LOCAL AND MUNICIPAL DEPARTMENT.

NOTIFICATION.

844 M 7 12th April 97.

Fort St. George, April 12, 1897.

REGULATION UNDER THE EPIDEMIC DISEASES ACT, 1897.

No. 21.—The clothing, bedding and personal effects of all persons detained or segregated under regulation 3, or removed under regulation 14 to a place provided under regulation 2, shall be thoroughly disinfected, and may, at the discretion of the Medical officer in charge of the place of detention or segregation, be destroyed.

The Collector of the district may in his discretion, at the cost of Local or Municipal funds, award compensation for articles destroyed, but no person shall be entitled as of right to recover any compensation by way of damages or otherwise for the destruction or disinfection of any article dealt with as above.

Where the clothes or bedding of a traveller shall have been destroyed as hereinbefore provided, the Medical officer may, if the person is poor, arrange for providing other necessary articles in their place, the cost of the same being intimated to the Collector of the district who shall debit it to Local or Municipal funds at his discretion.

LOCAL AND MUNICIPAL DEPARTMENT.

522 M&J 13th March 97.

NOTIFICATION.

Fort St. George, March 16, 1897.

No. 185.—Under section 250 (1) (*m*) of Act IV of 1884, His Excellency the Governor in Council is pleased to make the following rules for combating bubonic plague in municipalities. These rules shall come into force three months after their first publication in the District Gazettes in English and in the Vernacular language of the district.

Rules for combating Bubonic Plague ("Mahammari") in Municipalities.

NOTE.

The following is a description of the disease known as Bubonic plague:—

(*a*) After date of acquiring infection a period of a few hours to three or, in exceptional cases, even ten days may elapse. There occurs a gradually increasing feeling of lassitude, the colour of the skin may change till a yellowish tint is acquired; at times there is much restlessness and drowsiness; frontal head-ache of a severe character, attended with darting pains in the back, loins and abdomen, are frequent. High fever is ushered in with shivering, and after two or three days of usually continuous fever, glandular swellings may appear in the groins, arm-pits, or neck, or in all three positions. On appearance of the swellings the fever may diminish slightly. The disease may then abate, accompanied by disappearance of the swellings or their breaking down by suppuration. But if the disease continues, the patient may vomit blood, and blood may be discharged from the nose, the mouth, the bowels, and mixed with urine; the swellings may become gangrenous and hemorrhage may occur from their sites; death may be ushered in by convulsions, delirium, insensibility, &c.

(*b*) The prime cause of the disease is believed to be a microbe found in the blood and especially in the neighbourhood of the enlarged glands. Its mode of dissemination has not been fully ascertained, but there is good reason to believe its propagation is favoured by foul soil, and that not only the bloody discharges, but the excretions, more especially the fæcal, demand special care as to disinfection. The relation of infection to water is open to doubt, but certain facts have been observed that point to this being a possible medium. The clinging of the infective agent to clothing and rooms is more certain. Foul soil, crowded and narrow streets and badly-ventilated dwellings are specially favouring causes. Rats, snakes and cats being liable to infection may act as conveyers of the disease.

(*c*). It is the object of these Rules, therefore, to ensure (1) that the earliest possible informa-

assistance may be ma

లయు యుక్తమని తలఁచినయెడల, వా
డిస్ట్రిక్టు కలెక్టరుకు యుక్తమని తోఁచినయెడల
పరిహారద్రవ్యమును లోకల్ లేక మ్యునిసిపల్ ఫండ్లలోనుండి

and to
and Sharanpur
Presidency from the 13th Ja
1898 to any pilgrims or other pers

2. Municipal councils shall be responsible for the general carrying out of the scheme, and District Medical and Sanitary Officers for the necessary medical arrangements both in their head-quarters and elsewhere, except in municipalities where there are Civil Surgeons. In these, the Civil Surgeons shall be responsible. The preventive staff referred to in Rule 12 shall be under the medical officer designated by the District Medical and Sanitary Officer or the Civil Surgeon, as the case may be, to carry out the necessary arrangements, or, in the absence of such designation, under the senior medical officer on the spot, while the observation staff mentioned in Rule 6 shall be directly under the Chairman.

