Fort Saint George, Public Works Consultation of 26th May 1857.

No. 20. Extract from the Minutes of Consultation dated 22nd May 1857, No. 975.

The Government request that the Chief Engineer will be so good as to prepare and submit a Skeleton Map of each District, shewing the Trunk roads and their present condition according to the latest reports.

2. The Government wish to have before them readily accessible information as to the progress hitherto made towards the completion of these main lines of communication, and they hope that no difficulty will be found in representing the state of every part on a moderate scale.

3. Different colors will shew the parts metalled, those that are heavy sandy tracts, that are black cotton soil, or hard gravel, the principal rivers and streams will be shewn, and references made to shew which have been bridged.

4. The Government request that these Skeleton Maps may be lithographed, and that six copies may be sent to the Government office.

(Signed) H. FORBES,
Acting Secretary to Government.
