SEPTEMBER.

Administration Report.

Reviewing the — of the Vizianagram Municipal Council for 1898–99.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. V. VENKATARAYA SASTRI GARU, Chairman, Municipal Council, Vizianagram, to the Secretary to Government, Local and Municipal Department, dated Vizianagram, 10th July 1899, No. 439.

Statements I, I-A, II, II-A, II-B, III, IV-A, IV-B, Appendices A and B to statements IV-A and IV-B, V-A, V-B, VII, VIII, IX, IX-A, X, X-A, XI, XII, XIII, XIV and XV.

I have the honour to submit herewith the report on the administration of the Vizianagram Municipality for the official year 1898–99, together with the prescribed statements noted in the margin.

2. The municipality continued to be administered during the year under Madras Act IV of 1884 as amended by Act III of 1897.

3. Mr. E. B. Elwin, Divisional officer, held the office of Chairman from the beginning of the official year until September, when I assumed charge of the office as nominated Chairman.

4. The sanctioned strength of the Council is sixteen, consisting of four nominated and twelve elected members.

5. During the year under report, the Council met 23 times against 26 in the previous year. Five meetings were dissolved for want of quorum. The average attendance at each meeting actually held was 7·913.

I.—RECEIPTS.

6. The year opened with a balance of Rs. 91–6–3 and the receipts under all heads during the year amounted to Rs. 32,035–13–4, making in all Rs. 32,127–3–7 against Rs. 30,619–12–5 of the preceding year, thus showing an increase of Rs. 1,507–7–2 in the collections of the year under report. They, however, fall short of the revised estimate by Rs. 442–12–5, the causes of which will be explained below.

7. *Tax on Arts.*—This tax, as usual, was levied on all classes in the schedule. The current demand was Rs. 3,348 as finally settled by the Council, of which Rs. 3,149–8–0 were collected against Rs. 2,850–8–0 of the previous year collected out of a demand of Rs. 3,552. It will be seen from the above figures that, of the whole demand, only Rs. 198–8–0 were left uncollected which will shortly be adjusted. Of the arrear demand of Rs. 2,230–5–3 outstanding from the year 1894–95, a sum of Rs. 397–3–3 only was collected, Rs. 6 remitted and Rs. 1,678–10–0 were written off as irrecoverable after a careful scrutiny by the Council. The total collections in the year under this head were Rs. 3,546–11–3 against Rs. 3,273–15–3 in the preceding year. The amount outstanding under current and arrear demands was only Rs. 347 which will shortly be adjusted. It may be noticed from the above that during this year an unusually large amount was written off as irrecoverable, but I beg to submit that this was done out of arrears

demand outstanding for the past five years and upwards. The Council should have written off much of this amount long ago, but they were reluctant to do so and to lower the demand until they were better satisfied that they could not be collected.

8. *Tax on Buildings.*—The rate at which this tax was levied in the year was, as usual, $7\frac{1}{2}$ per cent. of the annual rent value. The house-tax registers were last revised in 1895–96. The current demand under this head was Rs. 10,991–2–0, out of which a sum of Rs. 9,056–3–0 was collected, Rs. 8–14–0 remitted by the Council on appeal and Rs. 3–4–0 remitted on account of vacant houses, leaving a balance of Rs. 1,922–13–0. The arrear demand outstanding at the beginning of the year was Rs. 3,508–4–6, of which a sum of Rs. 489–12–0 was collected and a sum of Rs. 1,846 was written off as irrecoverable after careful enquiries being made by the Council. These items were adjusted by the *ex-officio* Chairman, Mr. E. B. Elwin, Principal Assistant Collector. The amount left under balance was Rs. 1,172–8–6 which will shortly be disposed of. The Council have at last seen that there is no use of retaining these figures in the demand and resolved to write off after a careful scrutiny all the uncollectable arrears. The Council hopes to take steps in future to collect in each year every pie out of the current demand and deal with the arrears at the end of each year as they deserve, instead of allowing them to outstand for so long a time as has been usual. I beg to state, in this connection, that in the house-tax registers there are items amounting to upwards of Rs. 700 which are not at all collectable. They are therefore kept under uncollected demand and are written off as irrecoverable balances once in two or three years. These items are appertaining to thatched and other houses belonging to the poorer classes of Panchamas, Muhammadans, weavers, Bondilies and a few agriculturists. These houses are situated in Relligudem, Thurakagudem, Bondiligudem, Lunkavidhi and Sunkara street, and are assessed at 7 or 8 annas each, the annual rent having been estimated to be Rs. 6 or a little above according to measurements. It has been found very difficult to issue even notices of demand and more so to execute distress warrants upon these people and the bills are therefore retained outstanding as very often no property could be found to satisfy the demand. It is proposed to remove these items altogether in the next revision of house-tax and thus save much time and unnecessary labour. This explains the large arrears and the necessity for writing off large amounts occasionally.

9. *Tax on Lands.*—The current demand was Rs. 104–2–0 and the collections amounted to Rs. 94–10–0, leaving a balance of Rs. 9–8–0, while the arrear collections amounted to Rs. 9 out of the arrear demand of Rs. 40–10–0, leaving a sum of Rs. 31–10–0 which was written off as irrecoverable.

10. *Tax on Vechicles, Animals and Carts.*—These taxes were levied at the maximum schedule rates. There was an increase under each head in the collection of these taxes in the year over the figures adopted in the revised estimate for the year.

11. *Coercive Processes.*—Appendix A to statements IV-A and IV-B shows the number of warrants remaining unexecuted at the close of the previous year and those that were executed during the year. In four cases property was attached and seized and in one case property was sold and the sale-proceeds credited in satisfaction of the amount due.

12. The right of collecting tolls was kept under amani management as no contractor offered a reasonably sufficient price. Not more than Rs. 10,000 were offered by the bidders at the auction sale. The Council would have sold it for Rs. 11,000 if the highest bidder offered that amount ; but as no such offer came though the sale was adjourned to more than one meeting, the Council resolved to keep it, therefore, under amani as an experiment in order that they may have an approximate idea of the real income under the head, so as to serve as a guide to them in the sales of subsequent years. The Council realized a net increase of Rs. 2,410–7–10 under this head during the year under report, and the Council was really benefited by the experiment since the tolls in the current year were sold for Rs. 14,055. The District Board's share was paid during the year, except a sum of Rs. 223–4–2 kept back for adjustment, which was also paid later on in June 1899.

13. *Incidence of Taxation.*—The total actual income from taxation including tolls was Rs. 28,179–12–1 against Rs. 26,237–2–0 in the previous year and excluding tolls it was Rs. 16,580–8–3 against Rs. 17,048–6–0. The population of the town according to the census returns of 1891 is 29,180; the incidence per head, tolls being included was Rs. 0–15–6 against Rs. 0–14–4 of last year, and tolls being excluded was Rs. 0–9–1 as against Rs. 0–9–4 in the previous year.

14. *Realisation under Special Acts—Fees under Act II of* 1888.—The amount realised under this head was only Rs. 20. No dramatic companies on a large scale visited the town during the year. The amount realised under the head was the fees levied from two small local amateur companies.

15. *Rent of Lands.*—This small sum was collected as quit-rent from the occupiers of municipal ground as sanctioned by Government.

16. *Sale-proceeds of Land.*—The amount realised under this head was Rs. 50 which is the value of an old municipal blind road that was sold to one G. Baulakristnamma as sanctioned by Government.

17. *Produce of Lands and Gardens.*—The park fields were leased out for cutting grass during the year for Rs. 400 which was collected and Rs. 10–15–6 realised from the sale of vegetables grown in the park.

18. *Sale-proceeds of Old Materials.*—There was a large stock of old and unserviceable materials and other articles which was sold at the public auction. The amount collected by sale was Rs. 45–1–9.

19. *Conservancy Receipts—Sale-proceeds of Night-soil, Street Sweepings, &c.*—There was no competition in the year at the auction sale and hence the decrease under this head.

20. 4 (*c*) (*i*) *and* (*ii*).—The income from municipal schools and library was almost the same as in the previous year.

21. *Income from Slaughter-houses.*—The municipality owns two slaughter-houses--one for sheep and the other for bullocks. The highest bid at the auction sale was Rs. 650 which was fully collected.

22. *Warrant and Distraint Fees.*—The demand under this head was Rs. 162–2–0 and the collections amounted to Rs. 51–9–0.

23. *License Fees.*—There was a small increase in the revenue under this head which calls for no special explanation.

24. *Fines under Municipal and other Acts.*—There was a large decrease under this head. In the previous year, certain serious cases of encroachment were filed before the Principal Assistant Magistrate and the offenders were dealt with by the Magistrate as they deserved. Hence the increase in that year; but as no such cases occurred during the year under report, there was a decrease under this head. The municipality filed 66 cases of prosecution in the Bench Court during the year 1898–99.

25. 4 (*h*) (*i*).—This was the amount received from the Accountant-General as interest at 3½ per cent. on Government promissory note of 1865 for Rs. 5,000 invested by the late Rai Bahadur Sri P. Jagannadharaju Saheb, Dewan of Vizianagram Samastanam for feeding the poor during Pongal.

26. *Grants and Contributions—*(*a*) *From Government.*—This is the amount contributed from Provincial funds towards the maintenance of the gymnasium during the year 1898–99.

27. *Private Scavenging Fees.*—The current year's demand under this head was Rs. 1,731–6–0 and the collection was Rs. 1,533–8–6. The balance left uncollected in the year was only Rs. 197–13–6. The system of advance collections was worked in the year with great vigour. Of the arrear demand of Rs. 1,639–11–6, Rs. 100–10–6 was collected and Rs. 1,211, outstanding since 1892–93, was written off the accounts as irrecoverable. The current and the arrear balances will soon be adjusted. I beg to bring to the notice of Government the fact that much work was done by

way of improving the private scavenging system in the year. The number of private latrines under the municipal control during the year was 1,000.

