**Administration Report.**

Reviewing the — of the Máyavaram Municipal Council for 1898-99.

## GOVERNMENT OF MADRAS.

## LOCAL AND MUNICIPAL DEPARTMENT.

Read—the following paper :—

From M.R.Ry. T. A. ALAGA PILLAI AVARGAL, Chairman, Municipal Council, Máyavaram, to the Secretary to Government, Local and Municipal Department (through the Sub-Collector of Tanjore), dated 22nd June 1899, No. 479.

I have the honour to submit my report on the working of this municipality for 1898–99, accompanied by the statements prepared in the forms prescribed by Government in its Order, No. 2193 M., dated 10th December 1891, as modified by G.O., No. 210 M., dated 16th February 1899.

2. The budget for the year under report received the sanction of Government in its Order No. 482 M., dated 2nd March 1898, and the revised estimate was passed in G.O., No. 223 M., dated 18th February 1899.

3. The draft report was adopted by the Council at its meeting held on 19th June 1899. Copy of proceedings enclosed.

### I.—Constitution of the Council.

4. The sanctioned strength of the Council was 18 as in the year previous, and the number of nominated and elected councillors continued to be five (including the *ex-officio* councillor) and thirteen, respectively. The number on rolls on the 31st March last was eighteen. With the exception of the Sub-Collector and *ex-officio* councillor, the Council consisted of one official and sixteen non-official natives.

5. *Elections.*—Including the vacant seat of one councillor on the 31st March 1898, there were two vacancies among the elected seats, and both of them were filled up by election within the year. The competition for ward No. VII was very keen.

6. *Meetings of the Council.*—The number of meetings actually held during the year was 28 against 33 held last year and 1 was dissolved for want of quorum.

7. *Finance.*—The total receipts for the year amounted to Rs. 40,583–15–1 including the unexpended balance of Rs. 2,177–2–8 brought forward from the year previous. Of the above sum, Rs. 36,902–10–6 was spent during the year and Rs. 3,681–4–7 left as balance on 31st March 1899.

### II.—Receipts.

8. *Tax on Arts.*—This tax was levied on all the classes of the schedule. The assessment register was revised. Owing to the continued paucity of trade among the mercantile population, the revision resulted in a decrease. The net current demand as per register was Rs. 3,048–8–0. Of this, Rs. 123 was remitted by the Council on appeal, Rs. 2,762 was collected and Rs. 50 was written off as irrecoverable, thus leaving a balance of Rs. 113–8–0 at the close of the year. Out of the arrear demand of Rs. 67–8–0, there remained a balance of Rs. 36 to be collected in the year current. The sum actually realized under this head shows a decrease of Rs. 211 below the revised estimate. Owing to the deterioration of trade, the Council had to remit a larger sum on appeals and writes-off; and owing to the poverty of the defaulting rate-payers, the amount left uncollected at the close of the year was larger than was anticipated at the time of preparing the revised estimate. These circumstances caused the above decrease. A sum of Rs. 26–8–0 has since been collected out of the balance under this head.

9. *Tax on Buildings.*—This tax continued to be levied at the rate of 7½ per cent. of the annual rent value. The current demand of this tax, after a small sum of As 15 was remitted on appeal, was Rs. 8,284–3–6; of which Rs. 8,122–7–9 was collected, Rs. 14–14–6 written off and Rs. 146–13–3 left as balance. Out of the arrear demand of Rs. 60–0–9, a sum of Rs. 35–13–9 was adjusted within the year. The number of houses assessed was 4,320 or 31 more than in the previous year, the increase being due to thorough revision. The average incidence has also increased from Rs. 1–11–1 in 1897–98 to Rs. 1–14–8 in the year under report. The balance under this head has since been reduced by Rs. 49–4–3.

10. *Tax on Lands.*—The current demand under this head was Rs. 619–2–8 as in the year previous. Of this, Rs. 580–7–0 was collected and a small balance of Rupees 37–12–10 was left at the close of the year. Out of the arrear demand of Rupees 45–13–6, a sum of Rs. 38–9–6 was realized and only Rs. 6–11–8 remained as balance. This tax is now undergoing complete revision with reference to the survey register, and the revised figures will be adopted for the next year.

11. *Tax on Vehicles, Animals and Carts.*—Compared with the revised estimate, the income under tax on vehicles has decreased. Owing to the difficulty experienced in collection, a comparatively large balance was left at the close of the year. The tax on animals has increased owing to strict supervision, while the anticipated income from carts was almost realized. The balances under these items have since been reduced by Rs. 14, Rs. 12–4–0 and Rs. 4, respectively.

12. *Tolls.*—The tolls continued to be levied at three-fourths of the scheduled rates. The collection in the eleven gates was leased out to a contractor for Rs. 6,800 which was fully realized within the year. The share due to Local funds after deducting an expenditure of Rs. 30–11–0 incurred in the repair of toll-sheds was remitted to the treasury within the year.

13. *Coercive Process.*—Appendix A to statements IV-A and IV-B shows the extent to which coercive measures were adopted for the collection of the several taxes. The total number of warrants issued during the year, together with the number remaining uncollected at the close of 1897–98, was 2,246. Of this number, 1,970 were disposed of within the year and 276 remained unexecuted at its close. Property was sold only in two cases. Stringent measures are being adopted to dispose of the outstanding warrants.

14. *Rent on Lands.*—A sum of Rs. 134–10–6 was collected against Rs. 150 anticipated in the revised estimate. The decrease was caused by a balance of Rupees 16–4–0 remaining uncollected at the close of the year.

15. *Avenue Receipts.*—The sum realized from this source shows an increase of Rs. 55–1–0 over the revised estimate (Rs. 400). Competition in bids at the auction sales caused the increase.

16. *Fees and Fines from Schools.*—A sum of Rs. 12,281–1–3 was realized from this source, while Rs. 11,080 only was anticipated in the budget. The increase of Rs. 1,201–1–3 was realized solely from the municipal high school.

17. *Income from Markets and Slaughter-houses.*—The municipality has a vegetable market of its own in the Máyavaram division, which, together with the houses and bazaars attached thereto, was leased out to contractors for Rs. 690–10–0. Of this sum, Rs. 662–10–0 was collected within the year and Rs. 28 [*] remained as balance on 31st March 1899. The right of levying fees in the municipal slaughter-house was leased out to a contractor for Rs. 345 which was fully realized.

18. *Grants from Government.*—The income from this source amounted to Rupees 1,120–2–4 for "Education" and Rs. 277–5–2 for "Medical." The decrease in the former was due to the fall in the amount of grant earned by the municipal girls' school. The drawingmaster was at first allowed a third grant instead of a half as anticipated. The medical contribution referred to above was the moiety of the cost of constructing a dead-house in the hospital compound.

---

[*] Since collected.

19. *Other Grants and Contributions.*—A sum of Rs. 750 was contributed by M.R.Rys. T. A. Alaga Pillai Avargal, K. Vengu Chettiyar Avargal and N. R. Narasimayya Garu towards the construction of three water-pumps for the use of the public in three important centres of the town.

20. *Private Scavenging Fees.*—The income from this source has been rapidly increasing since the year 1896–97 when it was Rs. 661–2–0 to Rs. 853–8–0 in 1897–98 and to Rs. 1,207–8–0 in the year under report. This is, in no small measure, due to the exertions of the chief sanitary inspector.

## III.—EXPENDITURE.

21. The total expenditure was Rs. 36,902–10–6 or Rs. 677–5–6 less than the revised estimate. The decrease appears mainly under Grant 4, the increase under Grant 1 being partly counterbalanced by the decrease under Grant 2.

22. *Grant 1, Public Works.*—The expenditure on public works amounted to Rs. 5,640–10–9 against the revised estimate of Rs. 5,270 and the actuals of Rupees 5,713–10–6 in 1897–98. The increase, as compared with the revised estimate, occurs under "New works—Buildings", "Water-supply" and "Repairs—Communications."

23. *Communications.*—The total expenditure on roads was Rs. 2,923–14–5 against the revised estimate of Rs. 2,800. The Pattamangalam street south of the Cauvery bridge was regravelled to a length of 4 furlongs and 50 yards. The levels of many of the important streets were raised.

24. *Buildings.*—The amount spent under this head was Rs. 1,204–1–11 against Rs. 1,100 provided in the revised estimate. Of the above sum, Rs. 719–4–7 was spent on "New works" and Rs. 484–13–4 on "Repairs." The increase under "New works" over the revised estimate was caused by the completion of the construction of a dead-house in the hospital compound. Four new tatty latrines were constructed. The new shed for the high school accommodation was completed, the latrines in the high school were renewed by fresh plastering, &c., the shed in front of the old high school building was extended, seven corrugated iron dust-bins were purchased, the office compound wall was extended and renewed, and the repair of the office building was completed.

25. *Water-supply.*—A sum of Rs. 848–8–7 was spent under "Water works" in the construction of water-pumps in three important centres of the town as observed in paragraph 7 of the budget report for 1899–1900.

26. *Grant 2, Education.*—The outlay on education during the year was Rupees 13,925–9–2 excluding the expenditure of Rs. 404–10–3 on educational buildings which appears under Grant 1 against Rs. 14,170 in the revised estimate, and Rupees 14,099–7–3, the actuals of 1897–98. When compared with the revised estimate, the decrease occurs chiefly under "Municipal schools."

27. *Stipends to Normal Students.*—A sum of Rs. 30–14–6 was spent under this head against Rs. 60 of the budget allotment. Only two pyal school teachers were trained for this municipality, although provision was made for four. This caused the decrease.

