-ment propose to have a stone
revetment immediately outside the
present temporary work. Since the
monsoon abated, the sea has
receded very much and is now
within a few feet of the high
water mark before the erosion
took place as shewn in the sketch.
As the proposed revetment will take
up the space where shipping and
landing operations are now carried
on, the local Port Officer recom-
-mends the construction of a
small jetty opposite the Custom
House for loading cargo into boats
and unloading. This matter
will receive attention.

SIR,

With reference to para 2 of G. O. Marine, No 240, dated 7th August 1895, I have the honor to report that on 2^d August 1895 protective works were commenced in front of the Sea Custom House and along the fore-shore at Tellicherry. Wooden piles were driven 4 to 5 feet down the sand in the direction indicated by a double red line in the accompanying sketch. The space between the piles and the bank was filled in with bags of sand. These works were carried out as a temporary measure, but it is believed the Public Works Department

be made in the Light List, and a notice issued to Steamer Agencies.

(2). Suitable lamps will, as a matter of course, be obtained.

SIR,

With reference to G. O., Marine,
No. 263, dated 27th August 1895,
I have the honor to report that
there was no intention whatever
of entertaining an Establishment
for the lights proposed to be
exhibited at Barwa. They are
intended exclusively for the
benefit of British India Steamers,
&c., making the port at night
and will be shewn only on receipt
of previous intimation of a
vessel being expected. A notice
to mariners I do not consider
necessary, but a note will