II.—EXPENDITURE.

28. *Grant I, Public Works.*—The total expenditure under Grant I amounted to Rs. 7,401–10–4 against a sum of Rs. 7,430 provided in the revised estimate and Rs. 8,500 in the budget estimate of the year. Under the orders of Government, the expenditure under this grant was reduced as only urgent works were taken on hand.

(*a*) *New Works.—Communications.*—No important works were executed in the year. Rs. 71–14–0 only were spent on petty construction of road culverts.

(*b*) *Buildings.*—The accommodation in the sheep slaughter-house having been reported to be insufficient, the Council proposed to improve it by building a masonry platform at a cost of Rs. 260–6–2.

At the recommendation of the Sanitary Commissioner an iron latrine, the materials of which were purchased previously, was put up and a masonry basement to it was constructed in the year in the fish market in place of an old masonry enclosure at a cost of Rs. 380–6–6.

A sum of Rs. 65–8–6 was spent in providing enclosures and lining fence to the burial grounds at Buchanna's tank, Nallacheruvu and in Gurachari tope.

(*c*) *Drainage.*—Rs. 117–2–1 was spent for the construction of a masonry side drain in Peketivari street which was very faulty in its levels. Rs. 91–14–8 was spent in constructing a drain in hospital road. Other works do not deserve separate mention in the report.

(*d*) *Water-supply.*—On the recommendation of the Sanitary Commissioner an iron pump was purchased at a cost of Rs. 144–3–10 to be fixed to the public well at Dasannapeta which was recently constructed by the Council.

29. *Repairs—*(*a*) *Communications.*—The total mileage of roads, streets and lanes in the town is 42 of which 30 are metalled and gravelled, and 12 gravelled only. The total length of roads maintained in the year was 20½ miles. The main roads were repaired at a cost of Rs. 1,465–7–0. Twelve of the principal roads in the kaspa division were repaired at a cost of Rs. 501–3–10 and nine of Santapeta and three of Kottapeta and Hukumpeta were also put in order at a cost of Rs. 353–15–1 and Rs. 204–5–7 besides some petty roads at Rs. 231–1–1. The permanent staff of road coolies have also done good work in making patch works of roads wherever required in the town. The details of road works executed are shown in statement II-A.

(*b*) *Buildings.*—No repairs of any important nature were made in the year except those of municipal choultries which were retiled and repaired at a cost of Rs. 35–6–10.

(*c*) *Drainage.*—Petty repairs to drains were made at a cost of Rs. 63–13–9.

30. *Establishment.*—Statement III-B gives the details of establishment for flushing the drains. Drains are cleaned and flushed by the drain-cleaners twice a week. There was no change in the establishment.

31. *Water-supply—Establishment.*—There are six tanks and fourteen wells for the supply of drinking water to the townspeople. There were eleven watchmen employed for watching the tanks and wells. The cost of this establishment was Rs. 407.

32. *Public Works Establishment.*—There was no change in the establishment under this head. There was one overseer on Rs. 30 + 10 allowance and two maistries on Rs. 10 each. I beg to state that an allowance of Rs. 10 was sanctioned by Government as pony allowance to the overseer who now maintains a cart instead of pony. The Inspector of Local Fund Accounts in his recent audit took objection to this course and asked the Council to obtain sanction of Government for a cart allowance instead of pony allowance. Sanction is therefore solicited for the cart allowance accordingly.

33. *Tools and Plant.*—The amount spent for the purchase of tools was Rs. 235-10-10 against Rs. 180 provided in the revised estimate.

34. *Grant II, Education.*—The amount provided in the revised estimate under this grant was Rs. 3,800.

35. *Salary Result System Schools.*—The municipality as in the previous year had three schools under the system—a school for Muhammadan boys, another for Panchamas and a third called the night school for the labouring classes. In each of these schools education is imparted up to the fourth standard. Statement V-A gives in detail their strength and average attendance. The Muhammadan school presented 43 boys, of whom 31 passed against 45 presented and 20 passed in the previous year. Five boys appeared for the primary school examination, of whom two passed. The night school and the Pariah school have each one trained teacher. The former sent up three, of whom one passed, while the latter sent up none for the primary examination. Compared with the results of the previous year, the work turned out in the Muhammadan and the Pariah schools cannot be considered to be satisfactory. Grants were paid at half the rates to these salary result system schools.

Fees were levied at the same rates as in the previous year in the Muhammadan school. No fees were collected either in the Pariah or in the night school.

36. *Result Grants.*—The amount provided in the revised estimate was Rs. 2,200, but the sum actually spent was Rs. 2,430–5–0. The excess in expenditure was due to the payment in the current year of the arrear grant for 1897–98 to the Hindu Ripon Primary school and the Hindustani school. The grants for 1898–99 were paid to all the schools within the close of the year. The number of schools at the beginning of the year was 22, the number opened in the year was 4 and the number at the close of the year was therefore 26 schools. The qualifications of the teachers were improved, a teacher in each of the Raja Bazaar school, the Ripon Hindu Primary school and the Ripon Town school, Santapeta having obtained trained teachers' certificates. The number of pupils receiving instruction in the municipal and aided schools was 1,371, of which 1,232 were boys and 139 were girls.

37. *Gymnastic Instruction.*—The municipality maintains a gymnasium at a cost of Rs. 232–5–6, of which Rs. 66 were contributed from Provincial funds. There is one trained gymnastic teacher on Rs. 12 and a peon attached to it at Rs. 5. The number of boys that received instruction was 1,260 and their average attendance was 1,193.

38. *General Drawing.*—In the year under report the municipality introduced a drawing class for the schools under its management. A qualified drawing master was appointed on a salary of Rs. [illegible] per mensem from the 3rd May 1898. The number of teachers under instruction was 34 and that of boys 514. The average attendance of teachers under instruction was 2 and that of boys 22.

39. *(i) Building and Furniture Grant.*—The amount provided in the revised estimate for the year was Rs. 200 and the actual expenditure was Rs. 161–2–8.

40. *Inspection.* The municipal Inspecting schoolmaster inspected on an average 40 schools in a month. I agree with the Assistant Inspector of Schools who speaks well of his work.

41. *Grant III, Medical and Sanitation.* The total expenditure under this grant was Rs. 11,074–6–6 against Rs. 10,960 provided in the revised estimate and against Rs. 10,349–5–11, the actuals in the previous year.

42. *Hospitals and Dispensaries—Establishment.*—In the year there was only one midwife employed by the municipality who was trained in the Lying-in Hospital, Madras, and possesses a training certificate. She attended only 127 delivery cases and 7 other cases. Her work during the year was better than that of the previous year, but there is much room for improvement as the number of births reported to have occurred was so many as 1,031. During the first half of the year she attended only 20 cases and on severe notice having been taken of her conduct then, she began

to pay greater attention to her work, with the result that she attended more than a hundred cases in the second half of the year. It is hoped that she will show better results at the end of the current year.

The municipality owns no hospital or dispensary, but the Samastanam maintains one, the annual concise report of which institution is herewith forwarded.

43. *Vaccination.*—The municipality has in its service a first-class vaccinator. He operated 1,752 cases, of which 1,497 were successful, 249 unsuccessful and 6 unknown. There were 63 cases prosecuted in the year for failure to get children vaccinated. Number vaccinated under one year was 941, of which 789 were successful and 152 unsucessful, which was partly due to the lanoline paste supplied from the vaccine depot at Bangalore, which proved a failure during the hot weather. Number of notices issued to parties under section 138 was 746 and the number of complaints lodged before the Magistrate was 63. Number of persons that produced their children for vaccination under the Magistrate's order was 60. The vaccination work was under the supervision of the Hospital Assistant in charge of the Police Hospital who is also a councillor. He verified 715 cases during the year. The vaccinator is paid at the rate of two annas per each successful case vaccinated by him over and above 80 cases a month. He had to be paid accordingly a reward of Rs. 125-12-0 during the year. The cost of lymph and other charges relating to vaccination was Rs. 59–3–0. The average cost of each successful case was Rs. 0–3–11 against Rs. 0–2–9 in the previous year.

44. *Vital Statistics.*—The number of births registered during the year was 1,031 against 886 and that of deaths was 860 against 865 in the previous year.

The various causes of mortality are as compared below :—

	1897-98.	1898-99.
Cholera	56	...
Small-pox	5	3
Fevers	302	346
Bowel complaints	137	154
Other causes	365	357
Total ...	865	860

The population of the municipality according to the census of 1891 is 29,180 and the birth-rate per mille in the year was 35·332, while the death-rate was 29 547. There were no epidemics and the public health was good throughout the year. The municipality is divided into two divisions for registration purposes, each of which is kept under the charge a registrar. The Conservancy Inspectors go about and find out cases of birth and death ; and the registrars are also directed to go out into their divisions to check the reports received by them. Their work in the year was satisfactory. There were 35 cases of prosecutions for failure to report the occurrences of births. Owing to the severe fines imposed by the Magistrates, the parties have learnt to report the occurrences of births and deaths themselves to the Municipal office and hence the increase in the birth-rate.

45. *Conservancy.—Road-cleaning and road-watering.*—The amount provided in the revised estimate was Rs. 10,110 and the amount actually spent was Rs. 10,144–3–6.

Conservancy Establishment.—Statement II-B shows the details of establishment. In August 1898, a certificated man was appointed as Chief Sanitary Inspector of the Municipality. The sanitary condition of the town may be said to have been fairly satisfactory. The number of prosecutions for infringing the municipal laws was 66 and the fines collected amounted to Rs. 94. The number of dust-bins made in the year were 105, of which 82 were substituted for old ones found useless. The municipality had in all 357 dust-bins, of which 9 are of corrugated zinc, 322 iron, and 26 masonry. There were 29 public latrines at the beginning of the year, 1 latrine was constructed. The night-soil from public and private privies was, as usual, removed by means of air-tight iron carts to the depot and buried in trenches dug for the purpose and sold in due course for manuring purposes. There are

three rubbish and one night-soil depots in the town. The Vizianagram sewage filters, of which there were 38 in number, worked well during the year. Thirty rubbish carts were maintained at a cost of Rs. 1,800.

