Extract from the resolution of the Council Municipality, dated 20th March 1899.

* * * * *

Read G.O. No. 263 M. Mis. dated 27th February 1899 + early submission of the reports called for in Paris. G.O. No. 566 M. dated 14th March 1898 regarding reorganization of the Conservancy staff and the objectionable practice of removing night-soil in open baskets and the explanation for the delay, which has already occurred in this matter.

It was owing to the vigilance & efficiency of the sanitary staff that the sanitation of the town could hitherto be well maintained. The proposal of the Sanitary Commissioners to reorganise the staff involves a decrease in the number of hands and an increase in the charge which is required to be met by doing away with some of the scavengers. The present staff of scavengers is at times found to be insufficient and the Council think it very inadvisable to effect any reduction in their number as, by such a step the cleanliness of the town will greatly suffer. Further the supervision work which is now done by 4 overseers, 1 Inspector & 2 persons cannot be efficiently done by the reduced number which the proposal involves. In these circumstances the present Sanitary staff is resolved to be maintained in its present strength as the Council always find the present sanitary Inspector up to the mark and doing his work to satisfaction.

As the night soil depot is situated near the sea it would be very difficult to drag the

night soil cart in the sand for about 10 days
and as the night soil cart is costly in town
of the smallness of the town and the present condition
of the Municipality the Council resolved to make
arrangements to carry the night soil in covered tin lined
baskets.

CURRENT NO. 1187M

To

The Secretary to Government,
Local & Municipal Department,
Madras.

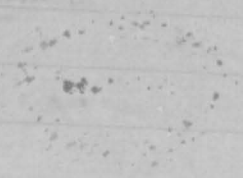

Sir,

In reply to G.O No: 263. M. No. dated 27th February 1899 I have the honor to state that, I herewith submit a copy of the Council's resolution No: 7 dated 20th March 99 regarding the reorganization of the conservancy staff and the objectionable practice of removing night soil in open baskets.

It seems to me that the object of the Sanitary Commission in proposing to do away with 1/3 of the conservancy staff is to engage the services of a trained sanitary inspector. This municipality maintains a Civil apothecary, on Rs 125/- who unfailingly looks after the sanitation of the town also with much zeal and interest. The present Sanitary Inspector has a very long service in this municipality. His constant carefulness and unflinching zeal combined with that of the civil apothecary keep the whole conservancy staff at active work, which is at times found more than what the present staff can do satisfactorily. In conclusion I humbly pray that you will be pleased to sanction the existing conservancy staff in the interest of the town considering the financial and present sanitary satisfactory conditions of this small municipality.

I beg to inform you that I cannot give any satisfactory explanation for the delay. A wrong understanding of the phrase "will be referred to the Council" made me delay to submit my report. On
