of fresh lanoline vaccine paste is available. The total number of cases vaccinated during the year under report was 1,163, of which 968 were successful, 53 unsuccessful and 142 unknown against 947 successful, 41 unsuccessful and 65 unknown in 1897–98. The work of the Municipal vaccinator cannot be considered satisfactory, as although the number vaccinated is larger than in the previous year, the successful cases are nearly 7 per cent. less, being 83·23 against 89·90 last year. The unknown cases were very numerous during the year. There were 187 cases revaccinated during the year, of which 50 were successful. The total cost of vaccination came to Rs. 278–0–11 for 1898–99, and the cost of each case vaccinated during the year was As. 3–10 against As. 4–1 in 1897–98. The unsatisfactory state of vaccination is, however, considered to be due to defective registration of births.

5. *Hospitals and Dispensaries.*—The Municipal Council maintained, as usual, three institutions during the year under report (*a*) Municipal Hospital, (*b*) Jubilee Hospital for Women and Children, and (*c*) the Branch dispensary. The first two are satisfactorily accommodated as regards position and buildings, but the latter is located in a small and inconvenient hired house which is illsuited for the purpose. The cook-room and the out wards of the Municipal hospital require early repairs. A pucka building for infectious diseases is also required at the Jubilee hospital. Most of the recommendations made by the Surgeon-General at his last two inspections have not been carried out for want of funds and that as regards the abolition of the branch dispensary has been disapproved of by the Council. The working of the Jubilee hospital is not as satisfactory as it might be.

(1) A sum of Rs. 350–7–6 was collected during the year from the sale of medicines against Rs. 423–14–9 last year. The decrease was due to the reversion to the old rules sanctioned in G.O., Mis. No. 1999 M., dated 15th September 1897. The reason is however unaccountable.

(2) The undermentioned table compares the number of patients treated during the year with that of the previous year:—

Year.	Municipal Hospital.		Jubilee Hospital.		Branch Dispensary.	
	In-patient.	Out-patient.	In-patient.	Out-patient.	In-patient.	Out-patient.
1897-98	499	22,360	23	5362	..	11280
1898-99	548	16,585	27	6134	..	14292

There was an increase of 49 and 4 in the number of in-patients treated in the Municipal hospital and the Jubilee hospital, respectively, but as regards the number of out-patients treated there was a marked increase in the numbers at the Jubilee hospital and the branch dispensary. The quantity of work done in the latter institution is very satisfactory. The Municipal hospital showed a decrease of 5,775 during the year under report. The causes of this marked decrease are not easily ascertainable. The theory that the institution is not popular is refuted by the fact that the number of in-patients was larger by 49 than in 1897–98. Probably the chief cause is owing to the fact of the branch dispensary being situated in a different position to what it was in 1896. The attendance there has markedly increased during 1897–98 and 1898–99.

(3) There were 82 deaths among the in-patients of the Municipal hospital and one at the Jubilee hospital. The mortality was therefore higher than in the previous year by 22 deaths. There were no deaths from septic diseases acquired in the hospital. This increase was mainly owing to nine deaths from enterites chiefly in aged people and a large number of accidents.

(4) One thousand three hundred and fifty-seven operations were conducted during the year in all the three institutions against 1,411 in 1897–98, the decrease occurring in the returns of the Municipal hospital. There was only one death in the Municipal hospital.

(5) The second toty recommended by the Surgeon-General at his inspection in 1897 has not been sanctioned as yet, the establishments of all three institutions being complete in other respects.

(6) There is a head midwife in the Jubilee hospital and also provision for four pupil midwifes, but two only were actually employed during the year. They attended 221 cases of labour as well as the out-patients in the dressing room under the supervision of the female hospital assistant, in charge, Miss C. A. Phillips. Gosha and caste women also attend the hospital and they are specially treated by the hospital assistant.

(7) The medical subordinates at the various institutions discharged their duties fairly satisfactorily during the year.

The number of prosecutions instituted under section 247 of Act IV of 1884 was 28 against 35 last year, of which 23 were convicted, 4 withdrawn and 1 acquitted. The registration of births and deaths was not satisfactorily carried out during the year. The defects have been pointed out monthly with no improvement.

3. *Sanitation.*—The drainage of the town continues in the same unsatisfactory condition as in the previous year. There are a number of cess-pools and pits in the side-channels, drainage water from which does not pass freely away. The public health in consequence is impeded. The Municipality appears to make no attempt to remedy this defect. The roads on the western side of the town are very uneven in many places and require early attention. The only improvements effected during the year have been petty repairs to three important drains. The number of dust-bins was the same as in 1897–98. None of the 59 masonry dust-bins have been replaced by moveable iron ones as suggested in the previous report. One new iron latrine was constructed during the year and three tatty latrines were replaced by iron ones, hence the number of latrines is 31 against 30 in 1897–98. The number of private latrines conserved by the Municipality was 923 against 881 last year, showing an increase of 42. A sum of Rs. 1,958–14–3 was collected during the year towards private privy tax, but no additional scavengers have been employed for this conservancy. The night-soil is deposited, as usual, in trenches and the rubbish stored in depots outside the town. The rubbish accumulated during the past three years was sold by auction during the year for Rs. 2,014–4–0. The beef slaughter-house has not yet been constructed though the matter had been under contemplation for the last two years and the necessary land acquired. Cows are at present slaughtered in private back-yards in the midst of dwelling houses which is objectionable. The practice of burying and burning the dead in the bed of the river is still continued though it has been often condemned as injurious to the health of the people. Two sites have been selected for burial and cremation grounds and a plan of the same has recently been received in this office for opinion. The water-supply of the town is obtained from wells, tank, irrigation channels, the river and the Moolapet reservoir. The latter is the only source which has a watchman employed to prevent it from pollution; during the hot months of the year, there was a great scarcity of water. The wells were almost dry and the principal source of drinking-water was the river and this is open to contamination. Four wells were supplied with pulleys and platforms during the year and one was repaired. Nothing appears to have been spent by the Municipality during the year in the direction of improvement of village-site. Sanitary establishments were the same as in the previous year.

4. *Vaccination.*—The subjoined table compares the work done by the Municipal vaccinator in 1898–99 with that in 1897–98:—

Year.	Total vaccinated.	Number successful.	Percentage of success.	Under one year of age.		
				Total vaccinated.	Number successful.	Percentage of success.
1897-98	1053	947	89·90	805	769	95·40
1898-99	1163	968	83·23	708	708	100

Vaccination is compulsory in the Municipality and a good supply of fresh lanoline vaccine paste is available. The total number of cases vaccinated during the year under report was 1,163, of which 968 were successful, 53 unsuccessful and 142 unknown against 947 successful, 41 unsuccessful and 65 unknown in 1897–98. The work of the Municipal vaccinator cannot be considered satisfactory, as although the number vaccinated is larger than in the previous year, the successful cases are nearly 7 per cent. less, being 83·23 against 89·90 last year. The unknown cases were very numerous during the year. There were 187 cases revaccinated during the year, of which 50 were successful. The total cost of vaccination came to Rs. 278–0–11 for 1898–99, and the cost of each case vaccinated during the year was As. 3–10 against As. 4–1 in 1897–98. The unsatisfactory state of vaccination is, however, considered to be due to defective registration of births.

5. *Hospitals and Dispensaries.*—The Municipal Council maintained, as usual, three institutions during the year under report (*a*) Municipal Hospital, (*b*) Jubilee Hospital for Women and Children, and (*c*) the Branch dispensary. The first two are satisfactorily accommodated as regards position and buildings, but the latter is located in a small and inconvenient hired house which is illsuited for the purpose. The cook-room and the out wards of the Municipal hospital require early repairs. A pucka building for infectious diseases is also required at the Jubilee hospital. Most of the recommendations made by the Surgeon-General at his last two inspections have not been carried out for want of funds and that as regards the abolition of the branch dispensary has been disapproved of by the Council. The working of the Jubilee hospital is not as satisfactory as it might be.

(1) A sum of Rs. 350–7–6 was collected during the year from the sale of medicines against Rs. 423–14–9 last year. The decrease was due to the reversion to the old rules sanctioned in G.O., Mis. No. 1999 M., dated 15th September 1897. The reason is however unaccountable.

(2) The undermentioned table compares the number of patients treated during the year with that of the previous year:—

Year.	Municipal Hospital.		Jubilee Hospital.		Branch Dispensary.	
	In-patient.	Out-patient.	In-patient.	Out-patient.	In-patient.	Out-patient.
1897-98	499	22,360	23	5362	..	11280
1898-99	548	16,585	27	6134	..	14292

There was an increase of 49 and 4 in the number of in-patients treated in the Municipal hospital and the Jubilee hospital, respectively, but as regards the number of out-patients treated there was a marked increase in the numbers at the Jubilee hospital and the branch dispensary. The quantity of work done in the latter institution is very satisfactory. The Municipal hospital showed a decrease of 5,775 during the year under report. The causes of this marked decrease are not easily ascertainable. The theory that the institution is not popular is refuted by the fact that the number of in-patients was larger by 49 than in 1897–98. Probably the chief cause is owing to the fact of the branch dispensary being situated in a different position to what it was in 1896. The attendance there has markedly increased during 1897–98 and 1898–99.

(3) There were 82 deaths among the in-patients of the Municipal hospital and one at the Jubilee hospital. The mortality was therefore higher than in the previous year by 22 deaths. There were no deaths from septic diseases acquired in the hospital. This increase was mainly owing to nine deaths from enterites chiefly in aged people and a large number of accidents.

(4) One thousand three hundred and fifty-seven operations were conducted during the year in all the three institutions against 1,411 in 1897–98, the decrease occurring in the returns of the Municipal hospital. There was only one death in the Municipal hospital.

(5) The second toty recommended by the Surgeon-General at his inspection in 1897 has not been sanctioned as yet, the establishments of all three institutions being complete in other respects.

(6) There is a head midwife in the Jubilee hospital and also provision for four pupil midwifes, but two only were actually employed during the year. They attended 221 cases of labour as well as the out-patients in the dressing room under the supervision of the female hospital assistant, in charge, Miss C. A. Phillips. Gosha and caste women also attend the hospital and they are specially treated by the hospital assistant.

(7) The medical subordinates at the various institutions discharged their duties fairly satisfactorily during the year.

(8) In accordance with G.O., No. 1985 M., dated 18th November 1896, all precautionary measures regarding plague have been carried out. Hospital assistant, P. Chenchureddy, has been at Nellore railway station on duty the whole year, examining all passengers arriving at Nellore from plague-infected areas. A plague camp, with observation and segregation sheds and fully equipped, have been constructed during the year at an excellent site to the north of the town.

Forwarded.

2. The roads are generally in a fair condition. A portion of the trunk road is very uneven and requires thorough repairs.

NELLORE,
23*rd May* 1899.

(Signed) K. NARSIMHA ROW,
Head-quarter Deputy Collector.

No. 814-Eng.

Submitted.

