With reference to his letter dated 3rd Dec 1894 No 695/415 G, the Presy Port Officer is requested to report, without delay, from what other ports besides Pamban, Cocanada, Tuticorin & Mangalore, requisitions have been received for the services of the Dredger Wenlock since 1891-92 up to date, and to explain the causes that led to those requisitions not being complied with.

2. A definite programme of future operations should also be laid before Govt with the least practicable delay.

Port Officer concurs with me in thinking that dredging with the "Wenlock" is impracticable. The only type of dredger that could be employed with any chance of success would be the Sand Pump Dredger.

2. The only proposals that can be made for the employment of the dredger are to work with punts at Mangalore, and subsequently to deepen the inner portion of the Madras Harbour so as to provide additional berths for light draft steamers inside the line of present stern moorings. I understand, however, that the Board's Engineer is opposed to dredging before the completion of the Harbour.