46. *Private Scavenging.*—The amount provided in the revised estimate was Rs. 1,450 under establishment, and Rs. 420 under contingencies, and the actual expenditure was Rs. 1,451 and Rs. 385 respectively. The small difference under Contingencies does not call for any explanation. The total cost of the private scavenging was Rs. 1,836, but the Municipality had collected Rs. 1,634–3–0 only, having thus worked the system at a loss of Rs. 202–3–0 in the year against a loss of Rs. 584–4–0 in the previous year. This shows some improvement however and the Council hopes to effect further improvement in the system in the course of the current year. In the beginning of the year there were 1,070 private latrines in the municipal register, 26 were added, and 96 removed in the course of the year. Thus at the close of the year, there were 1,000 privies under the municipal supervision.

47. *Epidemic Charges.*—A sum of Rs 1,000 was provided in the budget estimate, but in reviewing the revised estimate, the Government reduced it to Rs. 770, while the actual expenditure in the year amounted to Rs. 1,165–1–7. The excess in expenditure was due to the purchase of medicines, &c. There was no cholera in the year. The municipality maintains one Hospital Assistant on plague duty and 6 other servants, of whom one is an attendant upon the medical officer, another watches the segregation camp and the remaining 4 are watchmen at the burial and burning grounds employed under the recommendation of the District Medical and Sanitary officer to report cases of deaths of unusual nature.

48. *Contingencies.*—The sum provided in the revised estimate was utilised in providing tools, baskets and other contingencies to the conservancy establishment.

49. *Grant IV—Lighting.*—The amount spent in the year was Rs. 1,867–4–10 against Rs. 1,880 provided in the revised estimate. At the beginning of the year, there were 300 lamps to which 10 more were added in the year. There was no change in the establishment. The lighting of the town was supervised by a superintendent appointed for the purpose as well as by the out-door staff of the conservancy department.

50. *Markets.*—The municipality maintained a separate superintendent for all the markets and slaughter-houses for 5½ months in the year, when that office was abolished and the Chief Sanitary Inspector newly entertained then was required to attend to this duty also—*vide* Orders of Government No. 1392-M., Mis., dated 8th August 1898. The municipality has no market of its own, but the Samastanum maintains 4 markets in the town which are under the licensing control of the municipality. There is one sheep and one cattle slaughter-house belonging to the municipality.

51. *Choultries—Feeding the poor.*—As usual a sum of Rs. 174–9–0 was received as interest on Rs. 5,000 invested for feeding the poor during the Pongal by the late Sri P. Jagannadharaju Saheb, late Dewan of Vizianagaram Samastanam, in a Government Promissory note bearing interest at 3½ per cent. The municipality spent Rs. 175 towards that purpose in the year.

52. *Clock-Tower.*—The municipality maintains the clock-tower at an annual cost of Rs. 48 paid to the clock-winder.

53. *Public Gardens.*—There was no change in the establishment. The usual charge of contingencies amounted to Rs. 108–11–11. As was originally proposed in the budget, the work of completing the compound wall of the park was not taken up in the year as the Government have ordered that all such works should be stopped.

54. *Other Charges—Rewards for the Destruction of Dogs and Pigs.*—A sum of Rs. 287–14–0 was spent under this head as the destruction continued for a greater part of the year as directed by the Council.

55. *Stationery and Printing.*—The sum provided in the revised estimate was Rs. 400 and the expenditure was Rs. 517–8–1, the increase being due to the transfer of charges incurred on account of stationery from Grant V (ii) (*c*) to this head under the revised form of statement II.

Other items call for no remarks.

56. *Grant 5, General Establishment—Conveyance Allowance.*—A sum of Rupees 112–10–8 was spent towards the carriage allowance of the Chairman from September 1898 at the rate of Rs. 20 a month as sanctioned by Government in their order No. 80 M., Mis., dated 18th January 1899.

57. *Office Establishment.*—The sum provided in the revised estimate on account of the salary of a Secretary proposed to be appointed was not utilised as the appointment was not made in the year. Hence the decrease under this head.

Contingencies.—*Vide* remarks in paragraph 55 *supra.*

Collection of Tolls.—In the year under report the right of collecting tolls was kept under departmental management. The establishment scale was sanctioned by Government. The contingent charges did not exceed the revised estimate much.

The educational statements received from the Assistant Inspector of Schools are herewith forwarded.

General remarks.—I venture to think that on the whole the year's administration compares very favourably with that of last year. The collections are decidedly better. The instructions of Government as regards private scavenging, vital statistics, &c., have been attended to as far as practicable. There was no epidemic of any kind during the year. The office and other establishments have on the whole done their duty satisfactorily. The Assistant Accountant-General and the Inspector of Local Fund Accounts who audited the accounts * during the year, found the management of the office efficient.

* 1897-98

I was indisposed in the month of June, when I delegated my powers to M.R.Ry. K. Venkanna Pantulu Garu and hence the cause of delay in the submission of this report.

ENCLOSURE.

CONCISE Annual Report of His Highness The Maharaja's Hospital, Vizianagram, for the official year 1898–99.

1. *Public Health.*—The public health of the town during the year was good and there were no epidemics.

2. *Vital Statistics.*—These are registered by the municipality. One thousand and thirty-one births and 860 deaths were registered during the year against 886 and 865, respectively, in the previous year. Information regarding the number of cases reported to the Magistrate for failure to report these occurrences could not be obtained from the Municipal office. The population of the municipality is 29,180.

3. *Sanitation.*—Particular attention appears to be necessary to improve the sanitation of the town and its suburbs, as some of the outlying parts are not as clean as they might be.

Water-supply is as usual from tanks (which, in spite of the whole staff of watchers, are open to contamination), and some wells. Most of the water sources dry up in the hot weather, when the scarcity is badly felt by the public. The quality of water also is not very good, as most of the wells contain brackish water, and fresh water wells are very few and far between. The very first step, therefore, towards improvement of this town should be directed to drinking-water supply.

Drainage is very defective and requires improvement, as the drains allow the sewage to sink into the ground close by. Flushing does not appear to be carried on in such a way as to clean the drains thoroughly. The burning and burial place in the Kothapeta ward is quite close to a drinking-water tank, and there is the night-soil depot between that and another drinking-water tank. Much inconvenience is therefore caused to the people who get water from these sources.

The existence of a few large tanneries with foul effluvia emanating from the offensive process going on within, and from the decomposing animal and vegetable matter in stagnant pools and streams in and around them, just within the municipal limits, is another nuisance which requires correction.

The sanitary staff is under the municipal control. Information regarding that establishment, number of latrines and dust-bins could not be obtained from the Municipal office up to date.

There is a tiled slaughter-house for sheep and goats. The mutton available in the markets is of very inferior sort, as the system of examination of animals is somewhat defective owing to no measure being adopted to prevent the butchers from mixing up mutton of animals not passed by the Sanitary Inspector.

4. *Vaccination.*—This is compulsory. The municipal vaccinator, whose work is said to be verified by the Hospital Assistant in charge of the local police hospital, vaccinated 1,752 cases during the year, with 1,497 successful, 249 unsuccessful and 6 unknown. Of these, the number vaccinated under one year was 941, with 789 successful and 152 unsuccessful. The ratio of reported success of the total vaccinated is 85·45 against 98·3 in the previous year, showing that the quality of work was not quite so good. Infantile vaccination also showed a little retrogression, the total number of cases under one year successfully vaccinated being 789 or 27·04 per mille of the population against 845 or 28·9 in 1897–98.

5. *Hospitals and Dispensaries*—(*a*) *Nature and sufficiency of accommodation.*—The building has been designed and built for the purpose. Improvements are being made to prevent mingling of sexes in the out-patients' department.

There is accommodation for 12 male and 8 female in-patients.

(*b*) *State of repair of buildings.*—The wards have been repaired during the year. The dispensary is under repairs.

(*c*) *State of repair of furniture.*—Pretty good.

(*d*) *Inspections*—(i) *Steps taken to carry out the recommendations, if any, of the Surgeon-General with the Government of Madras.*—None, as the institution was not inspected by that officer.

(ii) *Steps taken to carry out the recommendations of other inspecting officers.*—The institution was inspected by the District Medical and Sanitary Officer, Vizagapatam, Captain W. Vickers, I.M.S., on the 13th August 1898. No recommendations were recorded in the Visitors' Book.

(*e*) *Amount of recoveries from parties who have been able to pay for their diets and medicines.*—*Nil*, as the institution is a wholly charitable one.

(*f*) *Number of patients treated as compared with previous years*—

Years.	Total treated.			Average daily attendance.		
	In-door.	Out-door.	Total.	In-door.	Out-door.	Total.
1894-95	150	12,435	12,585	Unknown.	.....	.....
1895-96	164	17,761	17,925			
1896-97	157	14,891	15,048			
1897-98	199	15,325	15,524			
1898-99	170	18,202	18,372	8·81	104·37	113·18

The number of in-patients treated during the year was 170 against 199 in the previous year. The decrease 29 might have been due to the wards having been under repairs for some time during the year.

18,202 out-patients were treated during the year against 15,325, showing an increase of 2,877, which may be said to be due to the growing popularity of the institution.

(*g*) *Mortality particularly with reference to septic diseases acquired in hospital.*—There were thirteen deaths among the in-patients during the year. No septic disease was acquired in hospital.

(*h*) *Operations and results.*—Five hundred and twenty-seven operations were performed during the year against 300 in the preceding one with the following results, 468 cured and 59 relieved.

(*i*) *Establishment, whether sufficient and efficient.*—The services of Civil Apothecary C. Mangayya Nayudu have been lent to the Vizianagram Samasthanam and placed at the disposal of the Collector and guardian. He has been in charge of the institution from the 18th October 1898. The establishment is sufficient and efficient.

