to Rs 8170

JUDICIAL DEPARTMENT.

PROCEEDINGS of the MADRAS GOVERNMENT.

Read the following Proceedings of Government in the Public Works Department.

Referring for consideration a letter from the Chief Engineer with correspondence, forwarding an estimate, amounting in the aggregate to Rupees 17,602 for the repair of the new Jail at Honore in Canara, and for making certain additions to it. (Here enter 3rd May 1859, No. 1023.)

ORDER THEREON, 26th May 1859, No. 729.

Reconstruction of boundary wall of stone in mortar...	5,700
Additional buildings.	
Tailor's House	950
Dresser's do	700
Two Cooking sheds	1,824
Two Sentry boxes	84
Dead House	224
	3,732
Rs...	9,432

In the correspondence referred in the above Resolution of Government for consideration in this Department, an estimate amounting to Rupees 17,602 for fully repairing and completing the new Jail at Honore, is proposed in substitution of that for Rupees 9,432, sanctioned Extract Minutes Consultation, 2nd March 1858, No. 276.

2. The work therein authorized was kept in abeyance on the reports of Lieutenant Goddard, the District Engineer, who recommended a careful inspection of the building, after the monsoon, in view to a radical correction of its many faults at a larger expense. A survey of the Jail was accordingly made later in the year by Lieutenant Hunter, the Acting District Engineer, and an estimate prepared for the complete repair of the Jail, which including the sum already sanctioned, amounted to Rupees 18,402. The largeness of this estimate led to a discussion, whether it would not be preferable to abandon the lately erected structure and to build an entirely new Jail in a better site on an improved plan.

3. The Inspector General of Jails, coincided in the views of the Officiating Chief Engineer on the inexpediency of attempting to improve the Honore Jail, and referred to the observations on the state of this Jail which he had recorded in his annual report to Government to the effect that it would be "no exaggeration to say that before the Jail is completed, much of it will in all probability be in a state of decay."

4. The question as to the advisability of repairing the Jail, was settled by Captain Orr, the Superintending Engineer of the Circle, who personally inspected the building in the course of his tour. He reported that, ill situated and ill built as it undoubtedly was, the greater part of it was extremely substantial, and that if placed in good order, according to Lieutenant Hunter's estimate, it would be found to require as little repair hereafter as most buildings in so trying a climate as that of Canara.

5. The matter was then again referred to Mr. Rohde who now states that he is well disposed to adopt Captain Orr's proposition, and that a late conversation with that Officer had convinced him that to build a new Jail on a better principle would at Honore be attended with very much heavier expense than he would be justified in recommending.

6. Under these circumstances, the Government approve the repairs to the Jail being made to the extent provided for in the estimate Rupees 17,602, the work being entered in the next Budget.
