# Weekly Report of Plague in the Civil and Military Station, Bangalore, for week ending 17th February 1899.

——:o:——

The following are the figures of plague compared with those of the three preceding weeks :—

| | Plague cases. | Plague deaths. | Deaths from all causes. | Normal mortality for same period. |
|---|---|---|---|---|
| From 28th Sept. to 20th Jan. | 3,921 | 3,230 | 5,820 | 605 |
| Week ending 27th ,, ... | 20 | 16 | 68 | 36 |
| ,, 3rd February ... | 22 | 21 | 61 | 38 |
| ,, 10th ,, ... | 18 | 14 | 65 | 41 |
| ,, 17th ,, ... | 10 | 10 | 52 | 41 |

The cases continue to be very scattered, the 10 seizures having occurred in 8 different circles. It is possible that the scattered character of the disease is due to importation from outside. In only three instances, however, could any such importation be traced. In one, the patient had come from an infected village just outside the Station; in the second, the father of the patient, though himself remaining healthy, had visited an infected village: and in the third, the patient had come from Vellore, an infected town, 17 days previously. There is some doubt about this period, however, as the arrival had not been properly reported.

In the other cases, the source of the disease could not be traced to outside, and it is more likely that elements of infection remain in some parts of the town.

Arrivals by railway are now sufficiently guarded. For those coming by road, supervision within the town must be relied on; but this chance of infection will decrease with the decline of the disease in the surrounding district.

The general health of the town remained good, and the infant mortality, which had been high in the preceding week, was lower.

2. The cases during the week were distributed as follows:—

| | | | |
|---|---|---|---|
| Mahomedans | 3 | Native Christian | 1 |
| Hindus | 4 | Pariahs ... | 2 |

The epidemic is not now lingering particularly among any community.

3. During the week, 24 persons were sent to segregation, besides 6 exempted on account of inoculation.

The figures for the camps were:—

| | Remaining. | Admitted. | Developed plague. | Discharged. | Remaining. |
|---|---|---|---|---|---|
| North Camp ... | 34 | 24 | ... | 12 | 46 |
| South ,, ... | 4 | ... | ... | 4 | ... |

4. During the week, 216 first and 7 second inoculations were performed, bringing the totals to 29,914 first, and 957 second inoculations up to date, in addition to 8,683 first, and 1,912 second inoculations among the military population. The number of persons coming forward for inoculation is steadily falling with the decrease in the disease. Four of the ten seizures during the week were of inoculated persons.

5. The number of houses disinfected during the week was 439, in addition to 21 done by their owners under supervision, and Rs. 109 were paid in compensation.

Of the houses disinfected during the week, 12 were done on account of fresh cases of plague occurring in them. All of these had been previously disinfected during the systematic disinfection, on dates varying from 6 to 44

days before the plague cases occurred. In two, moreover, disinfection had been also carried out on account of previous cases in the house: in one instance, there was 69 days interval between the cases, in the other only 14 days, the inmates having been in the Contact Camp for 10 of these 14 days.

The remainder of the coolies brought in from outside for disinfection work have been discharged, with the exception of one gang, and the establishment has been generally reduced as far as possible to the minimum which it will be necessary to maintain for a considerable time.

6. The Hospital figures were as follows:—

| | Remaining. | Admitted. | Discharged. | Died. | Remaining. |
|---|---|---|---|---|---|
| *North Camp.* | | | | | |
| For the week ... ... | 31 | 2 | 20 | 1 | 12 |
| Since commencement ... ... | | 936 | 332 | 592 | 12 |
| Verified inoculates ... ... | | 50 | 31 | 13 | 6 |
| *South Camp.* | | | | | |
| For the week ... ... | 12 | ... | 11 | 1 | ... |
| Since commencement ... ... | | 768 | 306 | 462 | ... |
| Verified inoculates ... ... | | 41 | 29 | 12 | ... |
| *Military Population.* | | | | | |
| For the week ... ... | 7 | ... | 2 | ... | 5 |
| Since commencement ... ... | | 195 | 57 | 139 | 5 |
| Inoculates ... ... | | 123 | 38 | 82 | 3 |

The South Camp Hospital was closed on the 15th instant, the three remaining patients, who were convalescent, being removed to the North Camp, before final discharge.

Major Deane, R. A. M. C., handed over charge of the North Hospital on the forenoon of the 16th and reverted to military duty the remaining number of patients not being sufficient to require a separate officer. The Hospital is now under the care of the Residency Surgeon.

7. Blackpully, and other congested portions of the town are being mapped and surveyed by noncommissioned officers of the Sappers and Miners, under the supervision of Captain Roe, with a view to a plan being drawn up for relieving the over crowding, and improving the sanitation in these parts.

P. R. CADELL,

*Assistant to the Resident*
*in Mysore.*

Residency Press, Bangalore.—27-2-99.—80.

# Weekly Report of Plague in the Mysore State, excluding the Civil and Military Station, for the Week ending 17th February, 1899.

