JUNE.

Administration Report.

Reviewing the — of the Mangalore Municipal Council for 1898–99.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. D. ANANTHAIYA Avargal, Chairman, Municipal Council, to the Secretary to Government, Local and Municipal Department (through the Revenue Divisional Officer, Mangalore, and the Collector of South Canara), dated Mangalore, 27th May 1899, Pr. No. 20 of 1899—1900.

I have the honour to submit the following report on the administration of the Mangalore Municipality during the financial year ending 31st March 1899, with connected statements, enclosure I.

2. *Accounts.*—The accounts for the year under report have not yet been audited. Those for the previous year, 1897–98, were audited in the year under report by one of the assistants to the Inspector of Local Fund Accounts, the concluding remarks of the auditor being : "The general result of the audit continued to be satisfactory on the whole. The manager has been found to discharge his duties with care and intelligence."

The differences or discrepancies between the previous years' figures quoted in this report and the figures contained in the last one are on account of the audited figures now adopted, the audit having been made after the submissi[illegible] of the last administration report.

CONSTITUTION OF THE MUNICIPAL COUNCIL.

3. The sanctioned strength of the Council is twenty, viz., one e[illegible]icipal popula-ence of the Revenue Divisional officer, four nominated by Government, and fifteen[illegible]ive of tolls, the rate-payers for the eight wards into which the town is divided. respectively.

At the end of March last, there were on the Council only eighteen m[illegible] this head the nomination of Mr. D. J. Mc'Farlan in the place of Mr. H. R. Morgan, w[illegible]ldings for years' term of councillorship expired on the 17th idem, and the re-election of [illegible]he Places H. Krishna Rao Avargal, B.A., for the market ward, which took place on t[illegible] idem, could not appear in the Gazette till the 11th of April.

4. Under paragraph 5 of G.O., No. 1950 M., dated 19th November 1898, the old lists of electors having continued in operation until the 1st April last, when the lists prepared in accordance with the new election rules came into force, the number of registered voters on 31st March last remained the same as in the previous year, namely, 891.

Eight seats were filled by election during the year under report in seven of the wards. Three of the seats, in three different wards, were contested ; 241 out of 364 electors concerned, or 66 per cent., attended the poll.

5. Twenty-two meetings were held by the council in the year under report—three more than in the previous year. The average attendance at a meeting was ten—two officials and eight non-officials—of whom one happened to be a European gentleman and nine native gentlemen. Twelve had been the average attendance in 1897–98, but in that year there were not so many vacancies among councillors to be filled up as there were in the year under report. No meeting, however, had to be adjourned for want of a quorum.

6. M.R.Ry. D. Ananthaiya Avargal continued to be Chairman of the Council during the year.

II.—RECEIPTS.

7. Exclusive of the opening balance, Rs. 4,183–5–11, the total receipts or income in the year amounted to Rs. 44,992–4–3 as compared with Rs. 51,251–0–8 in the previous year which, however, included an extraordinary item of Rs. 6,775, the sale-proceeds of a land. On comparison with the revised estimate, Rs. 46,320, the decrease of Rs. 1,328 would appear to have occurred mainly in the *actual collections* of the three principal taxes—profession, house and land—and also warrant fees, which brought in altogether about Rs. 1,240 less than the anticipated sum, as the collection work could not be completed within the year. This is due partly to the delay in the supply of printed forms of demand notices, &c., from the Lawrence Asylum Press at Madras, as already explained in paragraph 2 of the last budget report (G.O., No. 286 M., dated 2nd March 1899) and partly also to additional work thrown on the establishment concerned on account of a systematic general revision of the house and land tax registers made in the year.

The profession tax collections, however, exceeded the previous year's figure to the extent of about Rs. 650. Taxes on vehicles and animals, avenue receipts, conservancy receipts or sale-proceeds of poudrette, markets and license fees are some of the items showing an increased income as compared with the revised estimate or the actuals of the previous year.

Of the outstandings appearing in the demand, collection and balance statements IV-A and IV-B, recoverable items have almost all been already realised after the close of the year.

A.—Receipts from taxation.

8. *Tax on Arts, &c.*—As usual, this tax was levied on all classes of the schedule [illegible] As the result of the annual revision of the registers, the demand as originally assessed by the Chairman rose from Rs. 5,983 in the previous year to Rs. 7,081–8–0. Deducting [illegible] year, comprised by the Council on appeal, the net or finally settled demand rose (2) permanen[illegible] to Rs. 6,831–8–0. The number of assessees also from 901 to 1,127, the section 188, ; distributed under the several classes of the schedule except the first and (5) a[illegible] passes. The collections amounted to Rs. 5,976 or 87·5 per cent. of the account of [illegible]d demand ; Rs. 849 remained uncollected at the close of the year.

of Rs. 325 [illegible]rrear demand of Rs. 346–6–6 was fully adjusted, Rs. 315–6–6 being 21. [illegible]nd Rs. 31 remitted by the Council.

having [illegible]

by the *Taxes on Buildings and Lands.*—The rate ($6\frac{1}{4}$ per cent.) and the principles of [illegible]ssessment underwent no change—*vide* the note appended to statement I. As already reported to Government, the assessment books of these taxes were completely revised by the Chairman during the year. Under sub-section (3) of section 66 of the Act, the revised assessments are to be adopted in the current year.

Tax on Buildings—The current demand of this tax amounted to Rs. 15,095–12–6 on 7,147 buildings as compared with Rs. 14,268–12–11 on 6,653 buildings in the previous year, the increase of Rs. 826–15–7 and 494 buildings, on account of new buildings assessed in the year, being distributed under all the classifications in the statement. Rs. 13,957–13–10, or 92 per cent. of the said demand were collected, Rs. 56–6–0 remitted, and Rs. 1,081–8–8 remained outstanding at the close of the year.

The arrear demand of Rs. 70–1–9 was supplemented in the year under report by Rs. 245–11–2, being the taxes imposed on account of 1897–98 after settlement of objections, and of the total amount thus obtained, viz., Rs. 315–12–11, as much as Rs. 228–3–4 was realized, leaving a balance of Rs. 87–9–7 at the end of the year.

Tax on Lands.—There was a slight addition of Rs. 23–5–4 to the old demand of this tax, owing chiefly to the assessment of the land near the Sea Customs House, intended for the construction of a Government Warehouse but now let out by the Customs Collector for the deposit of salt bags. Of the current demand of Rupees 2,036–1–0, Rs. 1,912–10–9, representing about 94 per cent., were collected, leaving a balance of Rs. 123–6–3 at the close of the year.

Rs. 2-9-6 from the arrear demand of Rs. 3-5-6 were collected and the remainder, As. 12, was remitted by the Council.

10. *Taxes on Vehicles, Animals and Carts.*—There was altogether an increase of Rs 35 in the current demand (Rs. 4,352) in respect of these items and of Rs. 112-8-0 in the actual collections within the year, the balance at the close of the year being Rs. 140.

Out of the total arrear demand of Rs. 229, as much as Rs. 173-8-0 was realised, Rs. 49 was removed from the accounts as irrecoverable and Rs. 6-8-0 remained outstanding at the end of the year.

11. *Coercive Processes.*—Including 751 warrants, issued for the first time, for the recovery of private scavenging fees amounting to Rs. 493-15-3 and also 24 warrants for Rs. 898-10-0 on account of rents, &c., 6,304 warrants were issued during the year under report for an aggregate sum of Rs. 11,139-4-11, showing a decrease of 1,230 in the number of tax warrants and Rs. 1,578-10-10 in the amount of the taxes involved, which, of course, was owing to the imposition of a warrant fee. But at the close of the year, so many as 992 warrants remained unexecuted instead of 102 at the close of the previous year, the increase being due to the causes already explained in paragraph 7 *supra*.

In respect of 25 warrants, property had to be distrained, and in one case only, the distrained property had to be sold. Thirty-three prosecutions were instituted for the recovery of Rs. 75-2-6, and in twelve of the cases, collections were made after judgment.

12. *Tolls—Gross Receipts, Rs.* 2,325.—This is the sum for which the collection of tolls at the maximum rates at the three principal entrances into the town was let out to the highest bidder. As the renter for the previous year had suffered a loss and as there was no prospect of a better income, the competition at the sale was not good. Hence the comparative decrease in the income. The net receipts amounted to Rupees 2,181-12-0.

13. *Incidence of Taxation.*—The average incidence per head of mun[illegible]pal population into (40,922) was slightly higher than in the previous year, in consequ[illegible]nce of the increased income from rates and taxes on the whole, viz., As 11-5 inclus[illegible]ve of tolls, and As. 10-6 exclusive of tolls, as compared with As. 11-4 and As. 10-3, [illegible]spectively.

14. *Fees under Act II of* 1888.—The item of Rs. 130 shown under this head represents the fees levied on account of the licenses issued in respect of bui[illegible]dings for theatrical and other such public performances according to the rules under t[illegible]e Places of Public Resort Act.

B.—Miscellaneous Receipts.

15. *Rent of Lands, Houses, &c.*—(i) *Rent of Lands.*—Rs. 753-6-0 against Rupees 690-6-4 in the previous year. The realisation of arrear rents amounting to Rs. 54-8-0 and competition at the sale of the Urwa garden plots contributed towards the increase.

(ii) *Rent of Buildings.*—The sum of Rs. 1,189-15-0 noted under this head was made up of (1) Rs. 1,125, the rent of the Petroleum Store; (2) Rs. 30, the *net* rent from the powder magazine, the renter bearing the cost of the guard, &c.; (3) Rs. 6, the rent of a spare shed near the Kankanadi toll-gate; and (4) Rs. 28-15-0, the rent collected on account of the vacant female apothecary's quarters used for some time as office of the District Medical and Sanitary Officer. The comparative decrease in the first item was caused by lack of competition at the last annual sale of the building in consequence of two principal kerosine-oil importers having given up trading here.

(iii) *Avenue Receipts.*—Rs. 613-2-7, an increase of Rs. 31-4-10 over the previous year, owing to better prices realised for fruits.

16. *Conservancy Receipts—Sale-proceeds of night-soil, &c.*—Rs. 567 were realised from poudrette, or Rs. 120-8-0 in excess of the previous year, owing to an increased demand for the manure.

17. *School-fees, Rs.* 433-7-9.—The decrease of Rs. 83-3-0, as compared with the previous year, was due to the closure of one of the Hindustani schools (Butchers' lane) for want of sufficient attendance and competent masters and also to the decline in the attendance of the remaining seven primary schools—four for lower class Hindus and three Hindustani for Muhammadans and Mappillas.

18. *Sale-proceeds, &c., of Medicines, Rs.* 115-15-0.—This sum represents the value of outside prescriptions compounded at the Wenlock hospital, the previous years' receipts being Rs. 78-4-6.

19. *Income from Markets and Slaughter-houses.*—(i) The income from the Webster market amounted to Rs. 3,647-15-0, namely, Rs. 3,150, the rent of the main building, Rs. 384, of the four beef stalls, and Rs. 113-15-0 from the garden, as compared with Rs. 3,336-5-10, viz., Rs. 2,950, Rs. 228 and Rs. 158-5-10, respectively, in the previous year. The increase from rents was due to better competition at the sale, and the decrease in the garden receipts, of course, to lesser sales of plants and flowers. The net income from the market was Rs. 3,263-12-3, or about Rs. 450 in excess of the previous year.

A market (simple tiled sheds) was provided during the year in the central ward of the town at a cost of about Rs. 400, for the use of the vegetable and flower selling women who were hitherto hawking about on the public road in the locality, and it realised a rent of Rs. 182 for nine months from July to March last. For the current year, it has been leased out for Rs. 300.

(ii) The slaughter-house brought in Rs. 495-8-0, viz., Rs. 470 from rent of the building and the remainder, Rs. 25-8-0, from the manure, instead of Rs. 469-8-0 on the whole in the previous year. The net income was Rs. 474-1-0.

20. *Other fees*—(i) *Warrant and Distraint Fees, Rs.* 519-4-0.—The comparative decrease of Rs. 198-14-0 was in consequence of a considerable reduction in the number of the house, land and profession tax warrants executed within the year—*vide* paragraph 7 *supra*.

(ii) *License fees.*—Rs. 1,349-4-0 (Rs. 244-12-0 more than in the previous year) comprising—(1) temporary erections, sections 170, 173 and 179, Rs. 75-4-0; (2) permanent buildings, section 180, Rs. 187; (3) offensive and dangerous trades, section 188, Rs. 682-4-0; (4) slaughtering animals, section 191 (4), Rs. 79-12-0; and (5) a private fish-market, section 196, Rs. 325. The increase was mainly on account of this last item, as at the usual sale of the right of keeping the market, a fee of Rs. 325 was offered by the highest bidder as against Rs. 120 before.

21. *Fines, Rs.* 164-4-0.—In consequence of a smaller number of prosecutions having been instituted, Police as well as municipal, and of the imposition of low fines by the Bench of Magistrates, the receipts under this head were only half the last year's.

22. *Grants and Contributions.*—Under (*a*) from Government—(i) Education, schools—are shown Rs. 176-15-0, composed of Rs. 41-15-0 on account of result grants for girls reading in some of the primary schools; Rs. 60, salary grant for the drawing master; and Rs. 75, that of the gymnastic instructor, including arrears of the previous year. The sum of Rs. 60 appearing under "other purposes," represents the supervisor's salary grant.