28. *Municipal Schools on Salary System.*—In the year under review, the primary school, Máyavaram, was amalgamated with the high school with the approval of the Inspector of Schools. The high school was maintained under this system at a cost of Rs. 10,263–12–11 under "Establishment" and Rs. 464–0–1 under "Contingencies" against Rs. 10,400 and Rs. 500, respectively, in the revised estimate. The decrease under "Establishment" was due to the following causes. The 2nd assistant was not allowed the increase of Rs. 5 sanctioned, and the 8th, 14th, 17th and 21st assistants and the Sanskrit pandit were not given the increments, as they were not qualified for the same. The acting 11th assistant was allowed a reduced pay.

29. *Schools on the Salary-results System.*—As in 1897–98, five schools were maintained under this system at a cost of Rs. 1,209–12–3 under "Fixed payments." Rs. 573–15–9 under "Result stipends" and Rs. 254–7–11 under "Contingencies," the corresponding figures of the revised estimate being Rs. 1,210, Rs. 450 and

Rs. 250. All the boys' schools earned more grants than were provided for in the revised estimate. At the suggestion of the Assistant Inspector of Schools, the unexpended portion of the grants provided for "Result schools" was transferred to this head, in view to distribute a fair proportion of the total earnings to the teachers who have worked hard to turn out satisfactory results.

30. *Result Grants.*—A sum of Rs. 552–12–0 was paid to the managers of twelve schools as per certifying memoranda issued by the department, although Rs. 700 was provided in the budget and revised estimates. The number of aided schools has decreased. With the exception of the Aryan primary school, which earned a grant of Rs. 524–3–0, all the other schools earned very low grants.

31. *Progress of Education.*—The statements showing the progress of education in this municipality, as furnished by the Assistant Inspector of Schools and the Sub-Assistant Inspector of Girls' Schools, are submitted herewith in original. From these it will be seen that the total number of boys' schools of various denominations fell from 44 to 43 and the pupils from 2,116 (63 being girls) to 2,058 (72 being girls), the decrease being mainly under "Aided schools." This is mostly due to the very little time devoted by the municipal inspecting schoolmaster to his "legitimate duties of inspection and instruction" and to the too much time he appears to have spent in unnecessary correspondence, &c., "in matters which concern administration." In this connection I may quote here the general remarks of the Assistant Inspector of Schools, Trichinopoly-Tanjore division, in regard to the work of inspecting schoolmasters as contained in paragraph 13 (4) of his report on the progress and condition of education in the Tanjore district during 1897–98—

> "The great defect I find among the staff of inspecting schoolmasters is that they devote too little time to their legitimate duties of inspection and instruction and too much to matters which concern administration—such as making recommendations for appointments and leave, suggestions for changes in the budgets and other matters beyond their province or scope. They would be doing better work if they visited the schools under their charge oftener, held central classes, instructed the teachers how to be punctual and systematic in their work and impressed on their minds the importance of physical and moral education and discipline. In fact, in my humble opinion, real development of primary education depends more upon proper supervision and control than upon mere formal examinations which, in course of time, have a tendency to become a stereotyped routine work imparting little or no life to the progress of education."

In submitting this report to the Director of Public Instruction, the Inspector of Schools states—

> "The general remarks made on the inspecting schoolmasters by the Assistant Inspector are fully endorsed. These officers can do a great deal towards the improvement of education if they only worked conscientiously and minded their own business and be less interfering in matters that do not concern them. Most of these officers do not endeavour to improve the capacity of teachers by actually teaching important subjects in the schools they visit * *."

The Director of Public Instruction, in reviewing this report, remarks thus—

> "The remarks of both the Acting Inspector and the Acting Assistant Inspector regarding the work of inspecting schoolmasters are noted * * *. The Director trusts that the inspecting schoolmasters are not drawn away from their work by the higher inspecting officers * * *."

If the municipal inspecting schoolmaster is made to work in the light of the above instructions, I am confident that the status of the aided schools and of primary education generally will greatly improve in the town.

32. The strength of the high school including the primary school now amalgamated rose from 683 to 741. The decrease in the number of aided schools is counterbalanced by a corresponding increase in the unaided and indigenous schools. But out of 169 pupils lost in the former, only 50 is made good in the latter, the remaining having evidently left instruction altogether. The education of Panchamas has slightly advanced, the number of schools and scholars having risen during the year from 4 and 75 to 5 and 91, respectively. In the salary-result Panchama school, 20 were presented for examination and 16 passed with 8 in merit. This is satisfactory. But in all the other schools, 17 were presented and 9 passed with

only one in merit. The progress of Muhammadan education is likewise encouraging, the strength and efficiency having improved. The results of the several examinations appear in the footnote to statement V-A, and they are characterized as fair.

33. *Net cost on Education.*—The year's educational income in the shape of fees and Government grants amounted to Rs. 13,401–3–7. The total expenditure under Grant 2, together with the outlay of Rs. 404–10–3 on educational buildings, comes to Rs. 14,330–3–5. The net cost was thus only Rs. 928–15–10 or 4·8 per cent. of the income from taxation, markets and rents. The large amount of fees realized from the high school contributed to this abnormally low net cost. During the year under report, the high school worked at a profit of nearly Rs. 2,000, the expenditure incurred for the extension of the high school building being taken into account. The net cost of salary-result schools ranged from Rs. 3–1–9 in the Panchama school to Rs. 6–2–7 in the Saliya school. As, at the suggestion of the Assistant Inspector of Schools, the Council has recently resolved to levy a low rate of fees in the Muhammadan and Saliya schools, it is hoped that the net cost of these schools would diminish in the current year.

34. *Grant 3, Sanitation, &c.*—The total expenditure under this grant amounted to Rs. 11,990–6–3 against Rs. 11,940 of the revised estimate, the increase being under "Hospitals."

35. *Hospitals.*—The municipal hospital, Máyavaram, was maintained at a cost of Rs. 3,329–14–10 or Rs. 179–14–10 more than the revised estimate which was due to a large stock of medicines supplied to the hospital to meet the increased demand. From the accompanying concise report of the civil apothecary, Máyavaram, received from the District Medical and Sanitary Officer, Tanjore, only on the 11th June 1899, it will be observed that the number of in and out patients treated in the hospital was 154 and 12,633 against 180 and 12,398, respectively, in the year previous. The average attendance of both the classes of patients increased. The midwife attached to the hospital attended 168 labour cases, which was 40 more than in the year previous. She is reported to be doing her duty well. For want of funds, the work of cementing the floor of the wards and of the main building has been postponed.

36. *Contributions.*—A sum of Rs. 262–11–6 was paid against Rs. 290 entered in the revised estimate, the decrease occurring under "Contributions for sanitary inspection and reserve medical staff."

37. *Vaccination.*—The expenditure under this head amounted to Rs. 221–8–3 against Rs. 230 of the revised estimate. The vaccination system continued to be compulsory and it was carried on by a first-class vaccinator under the supervision of the civil apothecary. The total number of operations performed by him was 783 against 858 in the year previous. Lanoline paste supplied from the Mysore Government Vaccine Institute, Bangalore, was used throughout the year for all cases. Of this number, 763 cases proved successful and 456 cases were verified by the civil apothecary. In view to improve vaccination, the minimum number of cases to be operated by the vaccinator for each month has of late been increased from 60 to 80 at the suggestion of the civil apothecary.

38. *Registration of Vital Statistics.*—A sum of Rs. 108 was spent under "Establishment." The total number of births and deaths registered in the town was 924 and 792 against 771 and 787, respectively, in the year previous. The number of births has increased by 153 and that of deaths by 5. Five prosecutions were instituted, of which four were for failure to register births and one for a death.

39. *Conservancy.*—The expenditure on conservancy amounted to Rs. 8,068–3–8 against the revised estimate of Rs. 8,160. The decrease appearing under "Establishments" was due to "Fines and stoppages." The number of houses served by the private scavenging agency rose from 737 to 834. The establishment consisted of one chief sanitary inspector, one assistant sanitary inspector, six peons, seventeen sweepers, twelve street-cleaning toties and eighteen private scavenging toties. Particular attention was paid to the conservancy of roads and streets. The backyards of many of the private houses were systematically inspected, as a result of which the number of houses served by the private scavenging agency rose by 97. The system of trenching in night-soil received careful attention, and the cleanliness of the town was preserved during the year.

40. *Grant 4.*—The expenditure under this grant came to Rs. 2,039–8–3 against Rs. 2,880 in the revised estimate, the decrease being caused by the non-utilization within the year of the sum provided for the cost of survey stones referred to in paragraph 12 of my budget report for 1899–1900. Lighting was conducted departmentally and the "Establishment" consisted of thirteen masalchis working under a superintendent. The total number of lamps at the end of the year was 242 or 1 more than in the year previous. The decrease under "Avenue establishment" was due to "Fines and stoppages." A portion of the savings under "Travellers' bungalow—Contingencies" was utilized in the repair of the shed and of the pandals attached to the bungalow.

41. *Grant 5*—The total outlay under this grant amounted to Rs. 2,777–14–1 against Rs. 2,780 of the revised estimate. The items under this grant call for no explanation, the revised estimate being more or less kept up.

42. In conclusion, I should be failing in my duty if I do not mention here the continued co-operation of the councillors in carrying out the administration of this municipality.

---

## ENCLOSURE.

### CONCISE Annual Report of the Municipal Hospital, Máyavaram, for the official year 1898–99.

*Public Health.*—The town contains a population of 23,675 according to the census of 1891. Cholera prevailed in an epidemic form from the latter part of December 1898 to the beginning of March 1899. The first attack occurred on the 20th December and the last recorded case was on the 6th March. There were altogether 160 attacks and 89 deaths. The preventive measures laid down in the G.O., No. 1028 M., dated 26th June 1895, were adopted with the help of a small extra staff consisting of one inspector, two peons and two toties.

An annual festival is held in the month of Aippasi (October and November). During the last festival, six watchmen, five sweepers, nine toties and two lamp-lighters were added to the permanent staff as well as ten temporary latrines and forty street lamps to meet the requirements of the occasion.