(*j*) *Midwife—Work actually done.*—The municipal midwife, who is under the control of the Chairman, attended 134 cases against 118 in the previous year, showing an increase of 16, but the number is still too small when compared with the number of births registered 1,031. Her work is said to be inspected by the Chairman.

(*k*) *If Dufferin Fund Dispensaries* for woman who cannot, and will not, attend the ordinary dispensaries have been working, there is a dispensary for woman and children in the town in charge of female Apothecary Miss S. Cabral, but as the institution is closed just now, information regarding its working is not available.

(*l*) *General Remarks.*—The hospital is maintained entirely from the Samasthanam funds of His Highness the Maharaja of Vizianagram.

Balance	91	400	2,300	1,909

2. Twenty-three meetings were held by the Municipal Council against 26 in the previous year and five others were adjourned for want of a quorum against two in that year. The average attendance of the official members improved and was fair, while that of the non-officials declined and was indifferent. Nine seats were filled by election during the year, and of these six were contested; but owing to certain discrepancies in the number of registered voters given in statement X-A, an explanation of which has been called for in a separate memorandum, the proportion of those who exercised the privilege to the total number cannot be ascertained.

3. *Receipts.*—(1) The net current demand under the tax on buildings rose from Rs. 10,914 to Rs. 10,982, but that under the tax on arts showed a decrease of Rs. 204 for which no explanation has been offered. This omission should now be supplied. The demand under the tax on lands, however, remained unaltered. From the note to statement I it is observed that [illegible] of the taxes on houses and lands are now four years old. *Results.*—Five hundred and twenty-seven against 300 in that the registers of the taxes on operations are revised in the current year. The assessments under these taxes should therefore be read and brought [illegible] *Establishment.* shortly, so that under section 66 (3) of the Act the revised assessments may be brought into force from the beginning of the next year, and the result of this revision posal of the [illegible] October be reported to Government as soon as it is completed.

(2) The current collections under the taxes on arts and lands improved and were, on the whole, good; but those under the house-tax declined and were indifferent. The arrear realizations under all these heads were very poor; but about three-fourths of the demand under the tax on arts and more than one-half of that under the tax on buildings were written off the accounts as irrecoverable in the circumstances explained in paragraphs 7 and 8 of the Chairman's report, and the whole of the balance under the land-tax was similarly dealt with. No pains should be spared to adjust the balances still outstanding under the two former heads as soon as possible.

(3) There was an increase in the receipts under tolls, but the income from the tax on animals and slaughter-house fees showed a decline for which no adequate explanation has been offered.

(4) The number of houses served by the private scavenging agency fell from 1,070 to 1,000; but the fees levied on this account amounted to Rs. 1,634 against Rs. 1,296 in the previous year and the service was worked at a loss of Rs. 202 to the Municipal Council against Rs. 585. The Government is glad to learn from paragraph 27 of the Chairman's report that the system of collecting the fees in advance was introduced. Early steps should be taken to adjust the outstanding balance of Rs. 526 under this head and vigorous measures should be adopted to extend the service in the current year, for which there is considerable scope as pointed out in paragraph 3 (4) of G.O., No. 1510 M., dated 25th August 1898.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 3,188 or 30·7 per cent. of the net municipal income from tolls against the minimum of 50 per cent. prescribed by Government. But the short expenditure was due to the fact that a large amount had to be reserved for plague charges. Again the Revenue Divisional-Officer has not reported on the condition of the roads. This information should invariably be furnished in future. It should be explained why the Public Works Overseer maintains a cart instead of a pony for which he draws an allowance of Rs. 10.

(2) *Education.*—The net expenditure on education amounted to Rs. 3,840 or 13·6 per cent. of the receipts from taxation and the whole of this sum was spent on primary education. As in the previous year, the Municipal Council maintained three primary schools on the salary-result system, one of which was for Muhammadans and another for Panchamas; but the number of primary schools aided with result grants was 26 against 22 in 1897–98. The attendance at the municipal and aided schools improved, the results of the departmental and grant examinations continued to be good and the allotment for result grants was exceeded by 21·5 per cent., the excess being due to the payment of the arrears of grant due for the previous year. The total number of boys under instruction in the municipal and aided schools rose from 1,149 to 1,232 or 55·2 per cent. of the male population of school-going age; but it was still below the general average of 61·8 per cent. for Municipalities in 1897–98.

(3) *Medical Relief.*—The Municipal Council maintained no hospital of its own and medical relief was supplied by the Maharaja's hospital. From the Civil Apothecary's report on the working of this institution, it is observed that there was a large increase in the number of out-patients treated at this institution, which is attributed to its growing popularity, while that of in-patients showed a decrease of 29. It is satisfactory to note that the midwife employed by the Municipal Council attended 134 cases of labour against 167, the number attended by two midwives in 1897–98.

(4) *Vaccination and Vital Statistics.*—The total number of vaccinations performed during the year rose from 1,526 to 1,752; but the quality of the work greatly deteriorated, the percentage of reported success being 85·4 against 98·3 in the previous year. This result is ascribed by the Chairman to the fact that the lanoline paste supplied from the vaccine depôt at Bangalore proved a failure during the hot weather. Infantile vaccination showed a further retrogression, the number of children under one year successfully vaccinated being 789 or 27·0 per mille of the population against 845 or 28·9 per mille in 1897–98. The Municipal Council should devote its special attention to this subject in the current year.

The number of births registered during the year rose from 886 or 30·4 per mille of the population to 1,031 or 35·3 per mille, while that of deaths declined slightly, being 29·4 per mille against 29·6 in the previous year. The returns in both cases cannot be regarded as trustworthy, the rates recorded being much below the normal. Increased attention should be paid to the registration of vital statistics in the current year.

(5) *Sanitation.*—The expenditure of Rs. 10,144 under this head exceeded the sanctioned allotment by 3·2 per cent. and amounted to 31·7 per cent. of the current receipts. From paragraph 45 of the Chairman's report, it appears that some attention was paid to the sanitation of the town; but paragraph 3 of the medical report shows

that much yet remains to be done in this direction. The Government trusts that no pains will be spared to remedy the defects pointed out in this report as funds become available.

5. *General Remarks.*—The year closed with a balance of Rs. 1,909 or 6·0 per cent. of the current receipts.

The administration of the Municipality during the year under review showed an improvement on that of the previous year in some respects; but it cannot still be regarded as efficient. The collection of taxes was not satisfactory; the private scavenging system made no progress; infantile vaccination showed a retrogression; and the registration of vital statistics was defective. The Government however trusts that the Municipal Council will do its best to show a decided improvement in these respects in the current year.

SEPTEMBER.

Administration Report.

Reviewing the — of the Vizanagram Municipal Council for 1898-99.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. V. VENKATARAYA SASTRI GARU, Chairman, Municipal Council, Vizianagram, to the Secretary to Government, Local and Municipal Department, dated Vizianagram, 10th July 1899, No. 439.

Statements I, I-A, II, II-A, II-B, III, IV-A, IV-B, Appendices A and B to statements IV-A and IV-B, V-A, V-B, VII, VIII, IX, IX-A, X, X-A, XI, XII, XIII, XIV and XV.

I have the honour to submit herewith the report on the administration of the Vizianagram Municipality for the official year 1898–99, together with the prescribed statements noted in the margin.

2. The municipality continued to be administered during the year under Madras Act IV of 1884 as amended by Act III of 1897.

3. Mr. E. B. Elwin, Divisional officer, held the office of Chairman from the beginning of the official year until September, when I assumed charge of the office as nominated Chairman.

4. The sanctioned strength of the Council is sixteen, consisting of four nominated and twelve elected members.

5. During the year under report, the Council met 23 times against 26 in the previous year. Five meetings were dissolved for want of quorum. The average attendance at each meeting actually held was 7·913.

I.—RECEIPTS.

6. The year opened with a balance of Rs. 91–6–3 and the receipts under all heads during the year amounted to Rs. 32,035–13–4, making in all Rs. 32,127–3–7 against Rs. 30,619–12–5 of the preceding year, thus showing an increase of Rs. 1,507–7–2 in the collections of the year under report. They, however, fall short of the revised estimate by Rs. 442–12–5, the causes of which will be explained below.

7. *Tax on Arts.*—This tax, as usual, was levied on all classes in the schedule. The current demand was Rs. 3,348 as finally settled by the Council, of which Rs. 3,149–8–0 were collected against Rs. 2,850–8–0 of the previous year collected out of a demand of Rs. 3,552. It will be seen from the above figures that, of the whole demand, only Rs. 198–8–0 were left uncollected which will shortly be adjusted. Of the arrear demand of Rs. 2,230–5–3 outstanding from the year 1894–95, a sum of Rs. 397–3–3 only was collected, Rs. 6 remitted and Rs. 1,678–10–0 were written off as irrecoverable after a careful scrutiny by the Council. The total collections in the year under this head were Rs. 3,546–11–3 against Rs. 3,273–15–3 in the preceding year. The amount outstanding under current and arrear demands was only Rs. 347 which will shortly be adjusted. It may be noticed from the above that during this year an unusually large amount was written off as irrecoverable, but I beg to submit that this was done out of arrears

demand outstanding for the past five years and upwards. The Council should have written off much of this amount long ago, but they were reluctant to do so and to lower the demand until they were better satisfied that they could not be collected.