The item of Rs. 1,600 shown under (*b*) (ii) medical was the usual contribution paid by the District Board towards the maintenance of the two municipal hospitals—Rs. 600 for the Wenlock hospital and Rs. 1,000 for the Women and Children's; while that of Rs. 704-6-7 (including arrears of previous years) under (iii) "other purposes," represents a moiety of the salary of the Civil Apothecary on plague duty at this port, paid till October last by the same body as per G.O., Mis. No. 85 P., dated 25th February 1898; but from November, this contribution has been held in abeyance pending orders of Government on a reference said to have been made by the Collector inquiring with reference to the recent regulation regarding the distribution of plague charges, whether the said contribution could be continued.

23. *Private Scavenging fees.*—This cess continued to be levied at one-third of the house-tax; 2,391 houses were served or 32 more than before, the current collections amounting to Rs. 1,915–9–7 out of the demand, Rs. 1,992–10–3; Rs. 77–0–8 remained as balance at the close of the year.

The arrear demand of Rs. 77–7–3 was fully adjusted, Rs. 35–8–4 being realised and the remainder Rs. 41–15–4 remitted by the Council. On the whole, the collections exceeded the previous year's actuals by Rs. 31–3–10.

The cost of the private scavenging service as shown in Grant 3, (5) (*b*), was Rs. 1,521–10–6; the saving of Rs. 429–7–5 accruing from the service could not, as was intended, be utilized in the purchase of new carts for the removal of night-soil, which are needed. This will be done in the current year.

24. The remaining items in Statement I are usual more or less, being of a fluctuating nature and therefore do not require special notice here.

III.—EXPENDITURE.

25. The total expenditure in the year was Rs. 39,334–5–3 as compared with Rs. 52,186–1–6 in the previous year when a much larger than ordinary outlay had been incurred on public works. As compared with the revised estimate, the decrease of about Rs. 1,600 was caused principally by the savings of (1) Rs. 350 under Grant 1, New works—Buildings, the contracts for the construction of the vegetable and flower market and the erection of three iron latrines having been taken up for less than the estimated amounts, (2) Rs. 163, under repairs, buildings, the periodical repairs to buildings costing, less than usual, (3) Rs. 250 under Grant 2-(5) Building, Furniture, &c., Grants, the usual allotment made for the purpose not having been utilized for want of timely applications for aid (4) Rs. 300 under Grant 4-(1) Lighting, the repainting, &c., of the street lamps which was provided for not having been done, and other minor savings.

It must also be mentioned that with the prospect of an unavoidable reduction in the actual collections of taxes referred to in paragraph 7 *supra* and also [illegible] goods, Rs. 5 the fear that the plague raging in Bombay might at any moment be brought down here, in order to be fully fore-armed for the event with sufficient funds, only the usual or necessary expenditure was incurred and all possible economy therein was practically insisted upon.

The actual closing balance, however, exceeded the amount entered in the revised estimate by only about Rs. 280.

26. *Grant 1, Public Works.*—For the reasons just explained, the total outlay under this grant amounted to Rs. 9,501–10–7 instead of Rs. 10,160 allotted in the revised estimate. The construction of a vegetable and flower market at a cost of Rs. 400–11–6— *vide* paragraph 19 *supra*, and the erection, at a cost of Rs. 252–14–9, of three additional four seat latrines (Horbury's Patent) purchased in previous years were the only new works of public utility executed during the year under report.

The maintenance of the roads cost an ordinary sum, viz., Rs. 6,262–10–3, which is nearly two and-a-half times the net toll income. The general condition of the roads continued to be good. Rs. 989–4–7 were expended on the conservancy of the public drains and nullas, which were always kept clean.

M.R.Ry. J. S. Albuquerque Avargal, one of the elected councillors, continued to exercise supervison and give his professional advice in the matter of public works; and, as usual, M.R.Ry. D. Vaz Avargal and M.R.Ry. H. Krishna Rao Avargal, B.A., personally superintended the disbursements to the menial servants of this and other branches.

27. *Grant 2, Education.*—The expenditure under this grant amounted to Rs. 4,329–6–3 against the revised estimate of Rs. 4,620, and against Rs. 4,548–13–3, the actuals of the previous year, the usual allotment of Rs. 250 for building, furniture, &c., grants having remained unutilized as stated in paragraph 25 *supra*.

The five educational statements received as usual from the Assistant Inspector of Schools, West Coast division, are herewith accompanying, enclosure II.

28. *Municipal Schools on Salary Result System.*—The Butchers' Lane Hindustani school having been closed at the beginning of the year as mentioned in paragraph 17 above and paragraph 5 of the last budget report, only seven primary schools were maintained at a net cost of Rs. 1,178–13–6.

Statement V-A furnishes detailed statistics in respect of these schools, and on comparison with the previous year's statistics, leaving the abolished school out of account, they would appear to show a general decline in almost every way, for, the number on rolls at the end of the year fell from 332 to 289, the average attendance throughout the year from 263 to 252, and the fee income from Rs. 478–15–9 to Rs. 433–7–9; at the same time, the net cost to municipal funds rose from Rupees 1,043–15–3 to Rs. 1,178–13–6 and the average cost per pupil from Rs. 4–3–1 to Rs. 4–10–7. The only redeeming feature, however, was that the results of the annual examinations were comparatively better, 231 out of 262 pupils sent up having passed as against 226 and 271, respectively, in the previous year.

29. *Salary Grants.*—Only one lower secondary school, namely, the said department of the German Mission High school, continued to be aided under this head with the usual amount of grant, Rs. 521–2–0. At the end of the year, there were 135 pupils on rolls in the aided department—91 in the three lower secondary forms and 44 in the two primary classes—instead of 143, 89 and 54, respectively, in the previous year. Twelve boys appear to have been sent up for the Lower Secondary Examination, half the number being successful; 17 for the Primary Examination, of whom 13 passed, the corresponding figures of the previous year being 17 and 8 and 20 and 14, respectively, from which it will be seen that although the number of examinees was less, yet the results were comparatively better.

30. *Result Grants.*—The usual allotment of Rs. 1,800 made for the purpose was fully utilized. As in the previous year, three lower secondary schools and 11 primary schools were aided under this system. According to the Director's proposal sanctioned in G.O., No. 442, Educational, dated 21st July 1898, the assignments of grants this year were fixed by the inspecting officers after the conclusion of the grant examination in proportion to the earnings of each school.

On 31st March last, there were 1,481 pupils in all the fourteen schools or 54 less than on the coresponding date of 1897–98. The number of examinees and those successful also fell from 1,071 and 854, respectively, to 919 and 771, respectively.

In common with the salary result and salary grant schools, these schools also shared the general decline in the attendance, which appears to be chiefly due to the poorer condition of the labouring classes on account of continued depression in the tile industry in consequence of plague at Bombay.

31. *Inspection.*—There were, as usual, one supervisor on Rs. 15 per mensem for primary schools, and the Local Fund inspecting schoolmaster of Muhammadan schools in the district, for Hindustani schools, getting at Re. 1 per diem for the days spent in the municipality and thus Rs. 27 for the whole year.

The charges on the whole were Rs. 219 or Rs. 22–8–8 less than in the previous year.

32. *Grant 3, Medical Services, Sanitation, &c.*—The total expenditure under this grant amounted to Rs. 17,890–0–1 against Rs. 18,040 set apart in the revised estimate and against Rs. 20,431–11–5, the actuals of the previous year; the decrease as compared with the latter figure occurred in the maintenance of the hospitals owing to the saving of the female apothecary's salary and the lesser value of the medical supplies; and in the outlay on conservancy in consequence of the lower rate for which the contract for the removal of street sweepings was undertaken and the reduction in the plague charges from Rs. 2,729–11–5 to Rs. 2,346–13–1.

33. *Hospitals and Dispensaries, Rs.* 6,878–11–6.—(1) One hospital for males—the Wenlock hospital—and another for females and children continued to be maintained by the municipality. The efforts of the Dufferin's Fund Secretary and advertisements in the principal Madras newspapers did not succeed in securing the services of a female medical subordinate for the latter institution, and consequently it had to continue in charge of one of the municipal male hospital assistants, subject to

more frequent supervision on the part of the District Medical Officer and his assistant. Lately the services of a female hospital assistant have been secured, and she is expected to join the hospital shortly. The accompanying report (Enclosure III) from the District Medical and Sanitary officer and statement XII furnish the required information regarding the hospitals.

(2) The total attendance at both the hospitals was far more satisfactory than in the previous year, viz., 24,970—at the Wenlock hospital 17,759 and at the Women and Children's hospital 7,211—as compared with 22,845, 16,299 and 6,546, respectively, the increase being 2,125, 1,460 and 665, respectively. While there was a nominal increase of one in the number of in-patients treated at the male hospital, there was a decrease of as many as one hundred in the number of such admissions in the female hospital which must, of course, be due to the absence of a female doctor and not to the cause assigned by the District Medical Officer in paragraph 5 of his report, namely, "owing to the small allotment for dieting, more in-patients could not be treated," seeing that the expenditure (Rs. 935-13-2) on dieting was almost the same as in the previous year (Rs. 943-10-8); the average rate of dieting a patient, however, became higher, Rs. 1-11-7, instead of Rs. 1-7-7, owing to the issue of extras.

(3) One thousand and fifty-seven operations, major and minor, were performed at the two hospitals, an improvement of 244 over the previous year.

34. *Midwives.*—Out of three midwives in the previous year, the senior one on Rs. 18, after working for the first two months in the year under report, making 29 cases, proceeded on leave without pay for a long period, and latterly died, and so the two junior midwives, on Rs. 13 each, worked throughout the year, attending between them 325 cases of labour as compared with 48 cases attended by them during the last five months of the previous year, and with 288 cases, their minimum outturn for the year, at twelve cases each monthly. On the whole the outturn was 354 or 146 cases more than before. The Superintendent, Government Maternity Hospital, Madras, has already arranged to send a midwife shortly to take the deceased woman's place.

Contributions to other bodies.—The sum of Rs. 357-8-0 shown under this head represents the annual aid given to the Basel Mission and the St. Joseph's Leper Asylums, at Rs. 15 each a month, with a slight deduction for short attendance at the former asylum.

35. *Vaccination, Rs.* 454-0-2.—A female vaccinator on Rs. 8 provided for in the budget could not be entertained for want of a suitable candidate for the post. As hitherto two male vaccinators (Rs. 18 and Rs. 10) worked throughout the year, performing 2,452 operations with animal lymph—959 of them infantile and 1,493 above one year of age—an increase of 532 over the prescribed outturn, at 160 cases a month, and of 51 over the previous year's outturn. As in the previous year, about 99 per cent. of infantile vaccinations were successful and 97·3 per cent. on the whole. The number of infantile operations, however, decreased to the extent of 276 owing to the available number of children of six months and above, eligible for being compulsorily vaccinated, being much smaller than before, in consequence of a noteworthy decline in the registered number of births for the year. But the decrease of 276 in question was more than made up by the vaccinations "above one year of age" which rose from 1,166 to 1,493, and that with a higher percentage of success.

The average cost per successful operation was As. 3-1 or 4 pies less than in the previous year.

As the outcome of the personal exertions of the vaccinators in going about from door to door in quest of cases, only 266 defaulters had to be reported to the Magistrate under section 138 (2) of the Act—83 less than in the previous year.

36. *Registration of Births and Deaths.*—The sum of Rs. 201-10-0 shown under this head represents the remuneration paid to the ward sanitary sub-inspectors at two annas per birth and one anna per death reported by them. As compared with the previous year, there was a decrease of Rs. 47-6-10 in the expenditure and of 190 in the number (1,080) of births registered and of 144 in that of the deaths (1,127). The death-rate, which was 27·5 per mille against about 31, is accepted by the District Medical and Sanitary Officer as accurate, but as regards the birth-rate, 26·4

per mille, he says that, in order to evade compulsory vaccination, the occurrences among the ignorant and illiterate classes are concealed or not fully reported. How this could be it is rather difficult to understand, considering that the sub-inspectors were given extra remuneration for finding out and reporting the occurrences in their respective wards, unless it be that they were more than recouping themselves any decrease in the remuneration by encouraging or abetting persons to evade compulsory vaccination.

However now that a set of reporters have been appointed, as already reported to Government in my letter of the 17th ultimo, G. No. 11, their work in this direction is being particularly watched and, should the registration not show any improvement, some other means to secure proper results will have eventually to be devised.

No prosecutions were instituted for failure to report births or deaths.

37. (5) *Sanitation.*—Excluding the epidemic charges of Rs. 2,346-13-1 mostly incurred on account of the inspection of the arrivals by sea from the Bombay side—which was the usual precautionary measure taken, successful in that no plague case arrived or appeared here—and also in connection with cholera which had been prevalent in Mappilla quarters for a very short time at the beginning of the year, the usual conservancy arrangements, viz., 37 scavengers, 24 road sweepers and a supervising staff composed of one certificated sanitary inspector and eight ward sub-inspectors, &c., cost Rs. 7,857-13-4, or Rs. 781-2-3 less than in the previous year, the decrease being chiefly due to the much lower sum for which the contract for the removal of street sweepings was undertaken, the outcome of very keen competition at the sale.

The supervising staff mentioned above has been reorganised from the 1st April last as per G.O., Mis. No. 258 M., dated 27th February 1899, by abolishing the eight posts of ward sub-inspectors and creating in their stead one additional certificated sanitary inspector's place and four lower paid posts of maistries.