3. For the purpose of these Rules, every municipality to which they apply shall be divided into "circles", which should, as far as possible, follow ward divisions so that they may be readily comprehended. In municipalities where there are wards containing less than 1,200 houses and a population of less than 5,000 persons each, two or more wards may be comprised in one circle. Three circles shall ordinarily form a division, and in no case shall a division contain more than four circles. Chairmen will at once map out their towns into "circles" and "divisions," and after approval by the Collector record the maps in their offices and send a copy to the senior medical officer of the municipality.

4. For each division, the Chairman shall at once procure and retain in the municipal stores not less than the following apparatus and disinfectants, and will be responsible that these stores are always maintained and in good condition :—

12 portable tin canisters for disinfectants.
9 lb. perchloride of mercury.
9 lb. commercial hydrochloric acid.
60 lb. carbolic acid.
600 lb. of sawdust and 600 lb. of unslaked lime.

[*Note.*—The prices of these articles are approximately as follow :—

	RS.	A.	P.
One tin canister	1	8	0
One ounce perchloride of mercury	0	3	0
One ounce commercial hydrochloric acid	0	2	0
One lb. carbolic acid	0	4	0
One lb. sawdust	0	1	9]
One lb. unslaked lime			

I.—Observation.

5. Should it appear to the Collector of the district that plague imminently threatens to attack any municipality to which these Rules apply, he shall warn the Chairman of the council and the District Medical and Sanitary Officer and the senior medical officer of the town accordingly.

6. Upon receipt of such warning or otherwise receiving information, the Chairman shall immediately appoint in each circle of the town an observation staff consisting of an Inspector, a peon and a toti, and in each division a Divisional Inspector and an orderly, or such smaller establishment as the Collector may, under the circumstances of the particular occasion, consider sufficient. The orderly should be allowed a jutka or pony to enable him to carry without delay such orders to Circle Inspectors as may be given. The Chairman shall, without delay, report to the Collector the date on which these appointments were made.

[*Note.*—The salaries and allowances of this staff should not ordinarily exceed the following rates :—

	RS.
Circle Inspector	15
" peon	8
" toti	7
Divisional Inspector	35
Jutka or horse allowance	15
Orderly	8
Jutka or pony allowance to orderly	7]

7. This staff may consist of temporary hands if available and competent. Otherwise it

9. They should further warn the inhabitants of the circle to adopt the precautions against plague prescribed in the extract from Surgeon-Lieutenant-Colonel King's "Simple Sanitary Rules" which is printed as an Appendix to these Rules, and should distribute gratis and as widely as possible copies of this, which the Chairman will keep ready printed in the vernacular.

10. The Chairman and councillors and municipal servants of all ranks should assist the observation staff in every way possible, and the police in every way that is compatible with their other duties, both in getting information of the first attack and in removing sanitary defects in the circle.

II.—Prevention of Infection.

11. On receipt of information under the above system of the first attack of plague, the Chairman shall at once employ in the circle in which it has occurred (but not in other circles) three peons and three toties or such smaller establishment as the Collector may, under the circumstances of the particular case, consider sufficient, and shall report to the Collector and the District Medical and Sanitary Officer the date on which he did so.

[*Note.*—The salaries of the peons and toties appointed under this Rule should not, respectively, exceed Rs. 8 and Rs. 7 each per mensem.]

12. This staff, like the observation staff, may consist of temporary hands if available and competent. Otherwise, it should be selected from the ordinary existing municipal establishment, the vacancies caused in the latter case being filled by temporary men on the sanctioned rates, and it should be combined with the observation staff of the circle, so that the whole may thenceforth form "a preventive staff" to carry out the duties set forth below.

