ORDER—No. 807, Marine, dated 21st November 1896.

His Excellency the Governor in Council observes that the new light at Hangarkotta was exhibited on the 9th November 1896, while the report required by the rules only reached the Government on the 18th idem. It was pointed out to the Presidency Port Officer in G.O., No. 170-A., Marine, dated 5th May 1890, that the standing rules require that tabular statements of new lights should be submitted to Government at least a month before the actual exhibition of the lights, and that telegrams to the Home Government should be forwarded on the day of the exhibition itself.

2. His Excellency the Governor in Council desires that more attention be paid to the observance of these rules.

3. The following telegram will be despatched to the Secretary of State:—

"New light at Hangarkotta West Coast exhibited 9th November. Particulars follow."

[Here enter No. 13, Marine, dated 21st November 1896.]

FURTHER PAPERS.

1. The first step is to identify the key components of the system. This involves understanding the inputs, outputs, and internal processes. For example, in a manufacturing system, the inputs might be raw materials and labor, the outputs are finished products, and the internal processes are the various stages of production.