As usual, the general sanitary condition of the municipality remained satisfactory and the state of the public health was comparatively much better. The District Medical and Sanitary Officer admits that "the general sanitary condition of the town is good on the whole" and also that "the condition of private gardens and backyards has much improved; at the same time he makes certain remarks regarding the necessity for improving the condition of the Mappilla, &c., quarters, in fact, the western side of the town. But it must be repeated here that all that is possible to do was and is still being done and that as often represented before, no tangible or lasting improvement can be achieved unless and until proper drainage and water-supply are introduced in those parts, the present overcrowding or overpopulousness is by some means abated, and, first of all, the burial-grounds, which are in the vicinity of dwelling houses, mosques, &c., are duly closed. The preliminary survey, &c., for a drainage and water-supply scheme have been finished long ago, and the Sanitary Engineer to Government, in reply to an inquiry made of him with reference to G.O., No. 227 M., dated 18th February last, as to what has been done in the matter, says that the preparation of the design for the scheme can be taken up only in order of urgency, &c. Some provision has been made in the current year's budget for the purpose of public burial-grounds for the Muhammadan community. The remaining remedy of abating overcrowding, &c., is a thing for the future to think of.

There has been no inspection of this town by the Sanitary Commissioner or by his Deputy since December 1894.

38. *Grant 4, Lighting and Miscellaneous Municipal purposes.*—The expenditure on account of the several items of this grant was more or less usual. Under (1) Lighting, the rate of the contract for lighting the street lamps was lower than before, viz., annas 8-9 per lamp a month instead of annas 11-8; under (5) Avenues, their maintenance absorbed only Rs. 402-14-1 instead of Rs. 546-12-8 in the previous year owing to the employment of a lesser number of coolies for watering and other work and against Rs. 613-2-7, the avenue receipts for the year. On the whole the expenditure was Rs. 3,641-6-8 or less than the revised estimate and the previous year's actuals.

Seven additional lights were put up, making the total number of public lights 278, or 61 per square mile lit at a cost of Rs. 2,008–13–0.

The old Webster market, the new vegetable, &c., market, the slaughter-house and the travellers' bungalow were all in a proper state of repair.

39. *Grant 5, Supervision and Management, Rs.* 3,908–4–4.—The expenditure was usual and within the revised estimate. The toll-gates were all put in order and new rate boards provided at a cost of Rs. 138.

40. *Balances.*—The year closed with a balance of Rs. 9,019–1–8 under Municipal fund and Rs. 822–3–3 under endowments. The former slightly exceeded the revised estimate, *vide* paragraph 25 *supra.*

41. This report was placed before the Municipal Council at its special meeting held this day, and the resolution passed adopting the report is enclosed (enclosure IV).

ENCLOSURE.

CONCISE Medical and Sanitary Report for the official year 1898–99.

Public Health.—The public health has been rather bad * during the year. Fever and bowel-complaints prevailed to a great extent. Many cases of malarial fever among the coolies returning from the ghâts were treated. Cholera and small-pox, which prevailed during the previous year, continued during the early part of the year under report, causing 13 and 9 deaths, respectively. Typhoid fever prevailed as usual among the native population. The disease made its appearance soon after the rains set in and continued till about the end of the year, but isolated cases were met with throughout the year.

* But it had improved and was comparatively much better than in the previous year.

(Sd.) D. ANANTHAIYA,
27*th May* 1899. *Chairman, M. C.*

Measles and chicken-pox also prevailed to a large extent among the children.

2. *Vital Statistics.*—There has been a fall in the number of both births and deaths reported during the year. As regards deaths, the figure may be accepted as correct, but as regards births, I doubt very much if all births were reported. To avoid the enforcing of compulsory vaccination rules, I believe generally the ignorant and the illiterate class are concealing a number of births which remain unreported.† The ward sub-inspectors appear to report only such cases as are brought to their notice. They should be warned to work better in this important direction. There were 1,080 births and 1,127 deaths during the year against 1,270 and 1,271 in the previous year. Birth-rate per mille was 26·39 and death-rate 27·54.

† *Vide*, paragraph 36 of the Municipal report.

(Sd.) D. ANANTHAIYA,
27*th May* 1899. *Chairman, M. C.*

The rainfall was abundant and seasonable and the paddy crop was very good. Water-supply was also ample during the year.

3. *Sanitation.*—The conservancy establishment remained the same as the previous year. No notice appears to have been taken of the remark made in the last report that the working staff ‡ is quite inadequate for a town of this area and population. The general sanitary condition of the town is good on the whole, except the wards inhabited by the Mappillas and the fishermen. No attempts appear to have been made to improve their condition. § Their drinking water wells, perhaps with a few exceptions, are mere cesspits situated in most cases by the side of the drains. The highly objectionable practice of using the large drains and water-courses as latrines still continues. In some places private latrines are so constructed as to allow the contents to find their way directly into these drains.

‡ Already reorganized with reference to G.O., Mis. No. 258 M., dated 27th February 1899, and the reorganised staff is now *exclusively* employed on conservancy supervision, *vide* paragraph 37 of the Municipal report.

(Sd.) D. ANANTHAIYA,
27*th May* 1899. *Chairman, M. C.*

§ *Vide* paragraph 37 of the Municipal report.

(Sd.) D. ANANTHAIYA,
27*th May* 1899. *Chairman, M. C.*

The condition of private gardens and back-yards has much improved. No new wells or latrines * were constructed during the year.

* This is an error. Three iron latrines were newly constructed during the year under report and are being used by the public—*vide* paragraph 26 of the Municipal report.

(Sd.) D. ANANTHAYA,
27*th May* 1899. *Chairman, M. C.*

4. *Vaccination.*—The number vaccinated during the year was 2,452 against 2,401 in the previous year. There has been a fall in infantile vaccination—959 against 1,235—in the previous year, perhaps due to prevalence of measles and chicken-pox among the children for several months. There has been an increase in secondary vaccination. The percentage of successful vaccination is also more satisfactory—primary 98·75, secondary 99·68 and revaccination 84·15.

Two hundred and sixty-six persons were prosecuted under the Compulsory Vaccination Act.

5. *Hospitals and Dispensaries.*—The two hospitals—Wenlock hospital and Women and Children's hospital—continue to be maintained by the municipality. Both have sufficient accommodation. The Wenlock hospital building is in good repairs, but the roofing † of the Women and Children's hospital requires renewal. No † improvements have been effected since last report.

† The immediately necessary repairs have been made since the last report Renewal entirely involves rather a large expenditure and will be done in due time. An estimate for the purpose has already been made.

(Sd.) D. ANANTHAYA,
27*th May* 1899. *Chairman, M. C.*

Amount recovered by sale of medicines to patients is Rs. 115–15–0. During the year 17,360 out and 399 in patients were treated in the Wenlock hospital against 15,901 and 398 in the previous year. Owing to the small allotment for dieting, more in-patients could not be treated.‡ At the Women and Children's hospital 7,038 out and 143 in patients were treated against 6,303 and 213 in the previous year.

‡ This conclusion is erroneous as the expenditure on dieting was the same as in the previous year, *vide* paragraph 33 of the Municipal report.

(Sd.) D. ANANTHAYA,
27*th May* 1899. *Chairman, M. C.*

As the services of a female apothecary could not be secured for the charge of this institution, a hospital assistant was placed in charge, and the District Medical and Sanitary Officer or the Assistant Surgeon was visiting the institution twice or thrice a week to see all the patients both in and out.

There were eighteen deaths at the Wenlock hospital and four deaths at the Women and Children's hospital during the year. No deaths from septic diseases.

One thousand and fifty-seven operations were performed during the year—844 at the Wenlock Hospital and 213 at the Women and Children's hospital—against 533 and 280 in the previous year.

The establishment will be sufficient when the services of a female apothecary or hospital assistant are secured.

One Mrs. Lazarus, now at Masulipatam, has already been selected by the Honorary Secretary of the Dufferin Fund, and she is expected to join the hospital shortly. A female apothecary or female medical practitioner could not be got.

(Sd.) D. ANANTHAYA,
27*th May* 1899. *Chairman, M. C.*

6. *Midwives.*—Two midwives worked during the whole year, and one, who took leave and since died, worked only during the first two months. Three hundred and fifty-four cases were conducted by them, 146 cases more than in the previous year.

7. *General Remarks.*—The Surgeon-General with the Government of Madras inspected the hospitals in November 1898.

Strict preventive measures against plague continued during the year with a very gratifying result.

MANGALORE,
15*th May* 1899.

(Signed) C. P. GANAPATI,
Assistant Surgeon in charge,
for *District Medical and Sanitary Officer.*

for *District Medical and Sanitary Officer.*

Dis. No. 393-D. Rev.

Forwarded to the Collector of South Canara.

2. The roads within the municipality, as far as I have seen, are in a satisfactory condition.

3. The revision of assessments has been completed, but a few appeals are pending.

MANGALORE,
30*th May* 1899.

(Signed) G. NARAYANASAMI AIYAR,
Deputy Collector in charge of Mangalore Division.

Dis. No. 587-D.—Eng.

Forwarded.

2. *Paragraph 9. Taxes on Buildings and Lands.*—A separate report will be submitted as to the manner in which the revision of house and land tax registers has been carried out as soon as all the pending appeals shall have been disposed of.

3. In connection with the subject of house-tax, I wish to bring to the notice of Government the resolution of the Municipal Council, dated 16th December last, declaring that so much of the Aloysius College building as is used for school purposes as well as the Basel Mission school-houses are exempt from tax as falling under charitable purposes. This resolution of the majority of the Council, which was dissented from by the Chairman, the Revenue Divisional officer and two other councillors, appears to have been based on the decision of the Madras High Court in I.L.R., XXI Mad., 367, confirming the decision of the Sub-Judge of Madura (West) holding that the building in which the Native College at Madura is located is one exclusively used for charitable purposes and therefore exempt from house-tax under section 63 (1) of the District Municipalities Act. But the circumstances of these institutions seem to me to be different from those of the Madura College. For, while the latter college appears to vest in a committee who cannot appropriate any part of the income derived from fees and other sources for their own benefit but must spend it wholly for the promotion and encouragement of education, the institutions in question vest in the two missions mentioned above who may, if they like, use the income for purposes unconnected with the schools. It is also to be remarked that the Council passed the above resolution without apparently taking any legal advice on the point as suggested by Government in its Order, Mis. No. 2370 M., dated 29th October 1897. If the above resolution of the Council remains in force, it is very likely that other educational institutions in the town will also ask for exemption and the result will be that the municipal revenue will suffer to the extent of a few hundreds of rupees every year.

4. *Paragraph 18. Sale-proceeds of Medicines.*—The receipts under this head would show considerable improvement if, instead of charging only for compounding outside prescriptions, payment at moderate rates were demanded, agreeably to section 127 (1) of the Act from all persons except those who are really poor, for medical advice and treatment obtained by them from municipal hospitals.

5. *Paragraph 21. Fines.*—Enquiries will be made and necessary instructions issued with regard to the Chairman's statement about the imposition of low fines by the Bench Magistrates.

6. *Paragraph 22. Plague Expenditure.*—In my letter, Dis. No. 42 R./P., dated 20th May 1899 sent in reply to G.O., Ref. on C. No. 4806, dated 10th idem, I have proposed that the cost of the establishments maintained at the seaports in this district for the examination of passengers coming from the Bombay Presidency, &c., by sea should be met from the Provincial Funds.

7. *Paragraph* 26. *Roads.*—I do not agree with the Revenue Divisional officer in his remark that the roads within the municipality are in good condition. A few of the principal roads are kept in good repair, but others are much neglected; compared with roads in other municipalities the roads here are no doubt good, but this municipality is exceptionally favored by the laterite soil, &c., which renders the work of road repair easy and inexpensive. If, therefore, the work were better supervised, there is no reason why all the roads should not be equally good. The expenditure

on communications, though $2\frac{1}{2}$ times the toll receipts as pointed out by the Chairman, is less than the total sum realized from tolls, tax on vehicles and tax on animals. The expenditure on communications equals Rs. 6,262-10-3, whereas the receipts from the above three sources are over Rs. 6,700. It must be remembered that the toll receipts here are smaller than elsewhere by reason of the Netravati river forming the southern boundary of the municipality, the ferry fees for crossing which river go to the District Board.

MANGALORE,
2*nd June* 1899.

(Signed) A. F. PINHEY,
Acting Collector.

ORDER—No. 891 M., dated 26th June 1899.

The receipts and charges of the Mangalore Municipality for 1898-99 are compared below with the budget and revised estimates for the year and the actuals of 1897-98 :—

	Actuals, 1897-98.	Budget estimate, 1898-99.	Revised estimate, 1898-99.	Actuals, 1898-99.

Pensions and Gratuities	48	..	..	..
Total	131	100	50	64
Grand Total	52,186	44,300	40,940	39,335
Balance	4,184	1,400	9,560	9,841

2. The Municipal Council held 22 meetings against nineteen in the previous year, and the average attendance of the members, although it declined, was still fair. Eight seats were filled by election during the year, of which three were contested, 66·2 per cent. of the registered voters attending the poll.

3. *Receipts.*—(1) Owing apparently to careful assessment, there was an increase of 226 in the number of persons assessed to the tax on arts and of Rs. 1,017 in the net current demand under this head. The demand under the taxes on buildings and lands also rose by Rs. 827 and Rs. 23, respectively. The report on the revision of these latter taxes, promised in paragraph 2 of the Collector's endorsement, is awaited. The attention of the Municipal Council is drawn to his remarks in paragraph 3.

(2) The current collections under the arts, house and land taxes, although they declined, were still very fair, while the realizations of arrears improved and were satisfactory. Coercive processes were issued in a large number of cases, but their execution was not so prompt as in the previous year.

(3) The receipts from the taxes on vehicles and animals, sale of poudrette, market rents, and license fees showed an advance; but those from tolls, rent of buildings, warrant and distraint fees and fines fell off, the decline being explained in paragraphs 12, 15, 20 and 21 of the Chairman's letter. The Collector's suggestion in paragraph 4 of his endorsement is commended to the Municipal Council for consideration.