13. The preventive staff shall visit every house in which plague has occurred and shall use the greatest care in seeing that all sputa, vomit, fluid and solid excreta are at once collected in separate vessels, mixed with carbolic sawdust *, paddy husk, or other combustible matter, and, where necessary, with kerosine-oil, and thoroughly, completely, and immediately burnt on or near the premises. The burning shall, when possible, be carried out in the presence of the Divisional or Sanitary Inspector, but, in the absence of both, it may be carried out in the presence of the peon—the Divisional Inspector, Sanitary Inspector or peon, as the case may be, being responsible that it is thoroughly done. The Chairman shall delegate to the senior medical officer of the town, and to such others as may have to act under this Rule, his powers under section 231 (1) of Act IV of 1884 of entering and inspecting houses.

* One part of carbolic acid to ten parts of sawdust.

14. Rags, clothes and bedding stained with vomit or excreta, or blood passed from any part of the body, or discharges from the nose, mouth, open sores, boils or wounds should similarly be burnt upon the spot under the same precautions, the danger of keeping such articles being fully explained to the owners and full compensation in money or kind being offered in the case of the really poor, but, where the owners or other persons concerned so desire, articles of clothing proved to the satisfaction of the medical officer appointed under Rule 2 to be of great value may be disinfected in such manner as he may direct. In each such instance, that officer, by a certificate signed by him, shall define the method of disinfection employed and certify to its having been conducted with care.

15. Floors and furniture stained with vomit or excreta, or blood or any discharge, should be disinfected by being thoroughly sprinkled with a solution of perchloride of mercury made up as shown in the margin. The burning of tar and sulphur in houses and streets should be discontinued as it is inefficient as a disinfectant, but street drains outside the houses attacked and the drains of these houses where possible should be flushed with the above solution.

½ oz. perchloride of mercury.
1 oz. hydrochloric acid.
3 gallons (one small chatty full) of water with a pinch of red ink-powder to colour it to prevent accidents.

[*Note* 1.—Wooden buckets or earthen pots should alone be used for carrying about this solution, as it destroys metal vessels, and the packets of the solid perchloride should be labelled "Poison" in English and the vernacular

assistance may be

ఘనయు యొక్కమని తలంచినయెడల, వానిని

rnal and to

and Sharanpur

Presidency from the 13

1898 to any pilgrim or othe

absolutely necessary for the patient's welfare. Disinfectants for washing the hands of persons touching the patient should be available. Native food vessels used by the patient would be best disinfected by heating, till they cannot be touched directly over fire.

19. After a patient has recovered, the house, and especially the room which he occupied during the attack, should be thoroughly disinfected. The floors should be dug up wherever stained with plague matter and the earth burnt, or, if this cannot be easily done, the floors should be burnt over. The floor, the walls, the house-drains and the furniture should also be liberally sprayed and washed with the perchloride of mercury solution above described. The walls should subsequently be brushed with a dry broom, and be whitewashed with fresh slaked lime in the proportion of one part of lime to five of water.

[Note.—It is most desirable that the excreta of a patient for at least ten days after he has recovered from an attack should be carefully collected, disinfected and carried away. These probably still contain plague microbes. For this purpose, a Dindigul bullock lorrie costing Rs. [illegible] and air-tight iron excreta drums costing Rs. 2-8-0 each may be provided. The purchase of these will, however, be left to the option of the councils.]

20. Rats, cats and snakes suffer from the disease. If found alive in infected localities, these animals should be got rid of as quickly as possible by killing them as a matter of prevention. Where found dead, their bodies should invariably be burnt.

21. The Chairman shall provide the medical officer responsible for working the Rules with a permanent advance of Rs. 50 per division, which shall be recouped from time to time by bills supported by vouchers where possible.

22. The preventive staff shall continue to be maintained in an affected circle for ten days after the last attack of plague in it, and the observation staff in all circles or groups of circles as the Collector may approve for twenty-one days after the last attack in the town. During this time, they should be employed in remedying sanitary defects.

III.—*Medical Aid.*

23. There shall be a head-quarters in each division at which a medical subordinate shall reside, who shall be supplied with medicines and medical comforts from the municipal hospital for the treatment of those attacked, and who shall be available for attendance gratis on the sick in their own houses. This shall also be the head-quarters of the Divisional Inspector and of the preventive staff on night duty.