*II. Vital Statistics*—are recorded in the municipal office by the registrar. There were 924 births (473 males and 451 females) and 792 deaths against 771 and 787, respectively, recorded in the previous year, giving the ratio of 39·02 births and 33·45 deaths per mille.

The causes of death as classified in the death register were—

| | |
|---|---|
| Cholera | 89 |
| Fevers | 82 |
| Bowel-complaints | 129 |
| Small-pox | 12 |
| Accidents | 1 |
| Wound | 1 |
| All other causes | 410 |
| Still-born | 68 |

*III. Sanitation—Communications.*—Out of a mileage of 34 miles 7 furlongs and 30 yards of roads and streets, 3 miles 3 furlongs and 60 yards are metalled with laterite. The metalled portions are in a fairly good condition. The streets and lanes in the outlying parts of the town become slushy and impassable during the wet weather.

The surface cleanliness of the town is fair. The bye-lanes and streets require closer attention. The number of public latrines have fallen from 14 to 8. There are 218 dust-bins, of which 179 are of masonry and 39 moveable, and it is to be hoped that the former will gradually be replaced by the latter. Considering the large area of the town, the dust-bins require an increase.

only one in merit. The progress of Muhammadan education is likewise encouraging, the strength and efficiency having improved. The results of the several examinations appear in the footnote to statement V-A, and they are characterized as fair.

33. *Net cost on Education.*—The year's educational income in the shape of fees and Government grants amounted to Rs. 13,401–3–7. The total expenditure under Grant 2, together with the outlay of Rs. 404–10–3 on educational buildings, comes to Rs. 14,330–3–5. The net cost was thus only Rs. 928–15–10 or 4·8 per cent. of the income from taxation, markets and rents. The large amount of fees realized from the high school contributed to this abnormally low net cost. During the year under report, the high school worked at a profit of nearly Rs. 2,000, the expenditure incurred for the extension of the high school building being taken into account. The net cost of salary-result schools ranged from Rs. 3–1–9 in the Panchama school to Rs. 6–2–7 in the Saliya school. As, at the suggestion of the Assistant Inspector of Schools, the Council has recently resolved to levy a low rate of fees in the Muhammadan and Saliya schools, it is hoped that the net cost of these schools would diminish in the current year.

34. *Grant 3, Sanitation, &c.*—The total expenditure under this grant amounted to Rs. 11,990–6–3 against Rs. 11,940 of the revised estimate, the increase being under "Hospitals."

35. *Hospitals.*—The municipal hospital, Máyavaram, was maintained at a cost of Rs. 3,329–14–10 or Rs. 179–14–10 more than the revised estimate which was due to a large stock of medicines supplied to the hospital to meet the increased demand. From the accompanying concise report of the civil apothecary, Máyavaram, received from the District Medical and Sanitary Officer, Tanjore, only on the 11th June 1899, it will be observed that the number of in and out patients treated in the hospital was 154 and 12,633 against 180 and 12,398, respectively, in the year previous. The average attendance of both the classes of patients increased. The midwife attached to the hospital attended 168 labour cases, which was 40 more than in the year previous. She is reported to be doing her duty well. For want of funds, the work of cementing the floor of the wards and of the main building has been postponed.

36. *Contributions.*—A sum of Rs. 262–11–6 was paid against Rs. 290 entered in the revised estimate, the decrease occurring under "Contributions for sanitary inspection and reserve medical staff."

37. *Vaccination.*—The expenditure under this head amounted to Rs. 221–8–3 against Rs. 230 of the revised estimate. The vaccination system continued to be compulsory and it was carried on by a first-class vaccinator under the supervision of the civil apothecary. The total number of operations performed by him was 783 against 858 in the year previous. Lanoline paste supplied from the Mysore Government Vaccine Institute, Bangalore, was used throughout the year for all cases. Of this number, 763 cases proved successful and 456 cases were verified by the civil apothecary. In view to improve vaccination, the minimum number of cases to be operated by the vaccinator for each month has of late been increased from 60 to 80 at the suggestion of the civil apothecary.

38. *Registration of Vital Statistics.*—A sum of Rs. 108 was spent under "Establishment." The total number of births and deaths registered in the town was 924 and 792 against 771 and 787, respectively, in the year previous. The number of births has increased by 153 and that of deaths by 5. Five prosecutions were instituted, of which four were for failure to register births and one for a death.

39. *Conservancy.*—The expenditure on conservancy amounted to Rs. 8,068–3–8 against the revised estimate of Rs. 8,160. The decrease appearing under "Establishments" was due to "Fines and stoppages." The number of houses served by the private scavenging agency rose from 737 to 834. The establishment consisted of one chief sanitary inspector, one assistant sanitary inspector, six peons, seventeen sweepers, twelve street-cleaning toties and eighteen private scavenging toties. Particular attention was paid to the conservancy of roads and streets. The backyards of many of the private houses were systematically inspected, as a result of which the number of houses served by the private scavenging agency rose by 97. The system of trenching in night-soil received careful attention, and the cleanliness of the town was preserved during the year.

40. *Grant 4.*—The expenditure under this grant came to Rs. 2,039–8–3 against Rs. 2,880 in the revised estimate, the decrease being caused by the non-utilization within the year of the sum provided for the cost of survey stones referred to in paragraph 12 of my budget report for 1899–1900. Lighting was conducted departmentally and the "Establishment" consisted of thirteen masalchis working under a superintendent. The total number of lamps at the end of the year was 242 or 1 more than in the year previous. The decrease under "Avenue establishment" was due to "Fines and stoppages." A portion of the savings under "Travellers' bungalow—Contingencies" was utilized in the repair of the shed and of the pandals attached to the bungalow.

41. *Grant 5*—The total outlay under this grant amounted to Rs. 2,777–14–1 against Rs. 2,780 of the revised estimate. The items under this grant call for no explanation, the revised estimate being more or less kept up.

42. In conclusion, I should be failing in my duty if I do not mention here the continued co-operation of the councillors in carrying out the administration of this municipality.

---

## ENCLOSURE.

## CONCISE Annual Report of the Municipal Hospital, Máyavaram, for the official year 1898–99.

*Public Heatlh.*—The town contains a population of 23,675 according to the census of 1891. Cholera prevailed in an epidemic form from the latter part of December 1898 to the beginning of March 1899. The first attack occurred on the 20th December and the last recorded case was on the 6th March. There were altogether 160 attacks and 89 deaths. The preventive measures laid down in the G.O., No. 1028 M., dated 26th June 1895, were adopted with the help of a small extra staff consisting of one inspector, two peons and two toties.

An annual festival is held in the month of Aippasi (October and November). During the last festival, six watchmen, five sweepers, nine toties and two lamp-lighters were added to the permanent staff as well as ten temporary latrines and forty street lamps to meet the requirements of the occasion.

*II. Vital Statistics*—are recorded in the municipal office by the registrar. There were 924 births (473 males and 451 females) and 792 deaths against 771 and 787, respectively, recorded in the previous year, giving the ratio of 39·02 births and 33·45 deaths per mille.

The causes of death as classified in the death register were—

| | |
|---|---|
| Cholera | 89 |
| Fevers | 82 |
| Bowel-complaints | 129 |
| Small-pox | 12 |
| Accidents | 1 |
| Wound | 1 |
| All other causes | 410 |
| Still-born | 68 |

*III. Sanitation—Communications.*—Out of a mileage of 34 miles 7 furlongs and 30 yards of roads and streets, 3 miles 3 furlongs and 60 yards are metalled with laterite. The metalled portions are in a fairly good condition. The streets and lanes in the outlying parts of the town become slushy and impassable during the wet weather.

The surface cleanliness of the town is fair. The bye-lanes and streets require closer attention. The number of public latrines have fallen from 14 to 8. There are 218 dust-bins, of which 179 are of masonry and 39 moveable, and it is to be hoped that the former will gradually be replaced by the latter. Considering the large area of the town, the dust-bins require an increase.

The rubbish is thrown in small heaps in the rubbish depots and sold annually. If stored in heaps of given dimensions and covered with a thin layer of sand or dry earth it will fetch a larger income. The amount realised by sale of rubbish during the year under report was Rs. 102–12–9 against Rs. 113–15–1 for the previous year.

The night-soil from private and public latrines is buried in trenches in the night-soil depot. The private scavenging system is taken advantage of only by a small portion of the inhabitants and is in great need of extension. Out of a total of 4,321 houses, only 834 are served by scavengers. It is, however, encouraging to note that there has been an increase of 97 houses so served during the year under report.

The water-supply is unsatisfactory. It is derived from the Cauvery, when in floods, and when the river is dry, springs and wells are excavated in its bed. Three tanks are reserved for drinking purposes. They are supplied from the Cauvery through irrigation channels without any outlet to carry away the surplus water. The surroundings of the tanks and of their supply channels are anything but desirable. There are 22 municipal wells intended for drinking. Some of these are, however, brackish and unsuitable for drinking. The wells are used only when the Cauvery is dry. A few wells should be sunk in the outskirts of the town where there is dearth for drinking-water during the dry weather. Some Norton's tube wells will be of great service.

The system of drainage that obtains is the natural one which is very defective. During the rains the town becomes perfectly water-logged.

*IV. Vaccination*—is compulsory and is carried on by a first-class vaccinator. Lanoline paste supplied from the Mysore Government Vaccine Institute, Bangalore, is used for all cases. The vaccinator has vaccinated 783 cases against 858 in the previous year, showing a slight falling off. The minimum number of cases to be vaccinated monthly by the vaccinator is now raised from 60 to 80 with the hope of securing better work for the current year.