(4) The number of houses served by the private scavenging agency and the receipts from this source rose from 2,359 and Rs. 1,920, respectively, to 2,391 and Rs. 1,951, and the service was worked at a profit of Rs. 429 against Rs. 188 in the previous year. The service is, however, capable of considerable extension, seeing that it is now adopted by only about one-third of the number of houses assessed to the tax on buildings. Every endeavour should be made to extend it throughout the town, any profit accruing from this service being utilized towards its improvement.

4. *Expenditure*—(1) *Public Works.*—The only new work of importance executed during the year was the construction of a vegetable and flower market at a cost of Rs. 401. The total outlay on communications amounted to Rs. 6,320 or nearly three times the net municipal income from tolls. The Revenue Divisional Officer reports that the roads in the town are in a satisfactory condition; but the Collector considers that, with the exception of a few principal roads, they are much neglected. Greater attention should be paid to them in the current year.

(2) *Education.*—The net expenditure under this head amounted to Rs. 3,659 or 12·5 per cent. of the income from taxation; and all but Rs. 895 of this sum was devoted to primary education. The Municipal Council maintained seven primary

schools on the salary-result system against eight in 1897–98, and aided as in that year one secondary school and its primary department with salary grants and three secondary and eleven primary schools with result grants. Taken as a whole the attendance at these institutions declined; but the results of the departmental and grant examinations were satisfactory and the allotments for salary and result grants were fully utilized. The total number of boys under instruction in the municipal and aided schools was 1,693 or 52·8 per cent. of the male population of school-going age, against 1,840 or 59·4 per cent. in the previous year, the decline being explained in paragraph 30 of the Chairman's letter.

(3) *Medical Relief.*—The number of in-patients treated in the Wenlock Hospital was almost the same as in the previous year, but there was a decrease of 100 in the number of those treated in the hospital for women and children, which is ascribed by the Chairman to the want of a substitute for the female apothecary in charge, who resigned her appointment about the beginning of the year. The number of out-patients who attended both these institutions, however, rose from 22,204 to 24,428, and the work of the midwives, who attended 354 cases of labour against 208 in the previous year, was satisfactory.

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year was 2,452 or 51 more than in 1897–98, and 97·3 per cent. of the operations were successful against 97·2 per cent. in that year. Infantile vaccination, however, declined, the number of children under one year successfully vaccinated being 949 or 23·2 per mille of the population against 1,224 or 29·9 per mille in the previous year. The explanation of this decline given in paragraph 35 of the Chairman's letter cannot be accepted, as the registration of births in the municipality is evidently very defective. Special attention should be paid to this matter in the current year.

There was a large decrease in the numbers of births and deaths registered during the year, which must be ascribed to inaccuracy of the returns. Every endeavour should be made to render the returns trustworthy.

(5) *Sanitation.*—The outlay under this head amounted to Rs. 10,205 or 9·6 per cent. more than the allotment and was 22·7 per cent. of the current receipts. The District Medical and Sanitary Officer reports that the general sanitary condition of the town was on the whole good. There are admittedly, however, many defects, which the Council should remedy as soon as possible.

5. *General Remarks.*—The year closed with a balance of Rs. 9,841 or 21·9 per cent. of the current receipts. The greater portion of this sum might with advantage have been spent in improving the sanitation of the town.

The condition of roads, infantile vaccination and registration of vital statistics demand increased attention. In other respects the administration of the municipality during the year under review was fairly efficient.

The Government is pleased to note the testimony borne by the Chairman to the services rendered by the councillors named in paragraph 26 of his letter.

JUNE.

Administration Report.

Reviewing the — of the Mangalore Municipal Council for 1898-99.

GOVERNMENT OF MADRAS.

LOCAL AND MUNICIPAL DEPARTMENT.

READ—the following paper :—

From M.R.Ry. D. ANANTHAIYA Avargal, Chairman, Municipal Council, to the Secretary to Government, Local and Municipal Department (through the Revenue Divisional Officer, Mangalore, and the Collector of South Canara), dated Mangalore, 27th May 1899, Pr. No. 20 of 1899—1900.

I have the honour to submit the following report on the administration of the Mangalore Municipality during the financial year ending 31st March 1899, with connected statements, enclosure I.

2. *Accounts.*—The accounts for the year under report have not yet been audited. Those for the previous year, 1897-98, were audited in the year under report by one of the assistants to the Inspector of Local Fund Accounts, the concluding remarks of the auditor being : "The general result of the audit continued to be satisfactory on the whole. The manager has been found to discharge his duties with care and intelligence."

The differences or discrepancies between the previous years' figures quoted in this report and the figures contained in the last one are on account of the audited figures now adopted, the audit having been made after the submission of the last administration report.

CONSTITUTION OF THE MUNICIPAL COUNCIL.

3. The sanctioned strength of the Council is twenty, viz., one *ex-officio*, the Revenue Divisional officer, four nominated by Government, and fifteen elected by the rate-payers for the eight wards into which the town is divided.

At the end of March last, there were on the Council only eighteen members, as the nomination of Mr. D. J. Mc'Farlan in the place of Mr. H. R. Morgan, whose three years' term of councillorship expired on the 17th idem, and the re-election of M.R.Ry. H. Krishna Rao Avargal, B.A., for the market ward, which took place on the 16th idem, could not appear in the Gazette till the 11th of April.

4. Under paragraph 5 of G.O., No. 1950 M., dated 19th November 1898, the old lists of electors having continued in operation until the 1st April last, when the lists prepared in accordance with the new election rules came into force, the number of registered voters on 31st March last remained the same as in the previous year, namely, 891.

Eight seats were filled by election during the year under report in seven of the wards. Three of the seats, in three different wards, were contested ; 241 out of 364 electors concerned, or 66 per cent., attended the poll.

5. Twenty-two meetings were held by the council in the year under report—three more than in the previous year. The average attendance at a meeting was ten—two officials and eight non-officials—of whom one happened to be a European gentleman and nine native gentlemen. Twelve had been the average attendance in 1897-98, but in that year there were not so many vacancies among councillors to be filled up as there were in the year under report. No meeting, however, had to be adjourned for want of a quorum.

6. M.R.Ry. D. Ananthaiya Avargal continued to be Chairman of the Council during the year.

II.—RECEIPTS.

7. Exclusive of the opening balance, Rs. 4,183-5-11, the total receipts or income in the year amounted to Rs. 44,992-4-3 as compared with Rs. 51,251-0-8 in the previous year which, however, included an extraordinary item of Rs. 6,775, the sale-proceeds of a land. On comparison with the revised estimate, Rs. 46,320, the decrease of Rs. 1,328 would appear to have occurred mainly in the *actual collections* of the three principal taxes—profession, house and land—and also warrant fees, which brought in altogether about Rs. 1,240 less than the anticipated sum, as the collection work could not be completed within the year. This is due partly to the delay in the supply of printed forms of demand notices, &c., from the Lawrence Asylum Press at Madras, as already explained in paragraph 2 of the last budget report (G.O., No. 286 M., dated 2nd March 1899) and partly also to additional work thrown on the establishment concerned on account of a systematic general revision of the house and land tax registers made in the year.

The profession tax collections, however, exceeded the previous year's figure to the extent of about Rs. 650. Taxes on vehicles and animals, avenue receipts, conservancy receipts or sale-proceeds of poudrette, markets and license fees are some of the items showing an increased income as compared with the revised estimate or the actuals of the previous year.

Of the outstandings appearing in the demand, collection and balance statements IV-A and IV-B, recoverable items have almost all been already realised after the close of the year.

A.—Receipts from taxation.

8. *Tax on Arts, &c.*—As usual, this tax was levied on all classes of the schedule. As the result of the annual revision of the registers, the demand as originally assessed by the Chairman rose from Rs. 5,983 in the previous year to Rs. 7,081-8-0 ; deducting Rs. 250 remitted by the Council on appeal, the net or finally settled demand rose from Rs. 5,830 to Rs. 6,831-8-0 and the number of assessees from 901 to 1,127, the increase being distributed under the several classes of the schedule except the first and fourth classes. The collections amounted to Rs. 5,976 or 87·5 per cent. of the finally settled demand ; Rs. 849 remained uncollected at the close of the year.

The arrear demand of Rs. 346-6-6 was fully adjusted, Rs. 315-6-6 being realised and Rs. 31 remitted by the Council.

9. *Taxes on Buildings and Lands.*—The rate ($6\frac{1}{4}$ per cent.) and the principles of assessment underwent no change—*vide* the note appended to statement I. As already reported to Government, the assessment books of these taxes were completely revised by the Chairman during the year. Under sub-section (3) of section 66 of the Act, the revised assessments are to be adopted in the current year.

Tax on Buildings—The current demand of this tax amounted to Rs. 15,095-12-6 on 7,147 buildings as compared with Rs. 14,268-12-11 on 6,653 buildings in the previous year, the increase of Rs. 826-15-7 and 494 buildings, on account of new buildings assessed in the year, being distributed under all the classifications in the statement. Rs. 13,957-13-10, or 92 per cent. of the said demand were collected, Rs. 56-6-0 remitted, and Rs. 1,081-8-8 remained outstanding at the close of the year.

The arrear demand of Rs. 70-1-9 was supplemented in the year under report by Rs. 245-11-2, being the taxes imposed on account of 1897-98 after settlement of objections, and of the total amount thus obtained, viz., Rs. 315-12-11, as much as Rs. 228-3-4 was realized, leaving a balance of Rs. 87-9-7 at the end of the year.

Tax on Lands.—There was a slight addition of Rs. 23-5-4 to the old demand of this tax, owing chiefly to the assessment of the land near the Sea Customs House, intended for the construction of a Government Warehouse but now let out by the Customs Collector for the deposit of salt bags. Of the current demand of Rupees 2,036-1-0, Rs. 1,912-10-9, representing about 94 per cent., were collected, leaving a balance of Rs. 123-6-3 at the close of the year.

Rs. 2-9-6 from the arrear demand of Rs. 3-5-6 were collected and the remainder, As. 12, was remitted by the Council.

10. *Taxes on Vehicles, Animals and Carts.*—There was altogether an increase of Rs. 35 in the current demand (Rs. 4,352) in respect of these items and of Rs. 112-8-0 in the actual collections within the year, the balance at the close of the year being Rs. 140.

Out of the total arrear demand of Rs. 229, as much as Rs. 173-8-0 was realised, Rs. 49 was removed from the accounts as irrecoverable and Rs. 6-8-0 remained outstanding at the end of the year.

11. *Coercive Processes.*—Including 751 warrants, issued for the first time, for the recovery of private scavenging fees amounting to Rs. 493-15-3 and also 24 warrants for Rs. 898-10-0 on account of rents, &c., 6,304 warrants were issued during the year under report for an aggregate sum of Rs. 11,139-4-11, showing a decrease of 1,230 in the number of tax warrants and Rs. 1,578-10-10 in the amount of the taxes involved, which, of course, was owing to the imposition of a warrant fee. But at the close of the year, so many as 992 warrants remained unexecuted instead of 102 at the close of the previous year, the increase being due to the causes already explained in paragraph 7 *supra*.

In respect of 25 warrants, property had to be distrained, and in one case only, the distrained property had to be sold. Thirty-three prosecutions were instituted for the recovery of Rs. 75-2-6, and in twelve of the cases, collections were made after judgment.

12. *Tolls—Gross Receipts, Rs.* 2,325.—This is the sum for which the collection of tolls at the maximum rates at the three principal entrances into the town was let out to the highest bidder. As the renter for the previous year had suffered a loss and as there was no prospect of a better income, the competition at the sale was not good. Hence the comparative decrease in the income. The net receipts amounted to Rupees 2,181-12-0.

13 *Incidence of Taxation.*—The average incidence per head of municipal population (40,922) was slightly higher than in the previous year, in consequence of the increased income from rates and taxes on the whole, viz., As 11-5 inclusive of tolls, and As. 10-6 exclusive of tolls, as compared with As. 11-4 and As. 10-3, respectively.

14. *Fees under Act II of* 1888.—The item of Rs. 130 shown under this head represents the fees levied on account of the licenses issued in respect of buildings for theatrical and other such public performances according to the rules under the Places of Public Resort Act.

B.—Miscellaneous Receipts.

15. *Rent of Lands, Houses, &c.*—(i) *Rent of Lands.*—Rs. 753-6-0 against Rupees 690-6-4 in the previous year. The realisation of arrear rents amounting to Rs. 54-8-0 and competition at the sale of the Urwa garden plots contributed towards the increase.

(ii) *Rent of Buildings.*—The sum of Rs. 1,189-15-0 noted under this head was made up of (1) Rs. 1,125, the rent of the Petroleum Store; (2) Rs. 30, the *net* rent from the powder magazine, the renter bearing the cost of the guard, &c.; (3) Rs. 6, the rent of a spare shed near the Kankanadi toll-gate; and (4) Rs. 28-15-0, the rent collected on account of the vacant female apothecary's quarters used for some time as office of the District Medical and Sanitary Officer. The comparative decrease in the first item was caused by lack of competition at the last annual sale of the building in consequence of two principal kerosine-oil importers having given up trading here.

(iii) *Avenue Receipts.*—Rs. 613-2-7, an increase of Rs. 31-4-10 over the previous year, owing to better prices realised for fruits.

16. *Conservancy Receipts—Sale-proceeds of night-soil, &c.*—Rs. 567 were realised from poudrette, or Rs. 120-8-0 in excess of the previous year, owing to an increased demand for the manure.