2. *Drainage.*—The District Medical and Sanitary Officer remarks that the drainage is unsatisfactory. This is so, but the cost of a complete system of drainage is prohibitory. All that can be done is to make gradually minor improvements as directed in G.O., No. 1512 M., dated 19th September 1895. In obedience to this order Rayajee street and Madhvapathy street, two badly drained streets in Nellore town, were selected for improvement. The inhabitants of the latter street offered to pay half the cost of laying down U-shaped drains. Plan and estimate were accordingly prepared and sent to the Sanitary Board for approval. They were received and approved by the Board in September 1898. But the work has not been carried out for want of funds and as the half contribution has not been paid as promised.

3. *Water-supply.*—The principal schemes for water-supply to the town are—

(1) Kanigiri reservoir.
(2) Pennér bed wells.
(3) Nellore tank.

The first was proposed by Mr. Macleane, but condemned by Messrs. Walch and Malet, the then Chief and Assistant Engineers for Irrigation who considered the Pennér bed wells as the only satisfactory and permanent method of supply for the town. The third scheme, however, deserves further investigation. In G.O., No. 948 I.R., dated 11th November 1895, plans and estimates were sanctioned for a channel from Sangam anicut to the Nellore tank, converting it into a twelve month tank. If this project were carried out, there would be an ample water-supply for the town. I have written to the Executive Engineer about this project which will combine the advantages of irrigation and water-supply.

4. The plea for not carrying out improvements is want of funds, but now that section 75 (1) of the Municipal Act, as recently amended, empowers the Council to raise funds in this behalf by a levy of a water and drainage tax at 8 per cent. the matter may well be reconsidered by the Municipal Council and report submitted to Government as directed in G.O., Mis. No. 38 M., dated 12th January 1895.

5. The District Medical and Sanitary Officer describes the roads on the western side of the town as very uneven in many places and requiring early attention. The Divisional officer says a portion of the trunk road is very uneven and requires thorough repairs. I endorse these remarks and consider that with abundance of laterite about, there is no reason why the roads should not be kept in good order.

6. The out-houses and wards of the Municipal hospital need thorough repair. The suggestions of the Surgeon-General should be carried out without delay.

7. One of the two sites for burning and burial referred to in G.O., Mis. No. 22, dated 5th January 1898, has been approved; the other is under correspondence as it is situated above the anicut.

(Signed) C. M. MULLALY,
Collector.

29*th May* 1899.

ORDER—No. 877 M., dated 21st June 1899.

The receipts and charges of the Nellore Municipality for 1898–99 are compared below with the budget and revised estimates for the year and the actuals of 1897–98:—

—	Actuals, 1897–98.	Budget estimate, 1898–99.	Revised estimate, 1898–99.	Actuals, 1898–99.
Receipts.	Rs.	Rs.	Rs.	Rs.
Balance brought forward	5,899	4,040	4,460	4,463
Tax on Arts	3,131	3,100	3,150	3,135
,, Buildings and Lands	15,795	16,950	17,400	17,024

Balance	4,463	1,180	6,120	3,962

2. The Municipal Council held 20 meetings against 27 in the previous year. The average attendance of the official members improved and was good; but owing to delay in filling up certain vacancies on the Council by election, the attendance of the non-officials declined and was poor. Six seats were filled up by election during the year and all of them were contested, 47·7 per cent. of the registered voters attending the poll.

3. *Receipts.*—(1) The number of persons assessed to the tax on arts and the net current demand under this head rose from 1,046 and Rs. 3,092, respectively, to 1,090 and Rs. 3,236. Under the taxes on buildings and lands also, the demand increased by Rs. 1,098 and Rs. 125, respectively. The registers of the latter tax are, however, more than five years old and should be revised in the current year. Though the collections under all these taxes declined, they were still very fair.

(2) The income from bungalow fees, school-fees, market rents, fines and sale of sweepings showed an advance, which was most marked under the last head, being due to the rubbish which accumulated during the past three years having been sold in the year under review. On the other hand, the receipts from tolls and license fees fell off. The decrease under the former head is ascribed to the opening of the Bezwada-Madras Railway, but that under the latter has not been accounted for.

(3) It is satisfactory to observe that the number of houses served by the private scavenging agency rose from 881 to 923 and that the service was worked at a profit of Rs. 181 against Rs. 145 in 1897–98. The percentage of houses assessed to the tax on buildings, brought under the system, is still very low, viz., 15·3 per cent. during the year under review as compared with 14 per cent. during 1897–98. The advance is small and the Municipal Council should make an earnest endeavour to have the system extended to all the houses in the town, the excess in the receipts from this service over the charges being utilized towards its improvement.

4. *Expenditure*—(1) *Public Works.*—No new work of importance was undertaken during the year. The total outlay on communications amounted to Rs. 6,464 or 82 per cent. more than the net Municipal income from tolls and the Revenue Divisional Officer reports that the roads in the town are generally in fair order. Early steps should, however, be taken to improve the condition of the roads referred to in paragraph 5 of the Collector's endorsement.

(2) *Education.*—The net expenditure under this head amounted to Rs. 3,377 or 11·9 per cent. of the income from taxation. Of this sum, Rs. 1,958 were spent on primary, and the remainder on secondary, education. The Municipal Council continued to maintain three primary schools on the salary-result system, of which one was exclusively for Panchamas. The attendance at these schools rose from 239 to 267 and the results of the departmental examinations were fair. As in the previous year, four secondary schools were aided by the Municipal Council—two with salary grants and two with result grants—, while the number of primary schools aided by it with result grants was ten against nine in 1897–98. The number on the rolls of the aided schools fell from 1,163 to 1,123, but the results of the public and grant examinations were on the whole fair and the allotments for salary and result grants were almost fully utilized. The total number of boys under instruction in the Municipal and aided schools was 1,359 or 63·3 per cent. of the male population of school-going age against 1,375 or 64·1 per cent. in the previous year. More than 26 per cent. of the number of teachers employed in the aided schools were entirely unqualified. Steps should be taken to reduce this large proportion in the current year.

(3) *Medical Relief.*—As usual, the Municipal Council maintained two hospitals and one dispensary. The number of in-patients treated in the former rose from 522 to 575, but that of out-patients who attended all the three institutions fell from 39,002 to 37,011, the decrease which occurred in the civil hospital being explained in paragraphs 33 and 5 (2) of the reports of the Chairman and the District Medical and Sanitary Officer, respectively. The number of labour cases treated in the lying-in department of the Jubilee hospital rose from 106 to 221—a satisfactory advance. The attention of the Municipal Council is drawn to paragraph 6 of the Collector's endorsement.

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year was 1,163 or 110 more than in 1897–98; but the percentage of success again fell from 89·9 to 83·2. Infantile vaccination also declined, the number of children under one year successfully vaccinated being 24·1 per mille of the population against 27·1 per mille in the previous year. Greater attention should be paid to this branch of the administration in the current year.

There was a decrease in the numbers of births and deaths registered during the year. The rates recorded being considerably below the normal, it is evident that the registration of vital statistics is very defective. Early steps should be taken to render the returns accurate.

(5) *Sanitation.*—Owing to the large expenditure incurred on account of plague, the outlay under this head exceeded the allotment by 14·2 per cent. and it was 27·4 per cent. of the current receipts. The sanitation of the town appears to have received some attention from the Municipal Council; but from paragraph 3 of the District Medical and Sanitary Officer's report it is observed that there are still many defects, which the Council should remedy as soon as possible. In this connection, the attention of the Council is drawn to the Collector's remark in paragraph 4 of his endorsement.

5. *General Remarks.*—The year closed with a balance of Rs. 3,962 or 8·9 per cent. of the current receipts.

Except in regard to vaccination, registration of vital statistics and sanitation, which require special attention, the administration of the Municipality during the year under review was fairly satisfactory.

JUNE.

Administration Report.

Reviewing the — of the Nellore Municipal Council for 1898–99.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. N. V. RANGACHARLU Garu, Chairman, Municipal Council, Nellore, to the Secretary to Government, Local and Municipal Department (through the Head-quarter Deputy Collector, Nellore), dated 20th May 1899, No. 608-Mun.

I have the honour to submit the following report on the administration of the Nellore Municipality during the financial year 1898–99, together with the usual statements :—

I.—CONSTITUTION OF THE COUNCIL.

2. The sanctioned number of councillors was eighteen. Besides the four vacancies pending in the beginning of the year, seven more seats fell vacant during the year. Of these eleven vacancies, six were filled up by election as per G.O., Mis. No. 711 M., dated 4th April 1898, three by nomination and the other two remained vacant, having occurred in March 1889, so that the number of councillors actually remaining at the end of the year was sixteen. All the six seats were contested, 47·7 per cent. of the registered voters attending the poll. The undersigned held the office of Chairman throughout the year.

3. Twenty-two meetings were convened during the year and the number actually held was twenty against twenty-seven in 1897–98. The average attendance at the meetings held was 7—2·3 being officials and 4·7 non-officials against 1·9 and 7·7, respectively, in the previous year. The delay in filling up the six seats by election accounts for the decrease in the attendance of the non-officials.

4. The accounts for the year under report have not been audited.

II.—RECEIPTS.

5. The receipts under the several heads in 1898–99 amounted to Rs. 44,374 against Rs. 41,919, the actuals of 1897–98, and Rs. 44,630, the revised estimate of the year under report.

6. The differences between the actuals of 1897–98 and the budget and revised estimates of 1898–99 were explained in this office letter, dated 10th December 1898, No. 1294, recorded in G.O., No. 373 M., dated 15th March 1899, and those between the revised estimate and the actuals of the year under report are explained below.

7. *Tax on Arts.*—The original demand amounted to Rs. 3,252 and Rs. 16 was remitted on appeal, the net demand being Rs. 3,236. This, together with the arrear demand of Rs. 75, came up to Rs. 3,311, the total demand for the year. Rupees 3,134 (arrears Rs. 63 + current Rs. 3,071) were collected during the year and Rs. 12 written off, leaving a balance of Rs. 165 relating to the year under report.

The total number of persons assessed and the average incidence per person assessed were 1,090 and Rs. 2–15–6 against 1,046 and Rs. 2–15–3 in 1897–98, respectively, the increase in the number of persons being due to fresh assessments under the lower classes of the schedule.

8. *Tax on Buildings.*—This tax having been revised in 1897–98, the revised tax amounting to Rs. 16,317 was the original demand for the year under report. Rupees 24 were remitted on appeal and the net demand was Rs. 16,293. Adding to this the arrear demand of Rs. 450, the total demand for the year was Rs. 16,743. Rupees 15,983 (arrears Rs. 360 + current Rs. 15,623) were collected during the year, Rs. 61 remitted on account of vacant houses, &c., and Rs. 5 written off, leaving a balance of Rs. 694.

The number of houses assessed during the year was 6,050 against 6,165 in 1897–98, the decrease being due to the clubbing of houses at the revision and to the removal of those burnt, &c.

9. *Tax on Lands.*—This tax not having been revised in 1897–98 along with the house-tax for want of time, the previous year's demand excluding the tax on lands subsequently built upon, was taken as the original demand for 1898–99. This, together with the tax on vacant sites at As. 4 per 80 square yards amounted to Rs. 1,265 and Rs. 2 were remitted on appeal. Adding to this the arrear demand of Rs. 124, the total demand for the year was Rs. 1,387. A sum of Rs. 1,041 (arrears Rs. 108 + current Rs. 933) was collected during the year, leaving a balance of Rs. 346 at its close. The extent of land assessed was 1,401·×2 acres against 1,393·77 acres in 1897–98, the increase being due to the inclusion of the extent of vacant sites assessed during the year under report.

