No. 50. Read the following Extract from the Proceedings of the Chief Engineer, dated 7th January 1858, No. 6467.

Read the following letter from Lieutenant J. O. MAYNE, Acting District Engineer, North Arcot; to Colonel C. E. FABER, Chief Engineer, dated Camp Arcot, 9th December 1857, No. 1815.

Sir,

I have the honor to bring to your notice, that on the late visit of the Commander-in-Chief to this District, I took the opportunity of speaking to his Excellency regarding the small Hospital at this station lately used by our Department as an Office, and from which we were lately turned out at a few days notice, for the accommodation of the Troops luckily, there was no machinery put up, and it was cleared out in a few days. I mentioned this to His Excellency and pointed out to him, in the event of its being handed over to us again, and our Machinery &c., was erected, and the building should again be required on emergency, the great inconvenience and expense we should be put to, and asked whether it could be handed over to us permanently. He informed me such could not be sanctioned, and that on emergencies, I should have to evacuate the building again. Under these circumstances, I have the honor to request, you will be so good as to recommend for the sanction of Government, the building of an Office and Engineer yard for this District as for estimate submitted by Captain Johnston, with his letter No. 665, dated 29th September 1855, and I would suggest if sanctioned, that it be built at Vellore, as being more Central, and more easily approachable from all parts of the District; made roads from that station running north, south, east, and west.

Resolved to forward copy of the foregoing despatch No. 1815. from the District Engineer of North Arcot, together with the estimate of a District Engineer's Office and Work Yard, received from Captain Johnston on the 29th September 1855, and to solicit with reference to the intimation of His Excellency, the Commander-in-Chief, that the Hospital at Arcot, hitherto used as an Engineer Office must be held at the disposal of the Military Authorities, that the estimate now forwarded amounting to Rupees (3,520) three thousand, five hundred and twenty, be entered in list No. 2 of the Budget for 1858-59 now in the Government Office, as much inconvenience and loss and injury to Government are likely to arise, from want of professional premises for the plant and apparatus of the District Engineer in North Arcot.

1 Estimate.

(Signed) C. E. FABER, Colonel,
Chief Engineer.

No. 51. ORDER THEREON, No. 126; dated 25th January 1858.
The Budget for 1858-59 having been closed, the request of the Chief Engineer, contained in the above Proceedings, cannot be complied with.

(Signed) H. FORBES,
Acting Secretary to Government.