24. In one place at least in each town, there shall be isolation huts with separate accommodation for males and females for the treatment of those who desire it or who are brought there. These shall be in charge of a medical subordinate with the necessary staff, and supplied with equipment, medicines and medical comforts. This subordinate shall be deputed to no other duty. He shall reside with his staff on the spot and shall be adequately housed.

25. Charges for medical treatment under these Rules shall be met from the allotment in the budget under Grant 3, Hospitals and Dispensaries.

26. The head-quarters of the divisions and the sites for the isolation hospitals shall be at once selected, and shall be marked on the maps referred to in Rule No. 3 above.

27. In order to make provision for meeting the charges under the portions of this scheme relating to observation and prevention, the council of every municipality to which the scheme applies shall be required to allot in every budget under "Epidemic charges" a sum which shall be in the proportion of Rs. 1,000 to every 25,000 inhabitants in the municipality—provided such provision has not already been made under G.O., No. 1536 M., dated 9th September 1896, when such funds shall also be applicable to the purpose of these Rules. This shall be called the "Epidemic reserve," and shall not be spent upon any object but the carrying of this scheme into execution.

28. The provision of this reserve should not be allowed to disturb the existing percentages to the total municipal income of the expenditure upon communications, education, sanitation, &c.,

---

APPENDIX.

[Extract from Surgeon-Lieutenant-Colonel King's "Simple Sanitary Rules."]

Precautions to be observed on the approach of Plague.

A.—Habitations.

1. Each house must be thoroughly cleansed, that is, all manure, dirty water, washings of cattle stalls and collection of dirt of any description, must be completely removed.
2. Where the earth remains damp and foul after such removal, it should be dug up till dry and clean earth is reached.
3. The old earth should be taken far from the town and may be used as manure for the fields; new earth from a clean place should be laid down.
4. The interior and exterior of houses should be whitewashed. If persons cannot afford to do the outside, the inside at least should be whitewashed.
5. Bundles of clothing and other materials hanging from the beams, or occupying in any other way the rooms in which persons sleep, should be removed.
6. Doors and windows should at all possible hours be left open, so that free ventilation be obtained.
7. If private latrines are used, they must be kept free from fæcal matter by removal at least twice daily.
8. The drains leading from houses should be cleansed twice daily.
9. Cesspools and pits for receipt of urine of cattle should be emptied daily.

B.—The Person.

1. The body and clothing should be kept scrupulously clean. If delicate, persons should use warm, not cold, baths.
2. The food should be plain, nourishing and of good quality.
3. All vegetables, or leaves, or fruits, likely to cause diarrhœa, should be abandoned.
4. All forms of drinking to excess, debauchery, late hours and exposure to wet and cold should be avoided.
5. Cold cooked food should never be used. Care should be taken not to allow flies to settle upon food. Vegetables and leaves should never be eaten otherwise than after cooking. Before being cooked, they should be well washed in water that has been purified by boiling. Salt should be freely used with the diet; but, on the other hand, it must not be used in such unusual amounts as to excite uneasiness or looseness of the bowels.
6. An inferior quality of water should not be kept in the house; only the cleanest available should be employed.
7. Water for drinking purposes and for washing the mouth or eating and drinking vessels, and milk, should be boiled before use.

G. S. FORBES,
Secretary to Government.

గును; చర్మముయొక్క రంగు మాఱి పసుపువర్ణము వచ్చుటయుఁ గలదు; ఒక్కొక్కప్పుడు విశేషము నెమ్మదిలేకపోవుటయు కండ్లు కూరుకపోవుటయు తటస్థించును; నొసటివైపున గాఢమైన తలనొప్పియు, వీపునను, నడుములోను, కడుపులోను చుఱుకు చుఱుకుమను పోట్లును తఱుచుగా కలుగును. చలితో కూడుకొని విశేషమైన జ్వరము వచ్చును, మఱియు సాధారణముగా విడువని జ్వరము రెండుమూఁడు దినములు కాఁచినతర్వాత, గజ్జలలోఁగాని, చంకలలోఁగాని, మెడమీఁదఁగాని లేక యీ మూఁడుచోట్లలోనుగాని గ్రంథిసంబంధమయిన వాఁపులు కనఁబడవచ్చును. వాఁపులు కనఁబడినతర్వాత జ్వరము కొంచెము తగ్గవచ్చును. తర్వాత వాఁపులు తీసిపోయిగాని చీముపట్టి పగిలిగాని రోగము తగ్గిపోవచ్చును. కాని రోగము అట్లు పోకుండినయెడల, రోగి రక్తము వాంతిచేసికొనుటయు, ముక్కులోనుండియు, నోటిలోనుండియు, ప్రేగులలోనుండియు, మూత్రముతో కలిసియు, రక్తము పడుట తటస్థింపవచ్చును; వాఁచినబొబ్బలు కుల్లి వానినుండి రక్తము కాఱును; ఈడ్పులు, చిత్తభ్రమ, స్మారకములేకపోవుట మొదలగువానితో మరణము సంభవింపవచ్చును.

