Revenue Department

Read the following letter from
C. S. Middlemiss, Esq. Superintendent Geological Sur-
vey of India, dated Ootacamund, ^{14th March 1898} No: 231:—

In consequence of my going on leave and abolition of the temporary appointment of my micro-section cutter, Mr. J. G. D. Adheseerim of Egmore, Madras, I have the honour to request that he may be given a place either in any of the provisional Museums if a vacancy occurs or in the temporary establishment of the Revenue Board as a clerk, or he might be recommended for a Surveyor's post on probation at the Survey office.

During the last 4 years he has been working under me preparing thin sections ^{of rocks} for the microscope and as a clerk in my office at Aotacamund. He has done his work well and now knows all about section cutting; whilst he is also a handy methodical man and would, I should think, be of great use in any Museum, library or office where careful work ~~is~~ (not demanding special scientific knowledge) and orderly habits would be of use.

Read also the following letter from
the same officer, No: 232, dated the 14th March 1898:—

I have the honour to bring forward the following proposal and request that it may be favourably considered :-

On account of my going on leave and the consequent abolition of the temporary appointment of my native Assistant, Mr. S. Sethurama Rau B.A; who has been working under me for the last two years, I request that he may be attached to the regular clerical establishment of the Revenue Department either in Madras or in the Mofussil, or to the clerical establishment of the P. W. D, or anywhere in the Government Service - with this end in view, that his services may again be made use of by my department when any officer of the Geological Survey takes up further work here.

In making this request I am glad to say that Mr. S. Sathurama Rau has during the time he has been with me shown a keen interest in his work, eagerness to learn anything and everything pertaining to it considerable ability in making preliminary traverses, and explorations of limited areas, and he is industrious, resourceful, painstaking and neat and tidy in recording his results, mapping and collecting and cataloguing &c.

I consider him quite able to make a preliminary examination of any area; and that his services have been of sufficient use in the past to warrant him being given a definite appointment as formulated above, so that when the time arrives those services may be again available without loss to himself, and to the geological work of the presidency with which he is now familiar and in the acquiring of which he has spent two years of his time in a temporary appointment.

Order thereon No: 1488 mis, dt 26th March 1898.

Communicated to the Board of Revenue
and the Superintendent of Survey.
