Communicating an Extract from the Proceedings of the Chief Engineer forwarding a Plan and Valuation Estimate amounting to Rupees 280, for putting the Chicacole Church in thorough repair. } (Here enter 22nd August 1857, No. 1622.)

In their letter of the 19th February last, the Subscribers to the erection of the Church at Chicacole, resident at the station, propose, in view to secure its conservancy, to make the building over to Government, and express a hope that the repairs required to it may be made at the Public Cost.

From the report of the Acting Engineer of the District, dated 10th June last, it appears that the Church is in a good state of repair, with the exception of two large cracks in the side Walls, caused by the great weight of the upper beams and that the cost of putting the building into thorough repair and making a few improvements, is estimated at Rupees 280.

The Government direct that the Church be brought on the Return of Public buildings, and that orders be issued from the Department of Public Works for the execution of the requisite repairs, &c., at the outlay proposed.