(b) రక్తములోను ముఖ్యముగా వాఁచిన మాంసగ్రంథుల సమీపమునను ఉండెడి యొక అణుప్రమాణముగల పురుగు ఈ రోగమునకు ముఖ్యకారణమని నమ్ముచున్నారు. అది వ్యాపించు విధము పూర్తిగ తెలియలేదు, గాని మఱికినేల దానివృద్ధికి సహకారిగ నుండుననియు, కాఱెడి రక్తము మాత్రమేగాక వాంతి మలమూత్రాది విసర్జనములును, అందు ముఖ్యముగా మలమును, అంటురోగ నివారణచేముయుటకు విశేష జాగ్రత పుచ్చుకొనవలసియుండుననియు నమ్ముటకు మంచికారణము గలదు. నీటికి వ్యాధి సోఁకువిషయము సందేహాస్పదముగానున్నది, కాని యిది (నీరు) వ్యాధియొక్క సోఁకుడుకు సాధనము కావచ్చునని తెలియఁజేసెడి కొన్ని సంగతులు కనఁగొనఁబడినవి. రోగ సంబంధమయిన విషపదార్థములు బట్టలకును గదులకును సోఁకుచున్నవని యంతకంటె నిశ్చయముగా తెలియును. మఱికినేలయు, జనసమ్మర్దము గలిగిన యిఱుకువీధులును, గాలివసతిలేని యిండ్లును రోగమునకు ముఖ్యముగా ననుకూలము కలుగఁజేయును. ఎలుకలకు, పాములకు, పిల్లులకు వ్యాధి సోఁకును గనుక యవి రోగమును ఒక స్థలమునుండి మఱియొక స్థలమునకు తీసికొని పోవునవిగా నుండవచ్చును.

(c) కాఁబట్టి (1) సదరు వ్యాధి సంబంధమయిన పురుగులు ఆ వ్యాధిసోఁకి వ్యాపింపఁదగిన స్థలములకు తీసికొని పోఁబడకుండ తత్క్షణము ఆఁపుచేయఁగలందులకయి, వ్యాధితగిలిన ప్రతి విషయమునుగుఱించియు సమాచారము సాధ్యమయినంత త్వరగా అధికార్లకు తెలియఁజేయునట్లును, (2) సదరు పురుగులను వెంటనే పూర్తిగా నశింపఁజేయునట్లును, మఱియు (3) జాగ్రత పుచ్చుకొన్నను వ్యాధి తగిలినవారికి వైద్యసాహాయ్యము కలుగఁజేయునట్లును, గట్టి యేర్పాటుచేయుటయే యీ విధులయొక్క యుద్దేశమయియున్నది. కనుక యీ విధులు యీ మూఁడుభాగముల ననుసరించి యుండును.

విధులు.

1. ఈ విధులు మదరాసు పహారుతప్ప మదరాసు ప్రెసిడెన్సీలోనుండు మునిసిపాలిటీల [illegible]

execution.