17. *School-fees, Rs.* 433-7-9.—The decrease of Rs. 83-3-0, as compared with the previous year, was due to the closure of one of the Hindustani schools (Butchers' lane) for want of sufficient attendance and competent masters and also to the decline in the attendance of the remaining seven primary schools—four for lower class Hindus and three Hindustani for Muhammadans and Mappillas.

18. *Sale-proceeds, &c., of Medicines, Rs.* 115-15-0.—This sum represents the value of outside prescriptions compounded at the Wenlock hospital, the previous years' receipts being Rs. 78-4-6.

19. *Income from Markets and Slaughter-houses.*—(i) The income from the Webster market amounted to Rs. 3,647-15-0, namely, Rs. 3,150, the rent of the main building, Rs. 384, of the four beef stalls, and Rs. 113-15-0 from the garden, as compared with Rs. 3,336-5-10, viz., Rs. 2,950, Rs. 228 and Rs. 158-5-10, respectively, in the previous year. The increase from rents was due to better competition at the sale, and the decrease in the garden receipts, of course, to lesser sales of plants and flowers. The net income from the market was Rs. 3,263-12-3, or about Rs. 450 in excess of the previous year.

A market (simple tiled sheds) was provided during the year in the central ward of the town at a cost of about Rs. 400, for the use of the vegetable and flower selling women who were hitherto hawking about on the public road in the locality, and it realised a rent of Rs. 182 for nine months from July to March last. For the current year, it has been leased out for Rs. 300.

(ii) The slaughter-house brought in Rs. 495-8-0, viz., Rs. 470 from rent of the building and the remainder, Rs. 25-8-0, from the manure, instead of Rs. 469-8-0 on the whole in the previous year. The net income was Rs. 474-1-0.

20. *Other fees*—(i) *Warrant and Distraint Fees, Rs.* 519-4-0.—The comparative decrease of Rs. 198-14-0 was in consequence of a considerable reduction in the number of the house, land and profession tax warrants executed within the year—*vide* paragraph 7 *supra*.

(ii) *License fees.*—Rs. 1,349-4-0 (Rs. 244-12-0 more than in the previous year) comprising—(1) temporary erections, sections 170, 173 and 179, Rs. 75-4-0; (2) permanent buildings, section 180, Rs. 187; (3) offensive and dangerous trades, section 188, Rs. 682-4-0; (4) slaughtering animals, section 191 (4), Rs. 79-12-0; and (5) a private fish-market, section 196, Rs. 325. The increase was mainly on account of this last item, as at the usual sale of the right of keeping the market, a fee of Rs. 325 was offered by the highest bidder as against Rs. 120 before.

21. *Fines, Rs.* 164-4-0.—In consequence of a smaller number of prosecutions having been instituted, Police as well as municipal, and of the imposition of low fines by the Bench of Magistrates, the receipts under this head were only half the last year's.

22. *Grants and Contributions.*—Under (*a*) from Government—(i) Education, schools—are shown Rs. 176-15-0, composed of Rs. 41-15-0 on account of result grants for girls reading in some of the primary schools; Rs. 60, salary grant for the drawing master; and Rs. 75, that of the gymnastic instructor, including arrears of the previous year. The sum of Rs. 60 appearing under "other purposes," represents the supervisor's salary grant.

The item of Rs. 1,600 shown under (*b*) (ii) medical was the usual contribution paid by the District Board towards the maintenance of the two municipal hospitals—Rs. 600 for the Wenlock hospital and Rs. 1,000 for the Women and Children's; while that of Rs. 704-6-7 (including arrears of previous years) under (iii) "other purposes," represents a moiety of the salary of the Civil Apothecary on plague duty at this port, paid till October last by the same body as per G.O., Mis. No. 85 P., dated 25th February 1898; but from November, this contribution has been held in abeyance pending orders of Government on a reference said to have been made by the Collector inquiring with reference to the recent regulation regarding the distribution of plague charges, whether the said contribution could be continued.

23. *Private Scavenging fees.*—This cess continued to be levied at one-third of the house-tax; 2,391 houses were served or 32 more than before, the current collections amounting to Rs. 1,915–9–7 out of the demand, Rs. 1,992–10–3; Rs. 77–0–8 remained as balance at the close of the year.

The arrear demand of Rs. 77–7–8 was fully adjusted, Rs. 35–8–4 being realised and the remainder Rs. 41–15–4 remitted by the Council. On the whole, the collections exceeded the previous year's actuals by Rs. 31–3–10.

The cost of the private scavenging service as shown in Grant 3, (5) (*b*), was Rs. 1,521–10–6; the saving of Rs. 429–7–5 accruing from the service could not, as was intended, be utilized in the purchase of new carts for the removal of night-soil, which are needed. This will be done in the current year.

24. The remaining items in Statement I are usual more or less, being of a fluctuating nature and therefore do not require special notice here.

III.—EXPENDITURE.

25. The total expenditure in the year was Rs. 39,334–5–3 as compared with Rs. 52,186–1–6 in the previous year when a much larger than ordinary outlay had been incurred on public works. As compared with the revised estimate, the decrease of about Rs. 1,600 was caused principally by the savings of (1) Rs. 350 under Grant 1, New works—Buildings, the contracts for the construction of the vegetable and flower market and the erection of three iron latrines having been taken up for less than the estimated amounts, (2) Rs. 163, under repairs, buildings, the periodical repairs to buildings costing, less than usual, (3) Rs. 250 under Grant 2-(5) Building, Furniture, &c., Grants, the usual allotment made for the purpose not having been utilized for want of timely applications for aid (4) Rs. 300 under Grant 4-(1) Lighting, the repainting, &c., of the street lamps which was provided for not having been done, and other minor savings.

It must also be mentioned that with the prospect of an unavoidable reduction in the actual collections of taxes referred to in paragraph 7 *supra* and also owing to the fear that the plague raging in Bombay might at any moment be brought down here, in order to be fully fore-armed for the event with sufficient funds, only the usual or necessary expenditure was incurred and all possible economy therein was practically insisted upon.

The actual closing balance, however, exceeded the amount entered in the revised estimate by only about Rs. 280.

26. *Grant 1, Public Works.*—For the reasons just explained, the total outlay under this grant amounted to Rs. 9,501–10–7 instead of Rs. 10,160 allotted in the revised estimate. The construction of a vegetable and flower market at a cost of Rs. 400–11–6— *vide* paragraph 19 *supra*, and the erection, at a cost of Rs. 252–14–9, of three additional four seat latrines (Horbury's Patent) purchased in previous years were the only new works of public utility executed during the year under report.

The maintenance of the roads cost an ordinary sum, viz., Rs. 6,262–10–3, which is nearly two and-a-half times the net toll income. The general condition of the roads continued to be good. Rs. 989–4–7 were expended on the conservancy of the public drains and nullas, which were always kept clean.

M.R.Ry. J. S. Albuquerque Avargal, one of the elected councillors, continued to exercise supervison and give his professional advice in the matter of public works; and, as usual, M.R.Ry. D. Vaz Avargal and M.R.Ry. H. Krishna Rao Avargal, B.A., personally superintended the disbursements to the menial servants of this and other branches.

27. *Grant 2, Education.*—The expenditure under this grant amounted to Rs. 4,329–6–3 against the revised estimate of Rs. 4,620, and against Rs. 4,548–13–3, the actuals of the previous year, the usual allotment of Rs. 250 for building, furniture, &c., grants having remained unutilized as stated in paragraph 25 *supra*.

The five educational statements received as usual from the Assistant Inspector of Schools, West Coast division, are herewith accompanying, enclosure II.

28. *Municipal Schools on Salary Result System.*—The Butchers' Lane Hindustani school having been closed at the beginning of the year as mentioned in paragraph 17 above and paragraph 5 of the last budget report, only seven primary schools were maintained at a net cost of Rs. 1,178–13–6.

Statement V-A furnishes detailed statistics in respect of these schools, and on comparison with the previous year's statistics, leaving the abolished school out of account, they would appear to show a general decline in almost every way, for, the number on rolls at the end of the year fell from 332 to 289, the average attendance throughout the year from 263 to 252, and the fee income from Rs. 478–15–9 to Rs. 433–7–9; at the same time, the net cost to municipal funds rose from Rupees 1,043–15–3 to Rs. 1,178–13–6 and the average cost per pupil from Rs. 4–3–1 to Rs. 4–10–7. The only redeeming feature, however, was that the results of the annual examinations were comparatively better, 231 out of 262 pupils sent up having passed as against 226 and 271, respectively, in the previous year.

29. *Salary Grants.*—Only one lower secondary school, namely, the said department of the German Mission High school, continued to be aided under this head with the usual amount of grant, Rs. 521–2–0. At the end of the year, there were 135 pupils on rolls in the aided department—91 in the three lower secondary forms and 44 in the two primary classes—instead of 143, 89 and 54, respectively, in the previous year. Twelve boys appear to have been sent up for the Lower Secondary Examination, half the number being successful; 17 for the Primary Examination, of whom 13 passed, the corresponding figures of the previous year being 17 and 8 and 20 and 14, respectively, from which it will be seen that although the number of examinees was less, yet the results were comparatively better.

30. *Result Grants.*—The usual allotment of Rs. 1,800 made for the purpose was fully utilized. As in the previous year, three lower secondary schools and 11 primary schools were aided under this system. According to the Director's proposal sanctioned in G.O., No. 442, Educational, dated 21st July 1898, the assignments of grants this year were fixed by the inspecting officers after the conclusion of the grant examination in proportion to the earnings of each school.

On 31st March last, there were 1,481 pupils in all the fourteen schools or 54 less than on the coresponding date of 1897–98. The number of examinees and those successful also fell from 1,071 and 854, respectively, to 919 and 771, respectively.

In common with the salary result and salary grant schools, these schools also shared the general decline in the attendance, which appears to be chiefly due to the poorer condition of the labouring classes on account of continued depression in the tile industry in consequence of plague at Bombay.

31. *Inspection.*—There were, as usual, one supervisor on Rs. 15 per mensem for primary schools, and the Local Fund inspecting schoolmaster of Muhammadan schools in the district, for Hindustani schools, getting at Re. 1 per diem for the days spent in the municipality and thus Rs. 27 for the whole year.

The charges on the whole were Rs. 219 or Rs. 22–8–8 less than in the previous year.

32. *Grant 3, Medical Services, Sanitation, &c.*—The total expenditure under this grant amounted to Rs. 17,890–0–1 against Rs. 18,040 set apart in the revised estimate and against Rs. 20,431–11–5, the actuals of the previous year; the decrease as compared with the latter figure occurred in the maintenance of the hospitals owing to the saving of the female apothecary's salary and the lesser value of the medical supplies; and in the outlay on conservancy in consequence of the lower rate for which the contract for the removal of street sweepings was undertaken and the reduction in the plague charges from Rs. 2,729–11–5 to Rs. 2,346–13–1.

33. *Hospitals and Dispensaries, Rs.* 6,878–11–6.—(1) One hospital for males—the Wenlock hospital—and another for females and children continued to be maintained by the municipality. The efforts of the Dufferin's Fund Secretary and advertisements in the principal Madras newspapers did not succeed in securing the services of a female medical subordinate for the latter institution, and consequently it had to continue in charge of one of the municipal male hospital assistants, subject to

more frequent supervision on the part of the District Medical Officer and his assistant. Lately the services of a female hospital assistant have been secured, and she is expected to join the hospital shortly. The accompanying report (Enclosure III) from the District Medical and Sanitary officer and statement XII furnish the required information regarding the hospitals.

(2) The total attendance at both the hospitals was far more satisfactory than in the previous year, viz., 24,970—at the Wenlock hospital 17,759 and at the Women and Children's hospital 7,211—as compared with 22,845, 16,299 and 6,546, respectively, the increase being 2,125, 1,460 and 665, respectively. While there was a nominal increase of one in the number of in-patients treated at the male hospital, there was a decrease of as many as one hundred in the number of such admissions in the female hospital which must, of course, be due to the absence of a female doctor and not to the cause assigned by the District Medical Officer in paragraph 5 of his report, namely, "owing to the small allotment for dieting, more in-patients could not be treated," seeing that the expenditure (Rs. 935-13-2) on dieting was almost the same as in the previous year (Rs. 943-10-8); the average rate of dieting a patient, however, became higher, Rs. 1-11-7, instead of Rs. 1-7-7, owing to the issue of extras.

(3) One thousand and fifty-seven operations, major and minor, were performed at the two hospitals, an improvement of 244 over the previous year.

34. *Midwives.*—Out of three midwives in the previous year, the senior one on Rs. 18, after working for the first two months in the year under report, making 29 cases, proceeded on leave without pay for a long period, and latterly died, and so the two junior midwives, on Rs. 13 each, worked throughout the year, attending between them 325 cases of labour as compared with 48 cases attended by them during the last five months of the previous year, and with 288 cases, their minimum outturn for the year, at twelve cases each monthly. On the whole the outturn was 354 or 146 cases more than before. The Superintendent, Government Maternity Hospital, Madras, has already arranged to send a midwife shortly to take the deceased woman's place.

Contributions to other bodies.—The sum of Rs. 357-8-0 shown under this head represents the annual aid given to the Basel Mission and the St. Joseph's Leper Asylums, at Rs. 15 each a month, with a slight deduction for short attendance at the former asylum.

