G.O.	No.	Department.	Date.

Weekly Report of Plague in the Civil and Military Station, Bangalore, for week ending 3rd March 1899.

The following are the plague figures for the week compared with those of the preceding three weeks :—

	Plague cases.	Plague deaths.	Deaths from all causes.	Normal mortality for 5 years for same period.
From 28th Sept. to 3rd Feb.	3,963	3,267	5,949	678
Week ending 10th February ...	18	14	65	41
„ 17th „ ...	10	10	52	41
„ 24th „ ...	6	6	62	41
„ 3rd March ...	9	9	64	44

The nine cases occurred in five different circles. Two cases, however, were imported ; one of these was a boy who came from Kolar, and was discovered to be suffering from plague on the second day after his arrival, when reporting himself under the observation system. His father had died in Kolar. The second imported case was found in the railway inspection at the Cantonment Station, the patient coming from Bangalore City. A third case was that of a Eurasian child, living in a quarter believed free from plague. The last previous case in her community occurred nearly two months ago, and the source of infection cannot be traced. The other six cases occurred in two adjacent circles, and in three of them were in proximity to one another. The source of infection cannot be localized, however : and with traces of it existent in several quarters, and with the constant chance of importation from all sides, the disease does not seem likely to cease immediately.

The general health of the town does not give cause for anxiety, although the number of deaths exceed the probably defective normal record. A certificate is granted before any body is removed, and in most cases the Medical Officers have seen the sick before death.

2. The cases during the week were distributed as follows :—

East Indian ... 1. Mahomedans ... 4. Hindus ... 4.

3. The figures for the segregation camp were :—

	Remaining.	Admitted.	Developed plague.	Died from other causes.	Discharged.	Remaining.
North Camp ...	13	17	...	1	13	16

4. During the week 162 first and 6 second inoculations were performed, bringing the totals to 30,296 first and 963 second inoculations, in addition to 8,683 first and 1,912 second inoculations among the Military Population. Few inoculations were performed except in Lieutenant Browne's division. No inoculate was attacked during the week.

5. The number of houses disinfected during the week was six, and Rs. 32 were paid in compensation. These houses had all been disinfected previously during the systematic disinfection, at periods varying from 22 to 46 days before the fresh cases of plague occurred. There was no instance during the week of a case of plague occurring in a house in which there had been a previous seizure.

6. The Hospital figures were as follows :—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
North Camp.					
For the week	8	3	...	3	8
Since commencement		940	336	596	8
Inoculates		*87	*57	*24	6
South Camp.					
Since commencement		768	306	462	...
Inoculates		41	29	12	...
Military Population.					
For the week	4	...	1	...	3
Since commencement		195	53	139	3
Inoculates		123	40	82	1

* Revised figures.

7. Lieutenant Anislie left during the week for plague duty in Madras. The remaining work of disinfection is supervised by Captain Roe, Chief Plague Officer, in addition to his other duties, and no other Military officer now remains on plague duty with the exception of Captain Keays.

8. The Military followers, having been free from the disease for many weeks, have been allowed by the Military authorities to return to their houses.

P. R. CADELL,

Assistant to the Resident in Mysore.

Residency, Press, Bangalore.—7-3-99.—80.

Weekly Report of Plague in the Mysore State, excluding the Civil and Military Station, for the Week ending 3rd March, 1899.

——:o:——

Bangalore City.

I. The following are the figures in the City up to date :—

	Plague Cases.	Plague Deaths.	Deaths from all causes.	Normal recorded mortality in the same period.
From 12th August 1898 to 3rd February 1899...	3,324	2,648	6,983	612
Week ending 10th February 1899 ...	5	2	35	32
Week ending 17th February 1899 ...	1	1	27	32
Week ending 24th February 1899 ...	1	Nil	31	32
Week ending 3rd March 1899 ...	1	1	35	31

The number of attacks has been only 1 during each of the past three weeks and if the present steady rate of decrease should continue, it cannot be long before the City is declared free. The one attack and one death reported during the week occurred on the 25th and related to a dead body found near the Sumpungi Tank bund.

A passenger suffering from plague travelling from the City was discovered at the Cantonment Station on the evening of the 3rd March and the matter is under enquiry. The person is reported to have come from Krishnagiri, Salem District,a fortnight ago and purchased a ticket at the City Station after getting himself disinfected there.

