No. 24. Read the following Extract from the Proceedings of the Chief Engineer, dated 23rd May 1857, No. 587.

Read the following letter from Lieutenant J. BEAN, District Engineer Malabar; to Colonel C. E. FABER, Chief Engineer, dated Calicut, 31st March 1857, No. 961.

SIR,

I have the honor to forward plans and estimates for enlarging a tank and making a road for the use of the Ponies belonging to the Malabar Police Corps at Mulliapooram, amounting to Rupees 450, and Rupees 230 respectively.

These estimates have been recommended by the Acting Collector, and Major Haly the Commandant of the Force informs me, that there will be an insufficiency of water, unless the well is enlarged at their new Cantonment.

I have very great doubts of the probability of these estimates being carried out before the Monsoon and change of Executive in the District, especially as we have no good Superintendent of the many works already sanctioned at Mulliapooram. I have however forwarded them for your sanction and approval, as they have been recommended by the Acting Collector and Commanding Officer.

Resolved to forward copy of the letter No. 961, dated 31st March from the District Engineer, together with the estimates for Rupees (450) four hundred and fifty and (230) two hundred and thirty respectively to Government, with the recommendation of the Chief Engineer that in consideration of the advisability of affording the Malabar Police Corps a sufficient supply of good water, these two estimates be sanctioned on emergency, the object of the estimate for Rupees (450) four hundred and fifty appears to be to supply the men with water and that of the estimate for Rupees (230) two hundred and thirty, to enable the Ponies to be lead easily down to the river for water.
