ENCLOSURE.

Programme of the Marine Survey of India for the season, 1896-97.

Leaving Bombay towards the end of October, the R.I.M.S. "Investigator" will proceed to one of the northern atolls of the Maldives, for the purpose of trawling; after a few days spent there, Colombo will be visited for coal, and then Port Blair, in the Andaman Islands. The survey of the Andaman Island will be undertaken and continued until towards the end of December. As fine weather may then be expected in the Gulf of Martaban, the re-sounding of the gulf will be taken in hand, and continued for the remainder of the season.

The "Nancowry" having small steam power will leave Bombay for the Andamans as early as possible in October so as to get across the Bay of Bengal before the north-easterly winds set in, calling at Calicut, Trincomali or Colombo as may be necessary for coal. On arrival at the Andamans, she will be employed there until the arrival of the "Investigator" and then work in company with that ship in the Andamans and Gulf of Martaban.
