1 Abstract Estimate.

11th August 1859, No. 683.

In accordance with these instructions, the Civil Architect forwarded to this Office an Estimate amounting to Rupees 580, for making the requisite alterations and constructing an Octagon Chimney and Kitchen range, but as at this time the

arrangements for making extensive improvements to the General Hospital were under consideration, the Town Major was requested to state whether it was desirable under such circumstances to effect any immediate alterations to the Cook rooms connected with it.

Subsequently on the 10th ultimo, the Civil Architect reported to this Office, that the Copper boiler and iron plates for the above work had been made up in the school of Industrial Arts, under instructions from his Predecessor Captain Wilmson, who advanced money for them, and requested to know whether these articles could be received by him in anticipation of the

Estimate being sanctioned. A copy of this letter was forwarded to the Town Major with a recommendation that, as it was understood that the Cook rooms are not to be removed immediately, the Estimate for setting up the experimental Cooking ranges might be sanctioned.

3. In his reply to the above, the Town Major recommends that the Estimate be sanctioned and the work completed without delay, as the present Kitchen at the General Hospital is considered to be utterly insufficient.

4. Under these circumstances, I have the honor to submit for the early sanction of Government the Estimate amounting to Rupees (580) five hundred and eighty which has been examined and corrected in this Office, and to request orders for its immediate execution from the general Funds at the disposal of the Civil Architect, who states that the work can be completed within two months.

ORDER, No. 3982, 11th November 1859.

Approved for immediate execution.