There were 1,651 arrivals in the City during the week against 1,852 during the previous week.

II. The figures for the Health and Segregation Camps were as follows :—

	Remaining	Admitted	Discharged	Developed plague	Remaining.
Health camps	312	1	39	...	274
Segregation camp	...	8	6	...	2

III. During the week there were 547 first inoculations and no second incoulations, bringing the totals to 31,705 and 1,356, respectively. There were no attacks among inoculated persons during the week.

IV. The Hospital figures were as follows :—

	Remaining.	Admitted.	Discharged.	Died.	Remaining.
For the Week	2	....	1	....	1
Since commencement	....	2,095	741	1,353	1
Inoculates	....	105	65	40	....

V. During the week, 263 houses were disinfected as against 305 during the previous week, of which 45 were plague infected houses, and the rest deserted ones.

VI. During the week, permission was given to re-occupy 202 houses ; no charge was levied for disinfecting 41 houses, 5 were disinfected by the owners themselves and the charges collected from the remaining 156, amounted to Rs. 242—8—0.

VII. The cost of earthworks carried out during the week in the Malleswara and Basavangudi Extensions in the North and South of the City was Rs. 2,160, bringing the total amount spent up to date to Rs. 32,871.

From the commencement up to date 600 infected houses have been marked for demolition, of which 390 have been pulled down at a cost of Rs. 1,560. In addition to these, 893 houses have been marked for removal for the opening out of lanes in the City, of which 590 have been acquired by the Sanitary Department at a cost of Rs. 38,723.

Independently of the above, the Bangalore City Municipality demolished 12 houses as unfit for human habitation during the week, the total number demolished by the Municipality from the commencement being 412.

The length of pipes laid out for water supply in the Mallesvaram Extension from the commencement was 2690 running feet and the number of fountains put up was 7.

VIII. During the week under report 791 persons or a daily average of 113 were disinfected with their effects at the City Railway Station.

Mysore State, outside Bangalore.

IX. The accompanying weekly return shows the state of the epidemic in the Province :—

The decrease noticed in the four affected Districts of Bangalore, Kolar, Tumkur and Mysore in the last week's report continued during the present week.

In the Bangalore District the number of cases decreased from 115 to 91. In the Sub-taluk of Closepet, and the taluks of Hoskote and Chennapatna, in which an increase was noticed in the previous week, the number of attacks decreased from 10, 12 and 18 to 5, 9 and 10, re-

spectively. There was slight increase in the Taluks of Bangalore, Dodballapur and Devanhalli, but a decrease in all the other Taluks. In Magadi Taluk there were no attacks during the week. The total number of infected villages, increased from 55 to 59 ; but cases were reported from only 39 as against 41 villages. Of these 8 were newly infected villages.

In the Kolar District, excluding the Gold Fields, the number of indigenous cases decreased from 34 in the past week to 18 during the present week, while in the Gold Fields it increased from 32 to 33. The number of infected villages in the Gold Fields increased from 10 to 15 while in the Kolar District, excepting Gold Fields, it decreased from 20 to 16.

In the Tumkur Town there was no attack or death during the week, and the disease was confined to Tumkur Taluk, where the attacks decreased from 13 to 11 but the number of infected villages was increased by 1. Out of the 76 villages in the District from which plague cases have been reported from commencement, only 11 are now infected and it may therefore be hoped that this District will soon be entirely free from plague.

In the Mysore District excluding Mysore City, the number of indigenous cases, as well as the number of infected villages remained almost stationary, the figures for the week being 32 and 11, as against 31 and 12, respectively.

In the Mysore City, the figures were as follows :—

	Plague Cases.	Plague Deaths.	Total Mortality.
Week ending 10th Feb. 1899.	285	231	283
,, 17th Feb. ,,	282	249	300
,, 24th Feb. ,,	264	204	255
,, 3rd Mar. ,,	194	186	233

The decrease in plague cases, deaths and total mortality noticed in previous weeks was well maintained during the present week.

R. B. PLUMER,

For Plague Commissioner in Mysore.

BANGALORE,
3rd March 1899.

Statement showing Plague Cases and Deaths (imported as well as indigenous) in the Mysore Province reported in daily returns to the Plague Commissioner from 12th August 1898 to week ending Friday, the 3rd March 1899.