35. *Vaccination, Rs.* 454-0-2.—A female vaccinator on Rs. 8 provided for in the budget could not be entertained for want of a suitable candidate for the post. As hitherto two male vaccinators (Rs. 18 and Rs. 10) worked throughout the year, performing 2,452 operations with animal lymph—959 of them infantile and 1,493 above one year of age—an increase of 532 over the prescribed outturn, at 160 cases a month, and of 51 over the previous year's outturn. As in the previous year, about 99 per cent. of infantile vaccinations were successful and 97·3 per cent. on the whole. The number of infantile operations, however, decreased to the extent of 276 owing to the available number of children of six months and above, eligible for being compulsorily vaccinated, being much smaller than before, in consequence of a noteworthy decline in the registered number of births for the year. But the decrease of 276 in question was more than made up by the vaccinations "above one year of age" which rose from 1,166 to 1,493, and that with a higher percentage of success.

The average cost per successful operation was As. 3-1 or 4 pies less than in the previous year.

As the outcome of the personal exertions of the vaccinators in going about from door to door in quest of cases, only 266 defaulters had to be reported to the Magistrate under section 138 (2) of the Act—83 less than in the previous year.

36. *Registration of Births and Deaths.*—The sum of Rs. 201-10-0 shown under this head represents the remuneration paid to the ward sanitary sub-inspectors at two annas per birth and one anna per death reported by them. As compared with the previous year, there was a decrease of Rs. 47-6-10 in the expenditure and of 190 in the number (1,080) of births registered and of 144 in that of the deaths (1,127). The death-rate, which was 27·5 per mille against about 31, is accepted by the District Medical and Sanitary Officer as accurate, but as regards the birth-rate, 26·4

per mille, he says that, in order to evade compulsory vaccination, the occurrences among the ignorant and illiterate classes are concealed or not fully reported. How this could be it is rather difficult to understand, considering that the sub-inspectors were given extra remuneration for finding out and reporting the occurrences in their respective wards, unless it be that they were more than recouping themselves any decrease in the remuneration by encouraging or abetting persons to evade compulsory vaccination.

However now that a set of reporters have been appointed, as already reported to Government in my letter of the 17th ultimo, G. No. 11, their work in this direction is being particularly watched and, should the registration not show any improvement, some other means to secure proper results will have eventually to be devised.

No prosecutions were instituted for failure to report births or deaths.

37. (5) *Sanitation.*—Excluding the epidemic charges of Rs. 2,346-13-1 mostly incurred on account of the inspection of the arrivals by sea from the Bombay side—which was the usual precautionary measure taken, successful in that no plague case arrived or appeared here—and also in connection with cholera which had been prevalent in Mappilla quarters for a very short time at the beginning of the year, the usual conservancy arrangements, viz., 37 scavengers, 24 road sweepers and a supervising staff composed of one certificated sanitary inspector and eight ward sub-inspectors, &c., cost Rs. 7,857-13-4, or Rs. 781-2-3 less than in the previous year, the decrease being chiefly due to the much lower sum for which the contract for the removal of street sweepings was undertaken, the outcome of very keen competition at the sale.

The supervising staff mentioned above has been reorganised from the 1st April last as per G.O., Mis. No. 258 M., dated 27th February 1899, by abolishing the eight posts of ward sub-inspectors and creating in their stead one additional certificated sanitary inspector's place and four lower paid posts of maistries.

As usual, the general sanitary condition of the municipality remained satisfactory and the state of the public health was comparatively much better. The District Medical and Sanitary Officer admits that "the general sanitary condition of the town is good on the whole" and also that "the condition of private gardens and backyards has much improved; at the same time he makes certain remarks regarding the necessity for improving the condition of the Mappilla, &c., quarters, in fact, the western side of the town. But it must be repeated here that all that is possible to do was and is still being done and that as often represented before, no tangible or lasting improvement can be achieved unless and until proper drainage and water-supply are introduced in those parts, the present overcrowding or overpopulousness is by some means abated, and, first of all, the burial-grounds, which are in the vicinity of dwelling houses, mosques, &c., are duly closed. The preliminary survey, &c., for a drainage and water-supply scheme have been finished long ago, and the Sanitary Engineer to Government, in reply to an inquiry made of him with reference to G.O., No. 227 M, dated 18th February last, as to what has been done in the matter, says that the preparation of the design for the scheme can be taken up only in order of urgency, &c. Some provision has been made in the current year's budget for the purpose of public burial-grounds for the Muhammadan community. The remaining remedy of abating overcrowding, &c., is a thing for the future to think of.

There has been no inspection of this town by the Sanitary Commissioner or by his Deputy since December 1894.

38. *Grant 4, Lighting and Miscellaneous Municipal purposes.*—The expenditure on account of the several items of this grant was more or less usual. Under (1) Lighting, the rate of the contract for lighting the street lamps was lower than before, viz., annas 8-9 per lamp a month instead of annas 11-8; under (5) Avenues, their maintenance absorbed only Rs. 402-14-1 instead of Rs. 546-12-8 in the previous year owing to the employment of a lesser number of coolies for watering and other work and against Rs. 613-2-7, the avenue receipts for the year. On the whole the expenditure was Rs. 3,641-6-8 or less than the revised estimate and the previous year's actuals.

more frequent supervision on the part of the District Medical Officer and his assistant. Lately the services of a female hospital assistant have been secured, and she is expected to join the hospital shortly. The accompanying report (Enclosure III) from the District Medical and Sanitary officer and statement XII furnish the required information regarding the hospitals.

(2) The total attendance at both the hospitals was far more satisfactory than in the previous year, viz., 24,970—at the Wenlock hospital 17,759 and at the Women and Children's hospital 7,211—as compared with 22,845, 16,299 and 6,546, respectively, the increase being 2,125, 1,460 and 665, respectively. While there was a nominal increase of one in the number of in-patients treated at the male hospital, there was a decrease of as many as one hundred in the number of such admissions in the female hospital which must, of course, be due to the absence of a female doctor and not to the cause assigned by the District Medical Officer in paragraph 5 of his report, namely, "owing to the small allotment for dieting, more in-patients could not be treated," seeing that the expenditure (Rs. 935-13-2) on dieting was almost the same as in the previous year (Rs. 943-10-8); the average rate of dieting a patient, however, became higher, Rs. 1-11-7, instead of Rs. 1-7-7, owing to the issue of extras.

(3) One thousand and fifty-seven operations, major and minor, were performed at the two hospitals, an improvement of 244 over the previous year.

34. *Midwives.*—Out of three midwives in the previous year, the senior one on Rs. 18, after working for the first two months in the year under report, making 29 cases, proceeded on leave without pay for a long period, and latterly died, and so the two junior midwives, on Rs. 13 each, worked throughout the year, attending between them 325 cases of labour as compared with 48 cases attended by them during the last five months of the previous year, and with 288 cases, their minimum outturn for the year, at twelve cases each monthly. On the whole the outturn was 354 or 146 cases more than before. The Superintendent, Government Maternity Hospital, Madras, has already arranged to send a midwife shortly to take the deceased woman's place.

Contributions to other bodies.—The sum of Rs. 357-8-0 shown under this head represents the annual aid given to the Basel Mission and the St. Joseph's Leper Asylums, at Rs. 15 each a month, with a slight deduction for short attendance at the former asylum.

35. *Vaccination, Rs.* 454-0-2.—A female vaccinator on Rs. 8 provided for in the budget could not be entertained for want of a suitable candidate for the post. As hitherto two male vaccinators (Rs. 18 and Rs. 10) worked throughout the year, performing 2,452 operations with animal lymph—959 of them infantile and 1,493 above one year of age—an increase of 532 over the prescribed outturn, at 160 cases a month, and of 51 over the previous year's outturn. As in the previous year, about 99 per cent. of infantile vaccinations were successful and 97·3 per cent. on the whole. The number of infantile operations, however, decreased to the extent of 276 owing to the available number of children of six months and above, eligible for being compulsorily vaccinated, being much smaller than before, in consequence of a noteworthy decline in the registered number of births for the year. But the decrease of 276 in question was more than made up by the vaccinations "above one year of age" which rose from 1,166 to 1,493, and that with a higher percentage of success.

The average cost per successful operation was As. 3-1 or 4 pies less than in the previous year.

As the outcome of the personal exertions of the vaccinators in going about from door to door in quest of cases, only 266 defaulters had to be reported to the Magistrate under section 138 (2) of the Act—83 less than in the previous year.

36. *Registration of Births and Deaths.*—The sum of Rs. 201-10-0 shown under this head represents the remuneration paid to the ward sanitary sub-inspectors at two annas per birth and one anna per death reported by them. As compared with the previous year, there was a decrease of Rs. 47-6-10 in the expenditure and of 190 in the number (1,080) of births registered and of 144 in that of the deaths (1,127). The death-rate, which was 27·5 per mille against about 31, is accepted by the District Medical and Sanitary Officer as accurate, but as regards the birth-rate, 26·4 per mille, he says that, in order to evade compulsory vaccination, the occurrences among the ignorant and illiterate classes are concealed or not fully reported. How this could be it is rather difficult to understand, considering that the sub-inspectors were given extra remuneration for finding out and reporting the occurrences in their respective wards, unless it be that they were more than recouping themselves any decrease in the remuneration by encouraging or abetting persons to evade compulsory vaccination.

However now that a set of reporters have been appointed, as already reported to Government in my letter of the 17th ultimo, G. No. 11, their work in this direction is being particularly watched and, should the registration not show any improvement, some other means to secure proper results will have eventually to be devised.

No prosecutions were instituted for failure to report births or deaths.

37. (5) *Sanitation.*—Excluding the epidemic charges of Rs. 2,346-13-1 mostly incurred on account of the inspection of the arrivals by sea from the Bombay side—which was the usual precautionary measure taken, successful in that no plague case arrived or appeared here—and also in connection with cholera which had been prevalent in Mappilla quarters for a very short time at the beginning of the year, the usual conservancy arrangements, viz., 37 scavengers, 24 road sweepers and a supervising staff composed of one certificated sanitary inspector and eight ward sub-inspectors, &c., cost Rs. 7,857-13-4, or Rs. 781-2-3 less than in the previous year, the decrease being chiefly due to the much lower sum for which the contract for the removal of street sweepings was undertaken, the outcome of very keen competition at the sale.

The supervising staff mentioned above has been reorganised from the 1st April last as per G.O., Mis. No. 258 M., dated 27th February 1899, by abolishing the eight posts of ward sub-inspectors and creating in their stead one additional certificated sanitary inspector's place and four lower paid posts of maistries.

As usual, the general sanitary condition of the municipality remained satisfactory and the state of the public health was comparatively much better. The District Medical and Sanitary Officer admits that "the general sanitary condition of the town is good on the whole" and also that "the condition of private gardens and backyards has much improved; at the same time he makes certain remarks regarding the necessity for improving the condition of the Mappilla, &c., quarters, in fact, the western side of the town. But it must be repeated here that all that is possible to do was and is still being done and that as often represented before, no tangible or lasting improvement can be achieved unless and until proper drainage and water-supply are introduced in those parts, the present overcrowding or overpopulousness is by some means abated, and, first of all, the burial-grounds, which are in the vicinity of dwelling houses, mosques, &c., are duly closed. The preliminary survey, &c., for a drainage and water-supply scheme have been finished long ago, and the Sanitary Engineer to Government, in reply to an inquiry made of him with reference to G.O., No. 227 M, dated 18th February last, as to what has been done in the matter, says that the preparation of the design for the scheme can be taken up only in order of urgency, &c. Some provision has been made in the current year's budget for the purpose of public burial-grounds for the Muhammadan community. The remaining remedy of abating overcrowding, &c., is a thing for the future to think of.

There has been no inspection of this town by the Sanitary Commissioner or by his Deputy since December 1894.

38. *Grant 4, Lighting and Miscellaneous Municipal purposes.*—The expenditure on account of the several items of this grant was more or less usual. Under (1) Lighting, the rate of the contract for lighting the street lamps was lower than before, viz., annas 8-9 per lamp a month instead of annas 11-8; under (5) Avenues, their maintenance absorbed only Rs. 402-14-1 instead of Rs. 546-12-8 in the previous year owing to the employment of a lesser number of coolies for watering and other work and against Rs. 613-2-7, the avenue receipts for the year. On the whole the expenditure was Rs. 3,641-6-8 or less than the revised estimate and the previous year's actuals.

Seven additional lights were put up, making the total number of public lights 278, or 61 per square mile lit at a cost of Rs. 2,008–13–0.

The old Webster market, the new vegetable, &c., market, the slaughter-house and the travellers' bungalow were all in a proper state of repair.

39. *Grant 5, Supervision and Management, Rs.* 3,908–4–4.—The expenditure was usual and within the revised estimate. The toll-gates were all put in order and new rate boards provided at a cost of Rs. 138.

40. *Balances.*—The year closed with a balance of Rs. 9,019–1–8 under Municipal fund and Rs. 822–3–3 under endowments. The former slightly exceeded the revised estimate, *vide* paragraph 25 *supra*.

41. This report was placed before the Municipal Council at its special meeting held this day, and the resolution passed adopting the report is enclosed (enclosure IV).

Enclosure.

Concise Medical and Sanitary Report for the official year 1898–99.

Public Health.—The public health has been rather bad* during the year. Fever and bowel-complaints prevailed to a great extent. Many cases of malarial fever among the coolies returning from the ghâts were treated. Cholera and small-pox, which prevailed during the previous year, continued during the early part of the year under report, causing 13 and 9 deaths, respectively. Typhoid fever prevailed as usual among the native population. The disease made its appearance soon after the rains set in and continued till about the end of the year, but isolated cases were met with throughout the year.

* But it had improved and was comparatively much better than in the previous year.

(Sd.) D. Ananthaiya,
27*th May* 1899. *Chairman, M. C.*

Measles and chicken-pox also prevailed to a large extent among the children.