The following table shows the nature of the work done :—

| Year. | Primary and Secondary. | | | | | | | | Re-vaccination. | | | | Total. | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under one year. | | | | Above one year. | | | | | | | | | | | |
| | Successful. | Unsuccessful. | Unknown. | Total. | Successful. | Unsuccessful. | Unknown. | Total. | Successful. | Unsuccessful. | Unknown. | Total. | Successful. | Unsuccessful. | Unknown. | Total. |
| 1897–98 .. .. .. | 530 | 174 | .. | 704 | 121 | 9 | 10 | 140 | 12 | 1 | 1 | 14 | 663 | 184 | 11 | 858 |
| 1898–99 .. .. .. | 554 | 13 | .. | 567 | 201 | 1 | 6 | 208 | 8 | .. | .. | 8 | 763 | 14 | 6 | 783 |

The civil apothecary in charge of the municipal hospital verified the results in 456 cases, giving a percentage of 57·5.

*V. (a) Hospital.*—There is a main building with four wards and out-houses. The wards contain twelve beds—six for males and six for females. The male side is always fairly full. An operation room is badly wanted.

(*b*) The buildings are in good repairs. The floor of the wards and of the main building badly requires cementing.

(*c*) The furniture is in sound repair.

(*d*) The hospital was inspected once by the Collector, twice by the Sub-Collector and once by the District Medical and Sanitary Officer.

(*e*) Patients able to pay for their diets diet themselves and those who can pay for medicines buy them in the local shops.

(*f*) Table showing the number of patients treated as compared with previous year—

| — | 1896–97. | | 1897–98. | | 1898–99. | |
|---|---|---|---|---|---|---|
| | Total treated. | Daily average number. | Total treated. | Daily average number. | Total treated. | Daily average number. |
| In-door .. .. .. .. | 175 | 7·05 | 180 | 7·09 | 154 | 7·41 |
| Out-door .. .. .. .. | 12,191 | 78·60 | 12,398 | 84·87 | 12,633 | 88·08 |
| Total .. | 12,366 | 85·65 | 12,578 | 91·96 | 12,787 | 95·49 |

(*g*) There has been a slight falling off among the in-patients and some increase among the out-patients as well as in the daily average number.

There were four deaths among the in-patients, giving a ratio of 2·59 per cent. treated. There were no deaths from septic diseases acquired in hospital.

(*h*) One thousand and fifteen operations were performed during the year under report, of which 977 were cured, 24 relieved, 5 discharged otherwise and 9 are remaining under treatment.

(*i*) The establishment is sufficient and efficient.

(*j*) Midwife Ammamuthu is a barber woman with 29 years of service in the municipality. She does her duty well and is popular with all classes of people.

The following table shows the work done by her as compared with previous year:—

| Years. | Number of cases conducted by the midwife. |
|---|---|
| 1896–97 .. .. .. .. .. .. .. .. .. | 158 |
| 1897–98 .. .. .. .. .. .. .. .. .. | 128 |
| 1898–99 .. .. .. .. .. .. .. .. .. | 168 |

(*k*) No Dufferin Fund hospital is working in the town.

| Balance | 2,177 | 1,400 | 2,290 | 3,681 |

2. The number of meetings held by the Municipal Council was 28 or five less than in the previous year. The attendance of non-official members continued to be fair, but that of officials was again poor. The Collector is requested to inform the latter that Government expects them to be more regular in attending the meetings of the Council in future. Two seats were filled by election during the year and they were contested, 55·8 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) Owing to a thorough revision of the registers, the net current demand under the tax on buildings rose from Rs. 7,254 to Rs. 8,284. The average incidence of the tax also increased slightly; but it was still very low, being only Rs. 1–14–8 against a general average of Rs. 2–6–0 for Municipalities in 1897–98. The demand under the taxes on arts and lands remained almost stationary. The result of the revision of the latter tax, which is said to be now in progress, should be reported to Government as soon as it is completed.

(2) The current collections under the principal taxes, although they declined somewhat, were still good. The arrear realizations were, however, not satisfactory except in the case of the land-tax. The number of distress warrants issued during the year was 2,004 against 1,689 in 1897–98, but their execution was not as prompt as it might be, more than 12 per cent. of the total number for disposal remaining unexecuted at the end of the year. Greater promptitude should be displayed in this respect in future.

(3) There was an increase in the income from school fees, but that from markets and slaughter-houses showed a slight decline. The sale of sweepings brought in Rs. 103 against Rs. 114 in 1897–98. The Municipal Council should look after this source of revenue as it is capable of considerable development. In this connection, its attention is drawn to the suggestion made by the Civil Apothecary in paragraph III of his report.

(4) The number of houses served by the private scavenging agency again rose from 737 to 834 and the receipts from this source from Rs. 854 to Rs. 1,207—a satisfactory advance which is ascribed by the Chairman to the exertions of the Chief Sanitary Inspector. The service was thus worked at a profit of Rs. 264 to the Municipal Council. This surplus should, however, be utilized in further extending the service which is now adopted by only about 19 per cent. of the total number of houses assessed to the tax on buildings.

4. *Expenditure.*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 2,924 or 64·8 per cent. of the net Municipal income from tolls. The Revenue Divisional officer has not reported on the condition of the town roads—an omission which should not be allowed to recur; but from paragraph III of the Civil Apothecary's report, it appears that the metalled roads were in fair condition. The Municipal Council should devote its special attention to the improvement of the streets and lanes in the outlying parts of the town, which are stated by him to become impassable during the wet weather.

(2) *Education.*—The net expenditure on primary education was Rs. 3,011, while secondary education was worked at a profit of Rs. 2,486. Thus the total net outlay on education was only Rs. 525 or 2·8 per cent. of the receipts from taxation. As in the previous year, the Municipal Council maintained a high school on the salary system; but as the primary school at Máyavaram was amalgamated with this institution, the number of primary schools under the control of the Council fell from six to five. Twelve primary schools were also aided with result grants against seventeen in 1897–98. There was an improvement in the attendance at the Municipal schools; but, owing apparently to a fall in the number of aided schools, the strength of these institutions exhibited a marked decline. This is unsatisfactory, more especially as the fall was in the number of pupils attending the primary schools. The fall in the number and attendance of these schools is ascribed by the Chairman to the inattention of the Inspecting Schoolmaster to his legitimate duties of inspection and instruction; but the Assistant Inspector of Schools is of opinion that it is due to the maintenance of two free schools in the town by the Municipal Council which affects prejudicially the fee income of result schools under private management. He remarks that the Inspecting Schoolmaster did very fair work during the year. The results obtained by

the Municipal high school at the public examinations were good—15 out of 37 students sent up for the Matriculation examination and 32 out of 75 presented for the Lower Secondary examination having been successful. The Municipal primary schools appear to have acquitted themselves well at the departmental examinations, but the results of the grant examinations in the aided schools were indifferent and more than one-fifth of the allotment for result grants was allowed to lapse. The total number of boys under instruction in the Municipal and aided schools again fell from 1,591 to 1,474 or 85·2 per cent. of the male population of school-going age. The attention of the Council should be directed towards improving the attendance of pupils at all the primary schools in the town.

(3) *Medical Relief.*—The number of in-patients treated at the Municipal hospital fell from 180 to 154, but that of out-patients rose from 12,398 to 12,633. The midwife attached to this institution attended 168 cases of labour or 40 more than in the previous year—a gratifying advance. The attention of the Municipal Council is drawn to the Civil Apothecary's remarks in paragraph V (*a*) and (*b*) of his report regarding the necessity for the construction of an operation room and for repairs to the hospital buildings.

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year fell from 858 to 783, but the percentage of reported success rose from 77·3 to 97·4. Infantile vaccination also showed a slight advance, the total number of children under one year successfully vaccinated being 554 or 23·3 per mille of the population against 530 or 22·3 per mille in 1897–98; but to be satisfactory, the number of vaccinations should approach as nearly as possible the registered birth-rate of 38·9 per mille. Steps should be taken to secure better results in the current year. There was an improvement in the registration of vital statistics, the number of births and deaths registered during the year being 38·9 and 33·3, respectively, per mille of the population, against 32·4 and 33·1 per mille in the previous year. The returns of births cannot, however, be regarded as accurate, as the rate recorded was below the normal.

(5) *Sanitation.*—The expenditure under this head amounting to Rs. 8,068 was 94 per cent. of the allotment and 21 per cent. of the current receipts. From paragraph 39 of the Chairman's report, it appears that some attention is being paid to the sanitation of the town; but the Council should endeavour to remedy, as far as funds permit, the several defects pointed out by the Civil Apothecary in paragraph III of his report and by the Deputy Sanitary Commissioner in his last inspection notes.

5. *General Remarks.*—The year closed with a balance of Rs. 3,681 or 9·6 per cent. of the current receipts.

Except as regards vaccination and registration of births, which demand increased attention, the administration of the Municipality during the year under review was fair.

### Administration Report.

Reviewing the — of the Máyavaram Municipal Council for 1898-99.

17/3

## GOVERNMENT OF MADRAS.

## LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. T. A. ALAGA PILLAI AVARGAL, Chairman, Municipal Council, Máyavaram, to the Secretary to Government, Local and Municipal Department (through the Sub-Collector of Tanjore), dated 22nd June 1899, No. 479.

I have the honour to submit my report on the working of this municipality for 1898–99, accompanied by the statements prepared in the forms prescribed by Government in its Order, No. 2193 M., dated 10th December 1891, as modified by G.O., No. 210 M., dated 16th February 1899.

2. The budget for the year under report received the sanction of Government in its Order No. 482 M., dated 2nd March 1898, and the revised estimate was passed in G.O., No. 223 M , dated 18th February 1899.