28. The provision of this reserve should not be allowed to

to the total municipal income of the expenditure upon communications, education, sanitation,

Grants 1, 2 and 4

3. ఈ విధుల కార్యములకొఱకు ఇవి ప్రయోగపడునట్టి ప్రతి మునిసిపాలిటీని "సర్కిల్సు"గా భాగించవలయును; అవి, సులభముగా తెలియఁదగియుండుటకయి, సాధ్యమగునంతమట్టుకు, అవి వార్డు డివిజన్ల ననుసరించి యుండవలయును. ఒక్కొక్క దానిలో 1,200 కంటె తక్కువ గృహములును 5,000 మందికంటె తక్కువ జనసంఖ్యయుఁ గలిగినట్టి వార్డ్లు ఉండెడు మునిసిపాలిటీలలో, రెండువార్డ్లనైన నెక్కువ వార్డ్లనైన ఒక సర్కిలుగా చేర్చవచ్చును. సాధారణముగా మూఁడు సర్కిల్సు చేరి యొక డివిజన్ కావలయును. ఎట్లయినను ఒక డివిజనులో నాలుగు సర్కిల్సుకంటె నెక్కువ యుండఁగూడదు. చేర్మన్లు వెంటనే తమ పట్టణములను "సర్కిల్సు" గాను "డివిజన్లు" గాను పటములు వ్రాయించి కలెక్టరు అంగీకరించిన తర్వాత ఆ పటములను తమ ఆఫీసులలో రెకార్డుచేసి, ఒక నకలు మునిసిపాలిటీయొక్క సీనియర్ మెడికల్ ఆఫీసరుకు పంపవలయును.

4. ప్రతి డివిజనుకొఱకును చేర్మను ఈ క్రిందచెప్పిన సరంజామును అంటురోగ నివారణ వస్తువులను, చెప్పియుండుదానికంటె తక్కువలేకుండ, వెంటనే సమకూర్చి మునిసిపల్ ఉగ్రాణములో నుంచవలయును, మఱియు ఈ సామగ్రులను సదా పెట్టిపెట్టుటకును వానిని మంచి స్థితిలో పెట్టుకొనుటకును అతఁడు ఉత్తరవాదియై యుండును:—

అంటురోగ నివారణ వస్తువుల నుంచుటకు సులభముగా మోసికొని పోఁదగిన సత్తు డబ్బీలు	21
పర్క్లోరైడ్ అఫ్ మర్క్యురి	9 పౌన్లు.
కమ్మర్షల్ హైడ్రోక్లారిక్ ఆసిడ్	9 పౌన్లు.
కార్బాలిక్ ఆసిడ్	60 పౌన్లు.
రంపపుపొడి 600 పౌన్లు, విరియఁబోయని సున్నము ...	600 పౌన్లు.

[పరా.—ఈ వస్తువుల ధరలు ఇంచుమించుగా నీ క్రిందిప్రకార ముండును:—

	రూ.	అ.	పై.
ఒక సత్తు డబ్బి	1	8	0
ఒక ఔన్సు పర్క్లోరైడ్ అఫ్ మర్క్యురి	0	3	0
ఒక ఔన్సు కమ్మర్షల్ హైడ్రోక్లారిక్ ఆసిడ్	0	2	0
ఒక పౌను కార్బాలిక్ ఆసిడ్	0	4	0
ఒక పౌను రంపపు పొడి	0	1	9]
ఒక పౌను విరియఁబోయని సున్నము			

I.—విచారణ విషయము.

5. ఈ విధులు ప్రయోగపడునట్టి యే మునిసిపాలిటిలోనైన మహామారి వచ్చునట్లున్నదని ఆ డిస్ట్రిక్టుయొక్క కలెక్టరుకు తోఁచినయెడల, అతఁడు దానిని గుఱించి యా పట్టణములోని కౌన్సిలు చేర్మనుకును డిస్ట్రిక్టు మెడికల్ అండ్ సానిటరీ ఆఫీసరుకును సీనియర్ మెడికల్ ఆఫీసరుకును హెచ్చరిక చేయవలయును.

6. అట్లు హెచ్చరిక చేయఁబడిన మీఁదటఁగాని [illegible]

assistance may be

లు యుక్తమని తలఁచినయెడల,

డిస్ట్రిక్టుకలెక్టరుకు యుక్తమని తోఁచిన

పరిహారద్రవ్యమును లోకల్ లేక మ్యూనిసిపల్ ఫండ్లలో
