The provision of a Hospital in
Black Town - the papers about
which have been before you and
are pending a reference to the
Municipal Commission - will
probably affect the question of the
provision of Hospital for
infectious diseases. It hardly
seems feasible now to
get fresh schemes worked out for
the carrying out of which there is
no funds available for some years.

Report of the Committee appointed in G.O.No.1833 M.
dated 27th October 1898 re: Construction of a Contagious
Diseases Hospital for the City of Madras.

The Committee held two meetings at which they discussed the subject. In view of the fact that the establishment of the Black Town Hospital is practically in abeyance, of the stress under which the Municipality is labouring owing to Plague expenditure and the practical impossibility of constructing and maintaining such hospitals they would recommend that this question be also deferred.

2. When Madras is declared free from the danger of plague and the existing plague precautions are suspended they consider that the present plague hospitals and camps could readily and economically be adapted for the purpose.

18/4/99

The Committee held two meetings at which they discussed the subject. In view of the fact that the establishment of the fact that it is practically impossible to provide water under which the municipality is providing water to the public and the practical impossibility of constructing and maintaining such hospitals they would recommend that this measure be also deferred.

When it was declared free from the danger of plague and the existing plague precautions are suspended, the municipality should be adapted for the purpose.

I agree with you. I am, Sir, your obedient servant, J. W. Cornwall.