10. *Tax on Vehicles, Animals and Carts.*—A sum of Rs. 4,556 (arrears Rs. 5 + current Rs. 4,551) was collected under these heads against Rs. 4,691 in 1897–98 and Rs. 4,680, the revised estimate of the year, and there was a balance of Rs. 90 remaining to be collected at its close.

11. *Gross Collections under the above six taxes.*—The total collections under these amounted to Rs. 24,714 against Rs. 25,230, the revised estimate of the year. The decrease below the revised estimate was due to the abolition of the office of Revenue Inspector from 1st April 1898 and to the occurrence of plague during the latter part of the year. A sum of Rs. 789 has been collected up to date.

12. *Coercive Processes.*—The number of warrants at the beginning of the year was 39 involving a sum of Rs. 54. Five hundred and thirty-five warrants involving a sum of Rs. 693 were issued during the year, so that the number of warrants for execution was 574; of these 461 warrants were either executed or cancelled during the year, leaving a balance of 113 warrants at its close pending execution. In twenty cases the property was distrained and released before sale.

13. *Tolls.*—All the toll-gates were sold in one lot for Rs. 4,750 against Rs. 6,000 in 1897–98, the decrease being due to the opening of the Bezwada-Madras Railway. The whole of the demand was collected and the District Board's one-fourth share paid during the year.

14. *Rent of Municipal Buildings and Fees from Travellers' Bungalows.*—The increase under these two heads was due to more collections than was expected at the time of preparing the revised estimate.

15. *Income from School-fees.*—The headmaster of the Ranganaikulapet Municipal school failed to collect fees from boys leaving the school and a sum of Rs. 22 and odd was collected from him. This and the increase in strength account for the increase over the revised estimate.

16. *Cart-stand Fees.*—The cart-stand renter failed to pay four instalments; hence the decrease below the revised estimate. A suit has been filed against him.

17. *Fines.*—The amounts realised under the Police and Municipal Acts have been shown separately. The increase over the revised estimate was due to more collections subsequent to the submission of the revised estimate.

18. *Grants and Contributions from Government—Education—Normal Stipends.*—As no provision was made in the budget for 1899–1900, no students were entertained from January as usual. Hence the decrease below the revised estimate.

19. *Grants and Contributions from Local Boards—Medical.*—The less expenditure on the Jubilee Hospital and the consequent non-realization of the proportionate cost from the District Board account for the decrease below the revised estimate.

20. *Private Scavenging.*—The number of houses cleaned by the municipal agency at the beginning of the year was 881 and it rose to 923 at its close. The collections were Rs. 1,959 (arrears Rs. 39 + current Rs. 1,920) against Rs. 1,738 in 1897–98. The expenditure under this head was Rs. 1,778, leaving a surplus of Rs. 181. A separate inspector having been appointed from 1st April 1899, it is expected that there would be a substantial increase in the number of houses.

21. *Advances—Others.*—The excess amount drawn in 1897–98 on account of the cost of printing work done at Madras was recovered during the year. Hence the increase over the revised estimate.

III.—Expenditure.

22. The expenditure under the several grants was Rs. 44,876 against Rs. 43,354, the actuals of 1897–98, and Rs. 42,970, the revised estimate of the year under report.

23. As already submitted in paragraph 6 above, the differences between the revised estimate and the actuals of 1898–99 are explained below.

24. *Grant 1, New Works—Buildings.*—As provided for in the budget the two pucka sheds in the municipal hospital for the sweeper and scavenger and four iron latrines were constructed during the year, three of the latter having been substituted for tatty ones and the fourth set apart for the use of the females of Mulappet. The decrease below the revised estimate was due to less expenditure than was expected.

25. *Repairs—Communications.*—Seven roads and seven streets were repaired during the year besides patch work on other roads and streets. The condition of the roads and streets is very fair.

The length of the roads and streets is 37 miles 7 furlongs and 620 feet, 26 miles and 6 furlongs being metalled and the rest unmetalled. The District Surgeon's remarks that some of the streets in the western part of the town are uneven will be noted and the defect remedied as soon as possible. The increase over the revised estimate was due to more expenditure than was expected.

26. *Buildings.*—The several municipal buildings were white-washed besides petty repairs. The contagious disease ward was not repaired in order to provide for the increase in the plague expenditure. Hence the decrease below the revised estimate.

27. *Drainage.*—With due deference to the Medical officer's remark regarding the unsatisfactory state of the existing drains, the Municipality has been doing its best to set right the minor defects so far as the funds at its disposal could permit. There are, no doubt, a few depressions here and there in the drains. These have been in existence for a number of years. All possible care is taken that no sewage accumulates in such places. Levels were taken several years ago for a complete drainage scheme, but nothing further could be done because of the large outlay required and the inability of the Council to meet it from its limited means. The execution of some urgent petty repairs and the debit of the cost of the sewage cart, &c., to contingencies account for the increase over the revised estimate.

28. *Grant 2, Training Schools—Stipends to Normal Students.*—As no provision was made in the budget for 1899–1900, no students were admitted in January last when the old students left the school. Hence the decrease below the revised estimate.

29. *Municipal Schools on Salary-result System.*—The Municipality continued to maintain the three schools remaining at the close of 1897–98, one of them being purely for Panchamas. The average attendance in each of the three schools was higher than that in 1897–98 and the average cost of educating each pupil was Rupees 4–1–2 against Rs. 5–13–6 in the previous year. The increase under result grants was met by transfer of the savings under contingencies, salary, building, &c., grants. Hence the variations under the minor heads between the revised estimate and the actuals of the year under report. It appears from the results appended to statement V-A, that the schools did fairly well at the grant examinations.

30. *Salary Grants.*—The Free Church Mission and the Venkatagiri Raja's High schools were aided during the year. The strength of the schools was 274 and 271 against 308 and 269, respectively, in 1897–98. Out of Rs. 581 spent under this head, Rs. 494 were for the Free Church Mission school and Rs. 87 for the other. It appears from the Inspector's report that though the general condition of the Mission school and its tone and discipline were good, the work of the staff was not satisfactory, judging from the results of his inspection and that careful supervision did not seem to have been exercised by the headmaster over the work of his assistants. In the

case of the other school, he observed that generally fair results were shown at the inspection and that the general condition and the tone and discipline of the school left little to be desired. The following shows the results of the public examinations in the two schools :—

Name of institute.	Examination.	Number sent up.	Number passed.
Venkatagiri Raja's High school	Lower Secondary	16	7
Do.	Matriculation	29	7
Free Church Mission school	Lower Secondary	16	7
Do.	Matriculation	30	6

31. *Fixed and Result Grants.*—There were at the beginning of the year eleven schools—two lower secondary and nine primary. Two schools were added and three closed during the year, so that the number at the end of the year was ten. Rupees 1,255 were spent under this head against Rs. 1,004 in 1897–98.

32. *Inspection.*—The permanent supervisor having been sent for training at Madras, there was some delay in filling up the acting vacancy. Hence the decrease below the revised estimate.

33. *Grant 3, Medical Relief.*—Three institutions were maintained as in 1897–98 and the number of patients treated at them is given below together with the corresponding figures of the previous year :—

Name of institution.	In-patients.		Out-patients.		Total treated.	
	1897-98.	1898-99.	1897-98.	1898-99.	1897-98.	1898-99.
Municipal hospital	499	548	22,360	16,585	22,859	17,133
Jubilee hospital	23	27	5,362	6,134	5,385	6,161
Branch dispensary	..	..	11,280	14,292	11,280	14,292
Total	522	575	39,002	37,011	39,524	37,586

Though there was a marked decrease in the number of out-patients treated at the municipal hospital, the decrease on the whole below that of 1897–98 was 1,938 and the existence of cholera almost throughout the town and the plague scare might be taken to account for it. The decrease in the municipal hospital was simultaneous with the transfer of the branch dispensary to a more convenient part of the town and it is not improbable that the people once resorting to the former now go to the latter. The opening up of the Jubilee hospital for out patients must necessarily have interfered with the attendance of females at the municipal hospital. These two causes may have led to the decrease in the attendance at the latter institution.

The cost of maintaining the three institutions was Rs. 8,683 against Rs. 8,810, the revised estimate of the year, and Rs. 8,689, the actuals of 1897–98. The decrease below the revised estimate, mostly under establishment, was due to the entertainment of two against four pupil midwives and to the non-payment of vernacular allowance to the hospital assistant in charge of the branch dispensary as he was not entitled to it. An estimate is under preparation for the repairs of the several parts of the municipal hospital referred to by the Medical officer and they will be done as early as possible. The entertainment of a second toty could not be sanctioned for want of funds like other proposals of the Surgeon-General. As regards the unsuitability of the branch dispensary building, it may be submitted that the same was selected and considered sufficient by the then Medical officer for an out-patient dispensary and the Council agreed with him. The dispensary has been there since its transfer from the town. The Medical officer simply remarks "the working of the Jubilee hospital is not as satisfactory as it might be", though there was improvement in every way, viz., increase in the number of in-and out-patients treated and in the number of labour cases over last year and does not suggest any proposals to remedy it.

34. *Vaccination.*—The municipal vaccinator vaccinated 1,163 cases against 1,053 in 1897–98, 976 relating to primary and 187 to re-vaccination cases. Nine hundred

21. *Advances—Others.*—The excess amount drawn in 1897–98 on account of the cost of printing work done at Madras was recovered during the year. Hence the increase over the revised estimate.

III.—Expenditure.

22. The expenditure under the several grants was Rs. 44,876 against Rs. 43,354, the actuals of 1897–98, and Rs. 42,970, the revised estimate of the year under report.

23. As already submitted in paragraph 6 above, the differences between the revised estimate and the actuals of 1898–99 are explained below.

24. *Grant 1, New Works—Buildings.*—As provided for in the budget the two pucka sheds in the municipal hospital for the sweeper and scavenger and four iron latrines were constructed during the year, three of the latter having been substituted for tatty ones and the fourth set apart for the use of the females of Mulappet. The decrease below the revised estimate was due to less expenditure than was expected.

25. *Repairs—Communications.*—Seven roads and seven streets were repaired during the year besides patch work on other roads and streets. The condition of the roads and streets is very fair.

The length of the roads and streets is 37 miles 7 furlongs and 620 feet, 26 miles and 6 furlongs being metalled and the rest unmetalled. The District Surgeon's remarks that some of the streets in the western part of the town are uneven will be noted and the defect remedied as soon as possible. The increase over the revised estimate was due to more expenditure than was expected.

26. *Buildings.*—The several municipal buildings were white-washed besides petty repairs. The contagious disease ward was not repaired in order to provide for the increase in the plague expenditure. Hence the decrease below the revised estimate.

27. *Drainage.*—With due deference to the Medical officer's remark regarding the unsatisfactory state of the existing drains, the Municipality has been doing its best to set right the minor defects so far as the funds at its disposal could permit. There are, no doubt, a few depressions here and there in the drains. These have been in existence for a number of years. All possible care is taken that no sewage accumulates in such places. Levels were taken several years ago for a complete drainage scheme, but nothing further could be done because of the large outlay required and the inability of the Council to meet it from its limited means. The execution of some urgent petty repairs and the debit of the cost of the sewage cart, &c., to contingencies account for the increase over the revised estimate.

