P.W.D.

No. 1060

Extract from the Minutes of Consultation

Under date the 8th June 1857.

Read the following

minute by the Right

Honorable the President.

+ + + +

Received 21st May 1857

In January last

the Right Honorable the

President laid before the

Board a Minute containing

observations regarding his

late tour of inspection in

the Provinces; and in paras

135 and 136 of that Minute

he noticed the much

neglected state of the ruins of

the once famous city of

Beejanuggur, and proposed

that a Systematic plan

should be adopted by

which

which all the interesting memorials of the former history of Southern India might be preserved from falling into decay."

2 With reference to those suggestions the Government now resolve to vest in the Chief Engineer the general Superviision of all such relics of former days. Coll Faber will be requested to call upon each District Engineer to furnish him with a Return shewing the places in which such remains exist within his District, the state in which they are at present, the expenditure required for executing the necessary repairs to them, and the provision he would recommend for preserving them.

3. It is probable that subsequent to the transmission of the repo called for in the abo para, the existence of some old and interestin building may be discovered which it may be worth while to preserve, not only as an object of curiosity but as extending to illustrate the ancie history of this part of India The District Engineers will therefore be required to furnish reports of such buildings also as they may be discovered.

4 The Chief Engineer will submit to Govt annually a list of all such Architectural remains throughout this Presidency containing the particulars above specified, as well as any suggestion he may have to make on the subject.
