Enclosure.

SIR,

In forwarding letter No 983 dated 12th July 1897 from Collector of Kellore, I have the honor to state that, of the sites selected, No 1 would appear to be unobjectionable. As regards site No 2, provided it is below the ancient — which correspondence does not show to be the case, the selection may be regarded as fair an attempt to attain sanitary ends in the face of popular objections.

2. I would, in connection with Site No 2, invite the attention of Government to the following requirements suggested in my letter No 2111 dated 20th November 1895, para 4, embodied in G.O No 2112 in this dated 17th December 1895: —

4. Under the above circumstances, I would advise as formerly that no burial or cremation be allowed above the ancient. Below the

the Anicut there should be provided by the Municipality a correctly-planned cremation ground affording protection of the corpse from rain. A watchman should also be maintained on the spot to see that cremation is effected fully before the bones are thrown into the river."

I have the honor to be

 SANITARY COMMISSIONER FOR MADRAS,

J. A. JONES, Esq., MEM. INST. C.E., F.R.S.E.,
 SANITARY ENGINEER TO GOVERNMENT.

As many proposals received in reference to opening Burial or Burning grounds come before the Board without the information requisite in regard to them, the Board resolves to require that the following information accompany all such proposals:—

- (1) Name of town.
- (2) Population according to census of 1881 and 1891.
- (3) Population for which Burial or Burning ground is required.
- (4) Total average death rate of last ten years.
- (5) Number of persons {burned} {buried} annually.
- (6) Area proposed to be taken up.
- (7) Area to be used for roads and paths.
- (8) Description of soil met with and depth at which each description is found in digging to a depth of 8 feet.
- (9) Site plan showing site in relation to town and also direction of the prevailing winds.
- (10) Direction of slope—
 - (a) of the surface of the site.
 - (b) of the natural drainage flow from site.
 - (c) of the strata under the site.
- (11) Highest level of sub-soil water.
- (12) Lowest level of sub-soil water.
- (13) Level of site in relation to nearest habitations of the town.
- (14) A statement of the arrangements proposed for affording a supply of water
 - (a) for drinking purposes
 - (b) for bathing purposes at the burial or burning ground.
- (15) A description of the accommodation, if any, it is proposed to erect for mourners, vettians, &c.
- (16) A description of the arrangements intended to shelter the corpse on the occurrence of rain during the process of cremation.
- (17) Information as to whether it is customary to finally dispose of the bones and ashes in water, the locality to be named and indicated on the general map.