2. *Vital Statistics.*—There has been a fall in the number of both births and deaths reported during the year. As regards deaths, the figure may be accepted as correct, but as regards births, I doubt very much if all births were reported. To avoid the enforcing of compulsory vaccination rules, I believe generally the ignorant and the illiterate class are concealing a number of births which remain unreported.† The ward sub-inspectors appear to report only such cases as are brought to their notice. They should be warned to work better in this important direction. There were 1,080 births and 1,127 deaths during the year against 1,270 and 1,271 in the previous year. Birth-rate per mille was 26·39 and death-rate 27·54.

† *Vide*, paragraph 36 of the Municipal report.

(Sd.) D. Ananthaiya,
27*th May* 1899. *Chairman, M. C.*

The rainfall was abundant and seasonable and the paddy crop was very good. Water-supply was also ample during the year.

3. *Sanitation.*—The conservancy establishment remained the same as the previous year. No notice appears to have been taken of the remark made in the last report that the working staff ‡ is quite inadequate for a town of this area and population. The general sanitary condition of the town is good on the whole, except the wards inhabited by the Mappillas and the fishermen. No attempts appear to have been made to improve their condition. § Their drinking water wells, perhaps with a few exceptions, are mere cesspits situated in most cases by the side of the drains. The highly objectionable practice of using the large drains and water-courses as latrines still continues. In some places private latrines are so constructed as to allow the contents to find their way directly into these drains.

‡ Already reorganized with reference to G.O., Mis. No. 258 M., dated 27th February 1899, and the reorganised staff is now *exclusively* employed on conservancy supervision, *vide* paragraph 37 of the Municipal report.

(Sd.) D. Ananthaiya,
27*th May* 1899. *Chairman, M. C.*

§ *Vide* paragraph 37 of the Municipal report.

(Sd.) D. Ananthaiya,
27*th May* 1899. *Chairman, M. C.*

The condition of private gardens and back-yards has much improved. No new wells or latrines* were constructed during the year.

* This is an error. Three iron latrines were newly constructed during the year under report and are being used by the public—*vide* paragraph 26 of the Municipal report

(Sd.) D. Ananthaya,
27*th May* 1899. *Chairman, M. C.*

4. *Vaccination.*—The number vaccinated during the year was 2,452 against 2,401 in the previous year. There has been a fall in infantile vaccination—959 against 1,235—in the previous year, perhaps due to prevalence of measles and chicken-pox among the children for several months. There has been an increase in secondary vaccination. The percentage of successful vaccination is also more satisfactory—primary 98·75, secondary 99·68 and revaccination 84·15.

Two hundred and sixty-six persons were prosecuted under the Compulsory Vaccination Act.

5. *Hospitals and Dispensaries.*—The two hospitals—Wenlock hospital and Women and Children's hospital—continue to be maintained by the municipality. Both have sufficient accommodation. The Wenlock hospital building is in good repairs, but the roofing † of the Women and Children's hospital requires renewal. No † improvements have been effected since last report.

† The immediately necessary repairs have been made since the last report Renewal entirely involves rather a large expenditure and will be done in due time. An est mate for the purpose has already been made.

(Sd.) D. Ananthaya,
27*th May* 1899. *Chairman, M. C.*

Amount recovered by sale of medicines to patients is Rs. 115–15–0. During the year 17,360 out and 399 in patients were treated in the Wenlock hospital against 15,901 and 398 in the previous year. Owing to the small allotment for dieting, more in-patients could not be treated.‡ At the Women and Children's hospital 7,068 out and 143 in patients were treated against 6,303 and 243 in the previous year.

‡ This conclusion is erroneous as the expenditure on dieting was the same as in the previous year, *vide* paragraph 33 of the Municipal report.

(Sd.) D. Ananthaya,
27*th May* 1899. *Chairman, M. C.*

As the services of a female apothecary could not be secured for the charge of this institution, a hospital assistant was placed in charge, and the District Medical and Sanitary Officer or the Assistant Surgeon was visiting the institution twice or thrice a week to see all the patients both in and out.

There were eighteen deaths at the Wenlock hospital and four deaths at the Women and Children's hospital during the year. No deaths from septic diseases.

One thousand and fifty-seven operations were performed during the year—844 at the Wenlock Hospital and 213 at the Women and Children's hospital—against 533 and 280 in the previous year.

The establishment will be sufficient when the services of a female apothecary or hospital assistant are secured.

One Mrs. Lazarus, now at Masulipatam, has already been selected by the Honorary Secretary of the Dufferin Fund, and she is expected to join the hospital shortly. A female apothecary or female medical practitioner could not be got.

(Sd.) D. Ananthaya,
27*th May* 1899. *Chairman, M. C.*

6. *Midwives.*—Two midwives worked during the whole year, and one, who took leave and since died, worked only during the first two months. Three hundred and fifty-four cases were conducted by them, 146 cases more than in the previous year.

7. *General Remarks.*—The Surgeon-General with the Government of Madras inspected the hospitals in November 1898.

Strict preventive measures against plague continued during the year with a very gratifying result.

(Signed) C. P. GANAPATI,
Assistant Surgeon in charge,
for *District Medical and Sanitary Officer.*

Mangalore,
15*th May* 1899.

Dis. No. 393-D. Rev.

Forwarded to the Collector of South Canara.

2. The roads within the municipality, as far as I have seen, are in a satisfactory condition.

3. The revision of assessments has been completed, but a few appeals are pending.

MANGALORE,
30*th May* 1899.

(Signed) G. NARAYANASAMI AIYAR,
Deputy Collector in charge of Mangalore Division.

Dis. No. 587-D.—Eng.

Forwarded.

2. *Paragraph 9. Taxes on Buildings and Lands.*—A separate report will be submitted as to the manner in which the revision of house and land tax registers has been carried out as soon as all the pending appeals shall have been disposed of.

3. In connection with the subject of house-tax, I wish to bring to the notice of Government the resolution of the Municipal Council, dated 16th December last, declaring that so much of the Aloysius College building as is used for school purposes as well as the Basel Mission school-houses are exempt from tax as falling under charitable purposes. This resolution of the majority of the Council, which was dissented from by the Chairman, the Revenue Divisional officer and two other councillors, appears to have been based on the decision of the Madras High Court in I.L.R., XXI Mad., 367, confirming the decision of the Sub-Judge of Madura (West) holding that the building in which the Native College at Madura is located is one exclusively used for charitable purposes and therefore exempt from house-tax under section 63 (1) of the District Municipalities Act. But the circumstances of these institutions seem to me to be different from those of the Madura College. For, while the latter college appears to vest in a committee who cannot appropriate any part of the income derived from fees and other sources for their own benefit but must spend it wholly for the promotion and encouragement of education, the institutions in question vest in the two missions mentioned above who may, if they like, use the income for purposes unconnected with the schools. It is also to be remarked that the Council passed the above resolution without apparently taking any legal advice on the point as suggested by Government in its Order, Mis. No. 2370 M., dated 29th October 1897. If the above resolution of the Council remains in force, it is very likely that other educational institutions in the town will also ask for exemption and the result will be that the municipal revenue will suffer to the extent of a few hundreds of rupees every year.

4. *Paragraph 18. Sale-proceeds of Medicines.*—The receipts under this head would show considerable improvement if, instead of charging only for compounding outside prescriptions, payment at moderate rates were demanded, agreeably to section 127 (1) of the Act from all persons except those who are really poor, for medical advice and treatment obtained by them from municipal hospitals.

5. *Paragraph 21. Fines.*—Enquiries will be made and necessary instructions issued with regard to the Chairman's statement about the imposition of low fines by the Bench Magistrates.

6. *Paragraph 22. Plague Expenditure.*—In my letter, Dis. No. 42 R./P., dated 20th May 1899 sent in reply to G.O., Ref. on C. No. 4806, dated 10th idem, I have proposed that the cost of the establishments maintained at the seaports in this district for the examination of passengers coming from the Bombay Presidency, &c., by sea should be met from the Provincial Funds.

7. *Paragraph* 26. *Roads.*—I do not agree with the Revenue Divisional officer in his remark that the roads within the municipality are in good condition. A few of the principal roads are kept in good repair, but others are much neglected; compared with roads in other municipalities the roads here are no doubt good, but this municipality is exceptionally favored by the laterite soil, &c., which renders the work of road repair easy and inexpensive. If, therefore, the work were better supervised, there is no reason why all the roads should not be equally good. The expenditure

on communications, though $2\frac{1}{2}$ times the toll receipts as pointed out by the Chairman, is less than the total sum realized from tolls, tax on vehicles and tax on animals. The expenditure on communications equals Rs. 6,262-10-3, whereas the receipts from the above three sources are over Rs. 6,700. It must be remembered that the toll receipts here are smaller than elsewhere by reason of the Netravati river forming the southern boundary of the municipality, the ferry fees for crossing which river go to the District Board.

MANGALORE,
2*nd June* 1899.

(Signed) A. F. PINHEY,
Acting Collector.

ORDER—No. 891 M., dated 26th June 1899.

The receipts and charges of the Mangalore Municipality for 1898-99 are compared below with the budget and revised estimates for the year and the actuals of 1897-98 :—

—	Actuals, 1897-98.	Budget estimate, 1898-99.	Revised estimate, 1898-99.	Actuals, 1898-99.

Dis. No. 393-D. Rev.

Forwarded to the Collector of South Canara.

2. The roads within the municipality, as far as I have seen, are in a satisfactory condition.

3. The revision of assessments has been completed, but a few appeals are pending.

MANGALORE,
30*th May* 1899.

(Signed) G. NARAYANASAMI AIYAR,
Deputy Collector in charge of Mangalore Division.

Dis. No. 587-D.—Eng.

Forwarded.

2. *Paragraph 9. Taxes on Buildings and Lands.*—A separate report will be submitted as to the manner in which the revision of house and land tax registers has been carried out as soon as all the pending appeals shall have been disposed of.

3. In connection with the subject of house-tax, I wish to bring to the notice of Government the resolution of the Municipal Council, dated 16th December last, declaring that so much of the Aloysius College building as is used for school purposes as well as the Basel Mission school-houses are exempt from tax as falling under charitable purposes. This resolution of the majority of the Council, which was dissented from by the Chairman, the Revenue Divisional officer and two other councillors, appears to have been based on the decision of the Madras High Court in I.L.R., XXI Mad., 367, confirming the decision of the Sub-Judge of Madura (West) holding that the building in which the Native College at Madura is located is one exclusively used for charitable purposes and therefore exempt from house-tax under section 63 (1) of the District Municipalities Act. But the circumstances of these institutions seem to me to be different from those of the Madura College. For, while the latter college appears to vest in a committee who cannot appropriate any part of the income derived from fees and other sources for their own benefit but must spend it wholly for the promotion and encouragement of education, the institutions in question vest in the two missions mentioned above who may, if they like, use the income for purposes unconnected with the schools. It is also to be remarked that the Council passed the above resolution without apparently taking any legal advice on the point as suggested by Government in its Order, Mis. No. 2370 M., dated 29th October 1897. If the above resolution of the Council remains in force, it is very likely that other educational institutions in the town will also ask for exemption and the result will be that the municipal revenue will suffer to the extent of a few hundreds of rupees every year.

4. *Paragraph 18. Sale-proceeds of Medicines.*—The receipts under this head would show considerable improvement if, instead of charging only for compounding outside prescriptions, payment at moderate rates were demanded, agreeably to section 127 (1) of the Act from all persons except those who are really poor, for medical advice and treatment obtained by them from municipal hospitals.

5. *Paragraph 21. Fines.*—Enquiries will be made and necessary instructions issued with regard to the Chairman's statement about the imposition of low fines by the Bench Magistrates.

6. *Paragraph 22. Plague Expenditure.*—In my letter, Dis. No. 42 R./P., dated 20th May 1899 sent in reply to G.O., Ref. on C. No. 4806, dated 10th idem, I have proposed that the cost of the establishments maintained at the seaports in this district for the examination of passengers coming from the Bombay Presidency, &c., by sea should be met from the Provincial Funds.

7. *Paragraph* 26. *Roads.*—I do not agree with the Revenue Divisional officer in his remark that the roads within the municipality are in good condition. A few of the principal roads are kept in good repair, but others are much neglected; compared with roads in other municipalities the roads here are no doubt good, but this municipality is exceptionally favored by the laterite soil, &c., which renders the work of road repair easy and inexpensive. If, therefore, the work were better supervised, there is no reason why all the roads should not be equally good. The expenditure

on communications, though $2\frac{1}{2}$ times the toll receipts as pointed out by the Chairman, is less than the total sum realized from tolls, tax on vehicles and tax on animals. The expenditure on communications equals Rs. 6,262-10-3, whereas the receipts from the above three sources are over Rs. 6,700. It must be remembered that the toll receipts here are smaller than elsewhere by reason of the Netravati river forming the southern boundary of the municipality, the ferry fees for crossing which river go to the District Board.

MANGALORE,
2*nd June* 1899.

(Signed) A. F. PINHEY,
Acting Collector.

ORDER—No. 891 M., dated 26th June 1899.

The receipts and charges of the Mangalore Municipality for 1898-99 are compared below with the budget and revised estimates for the year and the actuals of 1897-98 :—

Balance		4,184	1,400	9,560	9,841

2. The municipal council held 22 meetings against ~~19~~ in the previous year, and the average attendance of the members, although it declined, was still fair. Eight seats were filled by election during the year, of which three were contested, 66·2 per cent. of the registered voters attending the poll.

