G.O.	No.	Department.	Date.

GENERAL DEPARTMENT (PLAGUE).

Bombay Castle, 22nd February 1899.

No. 1352-P.—The following Summary of Plague Operations in Bombay City during the week ending the 11th February 1899 is published for information:—

A Ward.—The health of the Fort was better than it was for the previous fortnight, but Middle and Lower Colába showed no improvement. The plague cases are all brought to notice in this ward.

B Ward.—In Mándvi and Chukla also good information is usually obtainable. In Umarchádi and Dongri the population is poor and overcrowded and a large number of deaths have to be treated as suspicious.

C Ward.—Few cases remain undetected and a considerable number go voluntarily to hospital. Rats were found dying in considerable number during the week.

D Ward.—Information is not readily forthcoming and a considerable number of cases have to be treated as suspicious.

E Ward.—The volunteers are working excellently and most of the plague is dealt with except in Mázgaon and Tárvádi sections, where a good deal of plague is escaping detection.

F and G Wards.—A very large number of people have migrated here from other parts of the city, which accounts for the high mortality in some measure. The number huddled out now is very large.

The increase in the mortality is generally diffused, being most marked in Chukla, Umarchádi, Kum-bhárváda and Byeulla. In N. Fort and Girgaon only was there any improvement.

The figures for plague attacks, deaths and total mortality are compared below.

Period.	Plague Attacks.	Plague Deaths.	Total Mortality.
Week ending 12th February 1898 ...	1,215	1,216	2,181
Ditto 21st January 1899 ...	445	384	1,321
Ditto 28th January 1899 ...	648	515	1,555
Ditto 4th February 1899 ...	631	569	1,540
Ditto 11th February 1899 ...	824	675	1,734

The admissions to hospitals and camps are shown in the following statement. 451 plague cases were under treatment at the beginning of the week. 452 were admitted during the week. Recoveries and deaths were 46 and 374 respectively. Appended are also statements showing information in regard to the plague operations and in regard to inoculation.

1 A.C. sent to C
2/3

Return showing information regarding Plague under the following headings for the week ending
6 A.M. on Saturday the 11th February 1899.

* One patient too ill to be removed; one Municipal sweeper removed.
† These persons were taken to the hospital.

* One patient too ill to be removed; one Municipal sweeper segregated in chall.

† Three suspicious cases in hospital under observation.

‡ One case too ill to be removed.

§ Five Bungis allowed to remain in houses.

|| Some allowed to remain in sheds and some allowed to remain at home.

¶ Six cases too ill to be removed and one segregated in the compound of No. 6 Love Lane.

** Two cases of Relapsing Fever.

†† Six cases of Relapsing Fever.

NOTE.—The total number of cases discovered is shown. If a man is discovered sick he is entered as an attack, but if he subsequently dies he is not again entered as a death. Similarly when the first intimation of a case is after the patient's death, he is entered as a death, but not also entered as an attack.

The type of the disease is still very bad and the mortality amongst those admitted during the week is high. English nurses have been employed in the Parel Hospital, which is doing good work. There is ample accommodation for many more cases in the large Public Hospitals and there will be no present need of opening any other.

(Signed) JAMES WILKINS,
Special Medical Officer, Plague Operations.
