SIR,

With reference to your No. 5234, dated
23-~~12~~¹¹-98, I have the honor to inform you that the
groynes were completed. During ebb and flow
of the tide, however, there is considerable scour
along the ends of the North and South groyne,
resulting in settlement.

I had soundings taken and visited
the groynes on 15th Instant.

The settlement need not cause any anxiety. It extends over 200' from the end of each groyne, and permanent reguine will probably not be reached for another year or two. Besides this stones have been displaced by heavy waves.

I have directed the Executive Engineer to prepare an estimate for bringing the groynes up to the normal level and section and will submit

Submit it for sanction in due course.

As the ends of the groynes were disturbed the lights had to be moved further back, and until the groynes have reached final settlement, it will be necessary to employ light keepers.

I have the honor to be

Sir,

Your most obedient servant