8. *Tax on Buildings.*—The rate at which this tax was levied in the year was, as usual, $7\frac{1}{2}$ per cent. of the annual rent value. The house-tax registers were last revised in 1895–96. The current demand under this head was Rs. 10,991–2–0, out of which a sum of Rs. 9,056–3–0 was collected, Rs. 8–14–0 remitted by the Council on appeal and Rs. 3–4–0 remitted on account of vacant houses, leaving a balance of Rs. 1,922–13–0. The arrear demand outstanding at the beginning of the year was Rs. 3,508–4–6, of which a sum of Rs. 489–12–0 was collected and a sum of Rs. 1,846 was written off as irrecoverable after careful enquiries being made by the Council. These items were adjusted by the *ex-officio* Chairman, Mr. E. B. Elwin, Principal Assistant Collector. The amount left under balance was Rs. 1,172–8–6 which will shortly be disposed of. The Council have at last seen that there is no use of retaining these figures in the demand and resolved to write off after a careful scrutiny all the uncollectable arrears. The Council hopes to take steps in future to collect in each year every pie out of the current demand and deal with the arrears at the end of each year as they deserve, instead of allowing them to outstand for so long a time as has been usual. I beg to state, in this connection, that in the house-tax registers there are items amounting to upwards of Rs. 700 which are not at all collectable. They are therefore kept under uncollected demand and are written off as irrecoverable balances once in two or three years. These items are appertaining to thatched and other houses belonging to the poorer classes of Panchamas, Muhammadans, weavers, Bondilies and a few agriculturists. These houses are situated in Relligudem, Thurakagudem, Bondiligudem, Lunkavidhi and Sunkara street, and are assessed at 7 or 8 annas each, the annual rent having been estimated to be Rs. 6 or a little above according to measurements. It has been found very difficult to issue even notices of demand and more so to execute distress warrants upon these people and the bills are therefore retained outstanding as very often no property could be found to satisfy the demand. It is proposed to remove these items altogether in the next revision of house-tax and thus save much time and unnecessary labour. This explains the large arrears and the necessity for writing off large amounts occasionally.

9. *Tax on Lands.*—The current demand was Rs. 104–2–0 and the collections amounted to Rs. 94–10–0, leaving a balance of Rs. 9–8–0, while the arrear collections amounted to Rs. 9 out of the arrear demand of Rs. 40–10–0, leaving a sum of Rs. 31–10–0 which was written off as irrecoverable.

10. *Tax on Vechicles, Animals and Carts.*—These taxes were levied at the maximum schedule rates. There was an increase under each head in the collection of these taxes in the year over the figures adopted in the revised estimate for the year.

11. *Coercive Processes.*—Appendix A to statements IV-A and IV-B shows the number of warrants remaining unexecuted at the close of the previous year and those that were executed during the year. In four cases property was attached and seized and in one case property was sold and the sale-proceeds credited in satisfaction of the amount due.

12. The right of collecting tolls was kept under amani management as no contractor offered a reasonably sufficient price. Not more than Rs. 10,000 were offered by the bidders at the auction sale. The Council would have sold it for Rs. 11,000 if the highest bidder offered that amount ; but as no such offer came though the sale was adjourned to more than one meeting, the Council resolved to keep it, therefore, under amani as an experiment in order that they may have an approximate idea of the real income under the head, so as to serve as a guide to them in the sales of subsequent years. The Council realized a net increase of Rs. 2,410–7–10 under this head during the year under report, and the Council was really benefited by the experiment since the tolls in the current year were sold for Rs. 14,055. The District Board's share was paid during the year, except a sum of Rs. 223–4–2 kept back for adjustment, which was also paid later on in June 1899.

13. *Incidence of Taxation.*—The total actual income from taxation including tolls was Rs. 28,179–12–1 against Rs. 26,237–2–0 in the previous year and excluding tolls it was Rs. 16,580–8–3 against Rs. 17,048–6–0. The population of the town according to the census returns of 1891 is 29,180; the incidence per head, tolls being included was Rs. 0–15–6 against Rs. 0–14–4 of last year, and tolls being excluded was Rs. 0–9–1 as against Rs. 0–9–4 in the previous year.

14. *Realisation under Special Acts—Fees under Act II of* 1888.—The amount realised under this head was only Rs. 20. No dramatic companies on a large scale visited the town during the year. The amount realised under the head was the fees levied from two small local amateur companies.

15. *Rent of Lands.*—This small sum was collected as quit-rent from the occupiers of municipal ground as sanctioned by Government.

16. *Sale-proceeds of Land.*—The amount realised under this head was Rs. 50 which is the value of an old municipal blind road that was sold to one G. Baulakristnamma as sanctioned by Government.

17. *Produce of Lands and Gardens.*—The park fields were leased out for cutting grass during the year for Rs. 400 which was collected and Rs. 10–15–6 realised from the sale of vegetables grown in the park.

18. *Sale-proceeds of Old Materials*—There was a large stock of old and unserviceable materials and other articles which was sold at the public auction. The amount collected by sale was Rs. 45–1–9.

19. *Conservancy Receipts—Sale-proceeds of Night-soil, Street Sweepings, &c.*—There was no competition in the year at the auction sale and hence the decrease under this head.

20. 4 (*c*) (*i*) *and* (*ii*).—The income from municipal schools and library was almost the same as in the previous year.

21. *Income from Slaughter-houses.*—The municipality owns two slaughter-houses—one for sheep and the other for bullocks. The highest bid at the auction sale was Rs. 650 which was fully collected.

22. *Warrant and Distraint Fees.*—The demand under this head was Rs. 162–2–0 and the collections amounted to Rs. 51–9–0.

23. *License Fees.*—There was a small increase in the revenue under this head which calls for no special explanation.

24 *Fines under Municipal and other Acts.*—There was a large decrease under this head. In the previous year, certain serious cases of encroachment were filed before the Principal Assistant Magistrate and the offenders were dealt with by the Magistrate as they deserved. Hence the increase in that year; but as no such cases occurred during the year under report, there was a decrease under this head. The municipality filed 66 cases of prosecution in the Bench Court during the year 1898–99.

25. 4 (*h*) (*i*).—This was the amount received from the Accountant-General as interest at 3½ per cent. on Government promissory note of 1865 for Rs. 5,000 invested by the late Rai Bahadur Sri P. Jagannadharaju Saheb, Dewan of Vizianagram Samastanam for feeding the poor during Pongal.

26. *Grants and Contributions—(a) From Government.*—This is the amount contributed from Provincial funds towards the maintenance of the gymnasium during the year 1898–99.

27. *Private Scavenging Fees.*—The current year's demand under this head was Rs. 1,731–6–0 and the collection was Rs. 1,533–8–6. The balance left uncollected in the year was only Rs. 197–13–6. The system of advance collections was worked in the year with great vigour. Of the arrear demand of Rs. 1,639–11–6, Rs. 100–10–6 was collected and Rs. 1,211, outstanding since 1892–93, was written off the accounts as irrecoverable. The current and the arrear balances will soon be adjusted. I beg to bring to the notice of Government the fact that much work was done by

way of improving the private scavenging system in the year. The number of private latrines under the municipal control during the year was 1,000.

II.—EXPENDITURE.

28. *Grant I, Public Works.*—The total expenditure under Grant I amounted to Rs. 7,401–10–4 against a sum of Rs. 7,430 provided in the revised estimate and Rs. 8,500 in the budget estimate of the year. Under the orders of Government, the expenditure under this grant was reduced as only urgent works were taken on hand.

(*a*) *New Works.—Communications.*—No important works were executed in the year. Rs. 71–14–0 only were spent on petty construction of road culverts.

(*b*) *Buildings.*—The accommodation in the sheep slaughter-house having been reported to be insufficient, the Council proposed to improve it by building a masonry platform at a cost of Rs. 260–6–2.

At the recommendation of the Sanitary Commissioner an iron latrine, the materials of which were purchased previously, was put up and a masonry basement to it was constructed in the year in the fish market in place of an old masonry enclosure at a cost of Rs. 380–6–6.

A sum of Rs. 65–8–6 was spent in providing enclosures and lining fence to the burial grounds at Buchanna's tank, Nallacheruvu and in Gurachari tope.

(*c*) *Drainage.*—Rs. 117–2–1 was spent for the construction of a masonry side drain in Peketivari street which was very faulty in its levels. Rs. 91–14–8 was spent in constructing a drain in hospital road. Other works do not deserve separate mention in the report.

(*d*) *Water-supply.*—On the recommendation of the Sanitary Commissioner an iron pump was purchased at a cost of Rs. 144–3–10 to be fixed to the public well at Dasannapeta which was recently constructed by the Council.

29. *Repairs*—(*a*) *Communications.*—The total mileage of roads, streets and lanes in the town is 42 of which 30 are metalled and gravelled, and 12 gravelled only. The total length of roads maintained in the year was 20½ miles. The main roads were repaired at a cost of Rs. 1,465–7–0. Twelve of the principal roads in the kaspa division were repaired at a cost of Rs. 501–3–10 and nine of Santapeta and three of Kottapeta and Hukumpeta were also put in order at a cost of Rs. 353–15–1 and Rs. 204–5–7 besides some petty roads at Rs. 231–1–1. The permanent staff of road coolies have also done good work in making patch works of roads wherever required in the town. The details of road works executed are shown in statement II-A.

(*b*) *Buildings.*—No repairs of any important nature were made in the year except those of municipal choultries which were retiled and repaired at a cost of Rs. 35–6–10.

(*c*) *Drainage.*—Petty repairs to drains were made at a cost of Rs. 63–13–9.

30. *Establishment.*—Statement III-B gives the details of establishment for flushing the drains. Drains are cleaned and flushed by the drain-cleaners twice a week. There was no change in the establishment.

31. *Water-supply—Establishment.*—There are six tanks and fourteen wells for the supply of drinking water to the townspeople. There were eleven watchmen employed for watching the tanks and wells. The cost of this establishment was Rs. 407.

32. *Public Works Establishment.*—There was no change in the establishment under this head. There was one overseer on Rs. 30 + 10 allowance and two maistries on Rs. 10 each. I beg to state that an allowance of Rs. 10 was sanctioned by Government as pony allowance to the overseer who now maintains a cart instead of pony. The Inspector of Local Fund Accounts in his recent audit took objection to this course and asked the Council to obtain sanction of Government for a cart allowance instead of pony allowance. Sanction is therefore solicited for the cart allowance accordingly.