28. *Grant 2, Training Schools—Stipends to Normal Students.*—As no provision was made in the budget for 1899–1900, no students were admitted in January last when the old students left the school. Hence the decrease below the revised estimate.

29. *Municipal Schools on Salary-result System.*—The Municipality continued to maintain the three schools remaining at the close of 1897–98, one of them being purely for Panchamas. The average attendance in each of the three schools was higher than that in 1897–98 and the average cost of educating each pupil was Rupees 4–1–2 against Rs. 5–13–6 in the previous year. The increase under result grants was met by transfer of the savings under contingencies, salary, building, &c., grants. Hence the variations under the minor heads between the revised estimate and the actuals of the year under report. It appears from the results appended to statement V-A, that the schools did fairly well at the grant examinations.

30. *Salary Grants.*—The Free Church Mission and the Venkatagiri Raja's High schools were aided during the year. The strength of the schools was 274 and 271 against 308 and 269, respectively, in 1897–98. Out of Rs. 581 spent under this head, Rs. 494 were for the Free Church Mission school and Rs. 87 for the other. It appears from the Inspector's report that though the general condition of the Mission school and its tone and discipline were good, the work of the staff was not satisfactory, judging from the results of his inspection and that careful supervision did not seem to have been exercised by the headmaster over the work of his assistants. In the

case of the other school, he observed that generally fair results were shown at the inspection and that the general condition and the tone and discipline of the school left little to be desired. The following shows the results of the public examinations in the two schools :—

Name of institute.	Examination.	Number sent up.	Number passed.
Venkatagiri Raja's High school	Lower Secondary	16	7
Do.	Matriculation	29	7
Free Church Mission school	Lower Secondary	16	7
Do.	Matriculation	30	6

31. *Fixed and Result Grants.*—There were at the beginning of the year eleven schools—two lower secondary and nine primary. Two schools were added and three closed during the year, so that the number at the end of the year was ten. Rupees 1,255 were spent under this head against Rs. 1,004 in 1897–98.

32. *Inspection.*—The permanent supervisor having been sent for training at Madras, there was some delay in filling up the acting vacancy. Hence the decrease below the revised estimate.

33. *Grant 3, Medical Relief.*—Three institutions were maintained as in 1897–98 and the number of patients treated at them is given below together with the corresponding figures of the previous year :—

Name of institution.	In-patients.		Out-patients.		Total treated.	
	1897–98.	1898–99.	1897–98.	1898–99.	1897–98.	1898–99.
Municipal hospital	499	548	22,360	16,585	22,859	17,133
Jubilee hospital	23	27	5,362	6,134	5,385	6,161
Branch dispensary	..	..	11,280	14,292	11,280	14,292
Total ..	522	575	39,002	37,011	39,524	37,586

Though there was a marked decrease in the number of out-patients treated at the municipal hospital, the decrease on the whole below that of 1897–98 was 1,938 and the existence of cholera almost throughout the town and the plague scare might be taken to account for it. The decrease in the municipal hospital was simultaneous with the transfer of the branch dispensary to a more convenient part of the town and it is not improbable that the people once resorting to the former now go to the latter. The opening up of the Jubilee hospital for out patients must necessarily have interfered with the attendance of females at the municipal hospital. These two causes may have led to the decrease in the attendance at the latter institution.

The cost of maintaining the three institutions was Rs. 8,683 against Rs. 8,810, the revised estimate of the year, and Rs. 8,689, the actuals of 1897–98. The decrease below the revised estimate, mostly under establishment, was due to the entertainment of two against four pupil midwives and to the non-payment of vernacular allowance to the hospital assistant in charge of the branch dispensary as he was not entitled to it. An estimate is under preparation for the repairs of the several parts of the municipal hospital referred to by the Medical officer and they will be done as early as possible. The entertainment of a second toty could not be sanctioned for want of funds like other proposals of the Surgeon-General. As regards the unsuitability of the branch dispensary building, it may be submitted that the same was selected and considered sufficient by the then Medical officer for an out-patient dispensary and the Council agreed with him. The dispensary has been there since its transfer from the town. The Medical officer simply remarks "the working of the Jubilee hospital is not as satisfactory as it might be", though there was improvement in every way, viz., increase in the number of in-and out-patients treated and in the number of labour cases over last year and does not suggest any proposals to remedy it.

34. *Vaccination.*—The municipal vaccinator vaccinated 1,163 cases against 1,053 in 1897–98, 976 relating to primary and 187 to re-vaccination cases. Nine hundred

21. *Advances—Others.*—The excess amount drawn in 1897–98 on account of the cost of printing work done at Madras was recovered during the year. Hence the increase over the revised estimate.

III.—Expenditure.

22. The expenditure under the several grants was Rs. 44,876 against Rs. 43,354, the actuals of 1897–98, and Rs. 42,970, the revised estimate of the year under report.

23. As already submitted in paragraph 6 above, the differences between the revised estimate and the actuals of 1898–99 are explained below.

24. *Grant 1, New Works—Buildings.*—As provided for in the budget the two pucka sheds in the municipal hospital for the sweeper and scavenger and four iron latrines were constructed during the year, three of the latter having been substituted for tatty ones and the fourth set apart for the use of the females of Mulappet. The decrease below the revised estimate was due to less expenditure than was expected.

25. *Repairs—Communications.*—Seven roads and seven streets were repaired during the year besides patch work on other roads and streets. The condition of the roads and streets is very fair.

The length of the roads and streets is 37 miles 7 furlongs and 620 feet, 26 miles and 6 furlongs being metalled and the rest unmetalled. The District Surgeon's remarks that some of the streets in the western part of the town are uneven will be noted and the defect remedied as soon as possible. The increase over the revised estimate was due to more expenditure than was expected.

26. *Buildings.*—The several municipal buildings were white-washed besides petty repairs. The contagious disease ward was not repaired in order to provide for the increase in the plague expenditure. Hence the decrease below the revised estimate.

27. *Drainage.*—With due deference to the Medical officer's remark regarding the unsatisfactory state of the existing drains, the Municipality has been doing its best to set right the minor defects so far as the funds at its disposal could permit. There are, no doubt, a few depressions here and there in the drains. These have been in existence for a number of years. All possible care is taken that no sewage accumulates in such places. Levels were taken several years ago for a complete drainage scheme, but nothing further could be done because of the large outlay required and the inability of the Council to meet it from its limited means. The execution of some urgent petty repairs and the debit of the cost of the sewage cart, &c., to contingencies account for the increase over the revised estimate.

28. *Grant 2, Training Schools—Stipends to Normal Students.*—As no provision was made in the budget for 1899–1900, no students were admitted in January last when the old students left the school. Hence the decrease below the revised estimate.

29. *Municipal Schools on Salary-result System.*—The Municipality continued to maintain the three schools remaining at the close of 1897–98, one of them being purely for Panchamas. The average attendance in each of the three schools was higher than that in 1897–98 and the average cost of educating each pupil was Rupees 4–1–2 against Rs. 5–13–6 in the previous year. The increase under result grants was met by transfer of the savings under contingencies, salary, building, &c., grants. Hence the variations under the minor heads between the revised estimate and the actuals of the year under report. It appears from the results appended to statement V-A, that the schools did fairly well at the grant examinations.

30. *Salary Grants.*—The Free Church Mission and the Venkatagiri Raja's High schools were aided during the year. The strength of the schools was 274 and 271 against 308 and 269, respectively, in 1897–98. Out of Rs. 581 spent under this head, Rs. 494 were for the Free Church Mission school and Rs. 87 for the other. It appears from the Inspector's report that though the general condition of the Mission school and its tone and discipline were good, the work of the staff was not satisfactory, judging from the results of his inspection and that careful supervision did not seem to have been exercised by the headmaster over the work of his assistants. In the

case of the other school, he observed that generally fair results were shown at the inspection and that the general condition and the tone and discipline of the school left little to be desired. The following shows the results of the public examinations in the two schools :—

Name of institute.	Examination.	Number sent up.	Number passed.
Venkatagiri Raja's High school	Lower Secondary	16	7
Do.	Matriculation	29	7
Free Church Mission school	Lower Secondary	16	7
Do.	Matriculation	30	6

31. *Fixed and Result Grants.*—There were at the beginning of the year eleven schools—two lower secondary and nine primary. Two schools were added and three closed during the year, so that the number at the end of the year was ten. Rupees 1,255 were spent under this head against Rs. 1,004 in 1897–98.

32. *Inspection.*—The permanent supervisor having been sent for training at Madras, there was some delay in filling up the acting vacancy. Hence the decrease below the revised estimate.

33. *Grant 3, Medical Relief.*—Three institutions were maintained as in 1897–98 and the number of patients treated at them is given below together with the corresponding figures of the previous year :—

Name of institution.	In-patients.		Out-patients.		Total treated.	
	1897–98.	1898–99.	1897–98.	1898–99.	1897–98.	1898–99.
Municipal hospital	499	548	22,360	16,585	22,859	17,133
Jubilee hospital	23	27	5,362	6,134	5,385	6,161
Branch dispensary	..	..	11,280	14,292	11,280	14,292
Total ..	522	575	39,002	37,011	39,524	37,586

Though there was a marked decrease in the number of out-patients treated at the municipal hospital, the decrease on the whole below that of 1897–98 was 1,938 and the existence of cholera almost throughout the town and the plague scare might be taken to account for it. The decrease in the municipal hospital was simultaneous with the transfer of the branch dispensary to a more convenient part of the town and it is not improbable that the people once resorting to the former now go to the latter. The opening up of the Jubilee hospital for out patients must necessarily have interfered with the attendance of females at the municipal hospital. These two causes may have led to the decrease in the attendance at the latter institution.

The cost of maintaining the three institutions was Rs. 8,683 against Rs. 8,810, the revised estimate of the year, and Rs. 8,689, the actuals of 1897–98. The decrease below the revised estimate, mostly under establishment, was due to the entertainment of two against four pupil midwives and to the non-payment of vernacular allowance to the hospital assistant in charge of the branch dispensary as he was not entitled to it. An estimate is under preparation for the repairs of the several parts of the municipal hospital referred to by the Medical officer and they will be done as early as possible. The entertainment of a second toty could not be sanctioned for want of funds like other proposals of the Surgeon-General. As regards the unsuitability of the branch dispensary building, it may be submitted that the same was selected and considered sufficient by the then Medical officer for an out-patient dispensary and the Council agreed with him. The dispensary has been there since its transfer from the town. The Medical officer simply remarks "the working of the Jubilee hospital is not as satisfactory as it might be", though there was improvement in every way, viz., increase in the number of in-and out-patients treated and in the number of labour cases over last year and does not suggest any proposals to remedy it.

34. *Vaccination.*—The municipal vaccinator vaccinated 1,163 cases against 1,053 in 1897–98, 976 relating to primary and 187 to re-vaccination cases. Nine hundred

and sixty-eight cases were successful, 708 of them being cases below one year of age. The cost of each successful case was As. 4–7 against As. 4–1.