3. The draft report was adopted by the Council at its meeting held on 19th June 1899. Copy of proceedings enclosed.

### I.—CONSTITUTION OF THE COUNCIL.

4. The sanctioned strength of the Council was 18 as in the year previous, and the number of nominated and elected councillors continued to be five (including the *ex-officio* councillor) and thirteen, respectively. The number on rolls on the 31st March last was eighteen. With the exception of the Sub-Collector and *ex-officio* councillor, the Council consisted of one official and sixteen non-official natives.

5. *Elections.*—Including the vacant seat of one councillor on the 31st March 1898, there were two vacancies among the elected seats, and both of them were filled up by election within the year. The competition for ward No. VII was very keen.

6. *Meetings of the Council.*—The number of meetings actually held during the year was 28 against 33 held last year and 1 was dissolved for want of quorum.

7. *Finance.*—The total receipts for the year amounted to Rs. 40,583–15–1 including the unexpended balance of Rs. 2,177–2–8 brought forward from the year previous. Of the above sum, Rs. 36,902–10–6 was spent during the year and Rs. 3,681–4–7 left as balance on 31st March 1899.

### II.—RECEIPTS.

8. *Tax on Arts.*—This tax was levied on all the classes of the schedule. The assessment register was revised. Owing to the continued paucity of trade among the mercantile population, the revision resulted in a decrease. The net current demand as per register was Rs. 3,048–8–0. Of this, Rs. 123 was remitted by the Council on appeal, Rs. 2,762 was collected and Rs. 50 was written off as irrecoverable, thus leaving a balance of Rs. 113–8–0 at the close of the year. Out of the arrear demand of Rs. 67–8–0, there remained a balance of Rs. 36 to be collected in the year current. The sum actually realized under this head shows a decrease of Rs. 211 below the revised estimate. Owing to the deterioration of trade, the Council had to remit a larger sum on appeals and writes-off ; and owing to the poverty of the defaulting rate-payers, the amount left uncollected at the close of the year was larger than was anticipated at the time of preparing the revised estimate. These circumstances caused the above decrease. A sum of Rs. 26–8–0 has since been collected out of the balance under this head.

9. *Tax on Buildings.*—This tax continued to be levied at the rate of 7½ per cent. of the annual rent value. The current demand of this tax, after a small sum of As 15 was remitted on appeal, was Rs. 8,284–3–6 ; of which Rs. 8,122–7–9 was collected, Rs. 14–14–6 written off and Rs. 146–13–3 left as balance. Out of the arrear demand of Rs. 60–0–9, a sum of Rs. 35–13–9 was adjusted within the year. The number of houses assessed was 4,320 or 31 more than in the previous year, the increase being due to thorough revision. The average incidence has also increased from Rs. 1–11–1 in 1897–98 to Rs. 1–14–8 in the year under report. The balance under this head has since been reduced by Rs. 49–4–3.

10. *Tax on Lands.*—The current demand under this head was Rs. 619–2–8 as in the year previous. Of this, Rs. 580–7–0 was collected and a small balance of Rupees 37–12–10 was left at the close of the year. Out of the arrear demand of Rupees 45–13–6, a sum of Rs. 38–9–6 was realized and only Rs. 6–11–8 remained as balance. This tax is now undergoing complete revision with reference to the survey register, and the revised figures will be adopted for the next year.

11. *Tax on Vehicles, Animals and Carts.*—Compared with the revised estimate, the income under tax on vehicles has decreased. Owing to the difficulty experienced in collection, a comparatively large balance was left at the close of the year. The tax on animals has increased owing to strict supervision, while the anticipated income from carts was almost realized. The balances under these items have since been reduced by Rs. 14, Rs. 12–4–0 and Rs. 4, respectively.

12. *Tolls.*—The tolls continued to be levied at three-fourths of the scheduled rates. The collection in the eleven gates was leased out to a contractor for Rs. 6,800 which was fully realized within the year. The share due to Local funds after deducting an expenditure of Rs. 30–11–0 incurred in the repair of toll-sheds was remitted to the treasury within the year.

13. *Coercive Process.*—Appendix A to statements IV-A and IV-B shows the extent to which coercive measures were adopted for the collection of the several taxes. The total number of warrants issued during the year, together with the number remaining uncollected at the close of 1897–98, was 2,246. Of this number, 1,970 were disposed of within the year and 276 remained unexecuted at its close. Property was sold only in two cases. Stringent measures are being adopted to dispose of the outstanding warrants.

14. *Rent on Lands.*—A sum of Rs. 134–10–6 was collected against Rs. 150 anticipated in the revised estimate. The decrease was caused by a balance of Rupees 16–4–0 remaining uncollected at the close of the year.

15. *Avenue Receipts.*—The sum realized from this source shows an increase of Rs. 55–1–0 over the revised estimate (Rs. 400). Competition in bids at the auction sales caused the increase.

16. *Fees and Fines from Schools.*—A sum of Rs. 12,281–1–3 was realized from this source, while Rs. 11,080 only was anticipated in the budget. The increase of Rs. 1,201–1–3 was realized solely from the municipal high school.

17. *Income from Markets and Slaughter-houses.*—The municipality has a vegetable market of its own in the Máyavaram division, which, together with the houses and bazaars attached thereto, was leased out to contractors for Rs. 690–10–0. Of this sum, Rs. 662–10–0 was collected within the year and Rs. 28 * remained as balance on 31st March 1899. The right of levying fees in the municipal slaughter-house was leased out to a contractor for Rs. 345 which was fully realized.

* Since collected.

18. *Grants from Government.*—The income from this source amounted to Rupees 1,120–2–4 for "Education" and Rs. 277–5–2 for "Medical." The decrease in the former was due to the fall in the amount of grant earned by the municipal girls' school. The drawingmaster was at first allowed a third grant instead of a half as anticipated. The medical contribution referred to above was the moiety of the cost of constructing a dead-house in the hospital compound.

19. *Other Grants and Contributions.*—A sum of Rs. 750 was contributed by M.R.Rys. T. A. Alaga Pillai Avargal, K. Vengu Chettiyar Avargal and N. R. Narasimayya Garu towards the construction of three water-pumps for the use of the public in three important centres of the town.

20. *Private Scavenging Fees.*—The income from this source has been rapidly increasing since the year 1896–97 when it was Rs. 661–2–0 to Rs. 853–8–0 in 1897–98 and to Rs. 1,207–8–0 in the year under report. This is, in no small measure, due to the exertions of the chief sanitary inspector.

## III.—Expenditure.

21. The total expenditure was Rs. 36,902–10–6 or Rs. 677–5–6 less than the revised estimate. The decrease appears mainly under Grant 4, the increase under Grant 1 being partly counterbalanced by the decrease under Grant 2.

22. *Grant 1, Public Works.*—The expenditure on public works amounted to Rs. 5,640–10–9 against the revised estimate of Rs. 5,270 and the actuals of Rupees 5,713–10–6 in 1897–98. The increase, as compared with the revised estimate, occurs under "New works—Buildings", "Water-supply" and "Repairs—Communications."

23. *Communications.*—The total expenditure on roads was Rs. 2,923–14–5 against the revised estimate of Rs. 2,800. The Pattamangalam street south of the Cauvery bridge was regravelled to a length of 4 furlongs and 50 yards. The levels of many of the important streets were raised.

24. *Buildings.*—The amount spent under this head was Rs. 1,204–1–11 against Rs. 1,100 provided in the revised estimate. Of the above sum, Rs. 719–4–7 was spent on "New works" and Rs. 481–13–4 on "Repairs." The increase under "New works" over the revised estimate was caused by the completion of the construction of a dead-house in the hospital compound. Four new tatty latrines were constructed. The new shed for the high school accommodation was completed, the latrines in the high school were renewed by fresh plastering, &c., the shed in front of the old high school building was extended, seven corrugated iron dust-bins were purchased, the office compound wall was extended and renewed, and the repair of the office building was completed.

25. *Water-supply.*—A sum of Rs. 848–8–7 was spent under "Water works" in the construction of water-pumps in three important centres of the town as observed in paragraph 7 of the budget report for 1899–1900.

26. *Grant 2, Education.*—The outlay on education during the year was Rupees 13,925–9–2 excluding the expenditure of Rs. 404–10–3 on educational buildings which appears under Grant 1 against Rs. 14,170 in the revised estimate, and Rupees 14,099–7–3, the actuals of 1897–98. When compared with the revised estimate, the decrease occurs chiefly under "Municipal schools."

27. *Stipends to Normal Students.*—A sum of Rs. 30–14–6 was spent under this head against Rs. 60 of the budget allotment. Only two pyal school teachers were trained for this municipality, although provision was made for four. This caused the decrease.

28. *Municipal Schools on Salary System.*—In the year under review, the primary school, Máyavaram, was amalgamated with the high school with the approval of the Inspector of Schools. The high school was maintained under this system at a cost of Rs. 10,263–1[illegible]–11 under "Establishment" and Rs. 464–0–1 under "Contingencies" against Rs. 10,400 and Rs. 500, respectively, in the revised estimate. The decrease under "Establishment" was due to the following causes. The 2nd assistant was not allowed the increase of Rs. 5 sanctioned, and the 8th, 14th, 17th and 21st assistants and the Sanskrit pandit were not given the increments, as they were not qualified for the same. The acting 11th assistant was allowed a reduced pay.

29. *Schools on the Salary-results System.*—As in 1897–98, five schools were maintained under this system at a cost of Rs. 1,209–12–3 under "Fixed payments," Rs. 573–15–9 under "Result stipends" and Rs. 254–7–11 under "Contingencies," the corresponding figures of the revised estimate being Rs. 1,210, Rs. 450 and Rs. 250. All the boys' schools earned more grants than were provided for in the revised estimate. At the suggestion of the Assistant Inspector of Schools, the unexpended portion of the grants provided for "Result schools" was transferred to this head, in view to distribute a fair proportion of the total earnings to the teachers who have worked hard to turn out satisfactory results.