33. *Tools and Plant.*—The amount spent for the purchase of tools was Rs. 235-10-10 against Rs. 180 provided in the revised estimate.

34. *Grant II, Education.*—The amount provided in the revised estimate under this grant was Rs. 3,800.

35. *Salary Result System Schools.*—The municipality as in the previous year had three schools under the system—a school for Muhammadan boys, another for Panchamas and a third called the night school for the labouring classes. In each of these schools education is imparted up to the fourth standard. Statement V-A gives in detail their strength and average attendance. The Muhammadan school presented 43 boys, of whom 31 passed against 45 presented and 20 passed in the previous year. Five boys appeared for the primary school examination, of whom two passed. The night school and the Pariah school have each one trained teacher. The former sent up three, of whom one passed, while the latter sent up none for the primary examination. Compared with the results of tne previous year, the work turned out in the Muhammadan and the Pariah schools cannot be considered to be satisfactory. Grants were paid at half the rates to these salary result system schools.

Fees were levied at the same rates as in the previous year in the Muhammadan school. No fees were collected either in the Pariah or in the night school.

36. *Result Grants.*—The amount provided in the revised estimate was Rs. 2,200, but the sum actually spent was Rs. 2,430-5-0. The excess in expenditure was due to the payment in the current year of the arrear grant for 1897-98 to the Hindu Ripon Primary school and the Hindustani school. The grants for 1898-99 were paid to all the schools within the close of the year. The number of schools at the beginning of the year was 22, the number opened in the year was 4 and the number at the close of the year was therefore 26 schools. The qualifications of the teachers were improved, a teacher in each of the Raja Bazaar school, the Ripon Hindu Primary school and the Ripon Town school, Santapeta having obtained trained teachers' certificates. The number of pupils receiving instruction in the municipal and aided schools was 1,371, of which 1,232 were boys and 139 were girls.

37. *Gymnastic Instruction.*—The municipality maintains a gymnasium at a cost of Rs. 232-5-6, of which Rs. 66 were contributed from Provincial funds. There is one trained gymnastic teacher on Rs. 12 and a peon attached to it at Rs. 5. The number of boys that received instruction was 1,260 and their average attendance was 1,193.

38. *General Drawing.*—In the year under report the municipality introduced a drawing class for the schools under its management. A qualified drawing master was appointed on a salary of Rs. 15 per mensem from the 3rd May 1898. The number of teachers under instruction was 34 and that of boys 514. The average attendance of teachers was 2 and that of boys 22.

39. *Building and Furniture Grant.*- The amount provided in the revised estimate was Rs. 200 and the actual expenditure was Rs. 161-2-8.

40. *Inspection.* The municipal Inspecting schoolmaster inspected on an average 40 schools in a month. I agree with the Assistant Inspector of Schools who speaks well of his work.

41. *Grant III, Medical and Sanitation.* The total expenditure under this grant was Rs. 11,074-6-6 against Rs. 10,960 provided in the revised estimate and against Rs. 10,349-5-11, the actuals in the previous year.

42. *Hospitals and Dispensaries—Establishment.*—In the year there was only one midwife employed by the municipality who was trained in the Lying-in Hospital, Madras, and possesses a training certificate. She attended only 127 delivery cases and 7 other cases. Her work during the year was better than that of the previous year, but there is much room for improvement as the number of births reported to have occurred was so many as 1,031. During the first half of the year she attended only 20 cases and on severe notice having been taken of her conduct then, she began

to pay greater attention to her work, with the result that she attended more than a hundred cases in the second half of the year. It is hoped that she will show better results at the end of the current year.

The municipality owns no hospital or dispensary, but the Samastanam maintains one, the annual concise report of which institution is herewith forwarded.

43. *Vaccination.*—The municipality has in its service a first-class vaccinator. He operated 1,752 cases, of which 1,497 were successful, 249 unsuccessful and 6 unknown. There were 63 cases prosecuted in the year for failure to get children vaccinated. Number vaccinated under one year was 941, of which 789 were successful and 152 unsucessful, which was partly due to the lanoline paste supplied from the vaccine depot at Bangalore, which proved a failure during the hot weather. Number of notices issued to parties under section 138 was 746 and the number of complaints lodged before the Magistrate was 63. Number of persons that produced their children for vaccination under the Magistrate's order was 60. The vaccination work was under the supervision of the Hospital Assistant in charge of the Police Hospital who [illegible] also a councillor. He verified 715 cases during the year. The vaccinator is paid at the rate of two annas per each successful case vaccinated by him over and above 80 cases a month. He had to be paid accordingly a reward of Rs. 125-12-0 during the year. The cost of lymph and other charges relating to vaccination was Rs. 59-3-0. The average cost of each successful case was Rs. 0-3-11 against Rs. 0-2-9 in the previous year.

44. *Vital Statistics.*—The number of births registered during the year was 1,031 against 886 and that of deaths was 860 against 865 in the previous year.

The various causes of mortality are as compared below :—

	1897-98.	1898-99.
Cholera	56	...
Small-pox	5	3
Fevers	302	346
Bowel complaints	137	154
Other causes	365	357
Total ...	865	860

The population of the municipality according to the census of 1891 is 29,180 and the birth-rate per mille in the year was 35·332, while the death-rate was 29 547. There were no epidemics and the public health was good throughout the year. The municipality is divided into two divisions for registration purposes, each of which is kept under the charge a registrar. The Conservancy Inspectors go about and find out cases of birth and death ; and the registrars are also directed to go out into their divisions to check the reports received by them. Their work in the year was satisfactory. There were 35 cases of prosecutions for failure to report the occurrences of births. Owing to the severe fines imposed by the Magistrates, the parties have learnt to report the occurrences of births and deaths themselves to the Municipal office and hence the increase in the birth-rate.

45. *Conservancy.—Road-cleaning and road-watering.*—The amount provided in the revised estimate was Rs. 10,110 and the amount actually spent was Rs. 10,144-3-6.

Conservancy Establishment.—Statement II-B shows the details of establishment. In August 1898, a certificated man was appointed as Chief Sanitary Inspector of the Municipality. The sanitary condition of the town may be said to have been fairly satisfactory. The number of prosecutions for infringing the municipal laws was 66 and the fines collected amounted to Rs. 94. The number of dust-bins made in the year were 105, of which 82 were substituted for old ones found useless. The municipality had in all 357 dust-bins, of which 9 are of corrugated zinc, 322 iron, and 26 masonry. There were 29 public latrines at the beginning of the year, 1 latrine was constructed. The night-soil from public and private privies was, as usual, removed by means of air-tight iron carts to the depot and buried in trenches dug for the purpose and sold in due course for manuring purposes. There are

three rubbish and one night-soil depots in the town. The Vizianagram sewage filters, of which there were 38 in number, worked well during the year. Thirty rubbish carts were maintained at a cost of Rs. 1,800.

46. *Private Scavenging.*—The amount provided in the revised estimate was Rs. 1,450 under establishment, and Rs 420 under contingencies, and the actual expenditure was Rs. 1,451 and Rs. 385 respectively. The small difference under Contingencies does not call for any explanation. The total cost of the private scavenging was Rs. 1,836, but the Municipality had collected Rs. 1,634–3–0 only, having thus worked the system at a loss of Rs. 202–3–0 in the year against a loss of Rs. 584–4–0 in the previous year. This shows some improvement however and the Council hopes to effect further improvement in the system in the course of the current year. In the beginning of the year there were 1,070 private latrines in the municipal register, 26 were added, and 96 removed in the course of the year. Thus at the close of the year, there were 1,000 privies under the municipal supervision.

47. *Epidemic Charges.*—A sum of Rs 1,000 was provided in the budget estimate, but in reviewing the revised estimate, the Government reduced it to Rs. 770, while the actual expenditure in the year amounted to Rs. 1,165–1–7. The excess in expenditure was due to the purchase of medicines, &c. There was no cholera in the year. The municipality maintains one Hospital Assistant on plague duty and 6 other servants, of whom one is an attendant upon the medical officer, another watches the segregation camp and the remaining 4 are watchmen at the burial and burning grounds employed under the recommendation of the District Medical and Sanitary officer to report cases of deaths of unusual nature.

48. *Contingencies.*—The sum provided in the revised estimate was utilised in providing tools, baskets and other contingencies to the conservancy establishment.

49. *Grant IV—Lighting.*—The amount spent in the year was Rs. 1,867–4–10 against Rs. 1,880 provided in the revised estimate. At the beginning of the year, there were 300 lamps to which 10 more were added in the year. There was no change in the establishment. The lighting of the town was supervised by a superintendent appointed for the purpose as well as by the out-door staff of the conservancy department.

50. *Markets.*—The municipality maintained a separate superintendent for all the markets and slaughter-houses for 5½ months in the year, when that office was abolished and the Chief Sanitary Inspector newly entertained then was required to attend to this duty also—*vide* Orders of Government No. 1392-M., Mis., dated 8th August 1898. The municipality has no market of its own, but the Samastanum maintains 4 markets in the town which are under the licensing control of the municipality. There is one sheep and one cattle slaughter-house belonging to the municipality.

51. *Choultries—Feeding the poor.*—As usual a sum of Rs. 174–9–0 was received as interest on Rs. 5,000 invested for feeding the poor during the Pongal by the late Sri P. Jagannadharaju Saheb, late Dewan of Vizianagaram Samastanam, in a Government Promissory note bearing interest at 3½ per cent. The municipality spent Rs. 175 towards that purpose in the year.

52. *Clock-Tower.*—The municipality maintains the clock-tower at an annual cost of Rs. 48 paid to the clock-winder.

53. *Public Gardens.*—There was no change in the establishment. The usual charge of contingencies amounted to Rs. 108–11–11. As was originally proposed in the budget, the work of completing the compound wall of the park was not taken up in the year as the Government have ordered that all such works should be stopped.

