

MADRAS RECORD OFFICE.

Government of Madras.

Public Works DEPARTMENT.

G.O. No.	1432	Press Mis.
Dated	28-7-	1857.

Not to be folded or roughly handled

Fort Saint George, Public Works Consultation of 28th July 1857.

No. 56. Read the following letter from Colonel C. E. FABER, Chief Engineer; to H. FORBES, Esq., Acting Secretary to Government, dated 16th July 1857, No. 2056.

SIR,

I have the honor to forward, for submission to Government, the accompanying copy of a letter No. 413, dated 18th June 1857, from the District Engineer of Madura, together with plans showing some repairs and improvements which the District Engineer proposes to make to the Kanavoyputty tank in the Thenkurray Talook of the Madura District; these plans are accompanied by an estimate of the cost of effecting the repairs and improvements amounting to Rupees (2,030) two thousand and sixty, it appears from a statement submitted by the Collector, the calculations of which have been corrected in this office, that the execution of these repairs and improvements will lead to an increase of Revenue of Rupees 237-12-3 or nearly 12 per cent on the estimate.

2. As the estimate has been prepared on sufficient but moderate data and it provides for a really useful improvement. I have the honor to recommend that it be entered in the Budget for 1858-59, its amount is Rupees (2,060) two thousand and sixty.

No. 57. ORDER THEREON, No. 1432; dated 25th July 1857.

The Government authorize the Chief Engineer to sanction such repairs to the Kanavoyputty tank in the Madura District as may be shewn to be absolutely necessary; but the proposed improvements to the tank must be deferred until the present restriction on expenditure upon Public Works shall have been removed.

(Signed) H. FORBES,
Acting Secretary to Government.

Colonel C. P. Taber
Chief Engineer, S. P. W.
Fort St George

Sir,
I have the honor herewith to forward an occasional Estimate with papers as per margin, for Rupees 2000, for the repair, or rather restoration, of the ruined tank of Annamangal in the Srirangapatna Taluk in this District.

2. As you will see the increase of Revenue expected from the restoration of the tank 208-2-2 per annum, or 10-1-8 per cent on the outlay, this is in accordance with the Statements of Augacut furnished me by the Collector, but I have no doubt that the results will be much more favourable, as according to

my

1. Sketch
1. Plan
1. Est^d Estimate
2. Rep^d Estimate

my own measurement and levels, it will be possible to bring 80 Cawnies of land, now either waste or under dry cultivation, into Kumbhaya. cultivation and this land being good, it might be assessed at Rupees 9 per Cawney. So as to give a return of 720 Rupees per annum.

3. The Muzis of Kumbhaya putty are very anxious that the tank should be repaired, as until it is so, a great portion of the water in the Kumbhaya putty annicut channel is lost to waste.

4. I therefore request you will be good enough to recommend the insertion of the enclosed estimate in the Budget of 1858/59.