30. *Result Grants.*—A sum of Rs. 552–12–0 was paid to the managers of twelve schools as per certifying memoranda issued by the department, although Rs. 700 was provided in the budget and revised estimates. The number of aided schools has decreased. With the exception of the Aryan primary school, which earned a grant of Rs. 524–3–0, all the other schools earned very low grants.

31. *Progress of Education.*—The statements showing the progress of education in this municipality, as furnished by the Assistant Inspector of Schools and the Sub-Assistant Inspector of Girls' Schools, are submitted herewith in original. From these it will be seen that the total number of boys' schools of various denominations fell from 44 to 43 and the pupils from 2,116 (63 being girls) to 2,058 (72 being girls), the decrease being mainly under "Aided schools." This is mostly due to the very little time devoted by the municipal inspecting schoolmaster to his "legitimate duties of inspection and instruction" and to the too much time he appears to have spent in unnecessary correspondence, &c., "in matters which concern administration." In this connection I may quote here the general remarks of the Assistant Inspector of Schools, Trichinopoly-Tanjore division, in regard to the work of inspecting schoolmasters as contained in paragraph 13 (4) of his report on the progress and condition of education in the Tanjore district during 1897–98—

> "The great defect I find among the staff of inspecting schoolmasters is that they devote too little time to their legitimate duties of inspection and instruction and too much to matters which concern administration—such as making recommendations for appointments and leave, suggestions for changes in the budgets and other matters beyond their province or scope. They would be doing better work if they visited the schools under their charge oftener, held central classes, instructed the teachers how to be punctual and systematic in their work and impressed on their minds the importance of physical and moral education and discipline. In fact, in my humble opinion, real development of primary education depends more upon proper supervision and control than upon mere formal examinations which, in course of time, have a tendency to become a stereotyped routine work imparting little or no life to the progress of education."

In submitting this report to the Director of Public Instruction, the Inspector of Schools states—

> "The general remarks made on the inspecting schoolmasters by the Assistant Inspector are fully endorsed. These officers can do a great deal towards the improvement of education if they only worked conscientiously and minded their own business and be less interfering in matters that do not concern them. Most of these officers do not endeavour to improve the capacity of teachers by actually teaching important subjects in the schools they visit * *."

The Director of Public Instruction, in reviewing this report, remarks thus—

> "The remarks of both the Acting Inspector and the Acting Assistant Inspector regarding the work of inspecting schoolmasters are noted * * *. The Director trusts that the inspecting schoolmasters are not drawn away from their work by the higher inspecting officers * * *."

If the municipal inspecting schoolmaster is made to work in the light of the above instructions, I am confident that the status of the aided schools and of primary education generally will greatly improve in the town.

32. The strength of the high school including the primary school now amalgamated rose from 683 to 741. The decrease in the number of aided schools is counterbalanced by a corresponding increase in the unaided and indigenous schools. But out of 169 pupils lost in the former, only 50 is made good in the latter, the remaining having evidently left instruction altogether. The education of Panchamas has slightly advanced, the number of schools and scholars having risen during the year from 4 and 75 to 5 and 91, respectively. In the salary-result Panchama school, 20 were presented for examination and 16 passed with 8 in merit. This is satisfactory. But in all the other schools, 17 were presented and 9 passed with

only one in merit. The progress of Muhammadan education is likewise encouraging, the strength and efficiency having improved. The results of the several examinations appear in the footnote to statement V-A, and they are characterized as fair.

33. *Net cost on Education.*—The year's educational income in the shape of fees and Government grants amounted to Rs. 13,401–3–7. The total expenditure under Grant 2, together with the outlay of Rs. 404–10–3 on educational buildings, comes to Rs. 14,330–3–5. The net cost was thus only Rs. 928–15–10 or 4·8 per cent. of the income from taxation, markets and rents. The large amount of fees realized from the high school contributed to this abnormally low net cost. During the year under report, the high school worked at a profit of nearly Rs. 2,000, the expenditure incurred for the extension of the high school building being taken into account. The net cost of salary-result schools ranged from Rs. 3–1–9 in the Panchama school to Rs. 6–2–7 in the Saliya school. As, at the suggestion of the Assistant Inspector of Schools, the Council has recently resolved to levy a low rate of fees in the Muhammadan and Saliya schools, it is hoped that the net cost of these schools would diminish in the current year.

34. *Grant 3, Sanitation, &c.*—The total expenditure under this grant amounted to Rs. 11,990–6–3 against Rs. 11,940 of the revised estimate, the increase being under "Hospitals."

35. *Hospitals.*—The municipal hospital, Máyavaram, was maintained at a cost of Rs. 3,329–14–10 or Rs. 179–14–10 more than the revised estimate which was due to a large stock of medicines supplied to the hospital to meet the increased demand. From the accompanying concise report of the civil apothecary, Máyavaram, received from the District Medical and Sanitary Officer, Tanjore, only on the 11th June 1899, it will be observed that the number of in and out patients treated in the hospital was 154 and 12,633 against 180 and 12,398, respectively, in the year previous. The average attendance of both the classes of patients increased. The midwife attached to the hospital attended 168 labour cases, which was 40 more than in the year previous. She is reported to be doing her duty well. For want of funds, the work of cementing the floor of the wards and of the main building has been postponed.

36. *Contributions.*—A sum of Rs. 262–11–6 was paid against Rs. 290 entered in the revised estimate, the decrease occurring under "Contributions for sanitary inspection and reserve medical staff."

37. *Vaccination.*--The expenditure under this head amounted to Rs. 221–8–3 against Rs. 230 of the revised estimate. The vaccination system continued to be compulsory and it was carried on by a first-class vaccinator under the supervision of the civil apothecary. The total number of operations performed by him was 783 against 858 in the year previous. Lanoline paste supplied from the Mysore Government Vaccine Institute, Bangalore, was used throughout the year for all cases. Of this number, 763 cases proved successful and 456 cases were verified by the civil apothecary. In view to improve vaccination, the minimum number of cases to be operated by the vaccinator for each month has of late been increased from 60 to 80 at the suggestion of the civil apothecary.

38. *Registration of Vital Statistics.*—A sum of Rs. 108 was spent under "Establishment." The total number of births and deaths registered in the town was 924 and 792 against 771 and 787, respectively, in the year previous. The number of births has increased by 153 and that of deaths by 5. Five prosecutions were instituted, of which four were for failure to register births and one for a death.

39. *Conservancy.*—The expenditure on conservancy amounted to Rs. 8,068–3–8 against the revised estimate of Rs. 8,160. The decrease appearing under "Establishments" was due to "Fines and stoppages." The number of houses served by the private scavenging agency rose from 737 to 834. The establishment consisted of one chief sanitary inspector, one assistant sanitary inspector, six peons, seventeen sweepers, twelve street-cleaning toties and eighteen private scavenging toties. Particular attention was paid to the conservancy of roads and streets. The backyards of many of the private houses were systematically inspected, as a result of which the number of houses

served by the private scavenging agency rose by 97. The system of trenching in night-soil received careful attention, and the cleanliness of the town was preserved during the year.

40. *Grant 4.*—The expenditure under this grant came to Rs. 2,039–8–3 against Rs. 2,880 in the revised estimate, the decrease being caused by the non-utilization within the year of the sum provided for the cost of survey stones referred to in paragraph 12 of my budget report for 1899–1900. Lighting was conducted departmentally and the "Establishment" consisted of thirteen masalchis working under a superintendent. The total number of lamps at the end of the year was 242 or 1 more than in the year previous. The decrease under "Avenue establishment" was due to "Fines and stoppages." A portion of the savings under "Travellers' bungalow—Contingencies" was utilized in the repair of the shed and of the pandals attached to the bungalow.

41. *Grant 5*—The total outlay under this grant amounted to Rs. 2,777–14–1 against Rs. 2,780 of the revised estimate. The items under this grant call for no explanation, the revised estimate being more or less kept up.

42. In conclusion, I should be failing in my duty if I do not mention here the continued co-operation of the councillors in carrying out the administration of this municipality.

---

## ENCLOSURE.

### CONCISE Annual Report of the Municipal Hospital, Máyavaram, for the official year 1898–99.

*Public Heatlh.*—The town contains a population of 23,675 according to the census of 1891. Cholera prevailed in an epidemic form from the latter part of December 1898 to the beginning of March 1899. The first attack occurred on the 20th December and the last recorded case was on the 6th March. There were altogether 160 attacks and 89 deaths. The preventive measures laid down in the G.O., No. 1028 M., dated 26th June 1895, were adopted with the help of a small extra staff consisting of one inspector, two peons and two toties.

An annual festival is held in the month of Aippasi (October and November). During the last festival, six watchmen, five sweepers, nine toties and two lamp-lighters were added to the permanent staff as well as ten temporary latrines and forty street lamps to meet the requirements of the occasion.

*II. Vital Statistics*—are recorded in the municipal office by the registrar. There were 924 births (473 males and 451 females) and 792 deaths against 771 and 787, respectively, recorded in the previous year, giving the ratio of 39·02 births and 33·45 deaths per mille.

The causes of death as classified in the death register were—

| | |
|---|---|
| Cholera | 89 |
| Fevers | 82 |
| Bowel-complaints | 129 |
| Small-pox | 12 |
| Accidents | 1 |
| Wound | 1 |
| All other causes | 410 |
| Still-born | 68 |

*III. Sanitation—Communications.*—Out of a mileage of 34 miles 7 furlongs and 30 yards of roads and streets, 3 miles 3 furlongs and 60 yards are metalled with laterite. The metalled portions are in a fairly good condition. The streets and lanes in the outlying parts of the town become slushy and impassable during the wet weather.