3. *Receipts.*—(1) Owing apparently to careful assessment there was an increase of 226 in the number of persons assessed to the tax on arts and of Rs. 1,017 in the net current demand under this head. The demand under the taxes on buildings and lands also rose by Rs. 827 and Rs. 23, respectively. The report on the revision of these latter taxes, promised in paragraph 2 of the Collector's endorsement, is awaited. The attention of the municipal council is drawn to his remarks in paragraph 3.

(2) The current collections under the arts, house and land taxes, although they declined, were still very fair, while the realizations of arrears improved and were satisfactory. Coercive processes were issued in a large number of cases, but their execution was not so prompt as in the previous year.

(3) The receipts from the taxes on vehicles and animals, sale of poudrette, market rents, and license fees showed an advance; but those from tolls, rent of buildings, warrant and distraint fees and fines fell off, the decline being explained in paragraphs 12, 15, 20 and 21 of the Chairman's letter. The Collector's suggestion in paragraph 4 of his endorsement is commended to the municipal council for consideration.

(4) The number of houses served by the private scavenging agency and the receipts from this source rose from 2,359 and Rs. 1,920, respectively, to 2,391 and Rs. 1,951, and the service was worked at a profit of Rs. 429 against Rs. 188 in the previous year. The service is, however, capable of considerable extension, seeing that it is now adopted by only about one-third of the number of houses assessed to the tax on buildings. Every endeavour should be made to extend it throughout the town, any profit accruing from this service being utilized towards its improvement.

4. *Expenditure*—(1) *Public Works.*—The only new work of importance executed during the year was the construction of a vegetable and flower market at a cost of Rs. 401. The total outlay on communications amounted to Rs. 6,320 or nearly three times the net municipal income from tolls. The Revenue Divisional-officer reports that the roads in the town are in a satisfactory condition, but the Collector considers that, with the exception of a few principal roads, they are much neglected. Greater attention should be paid to them in the current year.

(2) *Education.*—The net expenditure under this head amounted to Rs. 3,659 or 12·5 per cent. of the income from taxation; and all but Rs. 895 of this sum was devoted to primary education. The municipal council maintained seven primary

on communications, though 2½ times the toll receipts as pointed out by the Chairman, is less than the total sum realized from tolls, tax on vehicles and tax on animals. ance at these institutions communications equals Rs. 6,262-10-3, whereas the receipts examinations were satisfactory and the allotme 700. It must be remembered that the toll fully utilized. The total number of boys under instr the Netravati river forming the aided schools was 1,69 or 52·8 per cent. of the male population ossing which river go to against 1,840 or 59·4 per cent. in the previous year, the decline beings paragraph 30 of the Chairman's letter.

(3) *Medical Relief.*—The number of in-patients treated in the Wenlock pital was almost the same as in the previous year, but there was a decrease of 100 in the number of those treated in the hospital for women and children, which is ascribed by the Chairman to the want of a substitute for the female apothecary in charge, who resigned her appointment about the beginning of the year. The number of out-patients who attended both these institutions, however, rose from 22,204 to 24,418, and the work of the midwives, who attended 354 cases of labour against 208 in the previous year, was satisfactory.

(4) *Vaccination and Vital Statistics.*—The total number of persons vaccinated during the year was 2,452 or 51 more than in 1897–98 and 97·3 per cent. of the operations were successful against 97·2 per cent. in that year. Infantile vaccination, however, declined, the number of children under one year successfully vaccinated being 949 or 23·2 per mille of the population against 1,224 or 29·9 per mille in the previous year. The explanation of this decline given in paragraph 35 of the Chairman's letter cannot be accepted, as the registration of births in the municipality is evidently very defective. Special attention should be paid to this matter in the current year. There was a large decrease in the numbers of births and deaths registered during the year, which must be ascribed to inaccuracy of the returns. Every endeavour should be made to render the returns trustworthy.

(5) *Sanitation.*—The outlay under this head amounted to Rs. 10,205 or 9·6 per cent. more than the allotment and was 22·7 per cent. of the current receipts. The District Medical and Sanitary Officer reports that the general sanitary condition of the town was on the whole good. There are admittedly, however, many defects, which the council should remedy as soon as possible.

5. *General Remarks.*—The year closed with a balance of Rs. 9,841 or 21·9 per cent. of the current receipts. The greater portion of this sum might with advantage have been spent in improving the sanitation of the town.

The condition of roads, infantile vaccination and registration of vital statistics demand increased attention. In other respects the administration of the municipality during the year under review was fairly efficient.

The Government is pleased to note the testimony borne by the Chairman to the services rendered by the councillors named in paragraph 26 of his letter.

2. The Municipal Council held ~~twenty-two~~ 22 meetings against nine in the previous year, and the average attendance of the members although it declined, was still fair. Eight seats were filled by election during the year, of which three were contested, 66·2 per cent of the registered voters attending the poll.

3. Receipts. (1) Owing apparently to careful assessment there was an increase of 226 in the number of persons assessed to the tax on arts and of Rs 10·17 in the net current demand under this head. The demand under the taxes on buildings and lands also rose by Rs 827 and Rs 23 respectively. The report on the revision of these latter taxes, promised in para. 2 of the Collector's endorsement is awaited. The attention of the Municipal Council is drawn to his remarks in para. 3. (2)

Editor's Table - Disp. 10/7/99

(2) The current collections under the arts, house and land taxes, although they declined, were still very fair. While the realizations of arrears improved and were satisfactory. Coercive processes were resorted to in a large number of cases, but their execution was not so prompt as in the previous year.

(3) The receipts from the taxes on vehicles and animals, sale of poudrette, market rents, and license fees showed an advance; but those from tolls, rent of buildings, warrant & distraint fees and fines fell off considerably, the decline being explained in paras. 12, 15, 20 & 21 of the Chairman's letter. The Collector's suggestion in para. 4 of his endorsement is commended to the municipal committee for consideration.

(4) The number of horses served by the private Scavenging agency and the receipts from this source rose from 2359 and Rs 1920 respectively, to 2391 and Rs 1951, and the Service was worked at a profit of Rs 429 against Rs 188 in the previous year. The Service is, however, capable of considerable extension, seeing that

No. of horses assessed 1147.
No. served by private Scavenging agency 2391.

it is now adopted by only about one third of the number of houses assessed to the tax on buildings. Every endeavour should be made to extend it throughout the town, any profit accruing from this service being utilized towards its improvement.

4. Expenditure (1) Public Works.

The only new work of importance executed during the year was the construction of a vegetable and flower market at a cost of Rs 401. The total outlay on communications amounted to Rs 6320 or nearly three times the net municipal income from tolls. The Revenue Divisional officer reports that the roads in the town are in a satisfactory condition, but the Collector considers that, with the exception of a few principal roads, they are much neglected. Greater attention should be paid to them in the current year.

Para. 2 of Dy Coll's auth.

Para 7 of the Coll's auth.

(2) Education. The net expenditure under this head amounted to Rs 36,59 or 12.5 per cent of the income from taxation; and all but Rs 895 of this sum was devoted to primary education. The Municipal Council maintained seven primary schools on the salary-result system against eight in 1897-98, and aided one secondary school and its primary department with salary grants and three secondary and eleven primary schools with result grants. Taken as a whole the attendance at these institutions declined, but the results of the departmental and grant examinations were satisfactory and the allotments for salary and result grants were fully utilized. The total number of boys under instruction in the Municipal and aided schools was 1693 or 52.8 per cent of the male population of school-going age, against 1840 or 59.4 per cent in the previous year, the decline being explained in para. 30 of the Chairman's letter. (3)

Para. 33(2) of the Cis report

Vide para 59 the Asst Surgeons & Lamp officers report info 12461 D 11-7-98

(3) Medical Relief. The number of in-patients treated in the Wenlock hospital was almost the same as in the previous year, but there was a decrease of 100 in the number of those treated in the hospital for women and children, which is ascribed by the Chairman to the absence of a substitute for the female apothecary in charge, who resigned her appointment about the beginning of the year. The number of out-patients who attended both these institutions, however, rose from 22,204 to 24,428, and the work of the midwives, who attended 364 cases of labour against 208 in the previous year, was satisfactory.

(4) Vaccination & Vital Statistics. The total number of persons vaccinated during the year was 24,52 or 5 per cent more than in 1897-98 and 97.2 per cent of the vaccinations were successful against 97.2 per cent in the previous year. Infantile vaccination, however

Editor's Table - Typ. 10/7/99

declined, the number of children under one year successfully vaccinated being 949 or 23.2 per mille of the population against 1224 or 29.9 per mille in the previous year. The explanation of this decline given in para. 35 of the Chairman's letter cannot be accepted, as the registration of births in the municipality is evidently very defective. Special attention should be paid to this matter in the current year.

The registered birth rate was only 26.4 per mille.

There was a large decrease in the numbers of births and deaths registered during the year, which can be ascribed to inaccuracy of the returns and also to defective registration. Every endeavour should be made to render the returns trustworthy.

(5) Sanitation The outlay under this head amounted to Rs 10205 or 9.6 per cent more than the allotment and was 22.7 per cent of the current receipts. The District Medical and Sanitary officer reports that the general sanitary condition of the town was on the whole good. There are admittedly, however, many

Para 3. of the Medical Report

Vide para. 37 of the Chairman's

defects, which the Council should remedy as soon as possible.

5. General Remarks. The year closed with a balance of Rs 9,841 or 21.9 per cent of the current receipts. The greater portion of this sum might with advantage have been spent in improving the sanitation of the town.

The condition of roads, infantile vaccination and the registration of vital statistics demand increased attention. In other respects the administration of the Municipality during the year under review was fairly efficient.

The Government is pleased to note the testimony borne by the Chairman to the services rendered by the Councillors named in para. 26 of his letter.

× × ×

3 Read notice, dated 6 December 1898, under section 261 of the Act from Mr. A. J. S. Saldanha, Pleader, on behalf of the Rector of the St Aloysius College, that in the event of the sum of Rs 37-8-- collected as tax on the College building for the current half year on account of that part of the College building used for non-residential and public and charitable purposes

being not refunded by the Municipality within a month, a suit will be filed for recovery of the same.

Read also letter, dated 1st December 1898, from the General Agent of the Basel German Mission, requesting that as, in the decision quoted, the Madras High Court has held that school buildings are buildings exclusively used for charitable purposes and are not liable to tax under section 63(1) of the Act, the sum of Rs 37 paid by him for the current half year on the Mission School Buildings, may be refunded.

Resolved by a majority of the Councillors present that under the High Court decision reported at pages 367 and 368 of I. L. R. XXI, Madras, that portion of the St. Aloysius College building which is used for school purposes as well as the Basel Mission School houses should be exempted from tax as falling under charitable purposes.

Councillors Messrs. G. Narainswamy Aiyar, F. Hüber and A. Krishnaya and the Chairman dissented and were of opinion that in view of G.O. No 2370 A, 29.10.97, Mis., and the circumstances of the institutions in question being not similar to the peculiar circumstances of the Madura Native College on which the High Court decision is based,

the matter had better be settled by a Civil Court.

(True Extract.)

Govinda Sawa Ayyar
For Acting Collector.

Note to Statement I [1].—

1. The tax on arts, &c., is levied on ~~(the first)~~ all classes.
2. The tax on buildings is levied at 6¼ per cent. and the tax on lands at 6¼ ——— per cent. of rent value. ~~(annas ——— for every 80 square yards)~~
3. The water and drainage tax on buildings and lands is levied ~~(at ——— per cent)~~ not
4. The tax on vehicles and animals is levied at ——— the maximum rates.
5. The tax on carts, &c., is levied at Rs. 4 per cart per annum.
6. The tax on private, menial and domestic male servants is levied ~~at Rs. ——— per mensem for each servant~~ not
7. Tolls are levied at ——— the maximum rates.
8. License-fees are levied at the rates sanctioned in G.O^s 734-11, 2-7-88; 287-11, 3-3-91; 1121-11, 17-7-91 & 1360-11, 26-8-91, Mis.
9. The house-tax registers were last revised in the official year 1898-99 and the land-tax registers in the official year ~~1898-99~~ They have again been completely revised during 1898-99, the revised assessments, however, taking effect from 1899-1900.
10. The total extent of land assessed is ~~not known~~ ———.
11. The mode of estimating the annual rental of houses and lands is as follows:—

[1] This note should be filled in both when the statement is submitted with the budgets as well as when it accompanies reports, but in the former case items 9, 10 and 11 may be left blank.

I. Buildings—(i). In the case of private buildings let out, the actual rent obtained by the owners; (ii). In the case of such buildings not let but occupied by the owners themselves, etc., the rental is fixed with reference to similar buildings let in the locality, considering also the importance of the locality and other circumstances; (iii) In the case of public buildings, 5 per cent. of their estimated value is taken as the annual rental.

II. Lands or Gardens.— When leased out, the actual rent obtained by the owners when occupied by the owners themselves, etc., the value of the produce the lands or gardens are expected to yield.

27th May 1899. Chairman.

Realisable in 1899-1900

Note:- I- The difference between the total of column 5 and statements IV-A & III-B and the figure shown in column 2 of statement I is due to the latter being inclusive of the items having no fixed demand, interest, etc., etc.

* There is a difference of annas 1-6 between this figure and that as per Demand Register, which remains to be reconciled.

* Statements IV-A and IV-B should accompany budgets as well as reports.

27th May, 1899.

Statement IV-B.*—Arrears.

Particulars.	Balance of old demand.	Arrears of previous year.	Total demand.	Collected.	Remitted.	Written off.	Balance (column 4 *minus* columns 5, 6 and 7).	Years to which the balance relates.