A major portion of the unsuccessful and unknown cases was among re-vaccination cases and these consist of operations performed chiefly on Police and Salt and Abkári recruits and are not capable of being verified. Prosecution was resorted to in 256 cases against 232 in 1897–98. No cases were vaccinated by the several medical subordinates during the year under report.

35. *Registration of Births and Deaths.*—Seven hundred and fifty-four births and 933 deaths were registered during the year against 817 and 1,062, respectively, in 1897–98. Of 933 deaths, 239 were from fever, 8 from small-pox, 212 from cholera and 2 from plague against 191, 9, 241, and *nil*, respectively, in the previous year. The number of prosecutions was 28 against 35 in 1897–98 and the defaulters punished in 23 cases. All possible steps are being taken to ensure a satisfactory registration.

36. The following gives the number and cost of vaccine operations and the number of births and deaths registered with ratio per mille during the last three years:—

Years.	Number vaccinated.	Average cost of each successful case.	Births.	Ratio per mille.	Deaths.	Ratio per mille.
		A. P.				
1896–97	1,200	5 0	815	27·78	665	22·66
1897–98	1,053	4 1	817	27·85	1,062	36·20
1898–99	1,163	3 10	754	25·70	933	31·80

37. *Conservancy—Road-cleaning and Road-watering.*—The sanitary staff continued to be the same as in the previous year. The expenditure under the several minor heads amounted to Rs. 12,172 against Rs. 10,680, the revised estimate of the year, and Rs. 9,572, the actuals of 1897–98. The increase over the revised estimate was due chiefly to the construction of plague sheds and to the purchase of necessary furniture, &c., for the equipment of the plague hospitals, &c., when plague actually broke out, and the variations in the several minor heads were due to the classifications recently ordered to be made. The number of rubbish, &c., carts was the same as in 1897–98 except that one sewage and one road-watering cart were purchased during the year.

The number of latrines was increased by one, and three of the tatty ones were replaced by three iron ones so that the number of latrines at its end consisted of thirteen masonry, four tatty and fourteen iron ones. No new urinals were built during the year. The two plague cases that occurred in March last were among the police constables and their families that had returned from plague duty at Vellore. Both the cases proved fatal and there were no fresh cases afterwards. An hospital assistant still inspects the incoming passengers by train.

38. As regards the District Medical and Sanitary Officer's remark that none of the fifty-nine masonry dust-bins were replaced by iron ones and that the beef slaughter-house was not constructed though land was acquired some two years ago, it is submitted that the masonry dust-bins would be replaced by iron ones as they are worn out and that the construction of the beef slaughter-house could not be done as the Council had to provide funds for other more important and urgent matters. However all possible care is taken to keep clean the present place.

39. *Burial and Burning Grounds.*—The place acquired for the people of Nabobpet, &c., for burial and burning purposes has not yet been actually opened, pending the disposal of the reference in the District Court regarding the compensation awarded for the place. Places were selected for similar purposes for the people of the other parts of the town and proposals submitted through the Collector for sanction. The order prohibiting the burial of corpses in the river-bed was made permanent and, as a matter of fact, no burials take place against that order.

40. *Grant 4, Lighting.*—The allotment for new lights having been transferred to plague charges, the number of lights remained the same as in the previous year, viz, 215. The increase of Rs. 30 under contingencies was due to the purchase of burners, &c., for the existing lanterns.

41. *Travellers' Bungalow.*—The building is in good repair and well furnished.

42. *Other Charges.*—Some of the items hitherto shown under other items have been separately entered as per recent orders of the Government and the decrease below the revised estimate was due to less expenditure than was expected.

43. *Grant 5, Supervision and Management.*—The salary of the Secretary has been shown under inspection with reference to the recent classification. The increase under office contingencies below the revised estimate was due to the increase in the cost of printing work done at Madras.

44. *Advances Recoverable—Others.*—The District Medical and Sanitary Officer and the Secretary were advanced Rs. 50 and Rs. 150, respectively, to meet the plague expenses and the remainder consists of small sums advanced to other persons; hence the expenditure under this head.

45. *Incidence of Taxation.*—The receipts for 1898–99 amounted to Rs. 44,374, of which Rs. 28,295 were from Municipal rates and taxes. The population as per census of 1891 was 29,336 and the incidence of taxation per head was As. 15–6 against As. 15–4 in 1897–98, the difference being very small.

46. Round figures have been adopted in the report to avoid annas and pies.

47. The Educational returns and the District Medical and Sanitary Officer's report on medical institutions and sanitation, together with a copy of the Council's resolution, are herewith submitted.

Enclosure.

From W. W. L. McLEAN, Esq., District Medical and Sanitary Officer, to the Chairman, Municipal Council, dated Nellore, 15th May 1899, No. 400.

I have the honour to submit the following report on the medical administration of the Nellore Municipality for the official year 1898–99:—

Public Health.—The health of the public has not been satisfactory during the year under report. Cholera, small-pox, fevers, chicken-pox and measles were prevalent. In the month of March 1899, there were two imported cases of plague, both of which proved fatal. No further cases have however occurred. Cholera broke out in the latter part of 1897 and continued in an epidemic form up to the 8th May 1898. It appeared again on the 11th August 1898 and continued almost to the end of the year. The epidemic was reported to have been imported on the first occasion from a village in Chingleput district and on the second occasion from Gundlacamma river bridge by two coolies who were engaged on railway works. There were 421 attacks with 212 deaths during the year against 496 attacks with 241 deaths last year. Small-pox was sporadic with 8 deaths against 9 in 1897–98. There was an increase during 1898–99 in the number of deaths from malarial fevers, the mortality being 239 against 191 in 1897–98. The rainfall was 36·46 inches against 20·10 inches in the previous year. The prices of food grains remained very high till the latter part of the year, but the poorer classes did not suffer materially in health in consequence.

2. *Vital Statistics.*—Two Registrars, as in 1897–98, were maintained by the Municipality during the year. The statistics for the last three years are shown below:—

Year.	Total number of births.	Total number of deaths.	Average number of births for 1,000 per annum.	Average number of deaths for 1,000 per annum.	Remark.
1896–97	815	665	27·78	22·66	The population is estimated to be over 30,000.
1897–98	817	1,062	27·85	36·20	
1898–99	754	933	25·70	31·80	

The number of prosecutions instituted under section 247 of Act IV of 1884 was 28 against 35 last year, of which 23 were convicted, 4 withdrawn and 1 acquitted. The registration of births and deaths was not satisfactorily carried out during the year. The defects have been pointed out monthly with no improvement.

3. *Sanitation.*—The drainage of the town continues in the same unsatisfactory condition as in the previous year. There are a number of cess-pools and pits in the side-channels, drainage water from which does not pass freely away. The public health in consequence is impeded. The Municipality appears to make no attempt to remedy this defect. The roads on the western side of the town are very uneven in many places and require early attention. The only improvements effected during the year have been petty repairs to three important drains. The number of dust-bins was the same as in 1897–98. None of the 59 masonry dust-bins have been replaced by moveable iron ones as suggested in the previous report. One new iron latrine was constructed during the year and three tatty latrines were replaced by iron ones, hence the number of latrines is 31 against 30 in 1897–98. The number of private latrines conserved by the Municipality was 923 against 881 last year, showing an increase of 42. A sum of Rs. 1,958–14–3 was collected during the year towards private privy tax, but no additional scavengers have been employed for this conservancy. The night-soil is deposited, as usual, in trenches and the rubbish stored in depots outside the town. The rubbish accumulated during the past three years was sold by auction during the year for Rs. 2,014–4–0. The beef slaughter-house has not yet been constructed though the matter had been under contemplation for the last two years and the necessary land acquired. Cows are at present slaughtered in private back-yards in the midst of dwelling houses which is objectionable. The practice of burying and burning the dead in the bed of the river is still continued though it has been often condemned as injurious to the health of the people. Two sites have been selected for burial and cremation grounds and a plan of the same has recently been received in this office for opinion. The water-supply of the town is obtained from wells, tank, irrigation channels, the river and the Moolapet reservoir. The latter is the only source which has a watchman employed to prevent it from pollution; during the hot months of the year, there was a great scarcity of water. The wells were almost dry and the principal source of drinking-water was the river and this is open to contamination. Four wells were supplied with pulleys and platforms during the year and one was repaired. Nothing appears to have been spent by the Municipality during the year in the direction of improvement of village-site. Sanitary establishments were the same as in the previous year.

4. *Vaccination.*—The subjoined table compares the work done by the Municipal vaccinator in 1898–99 with that in 1897–98:—

Year.	Total vaccinated.	Number successful.	Percentage of success.	Under one year of age.		
				Total vaccinated.	Number successful.	Percentage of success.
1897–98	1053	947	89·90	806	769	95·40
1898–99	1163	968	83·23	708	708	100

Vaccination is compulsory in the Municipality and a good supply of fresh lanoline vaccine paste is available. The total number of cases vaccinated during the year under report was 1,163, of which 968 were successful, 53 unsuccessful and 142 unknown against 947 successful, 41 unsuccessful and 65 unknown in 1897–98. The work of the Municipal vaccinator cannot be considered satisfactory, as although the number vaccinated is larger than in the previous year the successful cases are nearly 7 per cent. less, being 83·23 against 89·90 last year. The unknown cases were very numerous during the year. There were 187 cases revaccinated during the year, of which 50 were successful. The total cost of vaccination came to Rs. 278–0–11 for 1898–99, and the cost of each case vaccinated during the year was As. 3–10 against As. 4–1 in 1897–98. The unsatisfactory state of vaccination is, however, considered to be due to defective registration of births.

5. *Hospitals and Dispensaries.*—The Municipal Council maintained, as usual, three institutions during the year under report (*a*) Municipal Hospital, (*b*) Jubilee Hospital for Women and Children, and (*c*) the Branch dispensary. The first two are satisfactorily accommodated as regards position and buildings, but the latter is located in a small and inconvenient hired house which is illsuited for the purpose. The cook-room and the out wards of the Municipal hospital require early repairs. A pucka building for infectious diseases is also required at the Jubilee hospital. Most of the recommendations made by the Surgeon-General at his last two inspections have not been carried out for want of funds and that as regards the abolition of the branch dispensary has been disapproved of by the Council. The working of the Jubilee hospital is not as satisfactory as it might be.

(1) A sum of Rs. 350–7–6 was collected during the year from the sale of medicines against Rs. 423–14–9 last year. The decrease was due to the reversion to the old rules sanctioned in G.O., Mis. No. 1999 M., dated 15th September 1897. The reason is however unaccountable.

(2) The undermentioned table compares the number of patients treated during the year with that of the previous year:—

Year.	Municipal Hospital.		Jubilee Hospital.		Branch Dispensary.	
	In-patient.	Out-patient.	In-patient.	Out-patient	In-patient.	Out-patient.
1897–98	499	22,360	23	5362	..	11280
1898–99	548	16,585	27	6134	..	14292

There was an increase of 49 and 4 in the number of in-patients treated in the Municipal hospital and the Jubilee hospital, respectively, but as regards the number of out-patients treated there was a marked increase in the numbers at the Jubilee hospital and the branch dispensary. The quantity of work done in the latter institution is very satisfactory. The Municipal hospital showed a decrease of 5,775 during the year under report. The causes of this marked decrease are not easily ascertainable. The theory that the institution is not popular is refuted by the fact that the number of in-patients was larger by 49 than in 1897–98. Probably the chief cause is owing to the fact of the branch dispensary being situated in a different position to what it was in 1896. The attendance there has markedly increased during 1897–98 and 1898–99.

