From

G. S. Forbes Esq.
Secretary to the Board of Revenue;

To

Colonel C. E. Saller
Chief Engineer D.P.W.

Sir

With Extract Minutes Consultation dated 11th June No. 925 the Board of Revenue

Dated 23d May 1856. received a copy of a letter addressed by you to the Revenue Secretary to Government soli-citing the attention of Government to the ex-pediency of keeping the D. P. W. fully inform-ed as to the result of their undertakings — and suggesting that it would be advanta-geous to communicate to the Department with this view the remarks made by Col. Sellors in their Annual reports on this sub-ject together with the returns which shew the trade and condition of Sea ports.

2. The Government have requested the

the Board to communicate with you on the subject and I am therefore instructed to state that the Board will readily meet your wishes by sending to you for perusal and for the extraction of such portions as you may select, the annual reports which they receive from Collectors.

3. These reports can be sent to your office shortly after their arrival and the Board hope that it may be found possible to obtain from them the desired information without occasioning detention &c.

4. The Board will be happy to learn from you whether any other portion of their records or reports can be of service to your department and whether the plan they have proposed with regard to the annual reports of Collectors will attain the object you have in view.

To
The Secretary to the
Board of Revenue,

Sir

I am directed to acknowledge the receipt of your letter No. 1997, dated 30th June 1850 and to state that the plan prepared by the Board for keeping the Chief Engineer informed of the results of undertaking in connexion with Public Works appears good as far as it goes, and that he has no doubt that a general wish to supply information will lead to better results than if he were at present to attempt to specify any other document as being useful; he moreover not being sufficiently acquainted with the working of the Board's Office to reduce the assessment.