## Bangalore City.

I. The following are the figures in the City up to date:—

| | Plague Cases. | Plague Deaths. | Deaths from all causes. | Normal recorded mortality in the same period. |
|---|---|---|---|---|
| From 12th August 1898 to 20th January 1899... | 3,304 | 2,633 | 6,889 | 562 |
| Week ending 27th January 1899 ... | 14 | 8 | 55 | 23 |
| Week ending 3rd February 1899 ... | 6 | 7 | 39 | 27 |
| Week ending 10th February 1899 ... | 5 | 2 | 35 | 32 |
| Week ending 17th February 1899 ... | 1 | 1 | 27 | 32 |

During the week under review there was but one fresh attack which occurred on the 14th instant, the total mortality from all causes being 27, as against 35 in the previous week. The return of people to the City still continues, the total number of arrivals during the week being 1,590, as against 1,668 during the previous week.

II. The figures for the Health and Segregation Camps were as follows:—

| | Remaining. | Admitted. | Discharged. | Developed plague. | Remaining. |
|---|---|---|---|---|---|
| Health Camps ... | 484 | 5 | 115 | ... | 374 |
| Segregation Camp ... | 16 | 6 | 15 | ... | 7 |

III. During the week, there were 598 first, and 3 second, inoculations, bringing the totals to 30,599 and 1,356 respectively. No inoculated person was attacked with plague during this week. The total number of such persons attacked since the outbreak up to the end of the previous week was 230. Of these 155 cases were verified.

IV. The Hospital figures were as follows:—

| | Remaining | Admitted | Discharged | Died | Remaining. |
|---|---|---|---|---|---|
| For the week .. .. | 3 | 1 | 1 | 1 | 2 |
| Since the commencement .. .. | | 2,094 | 739 | 1,353 | 2 |
| Inoculates .. .. .. | | 105 | 64 | 40 | 1 |

V. During the week, 340 houses were disinfected, as against 235 in the previous week, of which 54 were infected houses, 17 were deserted houses opened and disinfected under Government Notification dated 15th October 1898, and the remainder were opened and disinfected, before re-occupation, at the request of owners and tenants wishing to return to them.

VI. During the week, permission was given to re-occupy 224 houses; no charge was levied for disinfecting 44 houses; 14 were disinfected by the owners themselves, and the fees levied on the remaining 166 amounted to Rs. 269.

VII. The Malleswaram and Basavanagudi extensions in the north and south of the city continued to make progress, the cost of works carried out during the week being Rs. 1,934, of which the greater part was expended on making roads, and on the construction of shops in the Malleswaram extension. The total amount spent on the two extensions up to date is Rs. 28,674, excluding compensation for acquisition of land and crops, which is estimated at Rupees 1,35,270.

VIII. During the week under review, 969 persons, or a daily average of 138·43 persons were disinfected with their effects at the city Railway Station.

## Mysore State outside Bangalore.

IX. The accompanying weekly return shows the progress of the epidemic in the Province.

In the Bangalore District, there was a further decrease of plague during the week, in the Taluks of Bangalore, Nelamangala, Channapatna and Anekal. Although the disease silghtly increased in the other Taluks except Devanhalli, the total number of fresh attacks for the District was the same as in the previous week. The number of infected villages decreased from 69 in the past week to 55 during the present week, and fresh cases were reported only from 32 villages, including 10 newly infected villages, almost all of which are reported to have been evacuated.

In the Kolar District, there was a further decrease in the number of fresh cases during the week, though 1 town and 3 villages were newly infected, and 2 that were free from infection for 2 weeks were re-infected. There was a slight decrease in the total number of cases in the Kolar Gold Fields, where out of 10 infected villages, cases were reported only from four.

In the Tumkur town, there was but one fresh case during the week, and disinfection of houses is in progress.

In the Tumkur District, only one village was newly infected, and is reported to have been promptly evacuated. Out of 9 "infected" villages, only 7 reported fresh cases during the week. Disinfection is being pushed on with in the villages which have been free from plague for more than two weeks.

In the Mysore District, exclusive of the City, there was a considerable increase in the number of plague cases and deaths reported during the week under review. The town of Seringapatam and three villages, of which two are in the Mysore Taluk and one in the Seringapatam Taluk, were newly infected. Excluding Seringapatam and Ganjam which is mostly evacuated, all the other infected villages in the District, *viz*, 7 are reported to have been completely evacuated.

X. In the Mysore City, the figures were as follows:—

| | Plague Cases, | Plague Deaths, | Total Mortality. |
|---|---|---|---|
| Week ending 27th Jan. .... | 276 | 208 | 274 |
| ,, 3rd Feb. .... | 294 | 220 | 288 |
| ,, 10th Feb. .... | 285 | 231 | 283 |
| ,, 17th Feb. .... | 282 | 249 | 300 |

There was a further decrease in the number of plague attacks during the week, though the number of plague deaths as well as total mortality show a slight increase. As this decrease in the weekly total of plague attacks has continued for two weeks, the disease may fairly be considered to have reached its turning point.

H. RAMAIYA,
*For Plague Commissioner in Mysore.*

BANGALORE,
*20th February 1899.*

2
479 P 0899

Statement showing Plague Cases and Deaths (imported as well as indigenous) in the Mysore Province reported in daily returns to the Plague Commissioner from 12th August 1898 to week ending Friday, the 17th February 1899.