(3) There were 82 deaths among the in-patients of the Municipal hospital and one at the Jubilee hospital. The mortality was therefore higher than in the previous year by 22 deaths. There were no deaths from septic diseases acquired in the hospital. This increase was mainly owing to nine deaths from enterites chiefly in aged people and a large number of accidents.

(4) One thousand three hundred and fifty-seven operations were conducted during the year in all the three institutions against 1,411 in 1897–98, the decrease occurring in the returns of the Municipal hospital. There was only one death in the Municipal hospital.

(5) The second toty recommended by the Surgeon-General at his inspection in 1897 has not been sanctioned as yet, the establishments of all three institutions being complete in other respects.

(6) There is a head midwife in the Jubilee hospital and also provision for four pupil midwifes, but two only were actually employed during the year. They attended 221 cases of labour as well as the out-patients in the dressing room under the supervision of the female hospital assistant, in charge, Miss C. A. Phillips. Gosha and caste women also attend the hospital and they are specially treated by the hospital assistant.

(7) The medical subordinates at the various institutions discharged their duties fairly satisfactorily during the year.

The number of prosecutions instituted under section 247 of Act IV of 1884 was 28 against 35 last year, of which 23 were convicted, 4 withdrawn and 1 acquitted. The registration of births and deaths was not satisfactorily carried out during the year. The defects have been pointed out monthly with no improvement.

3. *Sanitation.*—The drainage of the town continues in the same unsatisfactory condition as in the previous year. There are a number of cess-pools and pits in the side-channels, drainage water from which does not pass freely away. The public health in consequence is impeded. The Municipality appears to make no attempt to remedy this defect. The roads on the western side of the town are very uneven in many places and require early attention. The only improvements effected during the year have been petty repairs to three important drains. The number of dust-bins was the same as in 1897–98. None of the 59 masonry dust-bins have been replaced by moveable iron ones as suggested in the previous report. One new iron latrine was constructed during the year and three tatty latrines were replaced by iron ones, hence the number of latrines is 31 against 30 in 1897–98. The number of private latrines conserved by the Municipality was 923 against 881 last year, showing an increase of 42. A sum of Rs. 1,958–14–3 was collected during the year towards private privy tax, but no additional scavengers have been employed for this conservancy. The night-soil is deposited, as usual, in trenches and the rubbish stored in depots outside the town. The rubbish accumulated during the past three years was sold by auction during the year for Rs. 2,014–4–0. The beef slaughter-house has not yet been constructed though the matter had been under contemplation for the last two years and the necessary land acquired. Cows are at present slaughtered in private back-yards in the midst of dwelling houses which is objectionable. The practice of burying and burning the dead in the bed of the river is still continued though it has been often condemned as injurious to the health of the people. Two sites have been selected for burial and cremation grounds and a plan of the same has recently been received in this office for opinion. The water-supply of the town is obtained from wells, tank, irrigation channels, the river and the Moolapet reservoir. The latter is the only source which has a watchman employed to prevent it from pollution; during the hot months of the year, there was a great scarcity of water. The wells were almost dry and the principal source of drinking-water was the river and this is open to contamination. Four wells were supplied with pulleys and platforms during the year and one was repaired. Nothing appears to have been spent by the Municipality during the year in the direction of improvement of village site. Sanitary establishments were the same as in the previous year.

4. *Vaccination.*—The subjoined table compares the work done by the Municipal vaccinator in 1898–99 with that in 1897–98:—

Year.	Total vaccinated.	Number successful.	Percentage of success.	Under one year of age.		
				Total vaccinated.	Number successful.	Percentage of success.
1897–98	1053	947	89·90	806	769	95·49
1898–99	1163	968	83·23	708	708	100

Vaccination is compulsory in the Municipality and a good supply of fresh lanoline vaccine paste is available. The total number of cases vaccinated during the year under report was 1,163, of which 968 were successful, 53 unsuccessful and 142 unknown against 947 successful, 41 unsuccessful and 65 unknown in 1897–98. The work of the Municipal vaccinator cannot be considered satisfactory, as although the number vaccinated is larger than in the previous year the successful cases are nearly 7 per cent. less, being 83·23 against 89·90 last year. The unknown cases were very numerous during the year. There were 187 cases revaccinated during the year, of which 50 were successful. The total cost of vaccination came to Rs. 278–0–11 for 1898–99, and the cost of each case vaccinated during the year was As. 3–10 against As. 4–1 in 1897–98. The unsatisfactory state of vaccination is, however, considered to be due to defective registration of births.

5. *Hospitals and Dispensaries.*—The Municipal Council maintained, as usual, three institutions during the year under report (*a*) Municipal Hospital, (*b*) Jubilee Hospital for Women and Children, and (*c*) the Branch dispensary. The first two are satisfactorily accommodated as regards position and buildings, but the latter is located in a small and inconvenient hired house which is illsuited for the purpose. The cook-room and the out wards of the Municipal hospital require early repairs. A pucka building for infectious diseases is also required at the Jubilee hospital. Most of the recommendations made by the Surgeon-General at his last two inspections have not been carried out for want of funds and that as regards the abolition of the branch dispensary has been disapproved of by the Council. The working of the Jubilee hospital is not as satisfactory as it might be.

(1) A sum of Rs. 350–7–6 was collected during the year from the sale of medicines against Rs. 423–14–9 last year. The decrease was due to the reversion to the old rules sanctioned in G.O., Mis. No. 1999 M., dated 15th September 1897. The reason is however unaccountable.

(2) The undermentioned table compares the number of patients treated during the year with that of the previous year:—

Year.	Municipal Hospital.		Jubilee Hospital.		Branch Dispensary.	
	In-patient.	Out-patient.	In-patient.	Out-patient.	In-patient.	Out-patient.
1897–98	499	22,360	23	5362	..	11280
1898–99	548	16,585	27	6134	..	14292

There was an increase of 49 and 4 in the number of in-patients treated in the Municipal hospital and the Jubilee hospital, respectively, but as regards the number of out-patients treated there was a marked increase in the numbers at the Jubilee hospital and the branch dispensary. The quantity of work done in the latter institution is very satisfactory. The Municipal hospital showed a decrease of 5,775 during the year under report. The causes of this marked decrease are not easily ascertainable. The theory that the institution is not popular is refuted by the fact that the number of in-patients was larger by 49 than in 1897–98. Probably the chief cause is owing to the fact of the branch dispensary being situated in a different position to what it was in 1896. The attendance there has markedly increased during 1897–98 and 1898–99.

(3) There were 82 deaths among the in-patients of the Municipal hospital and one at the Jubilee hospital. The mortality was therefore higher than in the previous year by 22 deaths. There were no deaths from septic diseases acquired in the hospital. This increase was mainly owing to nine deaths from enterites chiefly in aged people and a large number of accidents.

(4) One thousand three hundred and fifty-seven operations were conducted during the year in all the three institutions against 1,411 in 1897–98, the decrease occurring in the returns of the Municipal hospital. There was only one death in the Municipal hospital.

(5) The second toty recommended by the Surgeon-General at his inspection in 1897 has not been sanctioned as yet, the establishments of all three institutions being complete in other respects.

(6) There is a head midwife in the Jubilee hospital and also provision for four pupil midwifes, but two only were actually employed during the year. They attended 221 cases of labour as well as the out-patients in the dressing room under the supervision of the female hospital assistant, in charge, Miss C. A. Phillips. Gosha and caste women also attend the hospital and they are specially treated by the hospital assistant.

(7) The medical subordinates at the various institutions discharged their duties fairly satisfactorily during the year.

The number of prosecutions instituted under section 247 of Act IV of 1884 was 28 against 35 last year, of which 23 were convicted, 4 withdrawn and 1 acquitted. The registration of births and deaths was not satisfactorily carried out during the year. The defects have been pointed out monthly with no improvement.

3. *Sanitation.*—The drainage of the town continues in the same unsatisfactory condition as in the previous year. There are a number of cess-pools and pits in the side-channels, drainage water from which does not pass freely away. The public health in consequence is impeded. The Municipality appears to make no attempt to remedy this defect. The roads on the western side of the town are very uneven in many places and require early attention. The only improvements effected during the year have been petty repairs to three important drains. The number of dust-bins was the same as in 1897–98. None of the 59 masonry dust-bins have been replaced by moveable iron ones as suggested in the previous report. One new iron latrine was constructed during the year and three tatty latrines were replaced by iron ones, hence the number of latrines is 31 against 30 in 1897–98. The number of private latrines conserved by the Municipality was 923 against 881 last year, showing an increase of 42. A sum of Rs. 1,958–14–3 was collected during the year towards private privy tax, but no additional scavengers have been employed for this conservancy. The night-soil is deposited, as usual, in trenches and the rubbish stored in depots outside the town. The rubbish accumulated during the past three years was sold by auction during the year for Rs. 2,014–4–0. The beef slaughter-house has not yet been constructed though the matter had been under contemplation for the last two years and the necessary land acquired. Cows are at present slaughtered in private back-yards in the midst of dwelling houses which is objectionable. The practice of burying and burning the dead in the bed of the river is still continued though it has been often condemned as injurious to the health of the people. Two sites have been selected for burial and cremation grounds and a plan of the same has recently been received in this office for opinion. The water-supply of the town is obtained from wells, tank, irrigation channels, the river and the Moolapet reservoir. The latter is the only source which has a watchman employed to prevent it from pollution; during the hot months of the year, there was a great scarcity of water. The wells were almost dry and the principal source of drinking-water was the river and this is open to contamination. Four wells were supplied with pulleys and platforms during the year and one was repaired. Nothing appears to have been spent by the Municipality during the year in the direction of improvement of village-site. Sanitary establishments were the same as in the previous year.

4. *Vaccination.*—The subjoined table compares the work done by the Municipal vaccinator in 1898–99 with that in 1897–98:—

Year.	Total vaccinated.	Number successful.	Percentage of success.	Under one year of age.		
				Total vaccinated.	Number successful.	Percentage of success.
1897–98	1053	947	89·90	806	769	95·40
1898–99	1163	968	83·23	708	708	100

Vaccination is compulsory in the Municipality and a good supply of fresh lanoline vaccine paste is available. The total number of cases vaccinated during the year under report was 1,163, of which 968 were successful, 53 unsuccessful and 142 unknown against 947 successful, 41 unsuccessful and 65 unknown in 1897–98. Most of the recommendations made by the Surgeon-General at his last two inspections have not been carried out for want of funds and that as regards the abolition of the branch dispensary has been disapproved of by the Council. The working of the Jubilee hospital is not as satisfactory as it might be.

(1) A sum of Rs. 350–7–6 was collected during the year from the sale of medicines against Rs. 423–14–9 last year. The decrease was due to the reversion to the old rules sanctioned in G.O., Mis. No. 1999 M., dated 15th September 1897. The reason is however unaccountable.