54. *Other Charges—Rewards for the Destruction of Dogs and Pigs.*—A sum of Rs. 287–14–0 was spent under this head as the destruction continued for a greater part of the year as directed by the Council.

55. *Stationery and Printing.*—The sum provided in the revised estimate was Rs. 400 and the expenditure was Rs. 517–8–1, the increase being due to the transfer of charges incurred on account of stationery from Grant V (ii) (*c*) to this head under the revised form of statement II.

Other items call for no remarks.

56. *Grant 5, General Establishment—Conveyance Allowance.*—A sum of Rupees 112–10–8 was spent towards the carriage allowance of the Chairman from September 1898 at the rate of Rs. 20 a month as sanctioned by Government in their order No. 80 M., Mis., dated 18th January 1899.

57. *Office Establishment.*—The sum provided in the revised estimate on account of the salary of a Secretary proposed to be appointed was not utilised as the appointment was not made in the year. Hence the decrease under this head.

Contingencies.—*Vide* remarks in paragraph 55 *supra.*

Collection of Tolls.—In the year under report the right of collecting tolls was kept under departmental management. The establishment scale was sanctioned by Government. The contingent charges did not exceed the revised estimate much.

The educational statements received from the Assistant Inspector of Schools are herewith forwarded.

General remarks.—I venture to think that on the whole the year's administration compares very favourably with that of last year. The collections are decidedly better. The instructions of Government as regards private scavenging, vital statistics, &c., have been attended to as far as practicable. There was no epidemic of any kind during the year. The office and other establishments have on the whole done their duty satisfactorily. The Assistant Accountant-General and the Inspector of Local Fund Accounts who audited the accounts * during the year, found the management of the office efficient.

*1897–98

I was indisposed in the month of June, when I delegated my powers to M.R.Ry. K. Venkanna Pantulu Garu and hence the cause of delay in the submission of this report.

Enclosure.

Concise Annual Report of His Highness The Maharaja's Hospital, Vizianagram, for the official year 1898–99.

1. *Public Health.*—The public health of the town during the year was good and there were no epidemics.

2. *Vital Statistics.*—These are registered by the municipality. One thousand and thirty-one births and 860 deaths were registered during the year against 886 and 865, respectively, in the previous year. Information regarding the number of cases reported to the Magistrate for failure to report these occurrences could not be obtained from the Municipal office. The population of the municipality is 29,180.

3. *Sanitation.*—Particular attention appears to be necessary to improve the sanitation of the town and its suburbs, as some of the outlying parts are not as clean as they might be.

Water-supply is as usual from tanks (which, in spite of the whole staff of watchers, are open to contamination), and some wells. Most of the water sources dry up in the hot weather, when the scarcity is badly felt by the public. The quality of water also is not very good, as most of the wells contain brackish water, and fresh water wells are very few and far between. The very first step, therefore, towards improvement of this town should be directed to drinking-water supply.

Drainage is very defective and requires improvement, as the drains allow the sewage to sink into the ground close by. Flushing does not appear to be carried on in such a way as to clean the drains thoroughly. The burning and burial place in the Kothapeta ward is quite close to a drinking-water tank, and there is the night-soil depot between that and another drinking-water tank. Much inconvenience is therefore caused to the people who get water from these sources.

The existence of a few large tanneries with foul effluvia emanating from the offensive process going on within, and from the decomposing animal and vegetable matter in stagnant pools and streams in and around them, just within the municipal limits, is another nuisance which requires correction.

The sanitary staff is under the municipal control. Information regarding that establishment, number of latrines and dust-bins could not be obtained from the Municipal office up to date.

There is a tiled slaughter-house for sheep and goats. The mutton available in the markets is of very inferior sort, as the system of examination of animals is somewhat defective owing to no measure being adopted to prevent the butchers from mixing up mutton of animals not passed by the Sanitary Inspector.

4. *Vaccination.*—This is compulsory. The municipal vaccinator, whose work is said to be verified by the Hospital Assistant in charge of the local police hospital, vaccinated 1,752 cases during the year, with 1,497 successful, 249 unsuccessful and 6 unknown. Of these, the number vaccinated under one year was 941, with 789 successful and 152 unsuccessful. The ratio of reported success of the total vaccinated is 85·45 against 98·3 in the previous year, showing that the quality of work was not quite so good. Infantile vaccination also showed a little retrogression, the total number of cases under one year successfully vaccinated being 789 or 27·04 per mille of the population against 845 or 28·9 in 1897–98.

5. *Hospitals and Dispensaries—(a) Nature and sufficiency of accommodation.*—The building has been designed and built for the purpose. Improvements are being made to prevent mingling of sexes in the out-patients' department.

There is accommodation for 12 male and 8 female in-patients.

(*b*) *State of repair of buildings.*—The wards have been repaired during the year. The dispensary is under repairs.

(*c*) *State of repair of furniture.*—Pretty good.

(*d*) *Inspections*—(i) *Steps taken to carry out the recommendations, if any, of the Surgeon-General with the Government of Madras.*—None, as the institution was not inspected by that officer.

(ii) *Steps taken to carry out the recommendations of other inspecting officers.*—The institution was inspected by the District Medical and Sanitary Officer, Vizagapatam, Captain W. Vickers, I.M.S., on the 13th August 1898. No recommendations were recorded in the Visitors' Book.

(*e*) *Amount of recoveries from parties who have been able to pay for their diets and medicines.*—*Nil*, as the institution is a wholly charitable one.

(*f*) *Number of patients treated as compared with previous years*—

Years.	Total treated.			Average daily attendance.		
	In-door.	Out-door.	Total.	In-door.	Out-door.	Total.
1894–95	150	12,435	12,585	Unknown.	.....	.....
1895–96	164	17,761	17,925			
1896–97	157	14,891	15,048			
1897–98	199	15,325	15,524			
1898–99	170	18,202	18,372	8·81	104·37	113·18

The number of in-patients treated during the year was 170 against 199 in the previous year. The decrease 29 might have been due to the wards having been under repairs for some time during the year.

18,202 out-patients were treated during the year against 15,325, showing an increase of 2,877, which may be said to be due to the growing popularity of the institution.

(*g*) *Mortality particularly with reference to septic diseases acquired in hospital.*—There were thirteen deaths among the in-patients during the year. No septic disease was acquired in hospital.

(*h*) *Operations and results.*—Five hundred and twenty-seven operations were performed during the year against 300 in the preceding one with the following results, 468 cured and 59 relieved.

(*i*) *Establishment, whether sufficient and efficient.*—The services of Civil Apothecary C. Mangayya Nayudu have been lent to the Vizianagram Samasthanam and placed at the disposal of the Collector and guardian. He has been in charge of the institution from the 18th October 1898. The establishment is sufficient and efficient.

(*j*) *Midwife—Work actually done.*—The municipal midwife, who is under the control of the Chairman, attended 134 cases against 118 in the previous year, showing an increase of 16, but the number is still too small when compared with the number of births registered 1,031. Her work is said to be inspected by the Chairman.

(*k*) *If Dufferin Fund Dispensaries* for woman who cannot, and will not, attend the ordinary dispensaries have been working, there is a dispensary for woman and children in the town in charge of female Apothecary Miss S. Cabral, but as the institution is closed just now, information regarding its working is not available.

(*l*) *General Remarks.*—The hospital is maintained entirely from the Samasthanam funds of His Highness the Maharaja of Vizianagram.

VIZIANAGRAM,

2. Twenty-three meetings were held by the Municipal Council against 26 in the previous year, and five others were adjourned for want of a quorum against two in that year. The average attendance of the official members improved and was fair, while that of the non-officials declined and was indifferent. Nine seats were filled by election during the year, and of these six were contested; but owing to certain discrepancies in the number of registered voters given in statement X-A, an explanation of which has been called for in a separate memorandum, the proportion of those who exercised the privilege to the total number cannot be ascertained.

3. *Receipts.*—(1) The net current demand under the tax on buildings rose from Rs. 10,914 to Rs. 10,982, but that under the tax on arts showed a decrease of Rs. 204 for which no explanation has been offered. This omission should now be supplied. The demand under the tax on lands, however, remained unaltered. From the note to statement I it is observed that the registers of the taxes on houses and lands are now four years old. The assessments under these taxes should therefore be revised in the current year, so that under section 66 (3) of the Act the revised assessments may be brought into force from the beginning of the next year, and the result of this revision should be reported to Government as soon as it is completed.

(2) The current collections under the taxes on arts and lands improved and were, on the whole, good; but those under the house-tax declined and were indifferent. The arrear realizations under all these heads were very poor; but above three-fourths of the demand under the tax on arts and more than one-half of that under the tax on buildings were written off the accounts as irrecoverable, in the circumstances explained in paragraphs 7 and 8 of the Chairman's report; and the whole of the balance under the land-tax was similarly dealt with. No pains should be spared to adjust the balances still outstanding under the two former heads as soon as possible.

(3) There was an increase in the receipts under tolls, but the income from the tax on animals and slaughter-house fees showed a decline, for which no adequate explanation has been offered.

(4) The number of houses served by the private scavenging agency fell from 1,070 to 1,000; but the fees levied on this account amounted to Rs. 1,634 against Rs. 1,296 in the previous year and the service was worked at a loss of Rs. 202 to the Municipal Council against Rs. 585. The Government is glad to learn from paragraph 27 of the Chairman's report that the system of collecting the fees in advance was introduced. Early steps should be taken to adjust the outstanding balance of Rs. 526 under this head and vigorous measures should be adopted to extend the service in the current year, for which there is considerable scope as pointed out in paragraph 3 (4) of G.O., No. 1510 M., dated 25th August 1898.

4. *Expenditure*—(1) *Public Works.*—No new work of any importance was undertaken during the year. The total outlay on communications amounted to Rs. 3,188 or 30·7 per cent. of the net municipal income from tolls against the minimum of 50 per cent. prescribed by Government. But the short expenditure was due to the fact that a large amount had to be reserved for plague charges. Again the Revenue Divisional-officer has not reported on the condition of the roads. This information should invariably be furnished in future. It should be explained why the Public Works overseer maintains a cart instead of a pony for which he draws an allowance of Rs. 10.