The surface cleanliness of the town is fair. The bye-lanes and streets require closer attention. The number of public latrines have fallen from 14 to 8. There are 218 dust-bins, of which 179 are of masonry and 39 moveable, and it is to be hoped that the former will gradually be replaced by the latter. Considering the large area of the town, the dust-bins require an increase.

The rubbish is thrown in small heaps in the rubbish depots and sold annually. If stored in heaps of given dimensions and covered with a thin layer of sand or dry earth it will fetch a larger income. The amount realised by sale of rubbish during the year under report was Rs. 102-12-9 against Rs. 113-15-1 for the previous year.

The night-soil from private and public latrines is buried in trenches in the night-soil depot. The private scavenging system is taken advantage of only by a small portion of the inhabitants and is in great need of extension. Out of a total of 4,321 houses, only 834 are served by scavengers. It is, however, encouraging to note that there has been an increase of 97 houses so served during the year under report.

The water-supply is unsatisfactory. It is derived from the Cauvery, when in floods, and when the river is dry, springs and wells are excavated in its bed. Three tanks are reserved for drinking purposes. They are supplied from the Cauvery through irrigation channels without any outlet to carry away the surplus water. The surroundings of the tanks and of their supply channels are anything but desirable. There are 22 municipal wells intended for drinking. Some of these are, however, brackish and unsuitable for drinking. The wells are used only when the Cauvery is dry. A few wells should be sunk in the outskirts of the town where there is dearth for drinking-water during the dry weather. Some Norton's tube wells will be of great service.

The system of drainage that obtains is the natural one which is very defective. During the rains the town becomes perfectly water-logged.

*IV. Vaccination*—is compulsory and is carried on by a first-class vaccinator. Lanoline paste supplied from the Mysore Government Vaccine Institute, Bangalore, is used for all cases. The vaccinator has vaccinated 783 cases against 858 in the previous year, showing a slight falling off. The minimum number of cases to be vaccinated monthly by the vaccinator is now raised from 60 to 80 with the hope of securing better work for the current year.

The following table shows the nature of the work done :—

| Year. | Primary and Secondary. | | | | | | | | Re-vaccination. | | | | Total. | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Under one year. | | | | Above one year. | | | | | | | | | | | |
| | Successful. | Unsuccessful. | Unknown. | Total. | Successful. | Unsuccessful. | Unknown. | Total. | Successful. | Unsuccessful. | Unknown. | Total. | Successful. | Unsuccessful. | Unknown. | Total. |
| 1897–98 .. .. .. | 530 | 174 | .. | 704 | 121 | 9 | 10 | 140 | 12 | 1 | 1 | 14 | 663 | 184 | 11 | 858 |
| 1898–99 .. .. .. | 554 | 13 | .. | 567 | 201 | 1 | 6 | 208 | 8 | .. | .. | 8 | 763 | 14 | 6 | 783 |

The civil apothecary in charge of the municipal hospital verified the results in 456 cases, giving a percentage of 57·5.

*V. (a) Hospital.*—There is a main building with four wards and out-houses. The wards contain twelve beds—six for males and six for females. The male side is always fairly full. An operation room is badly wanted.

(*b*) The buildings are in good repairs. The floor of the wards and of the main building badly requires cementing.

(*c*) The furniture is in sound repair.

(*d*) The hospital was inspected once by the Collector, twice by the Sub-Collector and once by the District Medical and Sanitary Officer.

(*e*) Patients able to pay for their diets diet themselves and those who can pay for medicines buy them in the local shops.

(*f*) Table showing the number of patients treated as compared with previous year --

| — | 1896–97. | | 1897–98. | | 1898–99. | |
|---|---|---|---|---|---|---|
| | Total treated. | Daily average number. | Total treated. | Daily average number. | Total treated. | Daily average number. |
| In-door .. .. .. .. | 175 | 7·05 | 180 | 7·09 | 154 | 7·41 |
| Out-door .. .. .. .. | 12,191 | 78·60 | 12,398 | 84·87 | 12,633 | 88·08 |
| Total .. | 12,366 | 85·65 | 12,578 | 91·96 | 12,787 | 95·49 |

(*g*) There has been a slight falling off among the in-patients and some increase among the out-patients as well as in the daily average number.

There were four deaths among the in-patients, giving a ratio of 2·59 per cent. treated. There were no deaths from septic diseases acquired in hospital.

(*h*) One thousand and fifteen operations were performed during the year under report, of which 977 were cured, 24 relieved, 5 discharged otherwise and 9 are remaining under treatment.

(*i*) The establishment is sufficient and efficient.

(*j*) Midwife Ammamuthu is a barber woman with 29 years of service in the municipality. She does her duty well and is popular with all classes of people.

The following table shows the work done by her as compared with previous year :—

| Years. | Number of cases conducted by the midwife. |
|---|---|
| 1896–97 .. .. .. .. .. .. .. .. .. | 158 |
| 1897–98 .. .. .. .. .. .. .. .. .. | 128 |
| 1898–99 .. .. .. .. .. .. .. .. .. | 168 |

(*k*) No Dufferin Fund hospital is working in the town.

| Balance | 2,177 | 1,400 | 2,290 | 3,681 |

2. The number of meetings held by the Municipal Council was 28 or five less than in the previous year. The attendance of non-official members continued to be fair, but that of officials was again poor. The Collector is requested to inform the latter that Government expects them to be more regular in attending the meetings of the Council in future. Two seats were filled by election during the year and they were contested, 55·8 per cent. of the voters concerned attending the poll.

3. *Receipts.*—(1) Owing to a thorough revision of the registers, the net current demand under the tax on buildings rose from Rs. 7,254 to Rs. 8,284. The average incidence of the tax also increased slightly, but it was still very low, being only Rs. 1-14-8 against a general average of Rs. 2-6-0 for Municipalities in 1897-98. The demand under the taxes on arts and lands remained almost stationary. The result of the revision of the latter tax, which is said to be now in progress, should be reported to Government as soon as it is completed.

(2) The current collections under the principal taxes, although they declined somewhat, were still good. The arrear realizations were, however, not satisfactory except in the case of the land-tax. The number of distress warrants issued during the year was 2,004 against 1,689 in 1897-98, but their execution was not as prompt as it might be, more than 12 per cent. of the total number for disposal remaining unexecuted at the end of the year. Greater promptitude should be displayed in this respect in future.

(3) There was an increase in the income from school fees, but that from markets and slaughter-houses showed a slight decline. The sale of sweepings brought in Rs. 103 against Rs. 114 in 1897-98. The Municipal Council should look after this source of revenue as it is capable of considerable development. In this connection, its attention is drawn to the suggestion made by the civil apothecary in paragraph III of his report. Caps/

(4) The number of houses served by the private scavenging agency again rose from 737 to 834 and the receipts from this source from Rs. 854 to Rs. 1,207—a satisfactory advance—which is ascribed by the Chairman to the exertions of the chief sanitary inspector. The service was thus worked at a profit of Rs. 264 to the Municipal Council. This surplus should, however, be utilized in further extending the service which is now adopted by only about 19 per cent. of the total number of houses assessed to the tax on buildings. Caps/

4. *Expenditure.*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 2,924 or 64·8 per cent. of the net Municipal income from tolls. The Revenue Divisional officer has not reported on the condition of the town roads—an omission which should not be allowed to recur; but from paragraph III of the civil apothecary's report, it appears that the metalled roads were in fair condition. The Municipal Council should devote its special attention to the improvement of the streets and lanes in the outlying parts of the town, which are stated by him to become impassable during the wet weather. Caps/

(2) *Education.*—The net expenditure on primary education was Rs. 3,011, while secondary education was worked at a profit of Rs. 2,486. Thus the total net outlay on education was only Rs. 525 or 2·8 per cent. of the receipts from taxation. As in the previous year, the Municipal Council maintained a high school on the salary system; but as the primary school at Máyavaram was amalgamated with this institution, the number of primary schools under the control of the Council fell from six to five. Twelve primary schools were also aided with result grants against seventeen in 1897-98. There was an improvement in the attendance at the Municipal schools, but, owing apparently to a fall in the number of aided schools, the strength of these institutions exhibited a marked decline. This is unsatisfactory, more especially as the fall was in the number of pupils attending the primary schools. The fall in the number and attendance of these schools is ascribed by the Chairman to the inattention of the Inspecting Schoolmaster to his legitimate duties of inspection and instruction; but the Assistant Inspector of Schools is of opinion that it is due to the maintenance of two free schools in the town by the Municipal Council which affects prejudicially the fee income of result schools under private management. He remarks that the Inspecting Schoolmaster did very fair work during the year. The results obtained by

the Municipal high school at the public examinations were good—15 out of 37 students sent up for the Matriculation examination, and 32 out of 75 presented for the Lower Secondary examination, having been successful. The Municipal primary schools appear to have acquitted themselves well at the departmental examinations, but the results of the grant examinations in the aided schools were indifferent and more than one-fifth of the allotment for result grants was allowed to lapse. The total number of boys under instruction in the Municipal and aided schools again fell from 1,591 to 1,474 or 85·2 per cent. of the male population of school-going age. The attention of the Council should be directed towards improving the attendance of pupils at all the primary schools in the town.

(3) *Medical Relief.*—The number of in-patients treated at the Municipal hospital fell from 180 to 154, but that of out-patients rose from 11,398 to 12,633. The midwife attached to this institution attended 168 cases of labour or 40 more than in the previous year—a gratifying advance. The attention of the Municipal Council is drawn to the civil apothecary's remarks in paragraph V (*a*) and (*b*) of his report regarding the necessity for the construction of an operation room and for repairs to the hospital buildings.