(2) The undermentioned table compares the number of patients treated during the year with that of the previous year:—

Year.	Municipal Hospital.		Jubilee Hospital.		Branch Dispensary.	
	In-patient.	Out-patient.	In-patient.	Out-patient	In-patient.	Out-patient.
1897–98	499	22,360	23	5362	..	11280
1898–99	548	16,585	27	6134	..	14292

There was an increase of 49 and 4 in the number of in-patients treated in the Municipal hospital and the Jubilee hospital, respectively, but as regards the number of out-patients treated there was a marked increase in the numbers at the Jubilee hospital and the branch dispensary. The quantity of work done in the latter institution is very satisfactory. The Municipal hospital showed a decrease of 5,775 during the year under report. The causes of this marked decrease are not easily ascertainable. The theory that the institution is not popular is refuted by the fact that the number of in-patients was larger by 49 than in 1897–98. Probably the chief cause is owing to the fact of the branch dispensary being situated in a different position to what it was in 1896. The attendance there has markedly increased during 1897–98 and 1898–99.

(3) There were 82 deaths among the in-patients of the Municipal hospital and one at the Jubilee hospital. The mortality was therefore higher than in the previous year by 22 deaths. There were no deaths from septic diseases acquired in the hospital. This increase was mainly owing to nine deaths from enterites chiefly in aged people and a large number of accidents.

(4) One thousand three hundred and fifty-seven operations were conducted during the year in all the three institutions against 1,411 in 1897–98, the decrease occurring in the returns of the Municipal hospital. There was only one death in the Municipal hospital.

(5) The second toty recommended by the Surgeon-General at his inspection in 1897 has not been sanctioned as yet, the establishments of all three institutions being complete in other respects.

(6) There is a head midwife in the Jubilee hospital and also provision for four pupil midwifes, but two only were actually employed during the year. They attended 221 cases of labour as well as the out-patients in the dressing room under the supervision of the female hospital assistant, in charge, Miss C. A. Phillips. Gosha and caste women also attend the hospital and they are specially treated by the hospital assistant.

(7) The medical subordinates at the various institutions discharged their duties fairly satisfactorily during the year.

(8) In accordance with G.O., No. 1985 M., dated 18th November 1896, all precautionary measures regarding plague have been carried out. Hospital assistant, P. Chenchureddy, has been at Nellore railway station on duty the whole year, examining all passengers arriving at Nellore from plague-infected areas. A plague camp, with observation and segregation sheds and fully equipped, have been constructed during the year at an excellent site to the north of the town.

Head-quarter Deputy Collector.

No. 814-Eng.

Submitted.

2. *Drainage.*—The District Medical and Sanitary Officer remarks that the drainage is unsatisfactory. This is so, but the cost of a complete system of drainage is prohibitory. All that can be done is to make gradually minor improvements as directed in G.O., No. 1512 M., dated 19th September 1895. In obedience to this order Rayajee street and Madhvapathy street, two badly drained streets in Nellore town, were selected for improvement. The inhabitants of the latter street offered to pay half the cost of laying down U-shaped drains. Plan and estimate were accordingly prepared and sent to the Sanitary Board for approval. They were received and approved by the Board in September 1898. But the work has not been carried out for want of funds and as the half contribution has not been paid as promised.

3. *Water-supply.*—The principal schemes for water-supply to the town are—

(1) Kanigiri reservoir.
(2) Pennér bed wells.
(3) Nellore tank.

The first was proposed by Mr. Macleane, but condemned by Messrs. Walch and Malet, the then Chief and Assistant Engineers for Irrigation who considered the Pennér bed wells as the only satisfactory and permanent method of supply for the town. The third scheme, however, deserves further investigation. In G.O., No. 948 I.R., dated 11th November 1895, plans and estimates were sanctioned for a channel from Sangam anicut to the Nellore tank, converting it into a twelve month tank. If this project were carried out, there would be an ample water-supply for the town. I have written to the Executive Engineer about this project which will combine the advantages of irrigation and water-supply.

4. The plea for not carrying out improvements is want of funds, but now that section 75 (1) of the Municipal Act, as recently amended, empowers the Council to raise funds in this behalf by a levy of a water and drainage tax at 8 per cent. the matter may well be reconsidered by the Municipal Council and report submitted to Government as directed in G.O., Mis. No. 38 M., dated 12th January 1895.

5. The District Medical and Sanitary Officer describes the roads on the western side of the town as very uneven in many places and requiring early attention. The Divisional officer says a portion of the trunk road is very uneven and requires thorough repairs. I endorse these remarks and consider that with abundance of laterite about, there is no reason why the roads should not be kept in good order.

6. The out-houses and wards of the Municipal hospital need thorough repair. The suggestions of the Surgeon-General should be carried out without delay.

7. One of the two sites for burning and burial referred to in G.O., Mis. No. 22, dated 5th January 1898, has been approved; the other is under correspondence as it is situated above the anicut.

29*th May* 1899.

(Signed) C. M. MULLALY,
Collector.

ORDER—No. 877 M., dated 21st June 1899.

The receipts and charges of the Nellore Municipality for 1898–99 are compared below with the budget and revised estimates for the year and the actuals of 1897–98:—

(8) In accordance with G.O., No. 1985 M., dated 18th November 1896, all precautionary measures regarding plague have been carried out. Hospital assistant, P. Chenchureddy, has been at Nellore railway station on duty the whole year, examining all passengers arriving at Nellore from plague-infected areas. A plague camp, with observation and segregation sheds and fully equipped, have been constructed during the year at an excellent site to the north of the town.

2. The roads are generally in a fair condition. A portion of the trunk road is very uneven and requires thorough repairs.

NELLORE,
23*rd May* 1899.

(Signed) K. NARSIMHA ROW,
Head-quarter Deputy Collector.

No. 814-Eng.

Submitted.

2. *Drainage.*—The District Medical and Sanitary Officer remarks that the drainage is unsatisfactory. This is so, but the cost of a complete system of drainage is prohibitory. All that can be done is to make gradually minor improvements as directed in G.O., No. 1512 M., dated 19th September 1895. In obedience to this order Rayajee street and Madhvapathy street, two badly drained streets in Nellore town, were selected for improvement. The inhabitants of the latter street offered to pay half the cost of laying down U-shaped drains. Plan and estimate were accordingly prepared and sent to the Sanitary Board for approval. They were received and approved by the Board in September 1898. But the work has not been carried out for want of funds and as the half contribution has not been paid as promised.

3. *Water-supply.*—The principal schemes for water-supply to the town are—

(1) Kanigiri reservoir.
(2) Pennér bed wells.
(3) Nellore tank.

The first was proposed by Mr. Macleane, but condemned by Messrs. Walch and Malet, the then Chief and Assistant Engineers for Irrigation who considered the Pennér bed wells as the only satisfactory and permanent method of supply for the town. The third scheme, however, deserves further investigation. In G.O., No. 948 I.R., dated 11th November 1895, plans and estimates were sanctioned for a channel from Sangam anicut to the Nellore tank, converting it into a twelve month tank. If this project were carried out, there would be an ample water-supply for the town. I have written to the Executive Engineer about this project which will combine the advantages of irrigation and water-supply.

4. The plea for not carrying out improvements is want of funds, but now that section 75 (1) of the Municipal Act, as recently amended, empowers the Council to raise funds in this behalf by a levy of a water and drainage tax at 8 per cent. the matter may well be reconsidered by the Municipal Council and report submitted to Government as directed in G.O., Mis. No. 38 M., dated 12th January 1895.

5. The District Medical and Sanitary Officer describes the roads on the western side of the town as very uneven in many places and requiring early attention. The Divisional officer says a portion of the trunk road is very uneven and requires thorough repairs. I endorse these remarks and consider that with abundance of laterite about, there is no reason why the roads should not be kept in good order.

6. The out-houses and wards of the Municipal hospital need thorough repair. The suggestions of the Surgeon-General should be carried out without delay.

7. One of the two sites for burning and burial referred to in G.O., Mis. No. 22, dated 5th January 1898, has been approved; the other is under correspondence as it is situated above the anicut.

Balance	4,463	1,180	6,120	3,962

2. The Municipal Council held 20 meetings against 27 in the previous year. The average attendance of the official members improved and was good; but owing to delay in filling up certain vacancies on the Council by election, the attendance of the non-officials declined and was poor. Six seats were filled up by election during the year and all of them were contested, 47·7 per cent. of the registered voters attending the poll.

3. *Receipts.*—(1) The number of persons assessed to the tax on arts and the net current demand under this head rose from 1,046 and Rs. 3,092, respectively, to 1,090 and Rs. 3,236. Under the taxes on buildings and lands also, the demand increased by Rs. 1,098 and Rs. 125, respectively. The registers of the latter tax are, however, more than five years old and should be revised in the current year. Though the Collections under all these taxes declined, they were still very fair.

(2) The income from bungalow fees, school-fees, market rents, fines and sale of sweepings showed an advance, which was most marked under the last head, being due to the rubbish which accumulated during the past three years having been sold in the year under review. On the other hand, the receipts from tolls and license fees fell off. The decrease under the former head is ascribed to the opening of the Bezwada-Madras Railway, but that under the latter has not been accounted for.

(3) It is satisfactory to observe that the number of houses served by the private scavenging agency rose from 881 to 923 and that the service was worked at a profit of Rs. 181 against Rs. 145 in 1897–98. The percentage of houses assessed to the tax on buildings, brought under the system, is still very low, viz., 15·3 per cent. during the year under review as compared with 14 per cent. during 1897–98. The advance is small and the Municipal Council should make an earnest endeavour to have the system extended to all the houses in the town.

4. *Expenditure*—(1) *Public Works.*—No new work of importance was undertaken during the year. The total outlay on communications amounted to Rs. 6,464 or 82 per cent. more than the net Municipal income from tolls and the Revenue Divisional-officer reports that the roads in the town are generally in fair order. Early steps should, however, be taken to improve the condition of the roads referred to in paragraph 5 of the Collector's endorsement.

(2) *Education.*—The net expenditure under this head amounted to Rs. 3,377 or 11·9 per cent. of the income from taxation. Of this sum, Rs. 1,958 were spent on primary, and the remainder on secondary, education. The Municipal Council continued to maintain three primary schools on the salary-result system, of which one was exclusively for Panchamas. The attendance at these schools rose from 239 to 267 and the results of the departmental examinations were fair. As in the previous year, four secondary schools were aided by the Municipal Council—two with salary grants and two with result grants—, while the number of primary schools aided by it with result grants was ten against nine in 1897–98. The number on the rolls of the aided schools fell from 1,163 to 1,123, but the results of the public and grant examinations were on the whole fair and the allotments for salary and result grants were almost fully utilized. The total number of boys under instruction in the Municipal and aided schools was 1,359

or 63·3 per cent. of the male population of school-going age against 1,375 or 64·1 per cent. in the previous year. More than 26 per cent. of the number of teachers employed in the aided schools were entirely unqualified. Steps should be taken to reduce this large proportion in the current year.

