Note

The papers show that the village is

included in a village separated from Erode by
a large tract of cultivated country. I know
the place a beyond the fact that the village is on
the Channel there is no reason for including it
in the Municipality. The village will get
very few benefits out of the Municipality, while
the tax will be heavy. The Chairman, Municipal Council

Erode Municipal
Office July 1899

K. R. Lakshminarayana Aiyer
Chairman

No. 318
mg

Municipal Office, Erode,
Dated 18th July 1899.

From
M. R. By K. R. LAKSHMINARAYANA AIYER AVERGAL,
CHAIRMAN, MUNICIPAL COUNCIL,
Erode.

To
The Secretary
to the Government of Madras
Local and Municipal Department
Fort St. George.

Sir,
In reply to Govt No 1657 M. Misdated
27th September 1898, I have the honour to submit
a sketch drawn to scale showing the present
and the proposed boundaries of the Erode Town
and a draft notification under sub-section 1 of
Section 4 A of the Madras District Municipalities
Act defining the proposed boundaries.

2. In proposing this extension the
Council has no other motive than the
inclusion of the villages that are likely to be
included within the proposed extension. These
villages are situated within a radius of 2 miles
and are a source of nuisance to the town. The
inhabitants of these villages are mostly of the
agricultural and laboring classes. These people
daily come in contact with the towns people (ie)

They spend most of their time in the Erode town where they earn their livelihood. The Sanitary Condition of these villages is far from satisfactory. To maintain the Sanitation of Erode, it is essential to look after the Sanitary Condition of the villages closely. The residents of Veerappin Chattram and Brahmana Periya agharam villages are agriculturists and they contaminate the water of the Kalaignarai Channel higher up. This Channel is the main drinking water supply to a major portion of the population of the Erode town & down town. To prevent this contamination and to improve the Sanitary Condition of these villages it is proposed to extend the Municipal limits. In doing so the finances of the Municipality are affected much as will be seen from the enclosed Statement A & B.

Receipts

3. The receipts that are likely to be expected from the area proposed to be included within the Municipal limits are estimated at Rs 3810.

4. Tax on A.P.: A sum of Rs 500 is expected to be realized under Tax on A.P. as these villages

Carry

Carry on no profession or trade except agriculture besides some of them who carry on trade in Erode town have already been taxed.

5. Tax on Buildings: The proposed area is estimated to contain 1170 houses or so and it is believed that a sum of Rs 1000 will be realized in the shape of House Tax. It might be argued that the estimate is very low. I will meet this argument by saying that these villages are situated at a considerable distance from the Railway Station and public offices. They are of little or no importance, besides many of the houses are mere huts, and some of the houses worth taxing will not fetch any high rate of rent as in Erode. Hence credit is taken for Rs 1000 only.

6. Tax on Lands: According to the accounts furnished by the Revenue Authorities 1971 acres 28 cents of arable land will be taxed for Land Tax. Most of these being paddy lands a sum of Rs 1000 is expected to be realized as Land Tax.

7. Tax on Animals, Vehicles and Carts: This may bring in Rs 750.

8. The Avenues and Street Crossings are estimated to fetch Rs 20 and Rs 30 respectively.

6. In come from Slaughter Houses: In the Village of Brahmanandeniya Agraharam from 7 to 10 Sheep are being slaughtered everyday and a Slaughter House has to be built there. The right of collecting a fee of one anna on every head of Sheep or goat that is brought for slaughter when put up to auction will fetch Rs 60.

7. Licensing Fees and Magisterial fees: are put down at Rs 50 and Rs 50 respectively.

8. Private Scavenging Fees: This system, when introduced is estimated to bring in an income of Rs 100 at the beginning. No doubt it will take some time before the system has to expand.

9. Ferry rights: It is proposed to push the Municipal limits up to the Kavery river which is now at a distance of only a furlong and a half beyond the present Municipal limits. In doing the Council expects an annual income of Rs 100 or 20 in the shape of Ferry rights. Many of the towns people resort to this river for bathing and drinking purposes. There is a Mutt and a Chattram on its bank and they are much frequented by the people. Besides there is a Crematorium and a burial ground.

The water of the river has to be guarded against pollution. The ferry rights which now go to the Local Funds will have to be made over to the Municipal Funds.

10. The total receipts as detailed above come up to Rs 3810.

Charges

11. New works Communications: The sum of Rs 1000 provided under this head is hardly sufficient to lay out new streets and roads. The total mileage of roads within the Municipality is already 4 1/2 miles. The extension will bring in about 10 miles more.

Buildings: The erection of a Slaughter House in Brahmanandeniya Agraharam is estimated to cost Rs 200.

Water supply: Digging two new wells in places where necessary will cost about Rs 300.

Repairs Communications: Rs 350 is put down to repair the existing streets and to put them in order.

Drainage Establishment: Two watchmen are proposed to be employed to guard the Channel high up at Brahmanandeniya Agraharam and the

river Xavery. They cost Rs 96 or Rs 100 in round figure.

Water supply repairs. - A sum of Rs 100 is put down to execute necessary repairs to the existing public wells in the villages.

12. Grant II Education. - Results grants. There is a Primary School in Panjabnharan village aided from Local Funds. A sum of Rs 50 is provided to pay results grant to the School.

13 Grant II. Vaccination. There is already a First Class Vaccinator employed by this Municipality. When the Island is sanctioned the man cannot cope with the work. Therefore provision is made for entertaining a Second Class Vaccinator on Rs 10 per mensem, and Rs 20 is put down for usual contingencies.

14 Registration of Vital Statistics. - When the Island is proposed to come into force the Registrar will be found insufficient to register vital statistics. Provision is made for entertaining a Registrar on Rs 8 per mensem as Rs 10 is provided for the usual contingencies.

15 Road Cleaning Establishment. - A sum of Rs 840 is put down to employ 3 persons on Rs 6 each per mensem, 8 horses per month at Rs 4 each and 4 to the

Rs 5 each per mensem to look after the sanitation of the proposed area. I thought the Island covers a spacious area. No allowance is made for the Inspector for want of funds. Eight Carts are needed and they cost Rs 240. Besides the above, 2 scavengers are proposed to be employed to look after the private scavenging at a cost of Rs 120.

16. The removal of a portion of prickly pear grown in the Panabote land will cost Rs 300 at least.

17 Grant II Lighting. - Two meselches are required to look after the lighting of the proposed station. They cost Rs 110 at Rs 4-8 each per mensem.

18 Contingencies. - Rs 300 is provided for the purchase of Kerosene oil and Rs 500 for 40 more lamps & lanterns &c.

19 Grant I. Under this head Rs 120 is provided for the entertainment of an additional Bill-Collector on Rs 10 per mensem.

20 The total Charges come up to Rs 5070 or Rs 1260 over the receipts. This has to be met from the Municipal balance.

Under such financial crisis, I doubt
it is desirable to extend the present Municipal
limits and I leave the matter for the disposal of Government.

I have the honor to be

Forwarded.

2. I do not find any paper in my office
the subject. The boundaries seem most correct
if the north boundary is the Kalingaroya
(including, I presume, the poramboke attached)
I do not see why all the survey numbers
(with a trifling exception or two) should
specially entered. The eastern boundary
apparently does not run directly from a
to a rest house. The term 'rest house' is
on the west side more yellow lines are
than are boundaries as far as I can judge.

3. The scheme seems to me not to be correct
in that it includes purely agricultural
or hamlets miles off the Municipality
and will involve the Municipality in
extra expense.

W. Srinivasan
Ag. Collector