Caps/

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year fell from 858 to 783, but the percentage of reported success rose from 77·3 to 97·4. Infantile vaccination also showed a slight advance, the total number of children under one year successfully vaccinated being 554 or 23·3 per mille of the population against 530 or 22·3 per mille in 1897–98; but to be satisfactory, the number of vaccinations should approach as nearly as possible the registered birth-rate of 38·9 per mille. Steps should be taken to secure better results in the current year. There was an improvement in the registration of vital statistics, the number of births and deaths registered during the year being 38·9 and 33·3, respectively, per mille of the population, against 32·4 and 33·1 per mille in the previous year. The returns of births cannot, however, be regarded as accurate, as the rate recorded was below the normal.

(5) *Sanitation.*—The expenditure under this head amounting to Rs. 8,068 was 94 per cent. of the allotment and 21 per cent. of the current receipts. From paragraph 39 of the Chairman's report, it appears that some attention is being paid to the sanitation of the town; but the Council should endeavour to remedy, as far as funds permit, the several defects pointed out by the civil apothecary in paragraph III of his report and by the Deputy Sanitary Commissioner in his last inspection notes.

Caps/

5. *General Remarks.*—The year closed with a balance of Rs. 3,681 or 9·6 per cent. of the current receipts.

Except as regards vaccination and registration of births, which demand increased attention, the administration of the Municipality during the year under review was fair.

Para. 10

2. The number of meetings held by the Municipal Council was 28 or five less than in the previous year. The attendance of non-official members continued to be fair; but that of officials was again poor. The Collector is requested to inform the latter that Government expects them to be more regular in attending the meetings of the Council in future. Two seats were filled by election during the year and they were contested, 55.8 per cent of the voters concerned attending the poll.

3. Receipts (1). Owing to a thorough revision of the registers, the net current demand under the tax on buildings rose from Rs.7,254 to Rs.8,284. The average incidence of the tax also increased slightly, but it was still very low, being only Rs.1--14--8 against a general average of Rs.2--6--0 for Municipalities in 1897-98. The demand under the taxes on arts and lands remained almost stationary. The result of the revision of the latter tax, which is said to be now in progress, should be reported to Government as soon as it is completed.

(2) The current collections under the principal taxes, although they declined somewhat, were still good. The arrear realizations were, however, not satisfactory except in the case of the land-tax. The number of distress warrants is-

sued

issued during the year was 2,004 against 1,689 in 1897-98, but their execution was not as prompt as it might be, more than 12 per cent of the total number for disposal remaining unexecuted at the end of the year. Greater promptitude should be displayed in this respect in future.

(3) There was an increase in the income from school fees, but that from markets and slaughter houses showed a slight decline. The sale of sweepings brought in ~~only~~ Rs.103 against Rs.114 in 1897-98. The Municipal Council should look after this source of revenue as it is capable of considerable development. In this connection, its attention is drawn to the suggestion made by the Civil Apothecary in para. III of his report.

(4) The number of houses served by the private scavenging agency again rose from 757 to 834 and the receipts from this source from Rs.854 to Rs.1,207 - a satisfactory advance, which is ascribed by the Chairman to the exertions of the Chief Sanitary Inspector. The service was thus worked at a profit of Rs.264 to the Municipal Council. This surplus should, however, be utilized in further extending the service which is now adopted by only about 19 per cent of the total number of houses assessed to the tax on buildings.

4. Expenditure (1) Public Works: ~~The only~~ No new work of any importance was undertaken during the year. ~~was the construction of a dead-house in the hospital compound at a cost of Rs.470.~~ The total outlay on communications amounted to Rs.2,924 or 64.8 per cent of the net Municipal income from tolls. The revenue Divisional Officer has not reported on the condition of the town roads - an omission which should not be allowed to recur; but from paragraph III of the Civil Apothecary's report, it appears ~~that~~ that the metalled roads were in fair condition. The Municipal Council should devote its special attention to the improvement of the streets and lanes in the outlying parts of the town, which are stated by him to become ~~slushy and~~ impassable during the wet weather.

(2) Education. The net expenditure on primary education was Rs.3,011, while secondary education was worked at a profit of Rs.2,486. Thus the total net outlay on education was only Rs.525 or 2.8 per cent of the receipts from taxation. As in the previous year, the Municipal Council maintained a High School on the salary system, but as the primary school at Mayavaram was amalgamated with this institution, the number of primary schools under the control of the Council fell from six to five. Twelve primary schools were also aided with result grants against

Chairman

seventeen ~~Sixteen~~ in 1897-98. There was an improvement in the attendance at the Municipal schools, but owing apparently to a fall in the number of aided schools, the strength of these institutions exhibited a marked decline. The fall in the number and attendance of these schools is ascribed by the Chairman to the inattention of the Inspecting Schoolmaster to his legitimate duties of inspection and instruction, but **the Assistant Inspector of Schools is of opinion** that it is due to the maintenance of two free schools in the town by the Municipal Council which affects prejudicially the fee income of result schools under private management. The results obtained by the Municipal High School at the public examinations were good, 15 out of 37 students sent up for the Matriculation Examination and 52 out of 75 presented for the Lower Secondary Examination having been successful. The Municipal primary schools appear to have acquitted themselves well at the departmental examinations, but the results of the grant examinations in the aided schools were indifferent and more than one-fifth of the allotment for result grants was allowed to lapse. The total number of boys under instruction in the Municipal and aided schools again fell from 1,591 to 1,474 or 85.2 per cent of the male population of schoolgoing age.

This is unsatisfactory, more especially as the fall was in the number of pupils attending the primary Schools.

Para. 31.

Vide Educatnl. Statt. IV. F.

We remark that the Inspecting Schoolmaster did very fair work during the year.

The attention of the Council should be directed ~~to~~ towards improving the attendance of pupils at all the primary schools in the Town.

(3) Medical Relief. The number of in-patients treated at the Municipal hospital fell from 180 to 154, but that of

out-patients

out-patients rose from 12,398 to [illegible]83. The midwife attached to this institution attended 168 cases of labour or 40 more than in the previous year, a gratifying advance. The attention of the Municipal Council is drawn to the Civil Apothecary's remarks in para. V.(a) and (b) of his report regarding the necessity for the construction of an operation room and for repairs to the hospital buildings.

(4) Vaccination and Vital Statistics. The total number of persons vaccinated during the year fell from 858 to 783, but the percentage of reported success rose from 77.3 to 97.4 . Infantile vaccination also showed a slight advance, the total number of children under one year successfully vaccinated being 554 or 23.3 per mille of the population against 530 or 22.3 per mille in 1897-98, but to be satisfactory, the number of vaccinations should approach as nearly as possible the registered birth rate of 38.9 per mille. Steps should be taken to secure better results in the current year.

There was an improvement in the registration of vital statistics, the number of births and deaths ~~registered~~ registered during the year, being 38.9 and 33.3 respectively, per mille of the population, against 32.4 and 33.1 per mille in the previous year. The returns

of

Chairman

4

6.

8

of births cannot, however, be regarded as accurate, as the rate recorded was below the normal.

(5) Sanitation. The expenditure under this head amounting to Rs.8,068 was 94 per cent of the allotment and 21 per cent of the current receipts. From para.39 of the Chairman's report, it appears that, some attention is being paid to the sanitation of the town, but the Council should endeavour to remedy, as far as funds permit, the several defects pointed out by the Civil Apothecary in para III of his report and by the Deputy Sanitary Commissioner in his last inspection notes.

5. General Remarks. The year closed with a balance of Rs.3,681 or 9.6 per cent of the current receipts.

Except as regards Vaccination and registration of births, which demand increased attention, the administration of the Municipality during the year under review was ~~tolerably satisfactory~~ fair.

| Colleges | Government | | | | | | | |
| | Local or municipal | | | | | | | |
| | Aided from public funds | | | | | | | |
| | Unaided and indigenous | | | | | | | |
| Secondary schools | Government | | | | | | | |
| | Local or municipal | 1 | 438 | - | 1 | 741 | - | |
| | Aided from public funds | | | | | | | |
| | Unaided and indigenous | 3 | 52 | | 3 | 48 | | |
| Primary schools | Government | | | | | | | |
| | Local or municipal | 5 | 517 | 23 | 4 | 277 | 25 | |
| | Aided from public funds | 15 | 636 | 14 | 12 | 456 | 25 | |
| | Unaided and indigenous | 20 | 410 | 26 | 23 | 464 | 22 | |
| Training schools | Government | | | | | | | |
| | Local or municipal | | | | | | | |
| | Aided from public funds | | | | | | | |
| | Unaided and indigenous | | | | | | | |
| Sessional schools | Government | | | | | | | |
| | Local or municipal | | | | | | | |
| | Aided from public funds | | | | | | | |
| | Unaided and indigenous | | | | | | | |
| Industrial schools | Government | | | | | | | |
| | Local or municipal | | | | | | | |
| | Aided from public funds | | | | | | | |
| | Unaided and indigenous | | | | | | | |
| | Total | 44 | 2053 | 63 | 43 | 1986 | 72 | |

__Secondary Schools__:- The large increase in the Strength of the Municipal High School is due to the amalgamation with it of the Municipal Primary School.

__Primary Schools__:- The fall in the no & Strength of Board schools is nominal, being due to the amalgamation above referred. The decline of 3 under aided Schools is explained by (1) 3 of the aided Schools of 97-98 having been closed. (2) one L.F. Panchama School having failed to earn grants & (3) 1 new School added to the list during the year. Unaided & indigenous Schools increased both in number & Strength as the result of the closure of 6 Schools & the opening of 9 Schools. On the whole the total no of Schools in the municipality decreased from 44 to 43 & pupils & their attendances from 2113 to 2058 the fall being confined to Primary Schools.

NOTE.—1. *No comments should be made except as notes entered in the column of remarks.*
2. *This statement should be submitted in time to reach the Presidents of local boards or the Chairmen of municipal councils concerned by the 1st May.*
