17 JUN. 1899

Plague Report Salem District.

Date 11th June 99, No.

1. Name of town or village.— Jalarpet

2. Population of town or village.—

3. Plague cases up to date of last report
   - Number of seizures.— 73
   - Number of deaths.— 45
   - Date of last report.— 4.6.99

4. Date of present attack.— 10. 6. 99

5. When reported by telegram?— 10. 6. 99

6. Imported or indigenous?— Imported from Berikay Hosur Taluk

7. Brief history of case.— Kuppusawmy Age 17 Caste - Hindu Travelling on the 7th Instant from Berikay, Hosur Taluk, to Vellambakkam, North Arcot with Railway Ticket from Malur to Patchur

8. If imported, had patient a passport?— No

9. Steps taken to isolate and treat the patient.— He was isolated in the Suspect Camp from the 7th to the 10th Instant, when he developed more evident symptoms of plague and was removed into the Hospital for treatment

10. Steps taken towards the segregation of contacts.—

He had no contacts, was travelling alone.
He has been staying at Berikay for the last two months

11. Steps taken towards the evacuation and disinfection of the infected house.—

The hut in the suspect camp in which he was detained, has been disinfected

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures ?—

13. Remarks.— His temperature on admission was normal. The following day it rose to 100.4 and kept about the same till now. He has a few hard ~~and~~ shotty glands felt in the left groin, not tender to pressure and are probably chronic. He is prostrated, weak, and unsteady in his gait, lying down in a doubled up position. His tongue is furred, lips and gums dry, cracked and covered with sordes. He complains of headache and giddiness. Eyes normal, pulse compressible and irregular. He has dulness over the lower part of the left lung with deficiency of respiratory murmur, slight cough, but no expectoration.

Plague Report Hosur - Salem District.

Date 17. 6. 99, No.

1. Name of town or village.— Hosur

2. Population of town or village.— 5756

3. Plague cases up to date of last report
   - Number of seizures.— Imported Cases 13
   - Number of deaths.— 3
   - Date of last report.—

4. Date of present attack.— 16th June 99

5. When reported by telegram?— 17th June 99

6. Imported or indigenous?— Imported

7. Brief history of case.— A child 2 months old arrived with its parents from Horapalli 15th was perfectly well till Evening 16th when it suddenly got fits and died on morning 17th. Parents put up in their own empty house in Hosur

8. If imported, had patient a passport?— Nil

9. Steps taken to isolate and treat the patient.— Case reported too late - after death.

10. Steps taken towards the segregation of contacts.—

Contacts, father mother and sister sent back to Zorapalli and segregated in field sheds outside village

11. Steps taken towards the evacuation and disinfection of the infected house.—

Houses both in Hosur and Zorapalli evacuated and disinfected, also [illegible]

12. Was there any opposition on the part of the inmates of the infected house or of the people of the village to the plague measures?—

13. Remarks.— This case has been reported as suspicious as two members of the same family died on the 19th and 20th May at Zorapalli — the first a woman in childbirth (the deceased's aunt) the second a man of Rayacotta (uncle of deceased). Both these cases were reported late by village authorities and as they were uncertain were not wired but details given in my weekly diary. All these people belong to ~~to~~ one large family ~~of~~ 22 the head of which is Kotta Subba Chetty who owns the village of Zorapalli and two houses in Hosur. It seems to me now that there must be some infection either in one of the houses in Zorapalli or Hosur as this last death was rather sudden. So I have ordered all the houses belonging to the family both in Hosur and Zorapalli to be disinfected. The one in which the child died in Hosur was only drenched with perchloride solution before by the Sappers as no case had occurred in it

Abstract Report to the Plague Commissioner Madras for week ending June 17th

Observation Groups I - IV Salem District.

Sir

No report was furnished for the previous week - as there were no fresh attacks or deaths to record.

During the past week 2 suspicious deaths were reported.

1 At Chennathur - a village about 3 miles from Hosur on the Uddanapalli side (not previously infected). The death of a woman was reported on the 14th inst. She is said to have had some swelling in the right armpit and same side of neck. The case was treated as suspicious of plague as she had apparently fever for some days previously; it was not reported till after death. I found the corpse had been disposed of - the statements of relatives were found unreliable; no satisfactory history or the source of infection could be obtained - whether imported - or derived from Hosur or elsewhere. The contacts have been segregated outside the village under observation and the house disinfected.

2. On the 17th instant at Hosur a child 3 months old died suddenly - child appeared in good health the previous day. There were no glandular swellings. Case reported as belonging to a family in which 2 deaths had occurred 3 week before under suspicious circumstances at Norapalli (Kodamapali circle about 2 miles from Chemathus) where recently mortality has been high and which is under observation. The family had recently returned to Hosur which they had left during the outbreak of Plague there. The contacts have been removed outside the town under observation and their house in Hosur will be redisinfected.

The work of disinfection at Mukundahalli has been at a standstill this week owing to the strike amongst the coolies engaged in this work - 12 others have now been enlisted and have signed their consent to the conditions laid down. They will be located in the "health camp" away from Hosur.

Of the 3 patients from this village located in the Zuzuwadi frontier station, the child Venkati (admitted 26-4-99) with the Pneumonic form of the disease was discharged the week recovered together with two contacts in attendance. The other 2 are convalescent and progressing well.

I have had a severe case of intermittent fever isolated under observation from among the huts of the evacuated village Nagondapali; the boy is however now well.

At Petta Belagondapali 1 case remains convalescent in the fields. The pariahs are still outside the village the rest of village has been reoccupied.

I have the honor to be,
Sir,
Your most obedt servant.