(2) *Education.*—The net expenditure on education amounted to Rs. 3,840 or 13·6 per cent. of the receipts from taxation and the whole of this sum was spent on primary education. As in the previous year, the Municipal Council maintained three primary schools on the salary-result system, one of which was for Muhammadans and another for Panchamas; but the number of primary schools aided with result grants was 26 against 22 in 1897–98. The attendance at the municipal and aided schools improved, the results of the departmental and grant examinations continued to be good and the allotment for result grants was exceeded by 21·5 per cent., the excess being due to the payment of the arrears of grant due for the previous year. The total number of boys under instruction in the municipal and aided schools rose from 1,149 to 1,232 or 55·2 per cent. of the male population of school-going age; but it was still below the general average of 61·8 per cent. for Municipalities in 1897–98.

(3) *Medical Relief.*—The Municipal Council maintained no hospital of its own and medical relief was supplied by the Maharaja's hospital. From the Civil Apothecary's report on the working of this institution, it is observed that there was a large increase in the number of out-patients treated at this institution, which is attributed to its growing popularity, while that of in-patients showed a decrease of 29. It is satisfactory to note that the midwife employed by the Municipal Council attended 134 cases of labour against 167, the number attended by two midwives in 1897–98.

(4) *Vaccination and Vital Statistics.*—The total number of vaccinations performed during the year rose from 1,526 to 1,752; but the quality of the work greatly deteriorated, the percentage of reported success being 85·4 against 98·3 in the previous year. This result is ascribed by the Chairman to the fact that the lanoline paste supplied from the vaccine depôt at Bangalore proved a failure during the hot weather. Infantile vaccination showed a further retrogression, the number of children under one year successfully vaccinated being 789 or 27·0 per mille of the population against 845 or 28·9 per mille in 1897–98. The Municipal Council should devote its special attention to this subject in the current year.

The number of births registered during the year rose from 886 or 30·4 per mille of the population to 1,031 or 35·3 per mille, while that of deaths declined slightly, being 29·4 per mille against 29·6 in the previous year. The returns in both cases cannot be regarded as trustworthy, the rates recorded being much below the normal. Increased attention should be paid to the registration of vital statistics in the current year.

(5) *Sanitation.*—The expenditure of Rs. 10,144 under this head exceeded the sanctioned allotment by 3·2 per cent. and amounted to 31·7 per cent. of the current receipts. From paragraph 45 of the Chairman's report, it appears that some attention was paid to the sanitation of the town; but paragraph 3 of the medical report shows

that much yet remains to be done in this direction. The Government trusts that no pains will be spared to remedy the defects pointed out in this report as funds become available.

5. *General Remarks.*—The year closed with a balance of Rs. 1,909 or 6·0 per cent. of the current receipts.

The administration of the Municipality during the year under review showed an improvement on that of the previous year in some respects; but it cannot still be regarded as efficient. The collection of taxes was not satisfactory; the private scavenging system made no progress; infantile vaccination showed a retrogression; and the registration of vital statistics was defective. The Government however trusts that the Municipal Council will do its best to show a decided improvement in these respects in the current year.

2. Twenty three meetings were held by the Municipal Council against 26 in the previous year and five others were adjourned for want of a quorum against two in that year. The average attendance of the official members improved and was fair, while that of the non-officials declined and was indifferent. Nine seats were filled by election during the year, and of these six were contested; but owing to certain discrepancies in the number of registered voters given in Statement XA, an explanation of which has been called for in a separate memorandum, the proportion of those who exercised the privilege to the total number cannot be ascertained.

3. Receipts (1)--The net current demand under the tax on buildings rose from Rs.10,914 to Rs.10,982, but that under the tax on arts showed a decrease of Rs.204 for which no explanation has been offered. This omission should now be supplied. The demand under the tax on lands, however, remained unaltered. From the note to Statement I it is observed that the registers of the taxes on houses and lands are now four years old. The assessments under these taxes should therefore be revised in the current year so that, under Section 66 (3) of the Act the revised assessments may be brought into force from the beginning of the next year, and the result of this revision should be reported to Government as soon as it is completed.

(2) The current collections under the taxes on arts and lands improved and were, on the whole, good, but those under the house-tax declined and were indifferent. The arrear realizations under all these heads were very poor, but about three-fourths of the demand under the tax on arts and more than one-half of that under the tax on buildings were written off the accounts as irrecoverable, in the circumstances explained in paras. 7 and 8 of the Chairman's report; and the whole of the balance under the land tax was similarly dealt with. No pains should be spared to adjust the balances still outstanding under the two former heads as soon as possible.

(3) There was an increase in the receipts under tolls, but the income from the tax on animals and slaughter-house fees showed a decline, for which no adequate explanation has been offered.

(4) The number of houses served by the private scavenging agency fell from 1,070 to 1,000 ; but the fees levied on this account amounted to Rs.1,634 against Rs.1,296 in the previous year and the service was worked at a loss of Rs.202 to the Municipal Council against Rs.585. The Government is glad to learn from para. 27 of the Chairman's report that the system of collecting the fees in advance was introduced. Early steps should be taken to adjust the outstanding balance of Rs.526 under this head and vigorous measures should be adopted to extend the service in the current year for which there is considerable scope as pointed out in paragraph

respect[illegible] it cannot still

year. The total number of boys under instruction in the Municipal and aided schools rose from 1,149 to 1,232 or 55.2 per cent. of the male population of school-going age, but it was still below the general average of 61.8 per cent. for Municipalities in 1897-98.

(3) Medical relief--The Municipal Council maintained no hospital of its own and medical relief was supplied by the Maharajah's Hospital. From the Civil Apothecary's report on the working of this institution, it is observed that there was a large increase in the number of out-patients treated at this institution, which is attributed to its growing popularity, while that of in-patients showed a decrease of 29. It is satisfactory to note that the mid-wife employed by the Municipal Council attended 134 cases of labour against 167, the number attended by two mid-wives in 1897-98.

(4) Vaccination & Vital Statistics--The total number of vaccinations performed during the year rose from 1,526 to 1,752 ; but the quality of the work greatly deteriorated, the percentage of reported success being 85.4 against 98.3 in the previous year. This result is ascribed by the Chairman to the fact that the lanoline paste supplied from the vaccine depôt at Bangalore proved a failure during the hot weather. Infantile vaccination showed a further retrogression, the number of children under one year successfully vaccinated being 789 or 27.0 per mille of the population as p- tion

tion against 845 or 28.9 per mille in 1897-98. The Municipal Council should devote its special attention to this subject in the current year.

The number of births registered during the year rose from 886 or 30.4 per mille of the population to 1,031 or 35.3 per mille, while that of deaths declined slightly, being 29.4 per mille against 29. ~~30.4~~ in the previous year. The returns in both cases cannot be regarded as trustworthy, the rates recorded being much below the normal. Increased attention should be paid to the registration of vital statistics in the current year.

(5) Sanitation--The expenditure of Rs.10,144 under this head exceeded the sanctioned allotment by 3.2 per cent. and amounted to 31.7 per cent. of the current receipts. From para. 45 of the Chairman's report, it appears that some attention was paid to the Sanitation of the town ; but para. 3 of the Medical report shows that much yet remains to be done in this direction. The Government trusts that no pains will be spared to remedy the defects pointed out in this report as funds become available.

5. General Remarks--The year closed with a balance of Rs.1,909 or 6.0 per cent of the current receipts.

The administration of the Municipality during the year under review showed an improvement on that of the previous year in some respects, but it cannot

still

still be regarded as efficient. The collection of taxes was not satisfactory ; the private scavenging system made no progress ; infantile vaccination showed a retrogression ; and the registration of vital statistics was defective. The Government however trusts that the Municipal Council will do its best to show a decided improvement in these respects in the current year.

Rec'd 28-4-99

Statement No. II showing the proportion of pupils of the great classes of the population under instruction to children of school-going age in the Conjeeveram Municipality 98-99

Classes of Population.	Population of school-going age.		Pupils under instruction.		Percentage.		Remarks.
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	
Europeans and Eurasians							
Native Christians	7	—	11	—	157	..	
Muhammadans	97		110	6	113.	..	
Hindus — Brahmans			606	4	87		
Hindus — Non-Brahman Caste Hindus	2985	3180.	2004.	113.			
Hindus — Paraiyas and Kindred Classes							
Others	6.		15.				
Total.	3095	3180	2746	125	87	—	The percentage to School age population under all the Communities shows an improvement. The falling off under Christians is a fallacy. As all the girls under instruction in the Municipality have not been included these percentages have been calculated for them.

Note.—1. *No comments should be made except as notes entered in the column of remarks.*
2. *In the column of remarks the figures of the previous year should be briefly compared.*
3. *This statement should be submitted in time to reach the Presidents of Local Boards or the Chairmen of Municipal Councils concerned before the 1st May.*

Remarks:

(a) Includes 1 gymnastic instructor and drawing master

(b) Includes 1 drill instructor and 1 drawing master employed by the Municipality.

(c) Include 1 drill instructor and 1 drawing master employed by the Mission for High and Primary Schools.

Provision in the Budget for training teachers was not fully utilized as the selection of a teacher for the second Sessions of training was not decided upon till November 98. A teacher was then sent in January 99 for whom only a portion of the allotment was utilized

Of the total number of teachers employed 42 percent of them hold trained and untrained certificates 32 percent of the men are entirely unqualified. All the teachers in the Municipal Schools are qualified

Note.—1. *In the column of remarks it should be noted whether the provision made in the budget for training teachers during the year under report had been carried out.*

2. *No comments should be made except as notes entered in the column of remarks.*

3. *This statement should be submitted in time to reach the Presidents of Local Boards or Chairmen of Municipal Councils concerned before the 1st May.*
