Fort Saint George, Public Works Consultation of 29th October 1858.

No. 187. Read the following letter from Lieutenant-Colonel E. LAWFORD, Officiating Chief Engineer; to the Secretary to Government, dated 12th October 1858, No. 4445.

SIR,

In forwarding for the information of Government copy of a Telegram from the District Engineer of Nellore reporting the occurrence of a severe fresh in the Pennair by which the Annicut has been breached, I have the honor to state that further particulars will be communicated as soon as received; but it may be expedient to mention at once that the Annicut was in an unfinished state.

Telegram from the District Engineer, Nellore; to Lieutenant-Colonel E. LAWFORD, Officiating Chief Engineer, dated 12th October 1858.

Pennair rose to two and half feet above the Crown of the Annicut up to seven P. M., yesterday, this morning at 5 A. M., there was a depth of ten feet on the Crown, and at half past seven nearly twelve feet. The Annicut has breached about the Centre, and it is feared that the Centre Sluices have been carried away. The flood is one foot higher than that of last year and is still rising slightly, though the breach tends to keep it down. Country under the Survapully channel is flooded.

No. 188. ORDER THEREON, No. 2290; dated 29th October 1858.

Ordered that the foregoing letter be recorded.

(Signed) W. H. BAYLEY,

Acting Secretary to Government.

From the District
 Insp. Mullone -

The Offs Chief Engineer
 Madras

Remains now to two and half feet
 above the Crown of the Ament. at 7
 Seven p.m. yesterday. this morning
 at five A.M. there was a depth
 of two feet on the Crown, and at half
 past seven nearly twelve feet - The
 Ament has breached about the Centre,
 and it is feared that the Centre dikes
 have been carried away - The flood is
 one foot higher than that of last year