(3) *Medical Relief.*—As usual, the Municipal Council maintained two hospitals and one dispensary. The number of in-patients treated in the former rose from 522 to 575, but that of out-patients who attended all the three institutions fell from 39,002 to 37,011, the decrease which occurred in the civil hospital being explained in paragraphs 33 and 5 (2) of the reports of the Chairman and the District Medical and Sanitary Officer, respectively. The number of labour cases treated in the lying-in department of the Jubilee hospital rose from 106 to 221—a satisfactory advance. The attention of the Municipal Council is drawn to paragraph 6 of the Collector's endorsement.

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year was 1,163 or 110 more than in 1897–98; but the percentage of success again fell from 89·9 to 83·2. Infantile vaccination also declined, the number of children under one year successfully vaccinated being 24·1 per mille of the population against 27·1 per mille in the previous year. Greater attention should be paid to this branch of the administration in the current year.

There was a decrease in the numbers of births and deaths registered during the year. The rates recorded being considerably below the normal, it is evident that the registration of vital statistics is very defective. Early steps should be taken to render the returns accurate.

(5) *Sanitation.*—Owing to the large expenditure incurred on account of plague, the outlay under this head exceeded the allotment by 14·2 per cent. and was 27·4 per cent. of the current receipts. The sanitation of the town appears to have received some attention from the Municipal Council, but from paragraph 3 of the District Medical and Sanitary Officer's report it is observed that there are still many defects, which the Council should remedy as soon as possible. In this connection, the attention of the Council is drawn to the Collector's remark in paragraph 4 of his endorsement.

5. *General Remarks.*—The year closed with a balance of Rs. 3,962 or 8·9 per cent. of the current receipts.

Except in regard to vaccination, registration of vital statistics and sanitation, which require special attention, the administration of the Municipality during the year under review was fairly satisfactory.

2. The municipal Council held twenty meetings against 27 in the previous year. The average attendance of the official members improved and was good, but owing to delay in filling up certain vacancies on the Council by election the attendance of the non-officials declined and was poor. Six seats were filled up by election during the year and all of them were contested, 47·7 per cent of the registered voters attending the poll.

3. Receipts (a) The number of persons assessed to the tax on arts and the net current demand under this head rose from 1046 and Rs 3092, respectively, to 1090 and Rs 3236. Under the taxes on buildings and lands, the demand increased by Rs 1098 and Rs 125 respectively. The registers of the latter tax are, however, more than five

2. The Municipal Council held twenty meetings against 27 in the previous year. The average attendance of the official members improved and was good, but owing to delay in filling up certain vacancies on the Council by election, the attendance of the non-officials declined and was poor. Six seats were filled up by election during the year and all of them were contested, 47·7 per cent of the registered voters attending the poll.

3. Receipts (a) The number of persons assessed to the tax on arts and the net current demand under this head rose from 1046 and Rs 3092, respectively, to 1090 and Rs 3236. Under the taxes on buildings and lands, the demand increased by Rs 1098 and Rs 125 respectively. The registers of the latter tax are, however, more than five

five years old and should be revised in the current year. Though the collections under all these taxes declined, they were still very fair.

Vide section 66 (2) of the Act.

(2) The income from bungalow fees, school fees, market rents, fines and sale of sweepings showed an advance, which was most marked under the last head, being due to the rubbish which accumulated during the past three years having been sold in the year under review. On the other hand, the receipts from tolls and license fees fell off. The decrease under the former head is ascribed to the opening of the Bezwada-Madras Railway, but that under the latter has not been accounted for.

Vide para 3 of the medical report

Please see para 130 of the Chairman's report

(3) It is satisfactory to observe that the number of houses served by the private scavenging agency rose from 881 to 923 and that the service was worked at a profit of Rs 181 against Rs 145 in 1897-98.

Vide para 38 (3) of G.O. No. 1782 Mis. dated 16-8-97 / No. 1206 Mis. dated 11-7-98.

I₃ M

The number of houses brought under this system is only 15.8 per cent of the number houses assessed to the tax on buildings.

The percentage of houses assessed to conservancy duty brought under the system, is very low. Viz. 15.3 p.c. during the year under review as compared with 7.4 p.c. during 1897-98. The advance is small & the municipal Council should make an earnest endeavour to extend the system & to have all the houses in the town brought under it.

As pointed out in the reviews of the reports for the two previous years, however the system is capable of considerable extension and the Municipal Council should not relax its efforts until all the houses in the town have been brought under its control, the excess receipts from this service over the charges being utilized towards its improvement.

4. Expenditure (1) Public Works -

No new work of importance was undertaken during the year. The total outlay on communications amounted to Rs 64 or 82 per cent more than the net municipal income from tolls and the Revenue Divisional officer reports that the roads in the town are generally in fair order. Early steps should however be taken to improve the condition of the roads referred to in para. 5 of

Vide para 2 of the Dy Collector's endorsement

five years old and should be revised in the current year. Though the collections under all these taxes declined, they were still very fair.

(2) The income from bungalow fees, school fees, market rents, fines and sale of sweepings showed an advance, which was most marked under the last head, being due to the rubbish which accumulated during the past three years having been sold in the year under review. On the other hand, the receipts from tolls and license fees fell off. The decrease under the former head is ascribed to the opening of the Bezwada-Madras Railway, but that under the latter has not been accounted for.

(3) It is satisfactory to observe that the number of horses served by the private scavenging agency rose from 881 to 923 and that the service was worked at a profit of Rs 181 against Rs 145 in 1897-98.

Vide section 66(2) of the Act.

Vide para 3 of the medical report

Please see para 130 of the Chairman's report

Vide para 3(3) of [illegible] 15-8-97 and para 3(2)(a) of [illegible] 11-7-98.

I

M

The number of horses brought under this system is only 15.3 per cent of the number horses assessed to the tax on buildings.

The percentages of houses assessed to tax on buildings brought under the system, is very low. Viz. 15.3 p.c. during the year under review as compared with 14 p.c. during 1897-98. The advance is small & the Municipal Council should make an earnest endeavour to extend the system & bring all the houses in the town.

Vide para 2 of the Dy. Collector's endorsement

As pointed out in the reviews of the reports for the two previous years, the system is however capable of considerable extension and the Municipal Council should not relax its efforts until all the houses in the town have been brought under its control, the excess receipts from this service over the charges being utilized towards its improvement.

4. Expenditure (1) Public works -

No new work of importance was undertaken during the year. The total outlay on communications amounted to Rs 6464 or 82 per cent more than the net municipal income from tolls and the Revenue Divisional officer reports that the roads in the town are generally in fair order. Early steps should however be taken to improve the condition of the roads referred to in para 5 of

As pointed out in the reviews of the reports for the two previous years, however the system is capable of considerable extension and the

five years old and should be revised in the current year. The Collections under all the heads of taxation amount to Rs 3377 or Rs 1958 were spent on primary and the remainder on secondary education. The Municipal Council continued to maintain three primary schools on the salary-result system, of which one was exclusively for Panchamas. The attendance at these schools rose from 239 to 267 and the results of the departmental examinations were fair. As in the previous year, four secondary schools were also aided by the Municipal Council — two with salary grants and two with result grants, while the number of primary schools aided by it with result grants was ten against nine in 1897-98. The number on the rolls of the aided schools fell from 1163 to 1123, but the results of the public and grant examinations

Vide para 29 of the report

para 31 of the report

Vide staff flagg N

were on the whole fair and the allotments for salary and result grants were almost fully utilized. The total number of boys under instruction in the Municipal and aided schools was 1359 or 13·3 per cent of the male popula-tion of school going age against 1375 or 14·1 per cent in the previous year. More than 26 per cent of the number of teachers employed in the aided schools were entirely unqualified. Steps should be taken to reduce this large proportion in the current year.

(3) Medical Relief. As usual, the Municipal Council maintained two hospitals and one dispensary. The number of in-patients treated in the former rose from 522 to 575, but that of out-patients who attended all the three institu-tions fell from 39,002 to 37,011, the decrease which occurred in the Girl hospital being ex-plained in paras. 33 and 5 (2) of the

the reports of the Chairman and the District Medical and Sanitary officer, respectively. The number of labour cases treated in the lying-in department of the Jubilee hospital rose from 166 to 221 — a satisfactory advance. The attention of the Municipal Council is drawn to para. 6 of the Collector's endorsement.

(b) Vaccination and Vital Statistics. The total number of persons vaccinated during the year was 1163 or 110 more than in 1897-98; but the percentage of success again fell from 89.9 to 83.2. Infantile vaccination also declined, the number of children under one year successfully vaccinated being 24.1 per mille of the population against 27.1 per mille in the previous year. Greater attention should be paid to this branch of the administration in the current year.

There was a decrease in the numbers of births and deaths

Note
Normal birth rate - 42.46 per mille
do death rate - 38.70 per mille
The birth rate recorded in the Municipality was 25.7 per mille the death rate 21.8 per mille. The latter figure included a death rate of 7.2 per mille from Cholera.

Vide para 37 of the report

registered during the year. The rate recorded being considerably below the normal, it is evident that the registration of vital statistics is very defective. Early steps should be taken to render the returns accurate.

(5) Sanitation. Owing to the large expenditure incurred on account of plague, the outlay under this head exceeded the allotment by 14.2 per cent and was 27.4 per cent of the current receipts. The sanitation of the town appears to have received some attention from the Municipal Council, but from para. 3 of the District Medical and Sanitary officer's report it is observed that there are still many defects, which the Council should remedy as soon as possible. In this connection, the attention of the Council is drawn to the Collector's remark in para. 4 of his endorsement.

5. General Remarks. The year closed

the reports of the Chairman and the District Medical and Sanitary officer, respectively. The number of labour cases treated in the lying-in department of the Jubilee hospital rose from 166 to 221 — a satisfactory advance. The attention of the Municipal Council is drawn to para. 6 of the Collector's endorsement.

(4) Vaccination and Vital Statistics. The total number of persons vaccinated during the year was 1163 or 110 more than in 1897-98; but the percentage of success again fell from 89.9 to 83.2. Infantile vaccination also declined, the number of children under one year successfully vaccinated being 24.1 per mille of the population against 27.1 per mille in the previous year. Greater attention should be paid to this branch of the administration in the current year.

There was a decrease in the numbers of births and deaths

registered during the year. The rate recorded being considerably below the normal, it is evident that registration of vital statistics is very defective. Early steps should be taken to render the returns accurate.

(5) Sanitation. Owing to the large expenditure incurred on account of plague, the outlay under this head exceeded the allotment by 14.2 per cent and was 27.4 per cent of the current receipts. The sanitation of the town appears to have received some attention from the Municipal Council, but from para. 3 of the District Medical and Sanitary officer's report it is observed that there are still many defects which the Council should remedy as soon as possible. In this connection, the attention of the Council is drawn to the Collector's remark in para. 4 of his endorsement.

5. General Remarks. The year closed

Note
Normal birth rate — 42.46 per mille
do death rate — 33.70 per mille
The birth rate recorded in the Municipality was 20.7 per mille the death rate 21.8 per mille. The latter figure included a death rate of 7.2 per mille from Cholera.

Vide para 37 of the report

closed with a balance of Rs 3962
or 8.9 per-cent of the current
receipts.

Except in regard to vaccination,
registration of vital statistics
and Sanitation, which require
special attention, the administration
of the municipality during the
year under review was fairly
satisfactory.
